The S. L. Lamberd Co. has rearranged its store to better advantage, bringing its seed department all on one side. Entering its large establishment a line of farming implements is to be seen set up ready for inspection. This display has been lacking with our implement houses here; seldom could an article be seen satisfactorily, and Mr. Lamberd realizing the defect at once set to work and had samples rigged up. He has also issued an up-to-date catalog containing a fine line of choice garden seeds and the farming implements. He is going after the high-class trade, and will carry the latest in supplies.

The Market

The market has been keeping up fairly well, considering the extreme cold weather we have been experiencing up to last Saturday. On Sunday the thermometer climbed up to 68°, making a bright, clear Spring day. The trade had many visitors inspecting the Easter stock, which is making good headway and some little business was done.

Last week the market florists were up against it, unable to stand on the streets until last Saturday, and a great amount of cut blooms was on hand, the stalls loaded to their full capacity and flowers selling at an extremely low price. The street fakers had quantities of Roses and Violets, and thousands of Carnations. The Florists' Exchange is overloaded with Carnations, but the management moves them to the best advantage and the growers seldom complain. Roses are steady, Violets are plentiful, retailing at 50c. per 100 for singles. Bulbous stock is getting heavier. Greens of all kinds are plentiful enough to meet the demand.

Club Meeting

The regular meeting of the Gardeners and Florists' Club was held in the Club rooms last Monday night with a small attendance, the weather being anything but agreeable. However, an interesting meeting resulted, with a deal of humor among the members. Some interesting subjects were held over until the last meeting in March. Much regret was expressed at the meeting that no Dorothy Gordon Carnations were sent to the Club's Carnation exhibition last month, as great interest is taken in this particular variety.

George Morrison, Carroll, Md., had on exhibition some very fine specimens of Cinerarias in 10-in. pots, 2 1/2 ft. tall. The plants were well flowered and attracted considerable attention. The question box was dispensed with.

Ladies' Bowling

The bowling scores made last Wednesday evening by the ladies' bowling team, at the Garage alleys, were as follows:

		Totals
Mrs. James Boone.....	105 96 93 294	
Mrs. H. Klein	84 92 68 244	
Mrs. C. Seybold	123 105 79 307	
Mrs. F. C. Bauer	120 145 152 417	
Miss Cloman	68 97 92 257	

C. N. J. Hannigan, florist for James A. Garey, Catonsville, Md., has fourteen boxes of some very fine Ulrich Brunner Roses growing in his graperies. The boxes are 4 ft. by 6 in. and contain six bushes to the box. The foliage is perfect, and the plants average three to seven buds. They were planted last June and he is now cutting some perfect blooms. He also has a choice collection of Roses, Carnations, single Violets and a large variety of plants. It is a pleasure to see the condition of his range of houses.

J. L. T.

SHASTA

WE are now shipping fine, strong cuttings of **Shasta**, as fast as they are ready to come out of the cutting bench. Orders on our books will take all that will be ready up to February 15th. If you want late February delivery you should send in your order at once before the other fellow gets them.

Come and see it growing if you can. Once you see it you will want to grow it. \$12.00 per 100, \$100.00 per 1000.

"Canary Bird" THE BEST YELLOW CARNATION EVER INTRODUCED

EARLY—FREE—LARGE

Rooted Cuttings Ready Now, per 100 \$12.00, per 1000 \$100.00

Henry Schrade Scranton Florist Supply Co. Scranton, Pa.

Westerly, R. I., Feb. 12, 1910

HENRY SCHRADE, Saratoga Springs, N. Y.

Dear Sir:—We received the cuttings of "Canary Bird" this day in good condition, and are also well pleased with the appearance of the blooms you sent us of this variety. In fact, we would like to increase our order, as this carnation looks very good and we would like to grow a fair batch for trial next season. The blooms which you sent us are at this writing in good condition, they having expanded considerably and it shows to be a good keeper. Can you ship us at an early date an additional quantity of cuttings?

An early reply would be appreciated.

Yours very truly,
 L. J. REUTER,
 For S. J. Reuter & Son, Inc

CARNATION GREEN

WE have a very powerful coloring which will dye many white flowers a beautiful emerald green in a few hours by absorption, or instantly by immersion. This dye is combined with a very powerful and harmless chemical agent which helps to preserve and color the flowers. We have the coloring in Red, Blue, Yellow and Green. Directions with each package, which will make 3 to 4 quarts of coloring. Don't be fooled with cheaper dyes, but get the real article.

PRICES: 1 package 75c.; 6 packages \$4.00; 12 packages \$7.50

Sent postpaid on receipt of price. Address

THE PHILADELPHIA CHEMICAL CO., Philadelphia, Pa.

Carnation Sangamo

SANGAMO

BRILLIANT PINK

Experienced Carnation growers, who have visited our place and have carefully watched Sangamo this season, claim it will produce at least twice as many blooms as any other variety grown to-day. It is not only the most prolific Carnation, but the calyx does not burst, and the stem is always long and stiff, therefore Sangamo increases your profits more than two-fold. We not only invite growers to visit our place to see for their own satisfaction, but we will pay your railroad fare from Chicago to our place and back again, if you will only come. It is not too late for Sangamo. Our best plants were propagated in March and April last year.

Strong, healthy, well-rooted cuttings ready.

\$12.00 per 100, \$100.00 per 1000

ALBERT M. HERR, Lancaster, Pa.

Please mention the Exchange when writing.

Bridgeport, Conn.

Henry, son of Julius Reck, has taken a position with Wm. Henry Maule of Philadelphia, seedsman; his intention is to work his way up and also to become acquainted with the trade there. There are four more young florists coming along from the Brooklawn conservatories of Mr. Reck.

Providence, R. I.

Providence has a population of over 200,000, and is the capital of Rhode Island. Business has been fair since the Xmas holidays and up to the beginning of Lent, at which time trade fell off slightly, but has picked up considerably since. There are about 60 florists within a few miles of Providence, and nearly all stock handled is grown here.

Matthew Macnair, 322 Weybosset st., has an attractively decorated store, well supplied with mirrors and convenient shelves for display. An octagon ice box with all glass sides, located in the center of the store, is one of the novelties in use. Another useful labor-saving device is the Telautograph outfit used for sending orders to their make-up room in another part of the building. This device has been here for the past 5 years and has proven its value more than once since installed.

Edmund G. Brooke, in charge of the store of T. J. Johnston & Co., 171 Weybosset st., reports good trade, especially in funeral work. Jos. Reynolds of this store has been in the hospital since about Thanksgiving time with a badly fractured left wrist, upon which complications set in, and up to the present time he has been under doctors' care at the hospital. The window display here is one which attracts considerable attention.

E. B. King of Attleboro reports good business prospects and has enjoyed nice business during the Winter. Mr. King has 15,000 sq. ft. of glass devoted to Carnations, bulbous and bedding stock. Cigars were passed around Saturday, Feb. 26, by Arthur Battey, foreman for Mr. King, who had decided that two can live as one.

Johnston Bros, 38 Dorrance st., have an excellent location near the City Hall and close to the railroad station. Business here has been excellent. Mr. Villar, formerly with Math. Aitken in the Worcester store, has returned to Providence and is connected with this store.

J. P. Wood, 167 Westminster st., has samples of design work made up in artificial flowers and hung about the store, so that he can point out to prospective buyers of designs how their pieces will look. Mr. Wood has been in his present location about 18 months and reports good trade.

Miss M. P. Pollock has one greenhouse and store at No. 8 Franklin st. The glass is now being used as a conservatory. Trade here is very good considering the Lenten season. Miss Pollock has been, for eight years in her present location, coming from another part of town where she was for several years.

T. O'Connor of Blackstone blvd. has a most attractive window and store at 272 Westminster st. The display this week is made up of gold baskets, red flowers and greens, making a splendid contrast rich in color.

C. H. Hunt, 127 Burnside st., has some 6000 feet of glass devoted to Carnations, bedding and bulbous stock, and finds his houses inadequate to produce all he can sell. He is planning to erect more houses.

J. Kopelman & Co., 21 Washington st., has a general line of florists' supplies and cut flowers. Some extra fine Callas of unusual size were brought in by Wm. N. Crommon of E. Greenwich. Mr. Kopelman has some 16,000 feet of glass and is building more houses, which, when finished, will make a range of some 40,000 sq. ft. which will be devoted to mixed stock for cut flowers, etc. The glass is located in Oaklawn, Cranston, R. I.

Wm. B. Hazard, 178 Mathewson st., has some 20,000 ft. of glass at 524 Academy st., devoted to general lines. He reports the best crop of Freesias this year that he ever had in the 26 years he has been in the trade. He also forces large quantities of Tomatoes. Business is picking up very fast in his new location, he moving here from a location on Westminster st. about two months ago.

O. H. Williams & Sons Co. have about 50,000 feet of glass on Hartford ave. devoted to growing a general line for their retail store at 147 Mathewson st. This store is finished in birch bark, in rustic effect, and presents a very neat appearance. Trade here is very brisk especially so in funeral work.

THE FLORISTS' EXCHANGE

Announcement

To Our Friends and Patrons:

It has been brought to our attention that certain unscrupulous fellows, representing a certain concern, are spreading false and malicious reports to the effect that we are practically out of business, that we no longer travel, that we are on our "last legs," and that as a business concern, we are about to give up "our ghost."

We wish to announce most emphatically that all these rumors are absolutely false, that we are in the business to stay, that our progress, since the day we started up to the present time, has surpassed our own expectations, that the fellows using such contemptible means, in order "to catch" a few orders, are but short-sighted pygmies, unable to realize the ultimate harm they are causing to themselves and to their own interests.

Verily—"One cannot fool the people all the time."

Nor do we need to deny the malicious reports concerning our credit and business standing. Our creditors both here and abroad will bear us out when we say that our credit is second to none on this or on the European Continent.

We brand these rumors as deliberate and malicious falsehoods, calculated to undermine our business interests. Men employing such means are certainly unworthy of the name "MAN."

Respectfully yours,

SKIDELSKY & IRWIN CO.

 Please mention the Exchange when writing.

NEW YORK, March 2.—Conditions are worse than a week ago, and the market is experiencing one of the hardest slumps in years. American Beauty Roses move moderately well, but the demand is so small that, to use the expression of one wholesaler, "there is nothing doing." All other Roses are very plentiful and thousands of them are left over from day to day. Prices are out of the question, and the sales merely rest on the buyer's willingness to carry away the stock.

Carnations seem to suffer the worst, as it is simply impossible to clean out at any figure; 50c. per 100 is a common price, while shipments of day old stock are cleaned out for less.

Orchids "hang fire," no demand for anything in this line being noticeable; and while a few extra quality Cattleyas are sold for 50c. each the majority of sales are made at figures between 25c. and 35c. each.

Lilies, Callas, and Lily of the Valley also feel the slump, and but for sales made to speculators much material would ere now have found its way to the barrel. Tulips and Daffodils of every variety continue to pour in, in unlimited quantities, and sales on them are made at \$1 to \$1.50 per 100 in small lots. Violets are handled mostly by the street men, who are not backward in offering 15c. per 100, at which price the bulk of stock is moved. This applies to day old flowers; fresh shipments realize 25c. to 40c. per 100. Asparagus plumosus moves moderately well.

PHILADELPHIA, March 1.—Conditions have not changed since last week, and it is a matter of much concern with all connected with the business as to the outcome. Flowers of every variety are very plentiful, and prices are hard to maintain. American Beauty Roses are somewhat scarce, but the demand is below normal. All other Roses are hard to move; shorter grades sell more readily but stock has accumulated to such an extent that clearances are impossible.

Carnations are a veritable glut, and for the very best \$2 is considered top price. Many thousands are being disposed of at 50c. to 75c. per 100, to the fakirs, who retail them at 15c. per doz.

Every other cut flower is under the same ban, especially bulbous stock, which is in the market in such quantity that much of it is being sold. Daffodils are arriving daily from the South, the supply alone creating a glut, as it is impossible to clean out on home grown stock. Lily of the Valley, Violets, and Sweet Peas, meet the same fate, and have succumbed to the general local conditions. The continued weather, trolley men's strike, and Lenten season are some of the factors, for which no remedy is apparent.

BOSTON, March 1.—In the early part of the week the market was very quiet. Saturday saw most flowers pretty well cleaned up, considering that this is Lenten season. Prices have not fallen very well, but on the whole the market is not satisfactory and prices now show a downward trend. Trade in Roses is good. Richmond, Killarneys, and My Maryland bring good prices. There is a limited sale for Bride and Bridesmaid. Good American Beauty brings from \$3 to \$6 per doz.

Carnation prices are weakening and flowers are quite plentiful. Prices range from \$2 to \$4 per 100.

Violets are very plentiful; prices are from \$2 to \$4 per 1000. Sweet Peas are abundant, stock with long stems bringing fairly good prices. Bulbous material is in over supply and can only be disposed of in large quantities. Lilies are plentiful and prices are from \$8 to \$12 per 100. Callas very slow. Bunches of English Primroses sell well. Wallflowers are more plentiful but have a good sale. Snapdragons are selling well; in fact odd things bring good prices—people are fond of novelties. Acacia pubescens also moves well. Lily of the Valley is in good

demand and prices are from \$2 to \$4 per 100. Gardenias are selling slowly. Cattleyas are in good demand, and bring from \$4 to \$6 per dozen. There is much demand for Dendrobiums. Adiantum is in good demand and prices hold well. Asparagus Sprengeri and plumosus are still scarce. Pansies are plentiful, as also are Calendulas. There is some good Mignonette and prices are fairly good. Forget-me-nots in the higher grades sell well. R. C.

CHICAGO, March 1.—At this writing the market is very quiet, and prices have taken a tumble in nearly all lines, as there is a much increased supply in everything, with an overproduction of bulbous stock. If the present weather continues the situation will be relieved, as the street vendors and peddlers, who have had to keep under cover the past few months will again begin to consume a large portion of the surplus stock. American Beauty Roses are fine and the price is somewhat reduced, as fine flowers with long stems are bringing only \$3 per dozen. Other Roses are moving off slowly at less prices than during the past week. Carnations, with the exception of red and white sorts, are lagging; the other colored varieties are obtainable, fine stock, at \$1.50 and \$2 per 100, with red and white commanding \$2 to \$3.

Lilies and Callas hold their own, and for Lent are holding a fair price. Callas, extra, bring \$10 to \$12 per 100, at \$12 they must be extra heavy. Harrisii Lilies stand at \$12. Sweet Peas have at last become a drug on the market, and to command \$1 per 100 have to be especially good. Violets go at almost any price; even at this it is hard to dispose of them. Fine quality in singles bringing 40c. per 100, and double 40c. to 60c.

Orchids, while more in such demand as in the past, move off nicely, as there is not nearly so much stock. Prices are not so high as could be wished, the best Cattleyas selling at 50c. each. There are plenty of Gardenias and fancy flowers to satisfy all demands. Pansies are coming in in extra size, and colors; the demand for them though is very slight. Mignonette, Candytuft, Freesias, Jonquils, Snapdragons, Daisies and other miscellaneous stock are to be had in quantities, but move very slowly. Green stock is in good shape and in fair demand, at usual prices. These goods vary but little at any season. Ferns seem to be somewhat improved in quality.

INDIANAPOLIS, Feb. 28.—Steady winter temperatures have brought with them a correspondingly brisk demand for flowers to grace the homes of the many unable to be about. Counter trade led throughout the past week, but fur work was maintained in liberal quantities and a vast amount of stock was taken from the market. Plant decorations are still numerous but with the general complaint heard in regard to the price of foliage plants this line of the trade is not remunerative. Fine selection and quality of cut flowers make the salesman's duties far more pleasant at present, for only an exceptional purchaser can fail to be pleased with the beautiful stocks which practically sell themselves.

Bulbous flowers are as profuse as ever, and the prices vary but little from other years. Jonquils, Tulips, Lily of the Valley, Paperwhite Narcissus and Roman Hyacinths sell at \$3.50 to \$4 per 100. Mignonette, long spikes, is offered at the same figure. Forget-me-not is especially good at \$2 per 100.

The home supply of Roses is sufficient in quality, but lacks some in variety. Select Killarneys, Richmond, and My Maryland wholesale at \$7 to \$8 per 100. The best Bridesmaid and Bride bring about the same figure, except in the shorter grades which are more reasonable. American Beauty is in good condition at \$5 to \$5.50 per 100.

Carnations are being marketed in heavy quantities, and prices from a distance indicate a break. The local supply

is not great enough to cause much of a decrease at this period. \$3 to \$4 per 100 is still being received for the choice ones. 75c. per dozen is the usual store price in this locality.

Harrisii Lilies and Callas have been in demand all the time, and are as good as the money at \$10 to \$12.50 per 100. Single Violets grow in favor as Spring approaches at 50c. per 100. Eastern doubles are received, often in indifferent shape at 50c. to 75c. per 100.

The array of blooming plants promotes sales. This is perhaps not as profitable as the cut flower end of the business, but the potted plants certainly serve as a stimulus for the other lines. The green goods supply has been heavily drawn on for some time and at the present writing it is difficult to obtain either good Asparagus or Adiantum. Smilax is fairly good at \$12.50 per 100. Cold storage Ferns are generally deprived of five per cent. in number before they are fit for the counter. I. B.

ST. LOUIS, Feb. 28.—Trade last week was reported very good. It is said throughout the city that Lent has made little difference so far; the commission men, too, say business is most satisfactory, only that stock in some things has been too plentiful, in fact, a glut, and that was the reason so much stock was left over and prices so very low all of last week.

Roses have not been any too plentiful but more are coming in of late; the best sell for \$8 per 100 and down as low as \$2 for shorts. Ammann's stock is among the best; his Killarney, both white and pink, and Ivory are very fine and it looks as though he will be in full crop for Easter. Long, fancy American Beauty Roses are not too many at \$5 per doz.; plenty of shorts can be had at \$4 to \$8 per 100.

Violets are very cheap. Best Californias sold at 20c. per 100 and \$1.50 in 1000 lots; these have been a glut since Valentine's Day and every grower in Kirkwood is sending in a full cut each morning. Of Carnations, too, there are more in the market than any of the commission men can dispose of; prices range from \$1 to \$2 per 100 for the best. The quality is of the best and some extra fine Enchantress, Nelson Fisher, White Perfection and Rose Pink Enchantress are seen daily, also some fine Beacons.

Callas, Harrisii Lilies, Freesias, Lily of the Valley and Jonquils are in plenty. Lilies sell at from \$10 to \$12.50 per 100.

Sweet Peas, too, are a glut and sell for 10c. to 50c. per 100; white and lavender sell best of all. The market is well supplied with greens of all kinds.

ST. PATRICK.

Hartford, Conn.

Business continues good, the Lenten season having but little effect in decreasing the demand for flowers. A large amount of funeral work has been done the past week.

There is a good supply of all kinds of flowers; perhaps the most called for now are the Spring flowers, such as single and double Daffodils, Tulips, Freesias, Jonquils, Sweet Peas, etc. The single Daffodils are much more in demand than the double. Violets are selling unusually well and are fine in quality. Azalea plants at \$2 and \$3 each are also selling well.

John Coombs has been confined to the house, most of the time in bed with rheumatism, for the past three weeks, but is now on the way to recovery.

A long distance telephone has been installed at Leonard Cousins' Jr.'s establishment, Concord Junction, Mass., the number being 82 Concord.

Orders for Shamrocks are coming in nicely, the demand for this popular little plants showing an increase each year. Many thousands are grown here and are in fine shape for St. Patrick's Day.

J. F. COOMBS.

Boston

George A. Perkins, representing Brown Brothers Co., Rochester, N. Y., visited us a few days ago. He is soliciting orders for their blue Rambler Rose (?) and other nursery stock.

Last week William H. Elliott addressed the young men in the floricultural and horticultural classes at Amherst Agricultural College. His subject was "Rose Growing as a Business." He speaks very highly of the interest the young men are taking in the lectures which are given by practical plant and flower growers. These lectures are supplemented by visits to the largest and best conducted establishments in New England. There is no reason why these young men from the agricultural colleges should not be good, practical men as well as theoretical.

While in the western part of this State Mr. Elliott visited H. W. Field's greenhouses at Northampton, and he has no hesitation in saying that Mr. Field has the best houses of Carnations and Violets that he has ever seen anywhere, and his Roses are also well done, although not quite as good as the Carnations and Violets. This is quite a compliment to Mr. Field as there are few large places in this country that Mr. Elliott has not seen. He also visited the Montgomery Co.'s greenhouses at Hadley, Mass. The work on the new houses is getting along quite fast, considering the unfavorable weather the builders have had to contend with. One house is almost ready for glazing.

Quite a number of Mr. Elliott's employees at Madbury, N. H. have been on the sick list this winter. Mr. Armstrong, his foreman, has been sick for some time. Mr. Elliott is sorry he could not attend the banquet given John W. Duncan at the Parker House. He had to attend the funeral of Mr. Foss, the caretaker of his place at Madbury, N. H. Besides growing Roses at Madbury Mr. Elliott has quite a large dairy farm as a side issue. He has 55 head of stock in which he takes a great deal of pride, and his ambition now is to have one of the most up-to-date dairy farms in New England.

John Van Leween, foreman at the R. & L. Farquhar & Co.'s nurseries at Roslindale and Dedham has just returned from an extensive business and pleasure trip in Europe. He visited Oudenbosch Nurseries in Holland, which are famed for their fine collections of young trees and shrubbery. He was also at Boskoop, Belgium was also visited. While in England he visited Veitch's nurseries at Combwood and saw many of the Chinese plants which were collected by Mr. E. H. Wilson. He also visited Fromow & Sons' Nurseries and Waterer's at Woking, which is so famous for its Rhododendrons. He went as far north as Aberdeen, Scotland, and visited James Croker & Son, who are noted for their collection of Roses.

Robert Montgomery of Natick is shipping to the Co-operative Flower Market No. 2, on Park st., some excellent Richmond, Killarney and My Maryland Roses.

Lewis E. Small of Tewksbury is the largest grower in this vicinity of Dimorpha aurantiaca. It is quite common in the retail florists' windows and a large vase of it at the Mass. Hort. Society exhibition was quite an attraction. The color is dark orange yellow and is the best in this class of flowers. We were pleased to notice that the flowers kept open until about 8 p.m. outdoors they close up before that time.

The Co-operative Flower Market No. 2 has disposed of the lease of Music Hall Market on very satisfactory terms.

The yellow Marguerites which are of such fine quality and which are conspicuous in the retail florists' windows are grown by Edward J. Ahern of Wellesley. Bert Peirce is enjoying himself immensely at Savannah, Ga., where he is staying at the Hotel De Soto.

Doyle has some splendidly grown plants of Adiantum Farleyense in his Boylston st. store window. They are grown at his greenhouses at Cambridge. They sell well and bring handsome prices. Attention is being given to some fine specimens of Kentia Belmoreana and Forsteriana which they expect to exhibit at the National Show in 1910.

John Russell of W. W. Rawson & Co., who was in the hospital, is at home now recuperating, and is getting along nicely.

Rawson's revised edition of "Success in Market Gardening" which is being published by Doubleday, Page & Co., will be out on April 15.

steamship line between Rotterdam and Boston gives the seedmen and plant importers an equal chance with the New York importing houses for quick service. At present there is only one steamer in every two weeks, but just as soon as the business increases there will be a weekly service.

Mr. Irish, representing the Braslan Seed Co., San Jose, Cal., has been in town for three days, visiting the seed houses.

Edward MacMulkin visited New York and New Jersey growers last week and is very eulogistic of what he saw there. He speaks very highly of the Julius Roehrs Co.'s establishment. He had the

WELCH BROS.

226 Devonshire Street.

Detroit

Last week's record was the first sad feature of the season and the inexorable law of supply and demand asserted itself in a general and most decisive tumble of wholesale prices.

A few warm sunny days brought forth an over-abundance of Carnations and the bad weather following cut counter sales to a minimum. Even Mr. Sullivan's special offerings in Carnations did not stimulate the exchange of coin for flowers and the result was a surplus of some 20,000 Carnations in the hands of wholesalers on Saturday night. Roses seem to have become jealous of Carnations, and after being off crop for several weeks past they are now coming in large quantities and elegant quality, from all sides. With these two staples in over supply counter sales also greatly diminished and while a great quantity of funeral work was called for it was distributed mostly among retailers who are also growers. Such a strong combination could not be overcome by a large shipping trade, such as local wholesalers enjoy. The consequence is a demoralized market from which we all hope to be delivered before long, else some retailers might indulge in price cutting, which would be most deplorable now with Easter just a few weeks away.

The adjourned meeting of the Florists' Club showed the result of an active financial campaign. The needed guaranteed fund is all subscribed, the Wayne Pavilion is rented and general interest in the Fall show is plainly noticeable.

Roht. Kift said at the Florists' Club meeting he found that a cold air shaft from outside connected to his ice box was a great factor in the keeping of Carnations. A simple device, nothing less than

Please mention the Exchange when writing.

Retailers were especially interested in the self-watering flower box, exhibited at the recent Club meeting, which is handled by the Conard & Jones Co. of West Grove, Pa.; and from testimonials received the box evidently embodies all the claims made for it. It's a good thing.

SPECIAL OFFER

We will give one copy Plant Culture and The Florist's Exchange two years, all for \$3.00.

Plant Culture

NEW, THOROUGHLY REVISED EDITION. JUST PUBLISHED

By Geo. W. Oliver, Propagator to the Bureau of Plant Industry, U. S. Department of Agriculture

Printed on enamelled paper and illustrated with one hundred plates and engravings. Strongly bound, 12 mo., cloth. By mail postpaid, \$1.50

A WORKING handbook of every day practice for the Florist and Gardener, and those who intend to grow plants and flowers, in the greenhouse or garden; as a means of obtaining a livelihood. Each and every article is written in concise, simple language, and embodies wholly and solely the experience of the writer.

The plants dealt with comprise those which are commercially handled by Florists, Gardeners and Nurserymen, and include Florists' Flowers, Stove and Greenhouse Plants, Hardy Herbaceous Plants, Annuals, Shrubs, Hardy and Tender Vines and a chapter of General Directions, covering Propagation, Seeds, Grafting, Hybridization, etc.

This reliable cultural work has been gotten up for use, not ornament; therefore the price has been fixed at a figure within the reach of all. It contains more real practical information for those for whom it is intended than is found in much more pretentious works.

Send for sample pages, free.

Newport, R. I.The flower trade is slack with plenty
of good material available; and the great-
est demand has been brought about by
funeral work.For Easter preparations are being
made. At both Gibson Bros. and C. O.
Schultz's the Lilies look well, and from
present appearances will be in on time—
a healthy lot with no signs of disease
whatever.Many of the private gardeners are busy
as usual at this time of year transplant-
ing large trees, picking up fine specimens
wherever they can be had, especially in
the compact part of the city. Among
those who are going into this business
heavily are the gardeners for Hugh D.
Anchincross, Charles F. Hoffman and C.
Cass Ledyard, but for the present this
work has been interfered with by the
thaw that has set in.At the Mrs. William Grosvenor place
a new greenhouse is to be built for Car-
nations, but the contract has not yet been
given out. At the Belmont place several
of the old greenhouses are to be taken
down.During the cold spell James McLeish
had one of his old boilers give out; it
was used for heating one of his Peach
houses, which was just in bloom, but by
the use of stoves quickly placed he man-
aged to prevent damage.Gibson Bros. also had a similar expe-
rience, but they were more fortunate in
that the weather then was mild and con-
tinued so until repairs were made.Thomas J. Wade, representing Bonnie
Brae Nurseries, was here last week and
booked many orders for their famous
fertilizer, as well as other goods.

ALEX. MACLELLAN.

Plant Names, Pronunciation ofThis handy little book furnishes a key
of the pronunciation of some 4,350 names
of cultivated plants, genera and species,
and will be found valuable as furnishing a
standard to which to refer by all who de-
sire to be correct when they speak of plants.

**The Mastin Automatic White-Wash and Spraying Machine
is Reliable, Practical and Durable**The tank is made of galvanized sheet steel, and in brass.
The pump is of brass throughout, simple and powerful.
The mixing device keeps the contents of the tank well stirred
up from start to finish.When the machine is filled to within six inches of the top, a few
strokes of the pump will compress enough air in the tank to produce
a continuous mist-like spray for fifteen minutes.

All parts are made to gauge, and may be had for repairs.

Ask your dealer about our Extension Hose, Extension Rods,
and the Mastin White-wash Nozzle for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

are for THE TRADE ONLY

March 5, 1910

Los Angeles, Cal.

Announcement is made by the Pasadena Gardeners' Association of its fifth annual Spring flower show to be held March 31, April 1 and 2, at the corner of West Colorado st. and Pasadena ave., in a tent. There is no hall in the city large enough to accommodate the Spring shows of the Association. Efforts will be made during this year to secure a lot and put a building on it of sufficient size to meet the requirements of this body of men in their zeal to educate the public in horticulture.

Ed. Howard is home on a little visit from the jungles of Mexico and Central America, where he spends most of his time making collections of plants for a Los Angeles amateur grower of plants with abundant means to carry on this line of work. The effect of a tropical climate has not been so detrimental to his health the past year as the one preceding.

Dr. Schiffman of Pasadena sailed Feb. 15 from San Francisco for the Philippine Islands, where he has large real estate holdings; and combining business and pleasure he promises us some new plants from that far away country for testing in southern California. The doctor is a man possessed of business acumen above the average, and with it an inherent love for flowers. He was one of the most successful Orchid breeders in the United States while living in St. Paul. Several years ago he was in the Philippines and made a collection of Orchids—Phalenopsis—and when he got them in to seaport looked about for some method by which he might pack them securely in an economical way for transportation. He chanced Camphor lumber. He was impressed with the idea that the shavings would be suitable packing material, and securing large baskets he placed his plants, layer about, with them, firmly and securely, which proved to be a great success, and he disposed of the lot with profit to himself and pleasure to his patrons, because of his less expensive method of packing, and the reduced price of the plants.

Howard & Smith have put up at their Montebello place a new building, 20x50 ft., two stories, designed for an office, packing shed and storeroom for bulbous stock on first floor, the second divided into comfortable rooms for the employees on the place, bathroom, kitchen and dining room. They have a new perennial member of the natural order Convolvulaceae, of the Spomea section; and in a slat house without any effort to protect it from the chilly atmosphere at night it has furnished enough bloom the entire Winter to demonstrate its adaptability to our climate. The foliage is after the manner of *Mina lobata*; the flowers are borne on stems which are eight to twelve inches long. The corolla is of funnel form, an inch wide, the tube a half-inch or more long. There are two varieties, one of light red color and yellow throat, the other of a dark red, both very attractive because of their size and color. Finding no mention of it in any available work on plants, I chose to name it *Ipomea Howardii* and shall so refer to it in the future; nevertheless, if this specific name should turn one previously applied to this beautiful subject I am ready to accept the correction. Readers of these notes living in countries with climates similar to our own southern California would do well to give this plant a trial for covering porches and pergolas. The strain of *Pansies* developed at this establishment is of marvelous size, and produces beautiful colors. Red *Watsonias* were in bloom in a slat-house February 10, and a branch of *Moschoma riparium* close by, which escaped the effects of frost, showed it to be a desirable shrub, especially for Winter blooming; but it is too tender for our Winters outdoors, and a plant that fails in that particular does not find favor on this Coast. The list of plants which may be cultivated outdoors successfully is so long and the varieties so great that few people will bother with subjects that require much attention.

D. F. Reichard, who was so severely burned during the holiday season, is able to be about again, even though his hands will not be of much service to him for a month or two.

Since New Year's Day we have not had enough rain to keep the dust washed from trees and plants, and the result is that vegetation does not have the fresh appearance it usually wears at this time of year. Grain sown during the last thirty days is beginning to suffer, and wild feed is becoming so short that stock have a difficult time picking a living.

One of the strange things about our "Wild feed" is that English Barley Grass, *Hordeum murinum*, is one of the many plants composing it, and what a pest this foreigner is. When Winters are wet it grows with a tropical luxuriance, and the barbs of the heads torture all kinds of stock by penetrating the mucous membrane of the mouth, and that too in a way that their accumulation is so great that they often have to be removed by a surgeon. When ripe they penetrate clothing, and are even more irritating than Spanish Needles.

Dietrich & Turner are cutting fine Roses and Carnations. They have a white Carnation superior in form and substance to any variety that has ever come under my observation. Their entire stock covers varieties of Turner's own origination.

At the semi-monthly meeting of the Pasadena Gardeners' Association last night, *Iris reticulata* was shown by one of the members. Why has this exquisitely beautiful variety not come into general cultivation? It was not large, to be

sure, but so rich in color that what it lacked in size of flower was made up in quality of color—a rich dark purple.

P. D. BARNHART.

Howard & Smith have added the three back yards next to their sales yard on Olive st., in Los Angeles, to their grounds. Now almost all backyards in Los Angeles are 50x50, or 50x100 feet; in this case it is the first named size. They have in cultivation *Bellis perennis* of the large flowered type, such as are found in flower markets of Eastern cities. These are the first that I have met with on this Coast. The plant becomes a pest in lawns here if given half a chance, but the flowers are either single or only semi-double, and such has been the stock florists have been content to furnish their patrons because they were more easily grown from seed than from divisions of the plants, which is the only method by which good strains may be perpetuated. For the first time, too, since I have lived on this Coast have I seen pot-grown *Heliotrope* plants put upon the market,

THE FLORISTS' EXCHANGE

RIGHT DESIGNING

Many a well constructed house has been spoiled by poor design: it's the combination of a well thought out design and an enduring, light Iron Rafter Construction that makes the perfect house.

Such a one is this of Cyrus H. Curtis, Wyncote, Pa., owner of the Ladies' Home Journal and Saturday Evening Post.

did forcing variety. Originator, A. Van
den Berg, Heemstede.

Darwin Tulip William Copeland. An
early flowering, good forcing variety.
Originators, Roos & Goemaus, Vogelen-
sang.

HEATING QUERIES

Conducted by U. G. Scollay

Inquirers Read This

Subscribers asking questions for Heat-
ing Problems must be particular to give
the following: Length, width, height at
ridge, height at eaves, glass on sides,
glass on ends, position of house as re-
gards points of compass, grade of house,
location of boiler pit, size of boiler pit,
depth of boiler pit, size and location
of chimney, temperature desired in each
house, whether steam or hot water is
used for heating, number of pipes and
size in each house, dimension and posi-
tion of benches, location of doors. The
above information I must have before I
can answer any definite questions re-
garding any heating plants already in-
stalled.

If the inquiry is for proposed new
house or houses, send full measurements
of the houses as described above, in-
cluding glass, proposed location of boiler
pit, proposed location of chimney, posi-
tion of house as regards points of
compass, number and position of
benches, temperature required, of pur-
poses for which the houses are intend-
ed; whether steam or hot water heat
desired.

Subscribers who may contemplate
asking for information regarding heat-
ing apparatus are particularly requested
to cut this out, so that when they write,
the question will be answered fully,
and will save time and help the writer
materially to arrive at the proper con-
clusions.

U. G. Scollay.

—Will you kindly give us the amount
of 2 in. pipe necessary to heat one
house 32x100 and one 40x100. Also,
would an A. B. Farquhar Co.'s 30 h.p.
horizontal boiler be sufficient to heat
about 2200 sq. ft. of glass at a tem-
perature of 50 degrees in zero weather.
Also, what size flow pipe would be
proper to carry the two houses men-
tioned and two more of the same size,
using hot water system?

The 40 and 32 ft. houses will be joined
together; will have three ft. of glass
in each of the two outside walls; about
8 ft. to eaves. There will be a 15 ft.
ridge in 32 ft. hall, and 18 ft. ridge
in 40 ft. house. The other four houses
are about 12 ft. to ridge; 5 ft. eaves;
are connected, with no glass on sides;
also small passage way 14x75, running
between the ends of the two blocks of
houses is about 12 ft. to eaves. We en-
close herewith a rough sketch of these
houses.—S. E. C., Virginia.

Your first letter does not agree with
the plans so I reply from the additional
data and have my calculations on the
plans. In the 40 ft. house, place twenty-
five lines of 2" pipe, and in the 32 ft.
house twenty lines of 2" pipe. In each
of the 25 ft. houses put twelve lines
of 2" pipe, and in the 7 ft. house seven
lines of 2" pipe. I would advise run-
ning a separate set of mains for the
two divisions of your plan. First di-
vision, one house 100x40, one house
100x32, start out with 6" pipe, and carry
the 6" until you have taken off twelve
runs of 2" pipe, then follow with 5"
until you have taken off twelve more,
then 4" for eight more, and 3 1/2" for
eight more, and five with at least 2 1/2".

In the second section consisting of
three 25 ft. houses and the 12 ft. house,
start from boiler with 5" and include
on this 5" fifteen runs of 2", and reduce
to 4 1/2" and carry along eight runs of
2", then 4" for eight more of 2",
then 3 1/2" for eight more, then 2 1/2" for four.
The above will give you the size of
mains required both for flow and re-
turn, being sure to apportion the re-
turns in the exact way that you take
them for the flow. These calculations
are based on 50° inside, zero outside. I
do not consider a 30 h.p. boiler of suf-
ficient capacity to warm all of the
above. You should at least have a
boiler of 40 h.p. If you decide to use a
regular make of greenhouse boiler or
boilers, have the capacity or the com-
bined capacity of said boilers to equal
6000 feet 4" pipe rating.

LOS ANGELES—Concluded from p. 445
such as John Cook, of Baltimore grew
years ago—and this firm has the plants.
If there is any doubt about the prosperity
of this town a visit to their sales yard
will soon remove it. They have carloads
of conifers in boxes shipped here, from
the northern part of the State, to meet
the demand for specimen plants. One
Araucaria imbricata, a foot in diameter
at base and 15 ft. high, weighs a ton
and a half in the box. Some other speci-
mens of other varieties of the cone-bear-
ing section of plants are quite as large.

A method of caring for potted plants
in this dry atmosphere, as practised by
this firm, could be profitably followed by
other nurserymen on this Coast. All
potted plants are kept plunged in sand
to the rim—this prevents rapid drying
out. They use no tin cans for any plants,
which keeps the gardener who buys them
in a more cheerful frame of mind, when
removing the plants, than if they were
grown in tin cans. I wonder how many
Eastern gardeners there are who have
seen the tin can method of growing
plants. If there is any one thing that
will make a man swear more quickly than
another it is transplanting a plant grown
in a tin can.

Reference was made in these notes, in
January, to the Citrus trees being dam-
aged by frost. It is now definitely known
that about one-third the crop in this end
of the State was also frosted enough to
make it unmarketable in the East. The
temptation to dispose of it will be great,
and if none of it leaves the State it will
be a marvel. A frosted Orange is dif-
ficult to detect from outward appear-
ances, but when opened its character is
at once revealed. Moreover, there will
be a shortage in the crop of several thou-
sand cars as compared with last season,
even though it were all good.

Mr. Winsel tells me that the place of
his nativity is Brussels, Belgium, not
Holland as was stated recently.

P. D. BARNHART.

Tubular Boilers Steam and Water

The Most Economical and
Efficient Boiler for
Greenhouse Heating

CENTRALIZE YOUR HEATING PLANT

The economy in heating large
ranges of glass from a central
plant is so great that the first cost
is repaid in a few years.

Following are a few plants which
we designed and installed:

THOMAS YOUNG, JR. BOUND BROOK, N. Y.

150,000 sq. ft. glass heated by
steam from a central plant; the
exhaust from pumps is passed
through a condenser which heats
2-150 foot propagating houses with
hot water.

F. R. PIERSON CO. SCARBOROUGH-ON-HUDSON, N. Y.

150,000 sq. ft. glass heated by
steam from a central plant; the
steam is passed through condens-
ers and the hot water is forced
through the houses with circula-
tors.

JOHN N. MAY SUMMIT, N. J.

75,000 sq. ft. glass heated by
steam from a central plant.

Washington, D.C.

The closing day of February saw a
heavy downpour of rain which continued
into the opening of March. The unseason-
able hot spell which comes each year
and pushes the Easter stock ahead is
upon us and cool places are a luxury.

Oswego, N. Y.

The Winter of 1910 will long be re-
membered as one of the longest and worst
that has been experienced for many years
—blizzards, gales and low temperature,
and almost unprecedented heavy falls of
snow. The U. S. weather report states
that, up to the present, ten feet of snow
has fallen, the greatest amount in forty
years. As I write the snow piled in the
streets is higher than trolley cars.

Business has been very light indeed;
funeral orders are the only breaks. Still,
the florists are not discouraged, and with
fine weather look for a record breaking
Easter trade.

P. G. Campbell sustained a very heavy
loss by fire February 23, which totally
destroyed three houses, and seriously in-
jured the stock in those remaining. The
fire is supposed to have started in the
boiler room, or office. A fearful blizzard
was on at the time and it occurred at
the noon hour. It made such headway
that nothing could be saved. A large
quantity of seeds were stored in the of-
fice and the burned houses contained
large stocks of Palms, Ferns, Azaleas,
and the larger part of Easter bulb stock.
There was no insurance on the stock and
only \$500 on the houses. The craft all
express great sympathy for Mr. Camp-
bell. The new houses and store he is
building on the island in the river will
not be completed till warm weather
comes.

We offer a grand lot of exceptionally well-grown plants of the different varieties of

NEPHROLEPIS

which will be found one of the best-selling and most profitable plants that florists can handle. Our stock is in unusually fine shape, and we will guarantee it will please the most exacting, as it is exceptionally good value at the prices quoted.

Improved Elegantissima. The finest of all this type. It was introduced by us in 1905. This form of *Elegantissima* has been greatly improved, and shows no tendency to revert to the Boston, making it the most valuable fern of this type.

Strong plants, 4-in. pots, \$3.00 per dozen; 6-in., \$6.00 to \$9.00 per dozen—according to size; 8-in., \$12.00 to \$18.00 per dozen—according to size.

Superbissima. Introduced by us in 1908. A very unique and distinct novelty. Its distinguishing characteristics are its dark green foliage and dense growth. Fronds are very heavily imbricated, making them very dense and compact.

Strong plants, 4-in. pots, \$3.00 per dozen; 6-in., \$6.00 to \$9.00 per dozen—according to size; 8-in., \$12.00 to \$18.00 per dozen—according to size.

Bostoniensis, Piersoni, Whitmani, Scottii—Extra fine plants, 6-in. pots, \$6.00 per dozen; 8-in. pans, \$12.00 per dozen.

Special Gladiolus Offer

AMERICA

A few points of merit—Color: A beautiful soft flesh pink, very light, and much like "Echantedress," Carnation, except slightly tinged with lavender. Size: growth very strong and healthy, producing beautiful dark green foliage, and strong, erect spikes of the largest flowers. Purposes: For florists use its color makes it everything to be desired; delicate, attractive and absolutely new. It is most desirable for planting in beds in parks, private estates, etc.

America. The best commercial pink in existence 1st size bulbs, 100, \$4; 1000, \$30; 5000, \$125. Attraction. Deep, dark, rich crimson with a very conspicuous large pure white center and throat. At once a most beautiful and attractive sort. 100, \$4.00; 1000, \$35.00.

Augusta. Lovely pure white with blue anthers. 1 1/2 to 2 1/2 inches. 100, \$2.25; 1000, \$20; 5000, \$90. Blue Jay (Baron Hulot). The finest blue Gladiolus yet seen. It is a rich deep color of indigo shade. The only real blue Gladiolus on the market. 100, \$3.00; 1000, \$76.00.

Brenchleyensis. Extra fine red variety. 1 1/2 to 2 1/2 inches. 100, \$1.50; 1000, \$12.00; 5000 \$55.00. Columbia. Light orange scarlet, freely blotched and pencilled with bluish-purple. Throat freely mottled. 100, \$2.00; 1000, \$15.00; 5000, \$70.00.

Ceres. Pure white, spotted with purplish rose. 100, \$1.50; 1000, \$12.00; 5000, \$55.00.

May. A lovely pure white flower, finely flaked, bright rosy crimson. 100, \$2; 1000, \$15; 5000 \$70.

Nezinscott. Bright blood scarlet, with deep velvety crimson black blotches, and white mottlings in throat. 100, \$4.00; 1000, \$30.00; 5000, \$146.00.

Princeps. Rich crimson with very deep shades in the throat and broad blotches on lower petals. 100, \$10.00.

Salem. Fine salmon-pink, maroon blotches. 100, \$6.00; 1000, \$40.00.

Sulphur King. The finest yellow Gladiolus. 100, \$15.00; 1000, \$140.00.

European Notes

Warm, wet and stormy, only more so; that summarizes but does not summarize the position. [Mr. Editor, the joke is not ill-timed, although our brains, like our fields, are well-nigh waterlogged, and that, as you will admit is no joking matter.]

It is really remarkable how much bright sunshine the weather king manages to sandwich in between the storms; as a result our Primulas, Cinerarias and Cyclamens are at their very best nearly two weeks before the usual time, while our Spring-flowering plants in the open

"Horseshoe Brand" Products

"NOT HOW CHEAP—
BUT HOW GOOD"

If you see a pile of empty Lily Bulb boxes stencilled "Horseshoe Brand" in a grower's back yard, it is an indication that he buys the best the market affords. You will find good quality within, and it is a safe place to buy. It gives the grower a reputation for buying the best the market affords. "Horseshoe Brand" Giganteums are produced from the choicest seed-bulbs in the world. They will produce the best average in quantity and quality of flowers of any brand known. Write or call.

New Double Lobelia

"KATHLEEN MALLARD"

We can furnish excellent plants of this splendid novelty in 2 1/2-inch pots, at \$6.00 per 100, or \$50.00 per 1000.

RAWSON'S LEADING ASTERS

QUEEN OF THE MARKET ASTER

This is the best early out-of-door Aster. In colors as follows: Dark Blue, Light Blue, White, Rose, Peach Blossom, Crimson, per 1/4 oz., 25c.; per oz., 60c. All colors mixed, per 1/4 oz., 15c.; per oz., 50c.

RAWSON'S NEW MIDSUMMER ASTER

This is one of the best Asters for Midsummer or late crop and we recommend it highly. Flowers are large and are borne on erect long stems, often 2 feet in length. We offer the following colors: Pure White, Delicate Shell-Pink, Royal Purple, True Lavender, and Bright Rose, per 1/4 oz., 60c.; per oz., \$2.00. All colors mixed, per 1/4 oz., 50c.; per oz., \$1.50.

RAWSON'S LATE BRANCHING ASTER

This is the best American Branching Aster grown to-day. It is a late cropper and a money-maker. Flowers grown from our seed invariably bring from 1/2 to 1c. a flower more in the wholesale market than other similar strains. We can furnish the following separate colors: Crimson, Dark Blue, Light Blue, Rose Pink, Shell-Pink, Scarlet, and White, per 1/4 oz., 30c.; per oz., \$1.00. All colors mixed, per 1/4 oz., 25c.; per oz., 75c.

We have many other good strains of Asters and specialties for Florists all described in our special catalogue to florists (mailed free).

NEW YORK 25 Barclay St. **CHICAGO** 84-86 Randolph St.

Please mention the Exchange when writing.

ground, where not buried under water, are leaping into life as if anxious to be on hand to charm us, as usual, in the Easter holidays.

As regards Primulas, the only distinct novelty seen thus far is a salmon-tinted scarlet with a very large brown shaded eye. It would be very effective if the foliage were made of black velvet, but on the bronzy green leaf the color is flat and it will only rank with flowers of the Duchesse type. Cinerarias are hardly at their best at present and must be reserved for further and fuller notice later on.

Cyclamen have never been grander than they are this season and as the plants are exceptionally vigorous a good crop of seed may reasonably be expected.

The new salmon shades are steadily winning their way in popular favor and they have been so much improved of late both in form and size, as to be worthy to rank with the finest of the grandiflora section. Of the fringed varieties, the white is the most worthy of

commendation; the enclosed life size photo will show how true this is. [A reproduction of this white fringed Cyclamen will be found in another column.] The "freak" section is justly neglected.

EUROPEAN SEEDS.

P. S.—It is hardly necessary to say that the impassé with the Radish and Spinach growers still blocks the way to business.

Spring Trade Edition

Will be issued

next Saturday, March 19

The wide awake Advertiser acquainted with the value of our columns requires no additional advices from us.

American Notes

Another Busy Week

The seedsmen throughout the entire country have had a very busy week; night work is now a regular feature in the trade, and even with the additional hours given to filling orders it seems well nigh impossible to get the seeds out fast enough. When the real warm days do come the rush will be terrific, as every user of seeds seems imbued with a fixed determination to supply his needs early this year. Seed buyers fully realize that seeds are in shorter supply than for many seasons. The problem of extra hands for the rush season is always a very difficult one to arrange, but not in years has it been, apparently, so difficult to obtain satisfactory people to help out the regular force. The seed business needs skilled employees in its every branch, and as in the rush season fully twice as many or more orders are every day received than can be properly

taken care of, unless extra help is employed, we yearly have this short-handed situation to face. To single out any particular line of the trade for special mention as regards activity would be superfluous, as on all sides everyone is simply working to the limit of endurance.

Sweet Peas and Nasturtiums

Every dealer, when arranging for his stock of flower seeds, should supply himself with a quantity of hulk seed of the better mixtures of Sweet Peas, and both the tall and dwarf growing Nasturtiums. No matter how limited a dealer's trade in flower seeds may be, and even if he is starting the same for its first season, Sweet Peas and Nasturtiums will always find purchasers. It is almost unbelievable to what an enormous extent the output of these staple varieties of flower seeds has developed during the last few years. The writer, only a few days since, was speaking of this matter of ever-increasing Sweet Pea sales with the manager of a large Eastern seed house, and the fact was brought out that from a few hundred pounds of Sweet Peas a year, the firm in question has steadily kept increasing their sales in this direction, until this season will see an output of several thousand pounds against hundreds only a comparatively few years back. Yes, Sweet Peas and Nasturtiums are the most popular and largest quantity sellers in flower seeds, and should be very prominently pushed.

The Eschscholtzias

During the last few seasons it has been very noticeable that the Eschscholtzias (California Poppies) have wonderfully increased in popularity. Many seedsmen have made specialties of certain varieties, until at the present time they can certainly be considered as among our most desirable and fast selling annual flower seeds. There are many fine sorts that can be utilized to great advantage in making up flower seed collections, among them Golden West, The Mikado, Thorburn, Crimson King, and Dainty Queen. Being of the easiest culture the Eschscholtzias always give satisfaction, blooming as they do, from Spring-sown seeds, all Summer long. They will be found a most satisfactory flower seed to sell freely. V.

New York Seed Trade

At last the weather has turned pleasant and quite Spring-like, and the seed business has jumped accordingly. Orders, in every branch, are much heavier than last season. It is to be a year, as expected, of early buying. All the seed-houses here could, to great advantage, keep busy more employees, but skilled labor is very difficult to obtain. A great seed-selling season is fairly started.

The Stump & Walter Co. is meeting with unexpected success in its sales of 5-cent packets (retail) of vegetable seeds, to dealers. The assortment being sent out consists of 300 packets, made up very carefully to meet the requirements of the average country store; but should any dealer fail to sell the assortment entirely out, he has the privilege of exchange for any varieties that may be especially salable in his locality. This vegetable packet seed-selling plan should become very popular, as the dealer takes no risk whatever, of carrying dead stock over to another year.

Vaughan's Seed Store has been disposing of unusually large quantities of the various brands of Mushroom spawn. Its customers for this item have very much appreciated an explanatory leaflet—"How to Grow Mushrooms."

McHutchison & Co. have been handling an unusually large quantity of raffia the past few weeks. The demand for this item is larger than in many seasons.

At Boddington's orders are coming in fast, but the large force is keeping things moving in good shape. Shipments of Cannas bulbs have been made this past week to England and Holland. The special offer of the house on Roses is taking well. Mr. Bunyard is very much pleased with the Sweet Pea sales, especially of the newer varieties; it certainly looks like another great year for this favorite flower. Plenty of night work is in order.

C. McTaggart, for many years with J. M. Thorburn & Co., has established himself as a seedsman and florist, at 123 Warren st., near West st. Mr. McTaggart will carry, besides seeds, bulbs, and plants, a full line of garden tools, fertilizers, insecticides, lawn mowers, etc.

Burnett Brothers report an unusually large number of orders being received from the private trade.

MAULE'S SEEDS

Once Grown Always Grown

Few gardeners have any idea of the size of the Maule Seed business. To one firm of celery growers I have sold in the last five years over 1,000 pounds of my XX Golden Self-Blanching Celery seed; this year I have already shipped them 200 pounds for their own planting. To another gardener I shipped last year \$550 worth of Maule's Prize Earliest Cauliflower; this year I am getting \$100 per pound for this seed. In one county in New York last season I sold almost 1,000 pounds of my selected Danish Ballhead Cabbage. One of my customers last year cleared up \$3,375 net on 15 acres of Maule's Earliest Valentine Beans; another made \$9,000 net profit on a 50-acre field of White Bush Squash; another, on 300 acres on an Island in the San Joaquin River, in California, made a net profit of \$92,000 on Maule's XX Golden Self-Blanching Celery. In the small town of Sunnyside, Wash., I shipped last year direct to growers 110 pounds of Maule's Earliest of All Tomato seed, while in a small town in Texas, with a population of 25, more than \$3,000 worth of Maule's Seeds are annually consumed.

I will be glad to send my Seed Book for 1910 to every reader of Florists' Exchange who will send me their address on a postal.

Other facts are that in the last five years I have paid the U. S. Government \$214,898.07 in cash for postage. For years I have received more registered letters at the Philadelphia Post Office than any other Philadelphia seed house. In my home State of Pennsylvania alone I have 67,801 customers, fully 15,000 more than any other seed house in the country. During the late Boer War more cases of Maule's Seeds, bound for the Transvaal, were held up by the British Army than of any other seedsman, whether French, German, English or American. These facts may prove of interest to readers of the Florists' Exchange who do not know Maule. Maule's Seeds have today a reputation surpassed by none, equaled by few, and as you can get

Your Money Back if Not Satisfied

you need this book in your business. Send me a postal today and put money in your pocket.

Philadelphia Seed Trade

The many friends of A. E. Brown, the well-known cashier at the W. Atlee Burpee & Co.'s establishment, will regret to learn of the death of his mother, on March 6, at his home in Wyncote, Pa.

The Henry F. Michell Co. is making quite a feature of the Uncle Jonathan heads, many of which have grass growing where ordinarily hair should be. These heads are becoming more and more popular with the public every year. This house has been doing a fine mail order trade, especially in Astor seed, the quality of which is well known.

Walter P. Stokes has had a very fine electrical display sign suspended over his store so that customers, for a long distance up and down Market st., can locate "Stokes Seed Store" by a view of the garden seed sign.

The store of Henry A. Dreer is a hive of industry these days, and customers are daily lined up in front of the counters. Garden tools, as well as seeds and plants are in active demand, and the supply is enormous this year.

The Johnson Seed Co. is busy with the inquiries and sales on Cyphers incubators, for which this concern is agent.

The sympathetic strike in this city, which was inaugurated on Saturday last, has not, we are assured, affected the seed business in any way whatsoever, and deliveries are being made with regularity and on time just as though no trouble existed. Customers of Philadelphia houses need have no hesitation in placing their orders as usual. There is too much of the sensational in even the most conservative of the daily papers in the effort to publish (and often magnify) the most minute details of occurrences, and it has been much that way in the present instance. There would be no necessity to mention this strike were it not that possibly some ultra cautious buyer, misled by glaring headlines, might be impelled to order goods elsewhere while the strike continues.

Burpee's Prize Supplement for 1910

Burpee's Prize Supplement, just published, furnishes interesting reading. For many years W. Atlee Burpee & Co. have authorized the secretaries of every State Fair in the United States to offer a cash prize of twenty dollars for the best collection of vegetables grown from Burpee's seeds. Every County Fair, in like manner, has also had placed at its disposal a prize of five dollars for the best display of the products (vegetable or flowers) of Burpee's seeds. Prizes are also offered for photographs of the prize-winning exhibits, many of which are reproduced in connection with descriptions of what was done last Fall throughout the country at the State and County Fairs in these Burpee competitions. Another feature of the Supplement, is the report in full detail, of the prize awards made for photographs and descriptions from customers, on the Burpee Novelties of 1909. Of the ways in which to do effective advertising there are many; the Burpee prize offering idea, as above, is among the leaders and educational as well.

Have You Ever Heard Him?

"Ladies and gentlemen," he said, exhibiting considerable nervousness, "if I had known that I was to be called on to-night I should have taken the trouble to look up—ah—that is, I should have fortified myself with—ah—as I have just said, if I had been aware that I was to be asked to address you on this suspicious occasion—I mean auspicious occasion, I should have primed myself with facts concerning the subject to which I have been, or rather the subject that has been assigned to me. I assure you, ladies and gentlemen, that it gives me great pleasure to—ah—to—it is one of the most pleasant moments of my life to meet you here to-night. There is a story of—a story—you will please pardon me if I read it, as I can't remember just now—that is, it may be more—ah—falsely—or felicitous, I should say—to—ah—read it if you will—ah—with me. I—ah—did not expect when I came here to—ah—to—ah—to—

Then he got his manuscript out of his pocket and read for twenty-seven minutes without a break.—Tit-Bits.

THE EXCHANGE—Best Advertising Medium

Seed Trade the Country Over

TREMONT, TEX.—The E. L. Reel Co., has been incorporated to conduct a seed business. Capital \$3000.

LARIMOR, N. D.—The new M. & M. Seed Co. is to go into the seed business on a large scale. Property has recently been acquired and several buildings for purposes of the business are to be erected, among them a seed storehouse which is to contain all the modern improvements for kiln drying, storing and curing seeds. A commodious greenhouse is also to be built.

MITCHELL, S. D.—According to a local paper, the Dakota Seed Company of Mitchell is rather a unique organization. It is conducted by Prof. W. A. Wheeler, former agronomist at the Agricultural College. Every package of seed put out is tested for germination and is guaranteed to the purchaser. No other seed house ever dared to do this and it is yet a question if it can be successfully done because of the many conditions which may make a crop a failure even if seeds be good.

SALEM, MASS.—A fund of \$1,000 to the town of Marblehead, the income to be divided annually among the Marblehead women who have become mothers of twins in the course of the year, is one of the unique things provided for in the will of the late James J. H. Gregory, the wealthy seedman, who died recently. The testator's widow is the principal beneficiary under the will; but at her death, the residue is to go to the American Home Missionary Society to establish a fund for the purchase of "character building books" for distribution among the children of the mountain whites in the South. The will provides small bequests to the Episcopal, Methodist, Roman Catholic, Universalist, and Congregational Churches of Marblehead, declaring that each "in its own way, is doing its best for the improvement of mankind."

A Y. M. C. A. Course in Agriculture

A practical course of lectures and conferences for the presentation of agricultural and similar themes is offered by the Bedford Branch of the Y. M. C. A. of Brooklyn, N. Y. Sessions will be held on Wednesday evenings, beginning March 9. The idea is to be of help to men who have a longing to get back to the soil and earn a living therefrom, but who do not know how to make a start.

The course is also designed to be of benefit to owners of country property that they wish to further develop as profitable farms or inexpensive country homes. For the man who is a fixture in the city but has a desire to utilize his limited garden facilities in the back yard or on a vacant city lot, there will be much of suggestion and interest in the lectures and discussions.

The Association has gone to much pains to secure an exceptionally able lot of authorities to lecture and conduct the conference. The instruction will eliminate all unnecessary theory and give emphasis to the practical application in every case of the topic under discussion.

The opening lecture, scheduled for Wednesday night, March 9, is by Prof. W. J. Spillman, chief of the Department of Farm Management of the Department of Agriculture at Washington. The dates, subjects and speakers are as follows: March 9.—Types of Farming for the City Man, W. J. Spillman. March 16.—The Soil and Its Fertilization, George D. Leavens, Expert Soil Chemist. March 23.—Fruit Raising, George T. Powell, President of Agricultural Experts' Assoc. March 30.—Fruit Raising, George T. Powell. April 6.—Vegetable Gardening, Leonard Barron. Editor of the Garden Magazine. April 13.—Vegetable Gardening, Leonard Barron. April 20.—Poultry Raising, John Hollock, Poultry Expert. April 27.—Poultry Raising, John Hollock. May 4.—Live Stock, Charles W. Burkett, Editor of the American Agriculturist. May 11.—Dairying, Charles W. Burkett. May 18.—Practical Suggestions to Beginners, Prof. L. C. Corbett, horticulturist to Dept. of Agriculture, Washington, D. C. May 25.—Individual Successes. A Symposium of Experiences. First hand reports from city people who have taken up country life.

Several excursions will be made on Saturday afternoons to vegetable, fruit, chicken and dairy farms convenient to New York City.

Coming Exhibitions

New York, March 16-18, 1910.—Exhibition of The American Rose Society at the American Museum of Natural History, 77th st. and Central Park West. Secretary, Benjamin Hammond, Fishkill on-Hudson, N. Y.

Boston, Mass., May 26-30, 1910.—Great Exhibition of Orchids and other plants by the Massachusetts Horticultural Society. Secretary, William P. Rich.

Price List :: Easter 1910

COME AND SEE OUR STOCK

Any Buyer seeking quality will be well repaid by inspecting our large stock of Crimson and Pink Ramblers, Hydrangeas, Lilies, Azaleas, Rhododendrons, Spiraeas, etc., etc.

The early Easter will make absolutely no difference to us. Our stock is excellent and timed just right for Easter. Send us your orders at once to insure satisfaction.

Lilies
Our stock is exceptionally good this year. Plants from 4 to 8 blooms, at 12c. per bloom. Made up pans from 12 to 20 blooms, at 12c. per bloom. Plants with less than 4 blooms, at 15c. per bloom.

Azaleas
Our stock of Azaleas is the largest and finest we have ever had and includes:
Van der Cruyssen, Vervaneana, Emp. of India, Emp. of Brazil, Niobe, Bernard Andrea Alba, Prof. Wolters, etc., etc., at 75c., \$1, \$1.25, \$1.50, \$2, \$2.50, \$3, \$3.50, \$4, \$5, \$6, \$7.50 and \$10 each.
Pyramid Azaleas, very fine, at \$3, \$3.50 and \$4 each.
Azalea Mollis, Anthony Koster, the best yellow, at \$15 and \$18 per doz.
Azalea Mollis Ass't, very large plants, at \$2.50, \$3 and \$3.50 each.
Small Azaleas for Basket Work, at \$4 per doz., \$30 per 100.

Crimson Rambler Roses
These plants are unusually fine and will be just right for Easter.
6-in. and 7-in. pots, at \$1, \$1.25 and \$1.50 each.
8-in. pots, at \$2 and \$2.50 each.
Plants trained in fan and globular shapes, extra fine, at \$2, \$2.50, \$3, \$3.50, \$4, \$5 and \$6 each.

Pink Rambler Roses
Lady Gay and Dorothy Perkins
In great condition, trained into fan, globular and pyramidal shapes. At \$1.25, \$1.50, \$2, \$2.50, \$3, \$3.50, \$4, \$5 and \$6 each.
Special Ball Shapes, at \$1.50, \$2, \$2.50, \$3 and \$3.50 each.
Special Wire Fan Shapes, at \$3 and \$3.50 each.
Standard Lady Gay Umbrella Shape, \$3.50 each.
We want to call your attention to this Special Standard Lady Gay Umbrella which we have in exceptionally fine condition. This, we believe, cannot be duplicated anywhere.

Tausendschon (New)
"Thousand Beauties"
This was our finest Climber last Easter and this year the plants are still better. We cannot recommend the Tausendschon Rambler too highly.
Strong plants in 6-in. and 7-in. pots, at \$1, \$1.25 and \$1.50 each.
Trained plants, Fan, Globular and Pyramidal Shapes, at \$2, \$2.50, \$3, \$3.50, \$4 and \$5 each.

Baby Rambler Standards
Exceptionally fine plants, 3 to 5 foot stems, at \$1, \$1.25, \$1.50, \$2 and \$2.50 each.

White Baby Rambler Standards
At \$1, \$1.25 and \$1.50 each.

Standard Double-Budded White and Red Baby Rambler on Same Plant
At \$1.50 each.

Baby Ramblers
Good strong stock, well flowered, at \$3, \$6 and \$9 per doz.

Hiawatha
The best of its color.
6-in. and 7-in. pots, trained in globular and fan shapes, at \$1.25, \$1.50, \$2, \$2.50 and \$3 each.

Mrs. Cutbush (New)
Pink Baby Rambler
This is a good one, in 6-in. pots, at \$6 and \$9 per doz.

Baby Dorothy (New)
Pink Baby Rambler very similar to Mrs. Cutbush.
4-in. and 4½-in. pots, at \$4 per doz.
5-in. pots, at \$6 per doz.

AMERICAN ASSOCIATION OF NURSEYMEN

F. H. Stannard, Ottawa, Kan., President; N. P. Stark, Louisiana, Mo., Vice-president; John Hall, Rochester, N. Y., Secretary; C. L. Yates, Rochester, N. Y., treasurer.

OLYMPIA, WASH.—The Selah Valley Nurseries of Selah, have incorporated with a capital stock of \$5000. The incorporators are Clarence B. Wood and A. C. E. Brown.

MARTINSBURG, W. VA.—The Mt. Glen Orchard Co. of Martinsburg has been incorporated to grow fruits and vegetables and to cultivate Orchids. The capital stock is \$50,000.

WICHITA, KANS.—The Arkansas Valley Farmer is offering 100 Catalpa trees, all ready to grow, shipped direct from the nursery, to all subscribers of one dollar for the paper.

In collections of trees in the Middle States, the Deodar Cedar, *Cedrus Deodara*, is not seen as often as are the *C. Libani* and the *C. Atlantica*, the probable reason being that it is not as hardy or, at least, has not proved so, where it has been tried. On some of the older estates in our midst the *C. Libani* and *C. Atlantica* are not uncommon, while to meet with the *Deodara* is rare. In the vicinity of New York City it has been set out more than once and, though uninjured so far as the shoots are concerned, the cold caused the loss of its leaves.

In the vicinity of Philadelphia, some years ago, there was a very nice specimen of it, perhaps 15 feet high and bushy, and this endured the cold of many Winters unharmed, dying eventually one Summer from some unknown cause.

The one we illustrate represents a tree growing in southern California, the photograph of which was sent us by P. D. Barnhart. The growth is different to that of what the tree makes here. The branches are very much more heavily clothed with foliage than would be seen on such a tree growing here. In this way it represents just what this Cedar of Lebanon does. Such a tree in Penna. would not be nearly as dense as this one, so would not have the weighted down appearance this has.

A correspondent in Maryland sends us some *Clematis flammula* seed which he says has been sent him for *C. paniculata*, and which he says he would call *C. flammula*, and desires our opinion on the seed. The seeds of both of these *Clematis* are alike, and we do not think anyone could tell them apart. Those of *paniculata* that are sold here are altogether, we think, of home growth, vines of *flammula* being uncommon in collections, and where they are to be found they never grow as strongly as *paniculata*, hence make but few seeds. The seeds of *flammula* as they come to our seedsmen from abroad are just of the same appearance as *paniculata*, but the wings of the seed are of much lighter color—whether always so it cannot be said.

In view of the greater vigor and floriferousness of *paniculata* it may seem to some that there is no place for *flammula*; but there is, for it gives us its sweet scented flowers a month earlier in Summer than *paniculata*, and, occasionally, where but a moderate grower is required, it may be preferred to the other.

Unless some good reason exists for it there is no need to leave the long growths of the previous season on the *paniculata* when Spring comes; instead, cut back the vines to near the ground. This will result in having fresh growth from the ground to the top of the 20 feet or more of height the vine will attain to.

Spiraea Reevesiana Hedges

In a recent communication E. Y. Teas says the *Spiraea Reevesiana* makes a good hedge. No doubt it does as an ornamental feature only, but not in the way of a division hedge that in most respects would act as deterring passage. Around private grounds thorny plants are seldom required, still, something pretty stiff and at the same time having some ornamental features is desired. The ornamental feature the *Spiraea Reevesiana* gives, but not the stiff one that should accompany it. The other shrub Mr. Teas mentions, the *Spiraea Thunbergii*, is very good. It is prickly, bushy and highly ornamental when in berry, but it is slow in making height; and everyone having to do with planting a hedge knows how impatient owners of grounds are to have a line of hedge of good height and appearance.

Mr. Teas says the California Privet is not hardy with him. Why not try the *Ligustrum Iboia* or *Regelianum*, both are hardier than the Californian? In Philadelphia, everyone is satisfied with the latter. It is hardy, quick growing, foliage dark green, bears pruning well, and, undoubtedly, leads all other plants available for the purpose. The several photographs of it that have appeared in the EXCHANGE of late show what beautiful hedges are made of it. It is very nice to have Mr. Teas' suggestion of the *Spiraea Reevesiana*, but it would not do to plant along street lines as the Privet is. For one thing the flowers would be too tempting to passers-by; and it would seem that to get a green line from the

half-dozen years. One of these trees is in the Bartram Botanic Garden, another on the grounds of the late Franklin B. Gowen, Mt. Airy, a third in the Meehan Nursery, Germantown. Why the trees do not bear seeds seems puzzling.

If plants cannot be had from North Carolina some of our nursery propagators should take hold of it and bud it on the tripetala stock. The *M. acuminata* has been much used as a stock, but the more fibrous roots of tripetala makes it a better one to use.

Late Flowering Wistarias

By late flowering *Wistaria*, which a correspondent mentioned some time ago, the *W. frutescens* and *W. magnifica* must be meant, as these flower some weeks later than the *W. Chinensis*, the well-known Chinese *Wistaria*. The handsomest of all is the one last mentioned, its racemes of flowers being much larger and handsomer than either of the others, and blooming very early in Spring it is one of the floral delights of that season.

The late flowering ones, while handsome and attractive, are somewhat cast in the shade by the superior beauty of the other, and would be more so only for the fact of the Chinese one being out of flower when the others are displaying theirs. The late ones are better for uses vines are usually put to, as they make a thicker showing of foliage, having more shoots, and these make a longer growth in a season than the Chinese. And there is a difference, too, in the two late ones. The *magnifica* is much more floriferous than *frutescens*. This, the *magnifica*, is thought to be a hybrid, but there is little or no resemblance to the *Chinensis* in any part of it, appearing only as a greatly improved *frutescens*.

Tartarian Honeysuckle for Cold Climates

Those nurserymen whose trade extends to the coldest parts of our country, and to the northern part of Canada, find a constant call for a few shrubs which have proved very hardy, not the least among them being the Tartarian Honeysuckle, *Lonicera Tatarica*. It has proved one of the hardiest of shrubs, as might be expected, coming from northern Europe originally.

There are several varieties in nurseries; the white and the red fruited are two of them, and a third is the *L. grandiflora*, having handsome, large pink flowers. These Tartarian Honeysuckles are really nice shrubs in home collections, because of their early flowers, for they are among the first of those of Spring. In addition to this is the beauty of their berries, which ornament the bushes greatly, and these berries do not wait until Autumn before they ripen, but mature almost as soon as formed. All in all, these shrubs are good ones for the nurseryman to propagate. As hard wood cuttings root readily a stock can soon be had.

Caragana arborescens and the Lilac, *Syringa vulgaris*, are two of several other hardy kinds that are called for in the same way as the Tartarian Honeysuckle, by those living in very cold places.

Root Pruning Fruit Trees

Florists well understand how the checking of a plant's growth forces it into flower. A plant in a small pot lacking room for its roots will flower earlier than it would were it shifted on from time to time from one size pot to a larger one. The checking of it at the root intimates to the plant that growth has to cease, and so it turns to the next thing to do, the producing of flowers and seeds. It is the same with vines, shrubs, trees and all that grows outside. So long as everything conducive to growth is present, growth will be made; when this encouragement fails it, it proceeds to flower. Hardy vines have long been an example of this. So long as there is something to do, space to cover, there is less desire to produce flowers than there is when this work has been accomplished.

The checking of the growth of fruit trees by root pruning them is followed closely by European gardeners. As the climate permits it, it is done in Winter, usually. Often the trees are wholly dug up and reset, severing many roots in the process; and even when no roots are cut the transplanting itself checks the tree. In England the climate is so wet in Winter that transplanting can be carried on all the time without fear of roots drying up. There is no need of mats and waterpots to keep the roots wet, as there is with us; and with open Winters the work goes on all through it.

Some fruit trees, such as the Seckel Pear, are always many years growing before they bear; others may find the soil so rich as to cause them to continue growing for years when they should be bearing. Whatever the cause may be, root pruning will promote flowers and fruit. It really matters little at what season the pruning be done. Midsummer, before growth has stopped, is a good time, as it is not too late to get fruit buds to form then to give flowers the coming Spring. If delayed until Autumn it would not be effective until the Spring following, not until a year had passed.

Aside from root pruning fruit trees to cause fruitfulness, shade trees are greatly benefited for safe transplanting when root pruned a year or so in advance. Neither in the case of the fruit tree nor the shade tree is it required that all the roots be cut off; a few of the stronger ones is sufficient with fruits, but in the case of shade trees it is better to cut all around the tree, the better to transplant it later.

**Cedrus Deodara**

ground to the top of the plant from foliage, as is done with the California Privet, would not be possible.

Magnolia Fraseri

Considering the fragrance and the beauty of the canary yellow flowers of the *Magnolia Fraseri* it is rather strange how very rare the tree is in collections. Or is it that it is not so scarce in collections outside of Pennsylvania as it appears to be in it? It must be that our friend H. P. Kelsey could supply anyone with plants of it from its home in North Carolina, or even the seeds of it! For some reason, as the writer once mentioned to Mr. Kelsey, the tree never or most rarely perfects seeds in Pennsylvania. There are three very large trees in Philadelphia—and likely more—and these bloom profusely every year, but do not perfect seeds. At rare intervals a pod will perfect its seed, but not more than a pod in a

California Privet

California Privet is still the leading hedge plant, because nothing has yet been produced to surpass it.

I have an extra large stock of two-year-old plants, in all grades, to offer for Spring shipment. This stock is well branched with plenty of fibrous roots.

I can compete in price, quantity and quality with any reliable grower.

Outdoor Floriculture in Northern States. Present Development and Future Mission

A paper by Richard Rothe, read before the Bar Harbor Horticultural Society at its March meeting.

Broadly speaking, the New England States have a well-established and enviable record in all lines of outdoor floriculture as far north as Boston. Beyond the Massachusetts boundary, however, the horticultural fraternity of this country still looks with more or less doubt. Maine, New Hampshire and Vermont have not been heard from often enough to make an impression. I don't think I am exaggerating when stating that in the minds of a great majority of American horticulturists floriculture within those States is still in its infancy, and little is expected of this section in the near future. While this may properly apply to the thinly settled regions, it hardly does to our larger cities. Floriculture as a means to beautify home surroundings and city squares is better understood and becomes more noticeable year after year. For obvious reasons we find it farthest advanced along the seacoast line. With the establishment of fashionable Summer resorts and subsequent building of cottages the desire to have the immediate surroundings laid out in the customary lawn-like shape, planted with trees, ornamental shrubbery and some flowers, followed. It was, and in many cases still is, simply the introduction of the conventional city suburban lawn into the native Spruce and Pine region of the North. Whatever little of flowering, everyday bedding plants during the early stages of development were employed, were supplied by the large, faraway, central markets. The comparatively short growing seasons, the uncertainty of plant material coming a long distance from a much warmer climate thriving, not to speak of the frequent absence of skilled labor for proper handling and care, proved in many instances serious obstacles in the pathway of quick advance. The rapid floricultural progress of Bar Harbor is first and last due to the early employment of high-class professional plantsmen, and subsequent foundation of her own plant-growing industries. To lay bare the floricultural possibilities of a region, which at the beginning must have looked near to hopeless, required a vast amount of patient experimenting. There is no need to talk to you of the many disappointments, or, on the other hand, of the many happy surprises the northern floriculturist meets with, but it is safe to say that, so far, the latter have outclassed the former in number and importance.

Hardiness of Popular Shrubs in the North

It was one of the happy surprises to find out that we can safely employ many of the *Azalea mollis* and *pontica* varieties along the Atlantic coast line as far north as Canada. *Calyceanthus floridus*, *Cydonia Japonica*, all the free-flowering *Dentzias*, *Diervillas*, *Forsythias*, *Rush Honeysuckles*, *Mock Oranges*, *Spiraeas* and *Viburnums* have proven perfectly hardy and the rich florescence of immense *Lilac* bushes gives evidence that the climatic conditions of the North are exceptionally favorable for their growth. Let us hope that the popularity of the hardy *Hydrangeas* and *Rosa rugosa* is soon to be shared by *Rose* varieties such as *Austrian Brier*, *Copper*, *Harrison's Yellow* and *Persian Yellow*. Likewise are the *Rubiginosa* *Penzance* Hybrids and the many comparatively new *Rugosa* Hybrids worth serious consideration, for they are not only perfectly hardy within this locality, but also exceedingly prolific in flowering. Hybrid perennials, Teas and Hybrid Teas, need Winter protection in New England, and more so along the Canadian boundary. If carried through in good shape and otherwise properly cared for, their growth is extraordinarily vigorous, the crops of buds are heavy and the period of their flowering long lasting; not to mention the fortunate absence of the obnoxious *Rose bugs* which often ravage crops of outdoor *Roses* in the Middle Atlantic States.

Popular Bedding Plants Freely Used in the North

There is no climatic or other hindrance for the free use of nearly all the popular bedding plants, such as *Geraniums*, tuberous-rooted *Begonias*, *Heliotropes*, *Salvias*, *Petunias*, and so forth. If there had been any doubt as to the possibility of flowering such bulbs as *Dahlias*, *Gladioli*, and *Cannas*, your magnificent exhibits of last year's flower show would have quickly removed it. But, after all, there is nothing that can eclipse the great success we had in the line of hardy biennials and perennials. Not alone can we grow well nigh everything worth having; no, time has divulged the fact that we can also cultivate many varieties up to a perfection and floriferousness that is simply impossible south of Massachusetts. I said cultivate up, lest we forget that growing of perennials in the North means increased attention and, in consequence thereof, higher expenses, especially in overwintering, than in the Middle States. For those few extras, northern-grown plants, after surviving our long icy Winters under protecting leaf-covering, hardy and vigorous, are ready to put forth that wonderful sturdy growth, rich floriferousness and brilliancy of colors, which year after year compel the unreserved admiration of the multitude of our flower-loving visitors. This marvelous color phenomenon manifested equally strong in the flowers of all our Summer annuals, is variously at-

tributed to the moderate average Summer temperature, the always cool nights, and along the seacoast line the beneficent influence of the sea atmosphere. In the interest of all future progress, I cannot emphasize too strongly that a liberal amount of care in the preparation and fertilization of the soil, timely irrigation, weeding and cultivating are not less important whenever first-class results are desired.

Some years ago I read an article on new *Amaryllis* Hybrids and their magnificent outdoor effect in Florida gardens. I can easily imagine a mass of them in full bloom must be a floral revelation to the eye; still I cannot believe that they ever can vie with the splendor of lilies, for instance, of a well-assorted bed of Japanese lilies. It is not necessary to go into any further details on color questions, for Bar Harbor, for years past, has witnessed veritable floral color carnivals in *Peonies*, *Phloxes*, *Iris*es, and, in fact, in all hardy flowering plants, both perennials and annuals. This remarkable clarity in tints and shades has hereabout elevated many varieties to the rank of salable cut flowers, which ordinarily as such find no market at all.

I fear this brief recapitulation of facts to those of you who have been for years familiar with them may seem a mere waste of time. Still, just this familiarity is apt to make us near-sighted, and by giving up our thoughts entirely to cultural and other particulars we lose the right view-point to the matter as a whole. We may, as professional floriculturists, comprehend and take careful

Richard Rothe

Essayist at the March meeting of The Bar Harbor Hort. Society.

advantage of our opportunities as growers, but we should, at present, under no circumstances misunderstand the hitherto mainly evolutionary character of the situation. Northern outdoor floriculture in spite of its great productiveness would have no future without a mission.

Floriculture Improves Real Estate

Last Fall one of my customers, when leaving orders for Spring planting, summed up by saying: "Now please be sure and see that my little garden and my piazza boxes are again well attended to, for, you know, they help to rent my cottage,"—a brief, clear-sighted statement touching the matter from a sober, business-like point of view. It pays a city, by the agency of floriculture, to beautify her squares and boulevards, for it helps to bring up the value of adjacent property and in turn increases her tax receipts. It pays house owners along residential city and suburban streets and avenues to call on the floriculturist and brighten up the Summer aspect of their small front lawns, for concerted efforts in that direction will aid in giving the locality that air of refinement which attracts cultured people of means. It is a wise policy for the intelligent native population of northern seacoast districts to study and to avail themselves of ornamental shrubs, perennial and annual flowers, because the Summer resort calls especially for neatness and beauty of home grounds.

Floriculture as a Pastime

There is, however, another mission of northern floriculture which seems to me is of a higher order than the one just mentioned. That host of flower lovers, who, as a health preserving outdoor exercise, take delight in doing things themselves, can find no better opportunity than the invigorating Summer climate of the North offers. To our cottage inhabitants there seems hardly a more enjoyable pastime than that of outdoor

floriculture. After the large city markets have regaled them during the Winter with the floral output of acres under glass, they find in their Summer homes amid the Pines and the Spruces of Maine conditions altogether reversed. Here the northern-grown perennial and annual is supreme, and Iceland Poppies, Foxgloves and Canterbury Bells have their innings. The change is as radical as it proves agreeable, and amateur flower growing has become a strong feature of northern Summer resort life.

As gratifying, however, as the ready popular response is, and as much as the present activity along this line may encourage us, we should not overlook our next task, which is, as much as possible, to educate our patrons in the ways and modes to use our plants to their best effects. Since Bar Harbor from the very start has taken a leading part in the development of outdoor floriculture, and her floral garden effects are known to represent the best artistic examples, it is natural that the North will, more and more, look to her and this Society for competent council. In my opinion, the time is at hand to give this problem a more careful thought than we have done so far. As a northeastern outpost, situated far away from most of the nation's business centers, it is not likely that we will see great exploits in elaborate landscape architecture in the near future. Summer residences on Mount Desert, the opposite mainland shore lines and adjacent islands, as dwellings are all of a more or less temporary character. The native vegetation and sceneries themselves are extremely attractive and beautiful. These conditions naturally limit extension and outlay on private grounds. The future will see a steady increase of all sorts of flower growing, and attempts at gardening on a small scale, with the local professional in demand for intelligent advice.

The excellence of the home-grown hardy plant material alone should prompt us to direct the present private activity, by degrees, into those channels which lead to a higher standard of effect in outdoor arrangements. We are also face to face with the necessity of giving careful study to color harmony. Furthermore, the infinite variation of ground surface and the everchanging character of our native vegetation, will demand thorough familiarity with the material, and here especially with the habit of growth and with singular as well as mass effects of hardy perennials.

Nature's Great Assistance

During my whole thirty years' practical career, I have not found a single locality offering by Nature as many rare and unique propositions for high-class miniature work in landscaping as does the North, and above all, Mount Desert Island; problems which would inflame ingenuity to enthusiasm and put mediocrity at once out of commission. To the trained eye a mere glance at some of our rugged granite ledges and their picturesque wild vegetation discloses ideal natural conditions for the rock-garden, and yet the flower-loving lady is very apt to turn a deaf ear to all our suggestions, and decide on *Heliotropes* and *Poppies*, or a *Nasturtium* bed may be the final outcome. Occasional disappointments on account of lack of understanding should, however, not in the least discourage us in the patient, tactful pursuits of our aims for the best effects.

To sum up: A careful study of the situation soon convinces us that the home-grown hardy perennials rank first in resistance. They should, in a general way, form the nucleus of northern outdoor planting, with the more tender flowering bulbs, bedding plants and annuals as seconds. Many of the hardy perennials appear in no way out of place when in a natural, informal style, mixed in among our wooded landscapes. They are equally effective in the formal gardens, and they give our plantings from the start a much desired stability, which at no time should be underestimated.

We find ourselves near the threshold of a new growing season. Soon a large contingent of the wealthy metropolitan population will return to their cottages amid our eververdant Spruce and Pine woods to enjoy the invigorating northern Summer. Let us not forget that the last and highest mission of northern outdoor floriculture is to aid in strengthening the ties of attachment and in binding the bands of love for our home country and her beautiful North.

Rose Nurseries for North Carolina

Some extensive trials have been made in the direction of the production of dormant Rose stock in the northern sections of North Carolina, and with great success. A large real estate corporation has interested some of the Dutch growers in the subject, and two or three of them have visited the field of proposed operations, with the result that, for a starter, one Dutch firm expects to remove its business from Holland to a location in this new American field next Fall. It is conceded that ideal conditions for such an enterprise exist in the section mentioned, both climate and soil being, practically, similar to those of Holland and Belgium.

Firms Who are Building

CANANDAIGUA, N. Y.—Abram C. Capan will, this Spring, erect a 50 by 90 ft. house.

KNOXVILLE, TENN.—H. M. Stetzer is enlarging his greenhouse and will install a new boiler.

West Grove, Pa.

The congratulations and well wishes of the trade are extended to Robert Pyle, president of the Conard & Jones Co. who, on March 15, is to be married to an estimable young lady.

Detroit

A tolerably busy week saw an overabundance of all kinds of flowers shipped to the local market, which ended in a complete demoralization of retail prices. A most brilliant Spring day last Saturday brought fakirs and buyers out in force, and by night most all surplus stock was cleaned up.

J. F. Sullivan's Saturday special was Carnations, and he managed to dispose of over 10,000.

Violets are very plentiful now and sell at \$1.50 per 100. Otherwise, matters are moving along nicely with a very good stock of pot plants in sight for Easter. Some wholesalers are in fear though that the present warm Spring-like weather may bring Roses and Carnations along too fast, and cause an ultimate shortage of these flowers around Easter.

Breitmeyer's Lilies for the Easter market are locally considered to be far the best, being medium high, stocky plants with 5 to 7 buds on each stalk.

FRANK DANZER.

HEATING QUERIES

Conducted by U. G. Scollay

Inquirers Read This

Subscribers asking questions for Heating Problems must be particular to give the following: Length, width, height at ridge, height at eaves, glass on sides, glass on ends, position of house as regards points of compass, grade of house, location of boiler pit, size of boiler pit, depth of boiler pit, size and location of chimney, temperature desired in each house, whether steam or hot water is used for heating, number of pipes and size in each house, dimension and position of benches, location of doors. The above information I must have before I can answer any definite questions regarding any heating plants already installed.

If the inquiry is for proposed new house or houses, send full measurements of the houses as described above, including glass, proposed location of boiler pit, proposed location of chimney, position of house as regards points of compass, number and position of benches, temperature required of pipes, whether the houses are intended; whether steam or hot water heat desired.

Subscribers who may contemplate asking for information regarding heating apparatus are particularly requested to cut this out, so that when they write, the questions will be answered fully, and will save time and help the writer materially to arrive at the proper conclusions.

U. G. Scollay.

My hot water heating does not work right. I enclose a plan from which you will see the top of boiler is three feet higher than the coil in store. The two lower pipes in the coil never get hot. When I have a good fire in boiler it drives the water out of the expansion tank. I have air vent in flow pipes. The boiler is 6 ft. high; it is a six or seven horse power high pressure boiler. I do not get much work out of this boiler; it should do four times as much.

—J. M. N. Y.

—I assume that your main trouble is with the coils in the store, and that the greenhouse works fairly well. Owing to the distance of the store from the boiler would advise that you increase to the openings 2 1/2", and connect into each of the 1 1/4" coils with 3/4" pipe. The same proportion of sizes to govern the return. You have over 110 square feet heating surface in each coil, and 1 1/4" pipe in the position that these coils are, and taking into consideration also the position of the boiler, is not sufficient to properly take care of them. You must be careful to see that you raise from the boiler to the highest point and take an air vent from that point, and after reaching the highest point see that everything grades back toward the boiler. Even the coils would have the advantage by having the pitch to the boiler, providing you feed them from the far end of the coil.

You might overcome much of your difficulty by installing a heat generator at the boiler and connecting to the return pipe that leads from the expansion tank to the boiler. This would allow of increased pressure on the system and consequent higher temperature of the water in the pipes.

You do not mention the size of the greenhouse so I do not know the exact amount of heating surface you have on this particular job, but would say that this boiler should be able to take care of between 800 and 900 square feet of hot water radiation.

Be sure in case you use the heat generator to have a separate connection from the expansion tank, running into the system near the boiler; the heat generator should be placed on this pipe between the tank and the boiler.

Catalogs Received

A. DEMEYER, Ghent, Belgium, McHutchison & Co., sole agents, 17 Murray st., New York City.—Wholesale List for 1910, of Araucarias, Ficus, Dracaenas, Palms, Azaleas, Rhododendrons, Begonias, Hydrangeas, Bay Trees and miscellaneous plants. The publication embraces 30 pages, and contains several full page illustrations covering views of the DeMeyer establishment.

WILLIAM H. MOON CO., Morrisville, Pa.—"Moon's Hardy Trees and Plants for Every Place and Purpose." This is the Company's 1910 catalog of Evergreens, Evergreen Shrubs, Trees, Flowering Shrubs, Hardy Plants, Garden Roses, Vines, Perennials, Ornamental Grasses and Hardy Fruits. The publication has evidently been prepared with great care and is profusely illustrated with unusually fine half-tones, many of them object lessons in landscape gardening and plantings for effect. The publication contains 80 pages, is printed on first-class paper stock and is bound in a handsome paper cover with illuminated title page.

DUBUQUE, IA.—Harkett's Floral Nursery is to move its business to the Lyric Building, 9th and Main sts.

KINGSTON, N. Y.—The C. W. Brownell Co. has been incorporated to deal in Ferns and flowers. Capital \$2000.

KALAMAZOO, MICH.—The Central Nursery & Floral Co. has moved its downtown office from 136 South Burdick st. to 104 East Main st.

CINCINNATI, O.—Robert P. Dowling has been appointed receiver for the greenhouse and florist business of Brian P. Critchell.

HOMESTEAD, PA.—Faulk, the florist, has taken store quarters at 8th ave. and Amity st., and will occupy them about March 15. Jacob Ellicker, florist, is also changing his quarters.

WHEELING, W. VA.—Arthur Langhans, florist, will on April 1, move his store to 1217 Chapline st. A large greenhouse will be a feature of the new quarters.

SUMNER, WASH.—The Woodland Floral Co. is starting in business near this town, having purchased a 10-acre property which it will plant to Dahlias and other herbaceous stock.

WAUKESHA, WIS.—Thos. Weaver & Son have disposed of their greenhouses and fruit farm to the Milwaukee Electric Railway & Light Co. The business, however, will be continued until June.

GREENFIELD, MASS.—William Kennedy, the well-known florist and horticulturist, with his wife, on March 2 were receiving the congratulations of their friends on their golden wedding anniversary. The happy pair were the recipients of many presents and testimonials.

would suggest repotting plants into fresh soil, after removing from the roots all that can be easily loosened.

(64) Care of Spanish Iris.—I have some Spanish Iris that have been in a cold frame all Winter. They were planted to bloom Decoration Day. The glass has been over them since about Dec. 1, and at night we keep them covered now, when cold, and on mild nights we ventilate. How must they be handled from now on? They are about three inches above the ground.—H. J. S.

—Had we known earlier in season we would have suggested planting bulbs of Spanish Iris in flats, for the reason that it is possible to succeed, and if room temperature that is warmer than that in a cold frame. At this time of year one can hardly expect to have flowers on a certain day from cold frames, as the weather is so changeable that without means of controlling the temperature inside the frames we fail to see how it is possible to succeed, and if room could be found in a greenhouse we would suggest the careful lifting of the bulbs and planting them in a bench in a cool greenhouse, where a more even night temperature can be maintained. Plenty of ventilation and careful watering is necessary as well as keeping strict watch for slugs. Light manual waterings would be beneficial. Treatment necessary for the growing of good Mignonette should be about right for the Iris.

Question Box

(62) Geraniums for Name.—I am sending you two Geraniums for name. I bought them for S. A. Nutt but the color does not look like some Nutt I have had. If it is Nutt and off color, is there anything I can use to restore the color? Do you think I can pinch them back at this time?—S. A. P. New York.

—Samples of Geraniums sent are the S. A. Nutt variety and we do not doubt but that when they are planted out or become established in your soil, you will be better satisfied with them. This Geranium has a tendency to vary a little, the true type being maintained by careful selection for propagating purposes.

(63) Insects and Worms on Cinerarias, etc.—I send you a phial containing a few specimens of a little white insect, and a few little worms with black heads. These I find always together, destroying the roots of Cinerarias, Narcissus and Dracenas especially. As I never saw them before I should be glad if you could give me advice how to destroy them, and if possible, their names.—A. O. S. L. N. Y.

—Your phial was broken in transit and we did not find the worms. Would suggest you use lime water, or air-slaked lime or soot on the soil in the pots. Better still, make a small hole in the soil in each pot, or box, about 2 to 3 inches deep, into which pour a teaspoonful of bisulphide of carbon, filling the hole immediately with soil. The fumes from this will kill the worms. Evidently your soil is sour, and we

AZALEAS

We offer a fine lot of Azaleas, shapely specimens, well "headed," double and single flowered, which should make splendid plants for Easter sale.

We offer the well known and popular sorts:

Mme. Van der Cruyssen, Niobe, Deutsche Perle, Mme. C. Van Langenhove, Vervaeneana, Empress of India, Helen Thielman and Simon Mardner.

	Per doz.	Per 100

Please mention the Exchange when writing.

Washington, D.C.

F. H. Kramer has some novelties in tub-grow Box bushes which are attracting much attention; the plants are well grown, of good size, and trimmed in shape of pyramids, arm chairs, fountains and roosters on pedestals.

An electrical storm of considerable severity, the first of the Spring, which came on the last day of February, was followed for six days by abnormally high temperatures and beautiful weather, when another thunderstorm visited us. The high temperatures are telling rapidly on all classes of trees and shrubbery, and in many places Forsythia is in full flower. A most unusual and beautiful sight to behold at this season is two lawns directly on the east side of the Capitol Building, where the grass has surpassed any seen elsewhere by attaining a uniform height of about four inches.

Local Violet growers are entering their usual complaint incident to the season, regarding the overproduction of Violets and slow demand. One grower claims that 50,000 flowers are going to waste on his plants alone. The street fakirs are beginning to appear with Violets and occasionally a few other Spring blossoms, but they are numerically weak as compared with former years.

The stores about town are well filled with good qualities of Azaleas and bulbous stock. The dark pink Azalea is in high favor this season.

Novelties for St. Patrick's Day are already being shown, save the green Carnation, so popular, and which is to come a day or so previous to the feast. Artificial Irish Potatoes with a spray of Shamrock, clay pipes with same, and basket-shaped pipes filled with flowers and tied with green ribbon are among the leaders in public favor.

The unsightly old greenhouses of the Department of Agriculture, which for years have served for experimental work of the Department, at 14th and B. sts. S. W., have at last been razed to the ground and replaced with six modern even span houses, and a large Banana house 30 ft. high, all erected on the west side of the new marble office building which is nearing completion. These houses, which are rapidly being filled with a miscellaneous stock, are under the direct charge of David Bisset. The other large range of houses at 14th and B. sts., N. W., where the Carnations, Roses, etc., are grown for the Department, present a good appearance throughout. The Carnations here have been especially fine this season, but like elsewhere in overproduction. The solid beds have again made good in every instance. This range, which originally was heated by exhaust steam from the power plant opposite, is now maintained by the large and perfectly equipped steam plant under the new office building. It also cares for the other newly erected greenhouses, all of which are under the superintendence of E. M. Byrnes.

When that cordial gentleman, able florist, and typical type of the "Scotch gardener," John Clark, asst. supt. of the U. S. Botanical Gardens, returned a few months ago from a trip to Scotland, he brought some novelties and new additions to the Gardens. Among these are Alocasia Sanderiana superba and nobilis from his native country. From Sanders in England he secured new plants—Pereskia Goodenifera and Selaginella, and a plant of Emiliana aurea; these are said to be rare, and in their welfare Mr. Clark takes much pride. But the "Joy forever" is a plant of Begonias, Glory of Cincinnati, presented personally by Mr. Petersen of that city. The plant is of the Gloire de Lorraine type, but it is described in detail by Mr. Clark as far superior to any of the Begonia family which he has seen. The magnificent clusters of deep pink flowers and large, richly colored leaves combine to hold the plant in good shape for two months at a time. In Ferns Mr. Clarke showed the new crested variety of Nephrolepis Scottii, under label of N. Scholzii which is quite distinct and promising. A considerable number of fine Orchids were flowering, but none were more showy and beautiful than a collection of Dendrobium nobile in full and profuse bloom.

JAS. L. CARBERRY.

MANKATO, MINN.—The greenhouse of E. C. Willard, in this town, was burned to the ground February 25.

COLUMBUS, O.—Julius E. Raether, of the Franklin Park Floral Co. has been appointed florist for the Columbus State Hospital.

Heliotrope Novelty "Deutsche Schone"

From Moeller's Deutsche Gaertner-Zeitung.

NEW HELIOTROPE DEUTSCHE SCHOENE (German Beauty).—This novelty is a cross between Frau G. von Poschinger and Frau Medicinalrat Lederle, the result of experiments made by O. Kowalski of Burg, near Magdeburg, Germany, with a view to obtaining a Lederle heliotrope of more attractive appearance. German Beauty is a plant of splendidly vigorous habit with dark green stiff

leaves, like those of the well-known old sort, Anna Turell. The trusses are very large and spreading, and the color of the flowers is a pure dark violet blue; they have a delicate perfume. This novelty is considered as the best of the present day Heliotropes. It is offered by Teupel Bros of Quedlinburg, Germany.—Moeller's Deutsche Gaertner-Zeitung.

Peach "Brown Rot" and "Black Spot"

As the result of experimental work by the U. S. Department of Agriculture, a cheap and simple remedy for these diseases has been found in the self-boiled lime-sulphur wash. This can be applied during the growing season with very little danger of injuring the fruit or foliage, and it is very effective. Furthermore, by mixing arsenate of lead with the fungicide, the curculio can be destroyed at the same time. The Department has just issued a bulletin describing the preparation and use of the remedy.

[Parcel] Post and Second Class Mail

These two items still continue to absorb attention and will do so, we trust, until both are finally and decisively settled in favor of the right.

Speaking on these matters recently at a meeting in New York, former Second Assistant Postmaster-General W. S. Shallenberger, a gentleman whose experience certainly entitles him to a hearing and to credence said, in part:

"It is not a question of overpaying the railroads, nor of spending too much money on the rural mail delivery system, nor paying too much for the postal tube service, but it is the underworking of all these facilities that are the causes of the postal deficit.

"We are not getting the service and the revenues out of the facilities that we could and should easily obtain by the proper intelligent effort," he added.

"The postal service does not deserve the criticism that has been heaped upon it for the reason that the figures presented by the Post Office Department to the President, and by him voiced in his message to Congress, have no substantial basis on which to stand. The proper cost of transporting and handling mail matter is not as represented.

"The comparison with express matter, which was the primary object of these investigations, has not been attempted. The basis upon which express matter stands is a percentage of gross revenue; the basis on which postal matters stand, according to the reports referred to, is a flat per pound rate. No other country in the Postal Union, not even this country in its foreign mail service, accepts any other basis of gross revenue received as determining the proper cost of transportation.

"The fact is, as has already been pointed out, we are not utilizing our facilities as we might, and therefore not receiving the revenue that we should.

"We are not utilizing our rural mail delivery. We have there already the foundations of an excellent parcel post, reaching almost every family, adding materially to the convenience and enjoyment of rural life and at the same time adding to the revenue of the government.

"We are not utilizing our railroads to anything like the full extent. Following suggested methods, we could reduce the present expense of handling second class matter materially. We could reduce the cost of handling parcels. We could reduce the cost of handling light merchandise in city and country by eliminating the duplication of delivery agencies.

"In my judgement, we are getting all the revenue from second class matter that it will stand. We are giving to the people an education in literature and art that supplements a public school education. We are paying the railroads for the carriage of that matter 30 per cent. of its gross revenue. We are paying no more than 30 per cent. of the gross revenue derived from mail carried on railroads on that or any other class of mail matter. This compares favorably with 45 to 55 per cent. paid by express companies."

Lettergrams

Commencing with this week the Western Union and the Postal Telegraph Co. have inaugurated a service of value to business men. These companies now accept letters of fifty words for transmission at night and delivery at opening of business the following morning, at a charge based on one-fifth of the day rate. In other words a telegram can be sent at night, containing five times the number of words of a day message, at the day rate.

Greenhouse Construction and Heating

A series of papers on Greenhouse Construction and Heating, written by two of the most eminent men in the business, starts with this issue.

The first two articles are by Fred'k J. Elder, heating engineer for the Lord & Burnham Co., and the subject matter is confined entirely to heating, illustrated by diagrams.

Succeeding this will be given, commencing with our issue of March 26, a series of articles by John A. Payne, as follows: 1, Plan for Future; 2, General Arrangement; 3, Form and Size of Houses; 4, Material; 5, Ventilation; 6, Benches; 7, Potting Shed; 8, Heating; 9, Boiler Room. In these articles the author will deal with the entire subject of greenhouse construction and heating and will include descriptions of all the latest improvements in every line covered.

These articles will appear at an opportune time and should be of considerable value, more particularly to those who are planning extensions and new structures.

For Pure Insecticides

The Lowden bill for preventing the manufacture, sale or transportation of adulterated or misbranded Paris greens, lead arsenates and other insecticides and fungicides had a hearing last Tuesday before the House Committee on Interstate Commerce at Washington. The measure also provides regulations for the traffic in those insecticides and is designed to protect the growers' interests.

E. D. Sanderson of the New Hampshire Agri. Exp. Station, president of the National Association of Entomologists, declared that one-tenth of the agricultural products of the country were lost because of the ravages of insects, and another one-tenth from fungous diseases. Other speakers were J. H. Hale of Connecticut; E. W. Catchpole, president of the Cornell Horticultural Union; H. F. Baker, president of the Thomson Chemical Co. of Baltimore; E. W. Worshom, State Entomologist of Georgia; John B. Smith, State Entomologist of New Jersey, and T. P. Symons, State Entomologist of Maryland. All the speakers favored the bill. Later a hearing will be given the chemical and entomological bureau representatives from the Department of Agriculture.

The American Rose Society

Program of Proceedings for Annual Meeting

The annual meeting of the American Rose Society will open at 7.30 p.m., sharp, on Wednesday, March 16, in the American Museum of Natural History, 77th st. and Columbus ave., New York City.

The transaction of business will be in the following order: Opening address by President August F. Poehlmann. Reading minutes of previous session. Secretary's report. Treasurer's report. Report of committees. Selection of place for next year's meeting. Miscellaneous business. Election of officers. Appointment of committees. Adjournment, as business may require.

A question box will be open at the secretary's desk. Under the order of essays and discussions, addresses will be made as follows:

FIRST SESSION.—Paper by Adolph Farenwald, Roslyn, Pa. "Roses—the brightest of Flowers." Paper by S. B. Sibson, Portland, Ore., "North Pacific Coast Roses."

SECOND REGULAR SESSION.—Thursday afternoon at 2.30 p.m., sharp. Address by James Wood, Mt. Kisco, N. Y., president of the Horticultural Society of New York, "The Ideals of Horticulture." Lecture by George V. Nash, secretary of the Horticultural Society of New York, "The Rose and Its History," illustrated with colored lantern slides.

The American Rose Society fixed no hotel headquarters in the city, as all the business pertaining to the annual meeting will be transacted at the American Museum of Natural History.

There has been another prize of \$10 offered by S. J. Reuter & Son, Inc., Westerly, R. I., for the best vase of My Maryland Roses, 50 blooms.

Joseph A. Manda is the manager of the exhibition. The Horticultural Society of New York has issued a joint premium list with the American Rose Society, and in that list the value of the silver cup offered by Moore, Hentz & Nash of New York City, should be placed at \$50. It is listed as Number 190 in Division F.

BENJAMIN HAMMOND, Sec.
Fishkill Landing, N. Y., March 5, 1910.

Our 1910 Novelty Edition

We are in receipt of congratulatory letters from all over the country in praise of our Novelty edition, which was issued Feb. 26. The encouragement received is appreciated and will nerve us to repeat the undertaking in 1911.

Exhibition of the Nat'l Ass'n of Gardeners

The annual flower show and convention of the National Association of Gardeners will be held in Philadelphia, March 15, 16 and 17, in conjunction with the Spring Show of the Pennsylvania Horticultural Society.

The preliminary schedule of the N. A. G. covers some sixty classes, embracing Carnations, Roses, cut flowers of all bulbs and tuberous plants, Orchids, miscellaneous plants and under-glass grown vegetables. In the Carnation class cups are offered by Robert Craig, F. R. Pierson, Peter Henderson & Co. and Rickards Bros. In Roses, cups are offered by George Bertanell, The Chronicle Press, Benjamin Hammond, Bobbink & Atkins, Hitchings & Co., P. H. Goodsell, Gold Chemical Co., Ellwanger & Barry and The Weathered Co. Michael Fallon and F. J. Michell offer cups for cut flowers, tuberous and bulbous. Lager & Hurrell, Julius Roehrs Co. and Joseph A. Manda offer cups in the Orchid section. Lord & Burnham Co. offer a gold medal for the best group of flowers and foliage plants and William Kleinheinz, a silver cup. Wilson Plant & Fertilizer Co. offer a cup for the best twelve foliage plants. Cups are offered by W. Atlee Burpee and J. P. Sorenson for Sweet Pea exhibits. Burnett Bros. offer a silver cup for the best six plants of Cineraria Hybrida. There are also a number of other cups offered in the different classes as well as certificates.

The Pennsylvania Horticultural Society's schedule includes the Henry A. Dreer premiums amounting to \$126, for Roses and other plants; the Henry F. Michell Company's premiums, amounting to \$200, for bulbous stock, Lilies and other plants; and the Hosea Waterer premiums, amounting to \$215, for bulbous stock and other plants.

The joint exhibitions will be held in Horticultural Hall, Broad st. below Locust st., Philadelphia, Pa.

Copies of the schedules may be obtained from the N. A. G. secretary, W. E. Maynard, 236 William st., New York City, or David Rust, secretary of the Penna. Hort. Soc., at the Hall.

American Association of Nurserymen Thirty-fifth Annual Convention

There is every indication that this year's gathering of the nurserymen of the United States at Denver, Colorado, June 8, 9 and 10, will be both large and enthusiastic. The new secretary, John Hall of Rochester, N. Y., is busy looking after details, and expects shortly to issue a circular letter to members setting forth the arrangements made for hotel accommodations and terms, as well as information concerning railroad rates and special offers. The Brown Palace Hotel has been selected as headquarters. It is a thoroughly modern, fireproof building, all large outside rooms, and under excellent management.

Those who know anything about "The Queen City of the Plains" are aware that it is a popular convention city, and an ideal place for the assembling of an organization like that of the American nurserymen in "the month of Roses."

The entertainment committee has not been asleep, either. Chairman Frank A. Weber, Peter Youngers and A. M. Ferguson recently met in Denver, and arranged for the following entertainment to be given by the Western nurserymen to the members attending the national convention of the American Association of Nurserymen:

Afternoon of June 8. The ladies will be given a sight-seeing trip through Denver and vicinity.

Afternoon of June 9. The ladies will be entertained at a matinee in one of the theaters.

Friday, June 10 (subject to the action of the program committee). The committee has arranged for a sight-seeing trip over the Moffat route to Corona, for the members and their ladies. This is said to be the finest scenic route out of Denver, and has been styled by eminent civil engineers as the greatest piece of engineering in the world. This trip will be complimentary to members and their ladies, and it is hoped the nurserymen will take advantage of this splendid display of hospitality on the part of their Western brethren. Luncheon will be served on the trip. A special train will leave Denver at a convenient hour in the morning, returning in the late afternoon.

Other features have been arranged, and will be announced later. The Western nurserymen hope that the members from the East will be well represented. Besides those already mentioned, the members of the entertainment committee are: F. H. Stannard, ex-officio; J. W. Hill, C. G. Ferguson and George B. Fravert.

Secretary Hall is exceedingly anxious that members will anticipate his circular letter and be ready to give quick response to his appeal for membership fees and for advertisements and registration in the badge-book. "First come first served," is his motto.

ANNUAL SPRING TRADE EDITION

March 19, 1910

OUR first Spring Trade Edition was issued in March, 1890; consequently this forthcoming issue will be our twenty-first—and every one a success.

Despite competition and the business changes of a score of years, our Spring Trade Edition has always met with the hearty support of our advertisers. Years ago we called it our

Spring Trade, Sale, Mart and Exchange Number

BECAUSE IT CLEARED UP STOCKS

From now on, hundreds of growers have surplus stock to dispose of, while other thousands of growers are waiting to buy from these advertisers. Therefore,

Experiments in Crossing Dahlias

From "New Methods of Plant Breeding," by Geo. W. Oliver.—Bulletin No. 167 of the Bureau of Plant Industry, U. S. Dept. of Agriculture.

The original Twentieth Century Dahlia was used in pollinating a new species from Mexico four years ago. This species has very small, bright red flowers, and the stems are exceedingly long. The larger and very rough leaves are produced near the crown of the plant, leaving the principal stems with only very small leaves. The flowers of the Mexican plant were depollinated and pollen applied to three of the flowers. Sixteen seedlings resulted; the small number of seeds was probably due to the fact that the mother plants were growing in small pots in the greenhouse and did not flower till after the outdoor crop had been blackened by frost. The pollen was obtained from flowers which had been saved and kept in water.

The resulting first generation seedlings were strictly intermediate between the parents, all of them with very long stems, but the varieties were not striking enough in color or size of flower to warrant vegetative propagation. The best of them were bagged and allowed to set seeds. The seedlings of the following season gave a very large assortment of forms, and the colors were more varied than those of the first generation. About fifty forms were saved for further crossing and selection. The following Summer the best of these were crossed with pollen from the Cactus and other varieties. As a result a few crosses were produced which show that varieties may be raised in this way with large and well formed flowers, some of them equal in these respects to some of our best varieties bred from plants in cultivation for nearly a century. One of the forms with single flowers is shown in plate herewith.

Crossing Cultivated Varieties on Natural Species Pansies

To show what might be expected in renewing the vigor of some varieties by crossing them on wild progenitors, it may be permissible to mention some work in the improvement of the common Pansy in an attempt to enable it to better withstand our hot Summers. Some time ago a number of plants of *Viola tricolor* were found growing luxuriantly in southern California in hot and dry places. Even far down in the Imperial Valley, where the temperature frequently reaches a stage unheard of in the East, the plants seemed at home.

The idea suggested itself that this plant might be of use in imparting heat-resistant characters to the cultivated Pansies. Plants were raised from the seed gathered and pollen from a strain of Pansies applied to the

stigmas of the wild plants. Some of the flowers of the first generation progeny are shown in our illustration. The petals were removed from the flowers of the wild plant and their stigmas cleared of pollen with the aid of water previous to pollinating. All the plants secured have fair sized flowers, more or less resembling in color and markings those of the wild type. The foliage more closely resembles the mother than it does the father. Recrossing, with pollen from a good strain the present season will probably give the desired size next season.

Flowers from First-Generation Seedlings of
Crosses of Pansies (Natural Size)

Lilium giganteum

Grown by Peter Roemer, Woodlawn, N. Y.

A Well Flowered Lilium Giganteum

The photograph sent herewith, will, I trust, be of some interest to your readers. The fact that there are twelve flowers on one stem not only makes it a rare specimen, but also adds greatly to the beauty of the plant.

New York City. PETER ROEMER.

Among the Growers

Godfrey Aschmann, Philadelphia, Pa.

Visitors to the establishment of Godfrey Aschmann, Philadelphia, will find much to interest them for the Easter trade. Plants of every description are carried in stock. Lilies, giganteum, multiflorum and Formosum, Azaleas in all sizes and varieties, including Van Der Cruyssen, Vervaneana, Simon Mardner, Deutsche Perle, Prof. Wolters, and others are all well budded, and show the results of much care.

Hydrangea Otaksa will be just about right to handle, the large stock of plants having from three to eight large trusses of fine blooms to each plant.

Hyacinths raised from best selected bulbs in all colors, and giving good strong spikes, are in plenty. Tulips and Narcissus are also among the bulbous stock grown for the increasing demand. Cinerarias, Begonias—new improved Erfordi—Primula obconica, Begonia Flambeau, as well as many decorative and specimen Ferns are grown in quantity, as well as Ferns for table use, Latania Borbonica and Kentia Belmoreana.

Mr. Aschmann receives many orders daily, some of which come from customers who have bought his goods for many years. Firms in Peru, Mexico and California have placed orders at this establishment, and credit must be given for the good packing methods employed when it is known these goods arrive in fine condition after their long journey.

Constant advertising has brought this florist's name very prominently before the trade.

In his efforts to secure the best stock to be had, annual trips to Holland and Belgium are made, so that what is secured is usually selected from the fields where it is growing.

Connected with Mr. Aschmann in his business are his three sons, who are thoroughly experienced in all its branches, and upon whom most of the actual labor of producing plants of "Aschmann quality" rests.

Robert Craig Co., Philadelphia, Pa.

A visit to this establishment is very interesting at this time of year, especially in the case of store men who are somewhat anxious as to the amount and quality of stock to be offered them for Easter, by the wholesaler growers of plants and cut flowers in all the larger cities. The fact that Easter occurs this year at an early date has presented a serious proposition to many growers, and those having stock in good shape should

find no difficulty in disposing of it readily. All the Craig houses are full of good things, and special mention must be made of the Rambler Roses. These plants were pot grown last Summer and the results have shown wise forethought. The plants have been trained in many ways, globular and fan shapes predominating. All the well-known varieties have been grown, including Crimson Rambler, Tausendschon, Hiawatha, Lady Gay and Dorothy Perkins. Standards, double huddled, white and red Baby Rambler on same plant, white Baby and others, as well as the well-known hush form of Baby Dorothy, and Mrs. Cuthush, the new pink Baby Rambler, are all filled with flower buds, while the foliage is all that can be desired.

Lilies have been quite a proposition with the concern, and the labor which has been expended to get the enormous quantity of plants into bloom has been unending. Now the several houses of Formosum and giganteum present a fine appearance. Nearly all of the plants will be in good shape to ship.

Hydrangea Otaksa has finished remarkably well, considering the short space of time available in which to accomplish the result, consequently plants having from 3 to 12 heads of fine pink blossoms are the rule and not the exception.

Azaleas in all the best known varieties are on hand in immense quantities, from the small plant in a 4" pot up to the largest size in tubs. Small plants of Azaleas for use in basket work have become very popular of late years, as well as Azalea mollis in variety.

An unusual stock of Hybrid Roses is on hand. Richmond, Kaiserin, Mrs. Henshaw, Killarney, Magna Charta and others forming a complete list for selection, all of which are well budded.

The Rhododendrons, especially the Pink Pearl variety, have that beautiful dark green foliage so necessary to the beauty of these plants, and when crowned with masses of heavy trusses of bloom the effect is charming, and as Easter plants they are second to none.

Marguerites, Oranges, Ferns of every description, Dracenas, Crotons, and many other useful decorative plants are also on view, while a whole house of Spiraea Gladstone presents a sight hardly to be forgotten. The pink Spiraea, Queen Alexandra, should appeal to those seeking something new and novel, and is, besides, well flowered and thrifty.

Bonzaiavilla glabra Sanderiana has been finished remarkably well, and at very few places in the country can so fine a sight be seen as a house full of these plants in bloom. They are of various sizes, low, and exceptionally well flowered. Other plants offered by the company are English Hawthorns, standard Prouns, flowering Apples and Almonds, Double Daisy Queen Alexandra, Wistaria (blue) and many more, too numerous to mention. Incidentally, it may be said that a larger stock of Begonia Lorraine, propagated from leaves and now in 2 1/4" pots, would be hard to find in the East. Cyclamen seedlings to the number of 75,000 have been recently transplanted, all of which are doing fairly well; many of the first sowing have reached the 4" pot size.

COSMOS HYBRIDA GRANDIFLORA PURPUREA.—This is a valuable novelty introduced by the Cosmos specialist, F. Roemer of Quedlinburg, Germany. The flowers are about 3 1/2 in. in diameter, single, and of a bright purple. The plant grows to a height of nearly 4 1/2 ft. and is much branched; the foliage is very delicate and graceful. If sown toward the end of March in pots in hotbeds it may be transplanted by the middle of May; it will begin to bloom by the end of June, and from that time on the plant is covered throughout the Summer and Fall by a mass of flowers. As these have splendid keeping qualities when cut this Cosmos is especially suited for florists' purposes.—Der Handelsgaertner.

Morris Co. (N. J.) Gardeners and Florists' Soc.

We have received a copy of the preliminary schedule of the prizes to be awarded at the fifteenth annual flower show of the Morris County Gardeners and Florists' Society to be held in conjunction with the show of the Chrysanthemum Society of America at Morristown, N. J., Nov. 2-4, 1910.

The prizes offered by the Society amount in the aggregate to \$2500, and include a sweepstake cup valued at \$150. The additional offerings of the C. S. A. and others will swell the sum total of prizes very considerably.

The Chrysanthemum classes are numerous and the premiums quite generous. Among the more important may be mentioned:

Class 1, covering 60 flowers in 20 varieties, 3 of each, to be shown in twenty vases, lengths of stems 20 inches; three prizes, \$100, \$60 and \$40 respectively.

Class 2, for 36 flowers in 6 varieties, 6 of each; prizes, \$40, \$30 and \$20.

Class 15, for 24 flowers in 24 varieties, stems not over 12 inches, to be shown in single vases; prizes \$50, \$30 and \$20.

Class 22, for 36 flowers in 36 varieties, stems not to exceed 12 inches, to be shown on mossed boards; prizes \$25, \$15 and \$10.

The Chrysanthemum classes for commercial florists are as follows:

Classes 23 to 27, for the best 10 flowers, yellow, white, pink and crimson varieties, and any other color; prizes in each class, \$10, \$7 and \$5.

The Chrysanthemum Society of America will offer a grand array of special prizes in addition to its silver cup for the best 10 flowers of any Chrysanthemum, one variety.

W. Wells & Co., Merstharn, Eng., offer gold, silver and silver gilt medals for best six flowers of Chrysanthemum Howard Gould; also gold, silver and silver gilt medals for the best three vases of single Chrysanthemums, in three varieties, 6 sprays of each variety.

C. H. Totty, Madison, N. J., offers a silver cup, value \$50, for the best 12 flowers of Chrysanthemum R. F. Felton.

Wm. Duckham, Madison, N. J., offers for 6 flowers of Chrysanthemum Onuda, 1st, \$10; 2nd, \$5.

Anton C. Zvolanek, Bound Brook, N. J., offers for 3 varieties of Chrysanthemums, cut blooms, 3 flowers to a stem, one prize of \$10.

The Morris County Gardeners' and Florists' Society offers a "Grand Sweepstake Prize" on the following conditions: A cash prize of \$20 is offered to any winning member of any regularly organized floricultural or horticultural society exhibiting in this class, for the best 18 blooms, in 18 varieties, stems not to exceed 12 inches, to be shown in single vases. The competition for this prize is to be between members of the same society. The 1st prize exhibits of members of each society so competing will be judged for the grand sweepstake prize silver cup, value \$150.

In groups, the principal Chrysanthemum class is No. 60, for a group of Chrysanthemums in pots, arranged for effect, on a floor space of 50 sq. ft., prizes \$50, \$30 and \$20. Two other group classes, for 12 and 6 plants in pots carry prizes of \$10 and \$5 and \$5 and \$3 respectively.

There are separate classes for specimen plants, not or tub, and size, pink, white, yellow, and any other color, prizes in each class \$15, \$10 and \$5.

The Rose section includes fourteen classes, as follows:

Class 29, for 36 American Beauty, prizes \$30, \$20 and \$10.

Class 30, for 12 American Beauty, prizes \$10, \$6 and \$4.

Classes 31 to 36, for 25 each, Bride, Bridesmaid, pink Killarney, My Maryland, Richmond, and any other color, prizes \$10, \$6 and \$4 in each class.

Class 37 to 42, are for 12 Roses each, in the same varieties as in classes 31 to 36, prizes \$6, \$4 and \$2.

Floral Hill Gardens, Chatham, N. J.

Our illustration shows a house of the Floral Hill Gardens, at Chatham, N. J., of which G. F. Neipp is the proprietor. Built last year by the King Construction Co., it is 42 x 300 ft., and contains 30,000 giganteum Lilies which are of a very even growth and look exceedingly healthy.

New King Construction Greenhouse at Floral Hill Gardens, Chatham, N. J.

The photograph was taken just as the first buds could be seen, and they are coming on nicely for Easter. Another house of similar dimensions is stocked with Caroons, being in heavy crop now and of top grade. One house is devoted to Rose My Maryland; one to Asparagus plumosus. The two remaining houses contain miscellaneous stock, especially bulbous flowers, of which over 300,000 were produced this season. One of the specialties of this establishment is the raising of Asparagus plumosus from seed, the young plants from which are sent all over the United States.

There are thirteen classes in the Carnation section, with first prizes \$15, \$10, \$8, \$6 and \$5, and liberal second and third prizes. A special prize, cup value \$25 or cash, is offered by Charles B. Gee of Madison for the best vase of 18 blooms, any undisseminated variety.

A notable offer in the plant section is the one in class 59, for a group of flowering and foliage plants, exclusive of *Chrysanthemums*, on a floor space of 100 sq. ft., arrayed for effect; prizes \$100, \$75 and \$50.

There is one class for Orchids, covering the best exhibit of Orchid plants, some cut flowers permissible, arranged for effect on a round table 6 ft. in diameter. The Alpine Manufacturing Co. of Madison, N. J., offers \$50 as first prize; the other prizes are \$15 and \$10.

Arthur T. Boddington of New York offers a special prize for the best 12 distinct kinds of vegetables, to be judged under the rules specified by the M. C. G. & F. Soc., first \$50, second \$20, and third \$10.

Copies of the schedule may be obtained on application to the secretary, Edward Reagan, Box 334, Morristown, N. J.

Horticultural Notes from Cuba

BY WM. FALCONER

It was February, a terrible month of snow and frost in Pittsburgh and the North generally, so my daughter and I hid us off to the balmy South, the land of sunshine and flowers; away down through Florida to Palm Beach, Miami and Knight's Key, and thence to the more congenial and frostless island of Cuba. Although we stopped at Richmond, Savannah, Jacksonville, St. Augustine and other cities of Florida, it would be too long a story to tell you about anything except some impressions of the new Republic in the West Indies.

Around Havana

Havana is a large and most beautiful city, busy and clean, and in its interior are many acres of park and prado. These are filled with tropical shade trees and shrubs, a liberal assortment of vines and garden flowers, and, in the prados especially, pretentious attempts at geometrical or carpet gardening. The lawn is Bermuda grass.

Park Bedding

The flower beds are accurately defined, banked 12 to 16 inches high with a slope of about $\frac{1}{2}$ to 1, the banks being of closely shaved grass, but much more frequently of common *Portulaca* shorn to a dense carpet. On the level above these banks carpet designs are defined in *Alternanthera*, rose, red and yellow, and lettering in *Pilea muscosa*. The panels are variously filled, in fact this filling is their weakest point. Instead of using seedlings of *Portulaca* in the banks, they use cuttings, dibbling them in, four or five together, in holes 2 in. apart. Color is the most pretentious park and right in the center of the city, but it is not as well kept as the prados, which were scrupulously neat and clean.

The Shade Trees

Most all of the shade trees, especially in the prados, are closely pollarded like Willows along a Dutch canal. What sacrilege, I thought, but it isn't so. Some months ago a cyclonic hurricane passed over the city, breaking the trees so badly that the park gardener pruned them all back to about a uniform height, under the circumstances in my judgment the best thing that could have been done with them, and now they are breaking into vigorous growth.

The commonest shade tree in Havana is *Ficus religiosa*; they call it "Poplar"; this name they also apply to *Thespesia populnea*, which is more sparingly planted; frequent also are "Laurel" (*Ficus nitida*), our common Rubber (*Ficus elastica*), and a very handsome, glossy, large, brown-rusty Rubber (*Ficus ferruginea*). In town and country the Cuba Bast tree (*Paritium elatum*) is much used; it now is in bloom, large yellow and red Hibiscus-like flowers.

Another bold tree is the Ceibo or Silk Cotton (*Eriodendron anfractuosum*), now full of big crimson-red blossoms. But nowhere did I see a Ceibo tree nearly as large as those I saw near Spanish Town, Jamaica, or in Nassau in the Bahamas. The Horse-Radish tree (*Moringa*) is also full of small whitish blooms, and the Women's Tongue tree (*Albizia*) is laden with dangling, chattering, yellow pods.

Here, still full of lacy foliage and many big brown pods, the Royal Poinciana is at home; later it will be an umbrella of fire. The Soapberry tree (*Sapindus*) looking not unlike an Ash is esteemed for shade. A frequent and refined appearing evergreen tree is *Tecoma pentaphylla*. The Sea Grape tree (*Coccoloba uvifera*), a small tree in southern Florida assumes large proportions here, and so does the tropical Almond (*Terminalia Catappa*), and both are common as highway shade trees. The Mexican Rubber tree (*Castilloa elastica*) grows finely in Cuba, and it is a smoldering question with some Orange growers whether to extend their Citrus plantations, or fill in close with *Castilloa*.

It is generally conceded that the Mexican Rubber is not quite as good as the Para Rubber (*Hevea Brasiliensis*) but I didn't notice a Hevea plant in Cuba—there may be any number of them there though, for I saw only a small part of anything. Mango trees are as much at

home here as in India and are used for shade, also shelter belts in Orange plantations. *Cecropia palmata* is a very vigorous tree with large palmate foliage white underneath, used in the parks.

The Australian "Pine" or Beefwood tree (*Casuarina equisetifolia*) so extensively used about Palm Beach and Miami is equally at home in Cuba and a good deal planted. I would strongly urge setting it out as a timber tree, for firewood and timber are scarce on the island. But the everlasting Palms prevail over the face of the whole earth, and the finest specimens of the Royal Palm I ever saw are at the Botanical Gardens, trunks 60 ft. high and as straight as a plummet.

The Smaller Trees

Among lesser trees not at all uncommon in cultivation are the Avocado Pear, the Sapodilla Plum, Mamme Apple, Custard Apple, Ginep, Rose Apple (*Jambosa*) and the Otaheite Gooseberry (*Cicca*). The Japanese Loquat does well and the China tree (*Melia*) grows like a weed. I saw several plants of the Akee Apple (*Cupania*), but they were not as happy as in more tropical parts. Tamarind trees made fine specimens. Mahogany was at home in a wild state.

Along the roadsides I noted several Calabash trees (*Crescentia*), and one of the most plentiful and beautiful trees was the Star Apple (*Chrysophyllum*) its satiny brown and golden leaves glistening in the sunshine. *Erythrina umbrosa* is a large native tree, and its branches are lopped and stuck into the ground for fence posts, and these posts take root and grow as Poplars and Willows do with us, and are now in full bloom. Although *Eucalyptus* trees grow fairly well they cannot compare in thrift with those on the Pacific Coast. *E. robusta* and *E. resinifera* are the two species I noticed.

Some of the Shrubs

Roses and shrubs hold a prominent place in all Cuban gardens, and there are large Rose nurseries in the vicinity of Havana. Most of the shrubs are evergreen and look well in or out of bloom, and a goodly number of *Crotons*, *Dracenas*, *Acalyphas*, *Phyllanthus*, *Sanchezia* and *Pandanus* are cultivated for their variegated or colored foliage alone.

Here, as in Florida, red Hibiscus and Oleanders are extravagantly planted. The orange Jessamine (*Murraya exotica*) and Grape Jessamine (*Tabernaemontana*) are among the commonest and best, and little behind is the *Pittosporum Tobira*. *Ixoras*, white and red, are in bloom; *Meyenia erecta*, white and blue, is freely used; the blue *Plumbago Capensis* makes a big bush; the *Frangipanis*, with stout fleshy stems, delight in cultivation; and several varieties of Mountain Ebony (*Bauhinia*) brighten the gardens with large showy purple or whitish blossoms.

Melia floribunda is forever in bloom, and *Allamanda Williamsii*, *Tecoma stans* and *Thivetia nerifolia* all have their quota of yellow flowers. *Hamelia patens* is a dainty plant with orange flowers, but in the Botanical Garden in Havana I found it a little tree with stem 5 in. in caliper.

Several kinds of true Jasmines prevail, but preference seems to be given to gracillimum and pubescens. *Daturas*, 8 ft. high, were laden with their big white drooping trumpets, and the scarlet *Malvaviscus* seemed as happy as on the banks of the Brazos or in Mexico. By the way, Mr. G. W. Oliver of the Bureau of Plant Industry, Washington, showed me a fine specimen in bloom of a new species from Mexico, the flowers of which are very much larger and more showy than those of the old *M. arboreus*.

Both the day and night blooming *Cestruums* are among the commonest of garden plants, and have a double value, blossoms and fragrance by day or night, and then a load of Snowberries. Rank as a weed, but pretty and spreading into broad, dense patches, several times I found *Clerodendron fatidum* with its purple fragrant flowers and malodorous leaves. A shrubby Morning Glory (*Ipomoea fistulosa*), 6 or 7 ft. high and full of large purple flowers, was quite interesting, and *Jacobinia coccinea*, red, and a yellow *Justicia*, in good bloom, were common in gardens.

Flowering Vines

In the way of vines, purple and red Bougainvilleas, yellow Bignonias, blue and white *Clitoria*, Balfour's *Clerodendron*, the great blue *Thunbergia* (*Harrisii*), and the little white one (*fragrans*), the Mexican Mountain Rose (*Antigonon*), and a few kinds of Morning Glories were in bloom.

Common Garden Flowers

Among common garden flowers lots of common annuals prevailed, such as *Zinnias*, African Marigolds, Drummond *Phloxes*, Candytuft, *Celosias*, *Salvias*, Four-o'clocks, *Ageratum* and the like. The Globe Amaranth (*Gomphrena*) judging from the quantity used is a favorite. The white *Vinca* has run wild. *Bryophyllum* abounds wherever it once got a foothold, and the same is true of *Sansevierias*. I saw *Impatiens Sultanii* in splendid form there. *Goldfussia isophylla*, *Eranthemum pulchellum*, and *Russelia juncea* are common and never out of bloom; and one of the brightest plants, wild or cultivated, is the scarlet and yellow *Aselepias curassavica*. In the park were beds of *Begonia ricinifolia* doing well. And, amusing to me, one of the commonest plants in the park flower beds was the ordinary Balm, *Ocimum basilicum*.

Stray Notes from Abroad

BY T. A. WESTON

Apobos to Trade Jealousies

I have oftentimes marveled at the spirit of good fellowship that appears to prevail among seedsmen and nurserymen throughout America, for while members of the trade on this side are generally friendly, there is not the true, brotherly attitude. A spirit of rivalry is actually beneficial, but among some of our men there is something bordering on jealousy, and at times it amounts to what one may term "getting trade anyhow, and by any means." Of course, it is not to be supposed that all U. S. A. growers and traders are free from the taint of unfairness, and the recent appeal by one of your men, a Mr. Dayton, indicates that some do lack the essential qualities that go to make up the spirit of friendliness. One of our own Carnation men, Mr. M. Allwood, has been calling on growers, on this side, for a little more square dealing, for the object of bettering the trade in general; while in the seed way we have had W. J. Unwin and Wm. Cuthbertson appealing for a similar state of affairs. The idea of securing business by means of dumping surpluses, undercutting prices, or by false claims and claptrap statements, is not calculated to improve the trade in general. The great failing over here is the lack of combination or cooperation, many of the most important firms holding off from anything that is likely to foster the true spirit of good fellowship.

The reason, perhaps, is that we have not a real trade combination such as you have in the S. A. F. & O. H. Our societies, R. H. S. and others, are largely made up of amateurs, and while the committees of such societies include many really good traders there is always a suspicion that one class or the other is seeking to come out on top.

Many of the amateurs possess the notion that traders are, in the main, seeking to make capital out of such societies; on the other hand, some of the traders suspect that the other class wants to call the tune, while they pay the piper.

The broadminded of both sections, I am sure, would like to see a better state of things existing, but until we have a general trade understanding, I fear we shall always have petty jealousies existing. I say petty, but actually these troubles are much deeper seated and in some instances culminate in tactics that border on the disgraceful.

Insecticide and Fungicide Advances

The advance made in the production of insecticides and fungicides in recent years is not far short of remarkable, and both European and American chemists and scientists appear to be approaching the final stages of investigation.

I am led to make these remarks after reading Mr. Jos. Meehan's reference to the effectiveness of Scalecide for destroying scale insects. The success of Aphine in America is also indicative of the advance that is being made in the U. S. A. On this side we are being inundated with insect and fungus fighters, many of them probably being purely quacks, but nevertheless the success of some is nothing short of phenomenal. Soil fumigants for destroying all forms of soil insects are becoming very numerous, the simplicity of their use being a particularly valuable feature.

In addition, we have a real chemical soil sterilizer, which destroys disease spores, etc. as effectively as steam, without affecting the general character of the soil.

The washes and spray fluids for clearing off insects and diseases on plants and trees are legion, many of them accomplishing all that is claimed for them. One item that is attracting no small amount of attention is a German emulsion known as H. This fluid, when applied in varying strengths, proves itself to be not only an insecticide but fungicide also. It possesses a very pungent odor, which makes it useful for checking bird depredations. As a fruit wash it can be used in Winter for destroying larvae and disease, while in Summer it is applicable for the same purpose. My own tests prove it a perfect annihilator of all forms of aphids on Roses, etc., effective as a remedy and preventive of mildew, and also of value as a remedy against spot on Carnations out-of-doors.

Recent experiments also tend to prove that it is a soil sterilizer, and destroyer of insects such as slugs, wireworms, etc., even the root aphids on Apples giving way before it. I hope to give this new emulsion a thorough testing during the coming season.

Flat Trained Fruit Trees

Respecting flat trained fruit trees, mentioned by Mr. Meehan, I would point out that such trees, including Apples, Pears and Plums, are pruned twice yearly. All growths are pruned back to five or six leaves in July or early August, and cut back to two buds in the Winter.

The training is a simple matter if maiden trees are handled properly at the beginning. In cordons, the leaders must be allowed to have their head until the desired height is reached, and much the same applies to other forms.

The Late Henry A. Stone.

Editor The Florists' Exchange:

I want, to thank you for printing the sketch of my father's life. For the last five years he had been an invalid from rheumatism but mentally he was bright as ever, and he kept his accounts and correspondence in shape until ten days before he died. He was a great reader, but "The Florists' Exchange" was his favorite paper, he read it from end to end, and would mark articles for me to read. I will continue the business until it is settled up. Possibly I may buy the property.

Kingston, N. Y.

THOMAS A. STONE.

The Exchange Read by Uptodate Horticulturist

Editor The Florists' Exchange:

I wish to express my appreciation of the notice which you ran in the EXCHANGE relative to our wanting an assistant at this station. We have concluded that the EXCHANGE is read by every uptodate horticulturist in the United States. We received a long list of applications from a very competent set of men and have selected one that we think will fill the bill desirably.

C. B. WALDRON.

North Dakota Agri. College, March 5, 1910.

Remarkable Freedom from Mildew

Editor Florists' Exchange:

We would like very much an expression of opinion from your readers regarding the absence of rose mildew in our houses. We are not rose growers, but for the past five years have always had a few plants in the houses, including Crimson and Baby Ramblers, Hermosa, Clothilde Souper, Ivory, Etoile de Lyon, Gruss an Teplitz, etc. There has never been any sulphur in the houses, which are run for Smilax exclusively, and are often very hot, close and moist; and in the Summer this is usually succeeded by very cold nights, the temperature often dropping to forty degrees or lower, as we are in the mountains—but we have never seen a trace of mildew on the Roses.

Our neighbor, near by, but on a different soil, has the usual trouble with mildew, and we had it in his houses when we were growing Roses there.

We have wondered if our immunity could be due to any constituent of the soil, especially since reading of the carbolic acid remedy as published in the EXCHANGE some time ago. Our soil is naturally very poor, and was formerly Hemlock and White Pine forest land, an open and leachy loam, but producing good crops with proper treatment. We have noticed on various species of plants growing in the original soil a malformation of the tip of the leaf that would apparently indicate the presence of some ingredient prejudicial to plant growth. This malformation, however, disappears with liming and thorough fertilization.

J. C. GALLOWAY.

Port Alleghany, Penna., March 7, 1910.

Variation of Zinnia Elegans Under Trauma

Some curious variations of Zinnias which had been cut back close to the ground, after having been frozen toward the end of May of last year, have been observed by the French florist, M. Paul Becquerel. The Zinnias in question began to grow again profusely at the base of the cut stems, and these new branches bore very fine flowers from July to the end of November. But they showed a series of remarkable variations, affecting the color of the petals and the sepals, the structure of the buds and the grouping of the leaves around the stem. For instance, a Zinnia with red double flowers produced a shoot with superb white flowers; another with red and white striped flowers produced a shoot with flowers that were wholly or partially red. On certain Zinnias were found monstrous flowers with two, or three, or even four conical receptacles bearing normal petals. And in some shoots, finally, the leaves were curiously twisted, and grouped in several whorls very closely together. M. Becquerel intends to sow some of the seed of these variations, so as to find out whether these new characteristics will be constant.—Revue Horticole.

An Easter Window Decoration

As Easter approaches, among the thoughts uppermost in the mind of a florist is the one "How shall I dress my Easter window." A setting such as is shown in the drawing herewith is both economical and effective. It

Design for an Easter Window

Drawn for The Florists' Exchange by J. Meiklejohn

may be carried out as follows: First get a thin strip of lumber, which can be procured at any lumber yard. moisten it well so that it can be bent in the form of an arch. I would suggest having it about from 2 to 2½ ft. longer than the width of the window, according to the height of the arch desired, and also of the window. Then make the ends of the strip fast to either side of the window, about 2 ft. from the rear and about 6 ft. or 7 ft. from the bottom, leaving sufficient space behind for a bank of Palms. Where this is not possible, owing to the construction of the window-casing, place the arch at the rear and build a temporary platform, on a level with the floor of the window, and behind the arch, for the bank of Palms to stand on. After the strip is in place, cover it neatly with white cheese cloth, wound around in strips of about 4 in. wide. Then take some cheap white ribbon, about 1½ in. wide, make one end fast to the ceiling, bring it down around the arch and up to the ceiling again, thus forming a perpendicular strip, pinning it at the bottom to prevent sliding. Repeat this at intervals of about 4 in. apart the entire width of the arch. Next take some good symmetrical sprays of southern Smilax and entwine it between and outside the ribbon, fastening, by means of a pin catching the ribbon, back and front, the Smilax fastened between. While the Smilax may dry up a little by the end of the week, it will still be in presentable shape. If unable to procure southern Smilax, substitute garlands of any fine green, such as Asparagus or strings of regular greenhouse Smilax; in such case, however, it will be necessary to renew the garlands two or three times during the week, and I would, therefore, advise southern Smilax, if it is possible to procure same. You will now have a very effective arch for the top of the window. Next get some dark green felt, or cloth of some description—possibly green Canton flannel would do, and could be bought much cheaper. Cover the entire bottom of the window with same, and try to avoid showing a seam. Then get a very thin board, about ¼ in. thick, 6 ft. long, and 7 in. broad, upon which nail another piece of board of the same

width and thickness, and about 31 in. long, in the form of a cross. Now get two boxes—soap boxes would do—one about 2 ft. long, 6 in. deep and 12 in. wide, the other 2½ ft. long, 6 or 7 in. deep, and 18 in. wide. Turn the smaller box upside down, and nail the cross, exactly in the center of the outside edge; afterward place the box on the top of the larger one, at an even distance from either end, with the backs even, and nail a strip to hold them together. You now have a well-shaped "Rock of Ages" cross. Next take strips of white muslin, or cheese cloth, and wind them around the body of the cross, covering the base with the same material, which can be tacked on. Have a good thick paste made of flour and hot water, allowing same to cool before using, and cover the entire cross with the paste. Then take sheets of waxed or white tissue paper—preferably waxed, which will give a lustre—and lay them flat on the cross, crinkling them with an upward motion of the fingers while the paste is yet wet, being sure to keep an even edge on the outside. Place the cross directly under and in the center of the arch and bank around the base with pots of Easter Lilies, with small pots of Ferns on the outside to hide the pots. Now take two 4 ft. wooden pedestals, painted either white or gold, and place them directly in a line with the bottom of the arch and about a foot nearer the front of the window. Artistically fill two jardinières with Easter Lilies, allowing long sprays of Asparagus Sprenger, or A. plumosus, to hang down, and place them on the pedestals. Bank around the base with pots of Easter Lilies, tapering from within a foot of the top down, forming a sort of half circle around the bases of the pedestals, with small Ferns on the outside to hide the pots. Don't, however, take up too much floor space. Now procure a wax figure, preferably that of a boy dressed as a chorister, which can be hired at a very trifling cost for the week; place it in the center of the window, the figure holding a piece of music characteristic of its office. A prie dieu—devotional chair—could also be introduced here, trimmed with Smilax and clusters of Easter flowers; but this would necessitate fresh flowers every day, which would prove to be quite an expensive item at that period of the year, how take a ten-yard piece of broad ribbon, either Nile green, or a very pale blue—of good quality, as it will show very prominently—catch it in the center, and tie a bow knot around the cross, just above the arms; have the looms stand out as much as possible, leaving long streamers at each end, and bring the streamers well out to the front of the window and catch them up in the claws of two white doves suspended from the ceiling by a black thread, or a very fine invisible wire. Sprays of Asparagus would add effect

Vacant Chair

Designed by Burt, the florist, Syracuse, N. Y.

Vacant Chair

The accompanying illustration is from a photograph of a floral piece made by Burt, the florist of Syracuse, N. Y. It was five feet high, and was made of Carnations, Roses, Narcissus, Daisies and Violets. The stems were made of Carnations paneled with Violets. It was a most artistic piece and reflected great credit on Mr. Robinson the artist.

Spring Trade Edition
To be Issued next Saturday, March 19, 1910

Florists in good standing throughout the country can avail themselves of the advertisers' offers in this Department and accept, without hesitation, orders from their local customers, transmit same to an advertiser in these columns, and thus avail themselves of the opportunities for extension of trade which are open to all. Let your customers know you fill orders by telegraph to any part of this country.

DIRECTORY OF RELIABLE RETAIL HOUSES

The retail firms advertising under this heading are all considered by the publishers of *The Florists' Exchange* as being responsible, and will accept and fill orders for Flowers, Plants and Floral Designs for Steamer Orders, departing Trains, or any given point within their reach, forwarded them by mail, telegraph or telephone, in the respective districts to which their trade extends, the usual commission being allowed. While no guarantee is expressed or implied by this paper as to the satisfactory fulfillment of orders sent to parties whose names appear in this Directory, we will state that only concerns of known good standing will be admitted in this Department. The use of Arnold's Telegraph Code No. 16, a copy of which is placed in the hands of every advertiser, will greatly facilitate this interchange of business.

Eyes
ALBANY, N. Y.
11 North Pearl Street
Cut flowers or floral designs delivered to any part of Albany and vicinity on telegraphic order. Personal attention given and satisfaction guaranteed.

Hatcher
Leading Florist
AMSTERDAM, N. Y.
Schenectady, N. Y.
Estab. 1877

Atlanta Floral Co.
ATLANTA, GEORGIA
41 Peachtree Street
We cover all of Georgia and are within easy reach of New Orleans, Jacksonville, Birmingham, Chattanooga and Charleston. Retail orders placed with us will receive careful attention.

Thos. F. Galvin
BOSTON, MASS.
124 Tremont Street
We cover all New England points. Retail orders placed with us receive careful attention. The delivery of flowers and plants to Boston sailing steamers a specialty.

J. Newman & Sons
BOSTON, MASS.
24 Tremont Street
Orders by wire receive prompt and careful execution. We can refer to leading florists in all principal cities. Established 1870.

Robt. E. Wilson
BROOKLYN, N. Y.
Fulton St. and Greene Ave
Deliveries anywhere in Brooklyn, New York, New Jersey and Long Island. Trade orders cared for from all parts of the country and delivered at Theatre, Hotel, Steamer or Residence. Tel.: Prospect 2840 and 4065.

Palmer's Flowers of Quality
BUFFALO, N. Y.
W. J. PALMER & SON. 304 Main St.

Hauswirth
CHICAGO, ILL.
The Auditorium Florist, 232 Michigan Ave.
The quality of our work is of National repute, and we are prepared to execute commissions in first-class style in Chicago and its environs.

JULIUS BAER,

1026 Chapel St., Opposite Yale College
Every facility for prompt deliveries in all parts of Connecticut. Cut Flower and Funeral work solicited.

W. E. Matthews
DAYTON, OHIO
Florist, 16 West Third Street
Flowers in any arrangement for all occasions for Dayton and vicinity. Personal attention given to all orders. Long distance telephones.

if stuck in around the knot. Now bank the rear of the window behind the arch with tall Kentia Palms in the background, and a row of Scottii Ferns in front of them to hide the pots or tubs. Two vases of yellow Forsythia could be used to advantage, placed in tall glass American Beauty vases, on either side of the cross, but well back in the bank of Palms. You have now the general effect of the window, which can be added to by small attractive Easter novelties well in the foreground. I would especially suggest, however, that you do not overdo the arrangement in the foreground of the window—use simple little novelties, such as a few small hampers, that will harmonize with the color scheme, and do not take up much room. And, above all, avoid using anything in the way of artificial flowers, which would show a lack of refinement and would hardly be in keeping with the festival.

JAS. MEIKLEJOHN.

Breitmeyer's Auto Delivery Wagon

The illustration herewith is of Breitmeyers' auto delivery wagon, driven with a Grabowsky power motor. Notwithstanding the extraordinary heavy snowfalls this Winter, this machine has done duty every day and easily overcome the heaviest of snowdrifts. Its daily saving on carriages for messengers alone more than doubly pays for its upkeep. During a recent heavy snowfall in New York City, which blocked traffic, a Grabowsky power wagon used for distributing purposes on Staten Island gave uninterrupted service all through the storm, and was one of the few automobiles that bucked the snow drifts successfully. It is no wonder that Detroit, the principal automobile city, should house a concern making the best delivery wagon for either light or heavy work. Naturally, the mayor of Detroit, with his daily increasing delivery of cut flowers must needs take advantage of a local product, when it reduces cost and time of delivery as effectively as a Grabowsky machine does.

FRANK DANZER.

John Breitmeyer's Sons Dissolved

The dissolution of the firm of John Breitmeyer's Sons, in which Philip and Fred. Breitmeyer were partners, took effect March 1. Philip Breitmeyer acquires the firm name, the Detroit end of the business consisting of the store, good will and all belongings, also the greenhouses and stock at Mack and Bellevue aves. Fred. Breitmeyer acquires all the land and greenhouses at Mt. Clemens, Mich., hitherto the growing end of the concern, including all stock and other belongings to said business, and will conduct the same under his own name.

F. D.

Holm & Olson
ST. PAUL, MINN.
20-22-24 West Fifth Street
We fill orders for any place in the TWIN CITIES and for all points in the NORTHWEST. THE LARGEST STORE IN AMERICA; the largest stock, the greatest variety. Write, wire, or phone. We are alive night and day.

The Grabowsky Power Wagon Which Defied the Snowdrifts

Abutilon Hybridum maximum
From Moeller's Deutsche Gaertner-Zeitung.

Abutilon Hybridum Maximum

This novelty, which Ernst Benary of Erfurt, Germany introduced in 1909, and which we noted in a brief paragraph in our issue of Nov. 13, is very much admired in the home of its originator, according to a writer in Moeller's Deutsche Gaertner-Zeitung. The result of cross-fertilization of the largest flowered varieties, the Benary Abutilon hybrids form a class by themselves of permanent value. The plants are strong and healthy. The leaves are very large and firm and, as the branches are spreading, they permit their wealth of bloom to come into full view. The flowers, which open wide in the form of a flat cup, are from 2½" to 3½" across. The flower stems are generally short and stout, and we have here nothing of that retreating into the leaves which make the older garden sorts so often ineffective.

The range of color was especially large last year among the seedlings, and there were many new colors so far not found in the Abutilon. Aside from the chief colors, white, yellow, pink, chamois, scarlet, purple, lilac, dark red and brown, there are found shades lying between these colors. The flowers are very lasting, not only on the plant, but also for a very long time after being cut. A number of flowers that had been exhibited at a meeting of the Erfurt Gardener's Association, was placed the following morning, uncovered, in a cold house, where they kept for about 40 hours, without wilting or becoming spotty. This indicates that this splendid Abutilon as a cut flower is especially suited for decorative purposes as, for instance, filling flat bowls and jardinières, and for table decorations.

Taken all in all, these Abutilon hybrids are among the best novelties and should soon find general favor with florists.

Color Harmony

A paper read by E. A. Slattery at the Buffalo Florists' Club meeting, Tuesday, Mar. 1, 1910, at Hotel Iroquois.

Ever since the Grecians, in the early ages, made garlands of flowers, the question of color harmony has been one that has received the attention of those interested in supplying decorations; and the difference of opinion that existed in those days, we find, are perplexing the florists of today, and in a far greater degree; for every year since those olden times, the demand has been constantly on the increase for floral decorations, until no social, business or other function is complete without its floral accompaniment.

It is for this reason, no doubt, that I have been asked this evening to give my views as to the harmony of colors in flowers, and thus pass on to the craft we represent the knowledge that I have acquired in my years of experience in this and other cities.

Color harmony! What does it mean? It means that blending of the various shades so that the picture presented to the eye will be attractive, beautiful, and fascinating to a marked degree. When you attain this you

have reached the goal of satisfaction to your patron as well as to yourself.

True color harmony must originate with the florist himself; others can suggest, but on his or her own artistic judgment one must rely. True it is, that what will be pleasing to the eye of one person will not appeal in as strong a degree to another.

Nature, 'tis true, is the best harmonizer, and a person following in her footsteps cannot wander far from the true pathway of color harmony. Certain individuals are blessed by either being born with, or later developing to a greater degree than others, the art of harmonizing colors; if this were not so all of us would be as expert harmonizers, and handle the various shades with the same impunity as Nature herself.

Nature has endowed many persons with a clearer perception of the true idea in color harmony than is given to others; to such fortunate persons, be they florists or not, the problem of color harmony has been solved, for it is within their own brains that the scheme of harmony is developed, and their handiwork will proclaim their efficiency, and generous customers seek their work.

Not many years ago, when I first took up the art of arrangement of flowers, if a customer desired a floral piece for a funeral no one thought of making up anything except in white and green; and it was the height of impropriety to send a floral token with any color in it. Today how different! The floral emblems used at obsequies are most brilliant, and often gorgeous, yet so skillfully, deftly and artistically arranged. They are most pleasing to the eye, reflect the beauties of Nature, and at the same time are in complete harmony with the surroundings in the death chamber, be it in hovel or mansion. The one color scheme has been laid away with many other obsolete ideas.

The combinations that have taken the place of the one color schemes are more cheerful than those formerly in vogue, still they retain an artistic beauty. The change has benefited both the florists and their patrons; the florist by furnishing an outlet for the flowers of various colors, allowing a greater leeway in their selection, the substitution of one flower for another, even if a little different in shading—in the one color scheme of harmony this could not be done; the patrons, by the more cheerful aspect given their tokens, and the radiation of a cheerfulness among those who are the recipients of these gifts of flowers, be it the debutante or the bereaved family of some departed soul.

The range of vision and purchase of the patron, as well as that of the florist, has been widened, until the flowers that are in commercial use today are almost as numerous as the sands on the seashore. This is a most satisfactory situation or condition, for it permits of color combinations that could never before be executed and brought to the perfection which is excelled only by Nature herself.

The true idea of artistic and harmonious color blending must, and always does, originate in the inner man or woman; the handiwork is but the visible evidence of the color working of the mind; if it is not in the mind, it cannot be successfully transmitted to the floral pieces or scheme itself. You cannot get blood out of a Beet, neither can you get artistic and harmonious combinations of colors from those persons who have no conception of harmony and beauty themselves. In submitting a few combinations of colors that, in my experience, have found favor with people in general, I do so fully realizing that they may or may not meet with your approval, for, as I said at the commencement, there were differences of opinion along this score in the ages past and they are still with us in this twentieth century; but the combinations that I will submit are those that have received the seal of public approval, and in this commercial age that is what counts.

Some years ago, I had the pleasure of first introducing a two color combination. For some length of time the idea met with ridicule, not only from members of our craft, but also from our best patrons, who pooh-poohed the idea, and not one was willing to give me the opportunity to demonstrate the beauty and artistic value of the idea by actual decoration. I abided my time and finally persuaded one of our best customers to grant my request, for I had embraced every opportunity to impress upon him the desirability and the effectiveness that I felt sure would result from the combination I had in mind.

I decorated the dinner table according to my two color scheme, and it was the "hit of my life." The colors in this particular combination were pink Killarney Roses and yellow Daisies. Today every florist in Buffalo, and in fact all over the world, is using the same combination—evidence sufficient that the combination was a most happy thought, thoroughly artistic, attractive to the eye, and pleasing to the aesthetic taste. This combination, making the hit that it did, caused me to give serious thought to other color schemes and I evolved many combinations, some of which I will mention.

Richmond Roses and deep yellow Roses, the Richmond predominating. This combination is used most extensively today and is a close second in popularity with the first mentioned combination by me.

While speaking of yellow, I might say that a combination of yellow Pompon Chrysanthemums and Bon Silene Roses make a most striking combination, and one that is

White-fringed Cyclamen

See European Seeds, page 452.

very effective from every point of view. The yellow Oncidium and Violets form a combination that is difficult to beat; and one that will command the attention of your patrons at once and, furthermore, will always be satisfactory.

The combining of Safrano Roses and Violets is very pleasing and attractive, and a combination that is difficult to beat; while many find the combination of Perle Roses and Violets forms what has been termed by many florists as "the combination irresistible."

Violets are the "standby" of the florists, for the reason that there are so many other fine combinations that will go well with them; in fact, there is not a flower of any color that will not go well with Violets in a two color combination, with the possible exception of anything scarlet. To this fact is due much of the popularity of the Violets. Whenever a customer is in doubt as to the color of the flowers he is to purchase for his lady to wear, on account of his not knowing the color of the bodice she is to use, a florist can never go astray by suggesting Violets, for they are a never failing match for any shade or color.

I could suggest to you combinations from now until morning, but the few that I have mentioned will suffice to indicate that the day of one color scheme and combination has passed forever from the florists' horizon, and that upon us falls the duty of making combinations that will be pleasing and find favor with our customers. No one has a monopoly of the combination business; put your ideas into effect; make up a combination that appeals to your idea of color attractiveness and effectiveness. It is by so doing that you give to the craft the benefit of your ideas, and thus the floral art keeps pace with the progress of the hour.

Many are bewildered by complicated color schemes; for color harmony, as we know it today, has made enormous and wonderful strides, from the color harmony of twenty, yes, five years ago, and there is no telling where further study and development of it will lead the coming generation of the florist craft.

Some New Zonal Pelargoniums

The firm of Daiker & Otto of Langenweddingen, Germany, wholesale growers of Pelargoniums, who are credited with having one of the largest and best establishments of the kind, have some novelties that are worthy the attention of florists. Foremost among those introduced last year is Tiptop. The flowers are semi-double and rise evenly above the leaves; the color is a brilliant pink, quite different from that of any other variety. Tiptop is among the most dwarf of Pelargoniums, its height not exceeding that of an Alternanthera, so that it is splendidly suited for hedging. Germania, also introduced in 1909, is another dwarf variety, with brilliant meteor-red flowers; it has no rival as a free bloomer. It is an excellent sort for pot culture, its habit being very compact.

Chief among their novelties for 1910 is the pink Director Hommel, which may be designated as a Pick Rival, for it resembles this latter in habit and in foliage as well as in the opening of the flowers; it is compact in habit and a free bloomer. Else Bethge is remarkable for its magnificent dark salmon color; the individual flowers are very large and are bunched in immense trusses nearly covering the plant. Its habit is low, and the leaves are dark green with a dark zone. Else Bethge may be considered as the finest zonal Pelargonium of this color.—Moeller's Deutsche Gaertner-Zeitung.

HARDY PERENNIAL PLANTS

All the following, and many others, are fully described in my Catalog No. 1, a richly illustrated book of 80 pages; mailed free. Send for special Trade List giving details.

Write for 1000 rate on any variety wanted in quantity.

Where no size is stated, they are first class field-grown stuff.

W. J. ELLIOTT, Auctioneer.

Please mention the Exchange when writing.

Boston

For some time there has been quite serious doubts among the growers as to whether Easter plants and flowers would be just in the right condition for that festive season. Each day this doubt is lessening and if the lovely weather we are enjoying now will only continue everything will be in tip-top shape.

Since the Lenten season began this week has been the dullest. In the early part of the week it was rather discouraging. If it wasn't for the boys in the streets things would be in bad shape. Owing to the mild weather, almost like Summer some days, the boys were able to handle large quantities of bulbous material, Carnations and Violets. They have their failings, but at a time like this we can endure them.

The lecture at Horticultural Hall on Saturday, March 5, was by Miss Laura Blanchard Dawson of Jamaica Plain. Her subject was "Horticulture as a Profession for Women." She handled her subject in an able manner and brought out many new and original ideas. There was quite a good attendance, the larger number being ladies. There was a good discussion and the principal points brought out were that women are not fitted for the hard manual labor of the profession, but that they are quite well suited to work as salesladies in retail florists' stores and all lighter occupations of the profession. It was also pointed out that ladies did most of the work in the flower stores in England and Scotland and in fact in most countries of Europe, and also in Australia and New Zealand. The question was raised "Why don't we see more ladies working in our retail florist stores?"

The next lecture will be on March 12 and the subject will be "Lilies in the Home Garden," by E. S. Miller, Wading River, N. Y. This should prove an interesting subject as most of us need some more practical information on this beautiful genus of garden plants. There are only a few species of hardy Lilies that grow satisfactorily in New England.

There was a batch of eight plants of Dendrobium nobile virginale exhibited at the Horticultural Hall on Saturday, March 5, by Dr. G. C. Weld (Wm. C. Rust, mgr.). This was a most remarkable lot of plants. Every one was a perfect specimen and a good large specimen at that. This is a rather unprofitable Dendrobium, only seen in small pieces, and we did not think there were such large specimens in this country. We believe this is the true Dendrobium nobile virginale and those that we have seen before exhibited were only forms of Dendrobium nobile Ballianum. The plants were bought of Hugh Low & Co. eleven

months ago. They were awarded a silver medal, and if they were only owned or cared for a little longer by the grower we think he ought to have had a higher award. This is the whitest Dendrobium we have seen and it is very floriferous. It will make a capital florists' Orchid and there is no reason why in a few years it won't be quite plentiful, and also quite cheap. The plants on exhibition only cost \$5 a piece eleven months ago—they ought to be worth today from \$25 to \$30 each. The grower, Mr. Rust, also received an award of a cultural certificate, which he thoroughly deserved for this fine exhibit.

The Gardeners and Florists' Club will hold its first field day for this year on March 19. The members are to visit the W. W. Edgar Company's greenhouse and inspect the Easter plants. The writer visited this establishment on Washington's Birthday and he can assure all that the plants will be in fine condition for March 19. The houses of Acacia paradoxa, Azaleas and Lilies are well worthy of inspection. Peirce Bros. of Waverley are close by and there may be time to inspect their immense stock of Lilies, Azaleas and other Easter plants, which are said to be in very fine condition this year.

William N. Craig, secretary of the Gardeners and Florists' Club delivered a lecture on Tuesday, March 8, before the members of the Manchester Institute of Arts and Sciences at Manchester, N. H. His subject was "Planting the Home Garden," illustrated by fine stereoscopic pictures.

Alexander Montgomery has been on the sick list for a week, but he is now convalescent. We hope in a few days that he will be quite well again and able to resume his duties.

The best American Beauty Roses I have seen this year are shipped from the Waban Rose Conservatories. Their Killarneys are also of the very highest grades.

Carbone has some very fine Calla Eliotiana and vases of Phalenopsis in his window this week.

Galvin's Tremont st. window has some very dark varieties of Dendrobium nobile and vases of Phalenopsis, which are very attractive and much admired.

Penn's store on Bromfield st. has always the best Violets in town, and their window displays of this flower are most elaborate.

Probably one of the last gifts the late James J. H. Gregory of Marblehead gave was a fund for an annual premium for the best Apple orchard in the State of Maine. This prize is offered for the first time this year.

Mrs. E. M. Gill of Medford has been on the sick list for a week. We missed

her at Horticultural Hall on Saturday. Since March came in we have had real Spring weather and we have seen in some of the gardens around the Hub, Snowdrops, Scilla Sibirica, and Crocuses in all colors, in full bloom.

William S. Grassie, who has been employed at the Harvard Botanic Garden for the past three years, has resigned, and has bought several acres of land at Waverley, Mass., where he is going to build a large range of houses at once and grow for the market. His many friends wish him much success in his business.

Charles Graus of Watertown is shipping some well grown Queen Alexandra Marguerites in pots. The plants are stocky, well branched, good healthy foliage, and have an abundance of flowers.

Butterworth's Lily of the Valley in pots is well grown, and is bringing good prices in the market.

Thomas Peglar at the Park st. market is handling some extra fine Wallflowers. They are grown by Lemoine Bros., South Framingham.

Robert McGorum's Shanrocks are the best we have seen so far this season. We saw a fine batch from him a few days ago. His Killarney, Bride, and Bride-maid Roses are of extra good quality.

The energetic Sydney Hoffman has opened a new retail store on the corner of Devonshire and State sts. The store is nicely located and very well equipped. This is the first time, as far as is known, that there has been a flower store on State st. Mr. Hoffman is right among all the financial men and the location should prove a good one.

Cyclamens in 6-in. pots, with an abundance of flowers, find a ready sale in Park st. market No. 2. They are grown by J. W. Foot, Reading, Mass.

Mann Bros. are shipping some fine bulbous material. Their Tulips are really very fine. Their Narcissus Sir Watkins, Barri conspicuus and poeticus are of very good quality.

At the present time at the Park st. market there may be seen some fine specimens of Lilium speciosum from Peirce Bros. at Waverley.

The best Callas that are seen in the market come from the Willow Hill Greenhouses, West Roxbury. They are also shipping very nice plants in flower of Rose Clothilde Souperet.

The friends of John W. Duncan, who had feared he might have been caught in the dreadful avalanche, will be pleased to know that he reached Spokane in safety on March 1. He had a very comfortable journey and saw plenty of snow in the mountains. When he reached Spokane he found the weather delightful and there was no snow there.

R. C. Bredgham has purchased the stock and good-will of the business of Albert Scott, at 67 Beacon st., and will continue the business.

On March 4, Thomas J. Grey, the seedsman, gave an interesting address before the North Shore Hort. Society, subject, "The Old Gardeners." It proved to be of great interest to the younger gardeners. Mr. Grey told some very interesting reminiscences of the men who laid the foundations of the gardens of New England on which the younger generation is building today.

There was a good discussion and Joseph Clarke, one of the oldest and most respected gardeners in New England, took part. Mr. Grey received the thanks of the Society for his interesting lecture.

Two large plants of Hamamelis Japonica, which are in full bloom at the Arnold Arboretum, are drawing a great deal of attention. Crocuses, Squills (Scilla Sibirica) and four species of Snowdrops are in bloom at the Harvard Botanic Garden.

R. C.

Pittsburgh (Pa.) Florists' Club

The monthly meeting of the Club, held last week in the Dutch room of the Fort Pitt Hotel, was well attended; about 45 members were present. Two new members were elected and four proposed. The auditing committee reported everything in good order. The secretary stated that the list of members was 167, and one member died during the year. The secretary's salary was fixed at \$75 for the coming year. The resignation of Wm. Hamilton, former supt. of the North Side Parks, was accepted. The finance committee, which had charge of matters of the Carnation Society's convention in January made a final report, stating that a nice balance was left over after paying all expenses, and, as the money was contributed solely for the

Don't Get Left—Last Call on Rooted Cuttings, April Delivery

You still have one opportunity to get a stock of rooted cuttings of our splendid new Carnation, Dorothy Gordon, for Fall and Winter trade. Early orders took our entire stock during February and March, but we offer a limited

quantity of fine rooted cuttings for April delivery—which, from past experience, however, won't last long. Meanwhile our

CARNATION DOROTHY GORDON

has added to its laurels: At the Toronto show, just closed, a gold medal was awarded this splendid Carnation when exhibited in competition with others. Carnation Dorothy Gordon is a winner—a winner of prizes and a winner of profits, as our customers are learning.

Some of its merits are: Strong constitution—absolutely free from disease; wonderful productiveness—50% more flowers than Enchantress; good color—clear, uniform pink; splendid form and keeping qualities—flowers last four and

six days after cutting; and enormous size—averaging three inches in diameter. We know of no variety possessing all those strong qualities.

Order NOW some of the splendid stock we offer for April. Prices remain the same—\$10.00 per 100, \$75.00 per 1000—and you'll find, long before the season is over, that it was the best investment you made this year. If you want to investigate first, come to see us, or write for particulars—but don't delay, for the stock won't last!

NOTE THE DAY AND DATE

SPECIAL: Preparation Now Being Made for Sale of Flowering Plants Each Day During the Week Preceding Easter. Correspondence Invited.

Please mention the Exchange when writing.

entertainment of the visiting delegates, it had decided to return to each contributor his pro rata share. A letter was read from the Chicago Florists' Club, thanking the Pittsburgh florists for hospitalities extended to their visiting members. The congratulations of the Club were extended to B. L. Elliott and Edward Blind, who were married lately. The sympathy of the Club was tendered to James Moore, foreman of the North Side Park, in the recent death of his father.

The subject for the meeting was Easter flowers, but the exhibition thereof was very small. Merlin Harris, gen. to Dr. Shafer, showed a few Orchids, Phalenopsis Schilleriana, Dendrobium nobile, crassinodis and Wardianum, Dendrobium glumaceum; a cultural certificate was awarded to his exhibit. Frank Crook, gen. to H. Park, showed nice pot Hyacinths, Queen of the Blues, La Grandesse, Gertrude and Morena; Tulips Montrose, Keizerkroon and Belle Alliance; Narcissus Poeticus ornatus, Emperor and Golden Spur, for which he was awarded a cash prize donated by H. Waterer Co., of Philadelphia. Messrs. McCallum and Wiseman acted as judges.

The secretary announced that he had received \$12 cash to be given to the private gardeners for next month's competitive display as per schedule for 1910.

Easter Lilies were discussed, and it was thought that not so many would be in bloom for Easter as the date is early and the Lilies are coming on slowly. Mr. Randolph of Randolph & McClements said that his were fine and the percentage of loss would be small; he grows L. giganteum and Formosum, preferring the first named, and thought the Formosum were mostly seedlings and uncertain.

John Jones, foreman of Schenley Park Conservatories, claims that his Lilies will be in bloom for Easter although they did not look very promising for Easter bloom when the delegates to the A. C. S. convention visited the conservatories in January last; one gentleman, from the West, I think, promised to buy a silk hat for John if they came to bloom. I can see John wearing that hat after Easter.

After the meeting adjourned, Edward Blind, who as before stated, recently took unto himself a wife, asked the members present to partake of some refreshments and a very pleasant hour was spent.

E. C. REINEMAN.

Tuxedo (N. Y.) Hort. Society

On Wednesday evening, March 2, the old and new members of the Tuxedo Hort. Soc. assembled in the Village Club, and by way of celebrating the reorganization of the Society had a tip top time from start to finish. The attendance was good and the enthusiasm showed on the faces of all. The president, Thomas Murray, made all feel at home, and started the affair by drawing for sides for bowling with Fred. Bently, captain on the other side. This part

was thoroughly enjoyed by everybody. A collation followed, which was also enjoyed. After cigars were passed around the president in a fitting address expressed the pleasure it gave him to see so many present, and all eager to make the Society a success. Mr. Bently spoke in the same vein, urging harmony as one of the great essentials for success. Vice-president Mac. Machan, James Allen, David S. Miller, Albert Fischer, Joseph Tansey, G. O. Bush, Richard Schaeffer, Michael Cassidy, David McIntosh and Wm. Brock also spoke interestingly in relation to matters concerning the Society. Taken all through, the evening was spent profitably and pleasantly. Much credit is due to the committee for its success. The committee consisted of Fred. Bently, G. O. Bush and Fredk. Rake.

The regular monthly meeting of the Society was held Tuesday evening, March 8. President Thomas Murray was in the chair, and there was a good attendance of members on the floor. Ten applications for membership were acted upon and all the applicants elected. About as many applications were handed to the secretary and the required action taken regarding them. The members are coming in so rapidly that next month every gardener and horticulturist in the Park and vicinity will be enrolled in the Society, making an active membership then much larger than the old Society ever had. A very interesting discussion followed the routine business, on "Pruning." Every member took part in it, the whole making one of the liveliest discussions the writer has had the privilege of listening to. One member laid much stress on the importance of Summer pruning, and that only for Apples and Pears. The prevailing opinion as expressed in the remarks of the speakers, was that too much pruning is done in the Winter and Spring in the cases of fruit trees and flowering shrubs. The president then called for an expression of opinion on the advisability of holding one or two shows this year, when it was plainly evident that the members wish to have a Rose show in addition to a Chrysanthemum show. The executive committee was asked to take note of this sentiment, and try to act accordingly.

D. M.

Buffalo (N. Y.) Florists' Club

The annual election, banquet and Carnation Show, was held at the Iroquois Hotel on Tuesday, March 1.

The Carnations shown were very good and much admired by the local florists and, no doubt, the exhibit will be the means of selling quite a few cuttings. The show demonstrated that there were a few growers of Carnations in this section who will bear watching. A new variety was shown by Mr. Stroh of Attica, that he intends sending out next year; it is very similar to Enchantress,

but has a fuller flower and is of a deeper shade. The blooms sent in by Cottage Gardens, N. Y., Bauer & Smith and Messrs. Gunther, Palmer, Ehman, White Bros., Anthony Paula and others were much admired and the Committee wish to thank them one and all.

Election results: Joseph Striet, president; Otto Gillis, vice-president; Wm. Legg, secretary (re-elected); Jerome Deutcher, financial secretary. Directors, Wm. Palmer, Wm. Kasting, S. A. Anderson.

The election was followed by the banquet and songs and music by Joseph Tobin, Andrew Fisher, Mark Palmer, and then by the treat of the evening, cartoons of all the prominent members, which were all drawn by Mark Palmer, the 18-year old son of W. J. Palmer, judged by the applause received they made a great hit. Then Mr. Slattery read his paper on "Color Harmony," which will be found in another column of this issue; the subject matter treated showed considerable research and was well received.

W. H. G.

Worcester Co. (Mass.) Hort. Soc.

This Society held the first meeting of the season in its hall, Mar. 3, and it proved one of the best the Society ever held. The attendance was large, so also were the displays which were in excellent condition. Many well known florists of Worcester County were present. One of the leading attractions was an Orchid (a Dendrobium) grown by Wm. McAllister, gen. for Mrs. J. C. Whitin of Whitinsville; which carried 228 flowers. In the front part of the hall, near the stage, Leonard C. Midgeley had an attractive display of Roses; his White Killarney and Richmond were unusually fine.

Edwin W. Breed of Clinton made a fine showing of Cyclamens, Hyacinths, Azaleas and other plants. The estate of H. F. A. Lange was at the top in most of the displays. CAROLUS.

Newport (R. I.) Horticultural Society

At the meeting of the above named Society on Tuesday evening, March 3, the attendance was fairly good. President James Robertson was in the chair. It was voted to hold the Rose and Strawberry show at Masonic Hall on the same dates as last year, June 23-24. A premium list was adopted. Offer of special premiums for the children's classes amounting to \$60 were received from Mr. and Mrs. Lorillard Spencer; this amount will cover both the June exhibition and school garden premiums. The S. G. Harris special prizes of \$10 and \$5 are offered for the best display of Peony blooms in six varieties, six blooms of each. One new member was elected, and one name was presented for associate membership—that of a lady—which means annual dues of \$5 per year. ALEXANDER MacLELLAN.

Catalogs Received

PALISADES NURSERIES, INC., Sparkill, N. Y.—1910 Wholesale Price List of Hardy Perennials, Vines, Shrubs, Roses, Evergreens, Fruit and Shade Trees. This is a well gotten up catalog of 24 pages, illustrated with fine halftones.

F. W. KELSEY NURSERY CO., 150 Broadway, New York City.—Eighteen page catalog of Trees and Hardy Plants for all purposes, including Deciduous Trees, Hardy Evergreens, Evergreen and Deciduous Shrubs, Hardy Rhododendrons, Hardy Plants, Hardy Vines and Climbers, Perennials, Grasses, Roses and Fruits.

THE STANDARD PUMP & ENGINE COMPANY, Cleveland, O.—"The Standard Pumping Engines for Water Supply." Under this title is presented catalog No. 10 of the company's Standard Pumping Engines using gas or gasoline for fuel. It contains descriptions of pumps designed for pumping from shallow wells, cisterns, lakes or rivers, etc., as well as some to pump from deep wells. The information contained in the publication is very complete and quite sufficient to enable purchasers to order from it, only, as is stated in the introduction, "It is neither possible or desirable to give all the details of construction of the different machines shown." The publication is printed on extra heavy enameled paper stock and contains a number of unusually fine illustrations. Every florist interested in water supply should obtain a copy of this catalog, which may be had on application to the company.

WATKINS & SIMPSON, Ltd., London, England.—Their annual Foreign and Colonial Wholesale Catalog of 112 pages, which, throughout, is most attractively and fully illustrated with the finest halftone reproductions. The company offers this season, an unusually attractive list of novelties and specialties in both vegetables and flowers. Among the former the following are especially noted: Garden Pea Primo, Bean Eclipse Longpod, and Early Dawn Tomato. Among the flower seed introductions are: four new colors in dwarf-growing Antirrhinums—Dainty Queen, Rose Queen, Buff Queen, and Golden Fairy; several new Asters, Dahlias and Carnations. Their matchless Pansy is offered this year, and is an unusually fine addition to the giant varieties. In Sweet Peas, Plectra, George Stark, and an improved strain of King Edward VII are offered, also a full list of the best "Spencers" as well as the older sorts. As always, they list a full line of standard seeds, both flower and vegetable. A special feature this season is the combining of their illustrated album, which they published a few years ago, with the present catalog, also adding many new electros from photographs taken from nature on their trial grounds. These fine catalog illustrations will all be supplied to the trade at reasonable rates.

Something Different In Ribbons

Are Qualities that bear The PINE TREE LABEL, for Novelty Decorations, Funeral Decorations and Weddings. The rich, brilliant lustre, the good hand and beautiful appearance, make these Ribbons head and shoulders over any similar qualities, and they cost no more than the ordinary trashy ribbons usually offered around our prices.

It pays to keep in touch with the manufacturer.

WORCESTER, MASS.—Aitken, the florist, at 424 Main st., is giving up business here and removing to Springfield.

STOCKTON, CAL.—The Flower Shop is the name of a new florist store opened in the Idle Hour Theatre building on N. Sutter st., by Messrs. Davis & Louttit.

WASHINGTON, PA.—C. C. Philips, florist, and Earl J. Sedam, who was lately in charge of the Forrest Greenhouses have formed a partnership under the firm name of Philips & Sedam, and have purchased the floral business with which they have been connected, and will continue the same.

JACKSONVILLE, FLA.—The Jacksonville Floral Co. recently completed a hurry order from President Taft for 10 dozen American Beauty Roses to be delivered in Havana, Cuba, on the occasion of the wedding of Miss Gomez, daughter of Pres. Gomez, of Cuba. The Roses were delivered by special messenger at the American legation in Havana.

NEWBURGH, N. Y.—Schaeffers, the florists on Broadway, recently received fifty cents conscience money from Fishkill-on-the-Hudson. The money came with a letter, which read: "Enclosed please find 50 cents, the price of a plant I once took without permission." The letter was well written and the spelling of every word was correct. The letter was written on the back of an old scrap of paper.

PEORIA, ILL.—The floral decorations of the tables at the Creve Coeur banquet were the work of Geo. A. Kuhl, the florist of this place, and were deserving of special praise. The tall glasses of Spring flowers were a happy departure from the common heavy centerpiece of hot house plants and were the subject of general admiration. The George Wittbold Co. of Chicago, designed the decorations of the main hall, which were so beautiful as to excite comment from all visitors.

Health Among the Flowers

Lately it has come to my knowledge that one of the most conspicuous women in England saved her life from wreckage through the health-giving grace of a garden.

Owing to the prominence of her family, and the traditions of her birth, she was engaged when little more than a schoolgirl to a peer of the realm, an arrangement that to her was utterly distasteful. The peer was double her age, a man of no charm of personality and a renowned lover of the material pleasures of life. The girl was idealistic, high-strung and nervous to a degree.

A few days before the wedding she revolted openly. It then became a matter of nine days' gossip that the peer had been thrown over. Her relatives and friends referred to her as "Poor Amy," and as "Amy, who is a bit queer." Indeed, she felt herself to be so amid the general disapproval that broke over her head. She dreaded to go anywhere, since everywhere she felt that she was adversely criticised. At length her nerves gave away and she had a severe fit of illness.

One of the first things that interested her after the crisis was a bouquet of Jonquils. They seemed to open up a train of thought that she had never had before. She wondered about them a great deal.

Some months later it was stated in a society paper that this erratic lady was growing Daffodils in extraordinary numbers, and that she had, moreover, sent men to foreign countries to hunt for rare specimens of these plants. Indeed, her collection of Daffodils soon grew to be as much of an interest to horticulturists as the breaking of her engagement with the peer had been to society.

After awhile her interest extended to other flowers. She studied them scientifically, as well as from an artistic point of view. In an incredibly short time she became recognized as an authority on mooted points of plant distinctions. The famous Kew Gardens in London, even, have been pushed to ask her advice on more occasions than one. In truth, she is wedded to her flowers. In their presence she feels no nervousness, no lack of confidence. It seems that through some occult force they have the power to soothe and to comfort her, as well as to make her happy. She is at present, besides, a woman of abundant health.—ELAINE VALENTINE in Good Housekeeping Magazine.

New Rose "Leuchtfeuer"

From Moller's Deutsche Gaertner-Zeitung.

Under the title "Confusion in Rose Nomenclature," page 418, issue of March 5, we published a translation from Moeller's Deutsche Gaertner-Zeitung showing the confusion into which the nomenclature of this Rose (Bright Fire) has fallen. It appears the originator takes objection to the Rose being called by any other name than Bright Fire.

PURCELLVILLE, VA.—The sympathy of his friends is extended to Mr. Joseph H. Sperry, manager Virginia Nursery Co., and to Mrs. Sperry, in the sudden death of their eldest daughter, aged 32, which occurred recently in Massachusetts.

FRANKFORT, KY.—Louis D. Singer, who has been with John A. Keller in Lexington for some time, has leased the Henry greenhouses near Thorn Hill. Mr. Singer learned his business in New York and other large cities, and should make a success of his venture.

THE third edition of our Design Book is now ready to be mailed out to purchasers. It has been thoroughly revised and greatly improved and is easily worth Ten Dollars a copy to anyone with a Retail Trade. Sixteen pages have been added, older designs eliminated and many new and beautiful suggestions incorporated.

THE FLORISTS' EXCHANGE DESIGN BOOK

Handsomely printed on enameled stock, and containing 80 pages, size 9x12 inches, with strong paper cover.

The work contains a reproduction of some 216 Designs, such as:

Bridal Bouquets	Casket Covers	Easels
Broken Columns	Gates Ajar	Panels
Christmas Wreaths and Baskets	Floral Chairs	Wreaths in great assortment
Easter Baskets and other Easter Designs	Harpes	Standing Wreaths
	Horseshoes	Standing Crosses
	Lyres	
	Pillows	

Miscellaneous Designs in quantity, including Decorated Automobiles, Railway Designs, Flags, Ships and Steamers, Shields, Broken Wheels, &c., Emblems, Table, Mantel and Mirror Decorations and Christmas and Church Decorations.

Page 80 shows forms for Masonic, Fraternal and other Orders, for which wire designs are kept in stock by the supply houses.

TERMS OF SALE—The Florists' Exchange for two years and one copy Design Book, \$2.50, delivery prepaid. This offer is open to new subscribers or to subscribers renewing. One copy of the Design Book to present subscribers for 75c., delivery prepaid. No copies obtainable except as above. Money refunded if book is not satisfactory to purchaser.

Only one copy can be supplied at the 75c. rate. Subscribers desiring more than the one copy can secure them at the rate of \$1.00 each, postage prepaid.

Handsomely and durably bound, in stiff board covers, with 32 blank leaves for pasting in clippings of other designs, at One Dollar additional to above prices.

All prices include delivery prepaid.

S. A. F. and O. H.

The Mid-leaf meeting of the executive board of the Society of American Florists' and Ornamental Horticulturists will be held at the Seneca Hotel, Rochester, New York, March 12, at 10 a.m., and will continue until March 15 inclusive. H. B. DORNER, Secretary.

SAN DIEGO, CAL.—Articles of incorporation of the San Diego Floral Association were filed Feb. 18, in the office of the county clerk, Alfred D. Robinson, L. A. Blochman, S. M. Daley, Kate O. Sessions, Lymon J. Gage, Rodacy Stokes and Mrs. P. P. White being named as directors. The purposes of the Association, as stated in the articles of incorporation are to promote knowledge of floriculture, and a larger appreciation of flowers; to encourage the science, art and practice of floriculture, horticulture and arboriculture, and the beautification of grounds about homes, schools and other public buildings. It is also the purpose of the organization to hold floral exhibitions. The Association has become widely known through gifts of flowers to those ill in hospitals, for the graves of the strangers who have died within the gates of San Diego, and the providing of decorations for all public gatherings.

EARLY—FREE—LARGE

Rooted Cuttings Ready Now, per 100 \$12.00, per 1000 \$100.00

Henry Schrade
Saratoga Springs, N. Y. Scranton Florist Supply Co.
Scranton, Pa.

HENRY SCHRADE,

Saratoga Springs, N. Y.

Dear Sir:—We received the cuttings of "Canary Bird" this day in good condition, and are also well pleased with the appearance of the blooms you sent us of this variety. In fact, we would like to increase our order, as this carnation looks very good and we would like to grow a fair batch for trial next season. The blooms which you sent us are at this writing in good condition, they having expanded considerable and it shows to be a good keeper. Can you ship us at an early date an additional quantity of cuttings?

An early reply would be appreciated.

Yours very truly,

L. J. REUTER,
For S. J. Reuter & Son, Inc

PETER REINBERG, 35 Randolph Street, Chicago

Please mention the Exchange when writing.

New Bedford, Mass.

Trade the past week has been fair. There is a good supply of flowers coming into this market. Prices have dropped somewhat from last week; Carnations are now retailing at 50c. per dozen; Roses at \$1.50 per dozen; Violets at 75c. and \$1 per 100 blooms; Sweet Peas, \$1 per 100 blooms. Bulb stock is quite plentiful just now, and 50c. per dozen in general is the retail price. A few single Narcissus retail at 35c. per dozen. Easter Lilies sell at \$2.50 per dozen retail, and Callas at \$2. Some nice Snapdragon sells at \$1 per dozen retail. Mignonette of good quality also sells fairly well; Freesias are about all over with us now; there is very little demand for these sweet flowers outside of funeral work.

Funeral work of late has been good, using up immense lots of stock. The recent weather we have had being very mild and warm has opened up flowers quickly and the result has been a regular "glut." We are now feeling the effects of it.

Our old friend the fakir is with us now. He is slashing prices right and left. All last week he was selling Carnations and Violets at ridiculously low prices—Carnations at 30c. per dozen, and big bunches of Violets at 25c. per bunch, and even cheaper. This must certainly hurt the storemen uptown, who have to pay high rentals. I suppose it is the same in almost every business; there are always some skins ready to beat down prices.

One of our florist growers had a man selling Violets on Saturday last at 10c. per bunch.

We look for a toning up of prices for Easter, and a good demand.

H. A. Jahn has produced a Daisy that is practically the same thing as the Hen and Chickens' Daisy of Germany, known botanically as *Bellis perennis* proliferata. This flower has a large central blossom with small offshoots. It certainly is most curious.

H. A. Jahn has some fine promising seedling Carnations that will be heard from later.

The weather continues warm.

HORTICO.

Topeka, Kan.

Ed. G. Bass, the Topeka florist, who has been selected by the Illinois Florists' Association to act as secretary of a similar organization in Kansas, has issued a call for a meeting of the florists of Kansas to be held in Topeka June 8. The purpose of the meeting is to organize the florists and all others who grow plants under glass in Kansas. Mr. Bass thinks there are about 100 florists in Kansas and he will attempt to bring all of them to Topeka for the meeting.

Plant Culture

By GEO. W. OLIVER.

Propagator to the Bureau of Plant Industry, U. S. Department of Agriculture, Washington, D. C.

New, revised and enlarged edition, fully illustrated, handsomely printed on enameled paper and bound in Vellum de Luxe cloth, 12 mo., 200 pages. Sample pages on application. Purely an American book by an American author.

The Book of Books for the Grower. Compact, concise, practical, containing all the information bearing on present day practice. You need it for yourself, for your foreman, for your men.

THE EXCHANGE—Best Advertising Medium

GREENHOUSE HEATING

By Fredk. J. Elder, Heating Engineer for the Lord & Burnham Co

There are two principal methods of greenhouse heating, hot water and steam, and both methods accomplish their results by the radiation of heat from the best and the cheapest possible radiating surface, i. e. horizontal iron pipe.

In either system the piping is generally placed at the sides of the house and under the plant benches, and for almost all purposes this seems to be the best possible distribution. In some cases solid beds of the same height are preferred to raised benches, and in these cases the piping is generally hung on the side walls and on the sides of the solid beds; and in vegetable houses, where there are no raised beds at all or very low beds, say 8" to 12" high, the piping is hung on the side walls and as low as convenience will permit on the pipe columns supporting the roof, and sometimes single lines are placed around the low solid beds.

Under bench heating is preferable for nearly all purposes to over-bench heating, but plants with flower buds will be forced into flower more quickly and Mushrooms seem to do better with over-bench heating. It seems to

exposure, and the same bench arrangement; one house was heated by hot water, the other by steam, and each system capable of the same temperature results. This grower states that he noticed a decided difference in the crops taken from the two houses. That from the water heated house was superior to the crop from the steam heated house. As all other conditions seemed equal, he thought at first that the difference in results obtained was probably due to the fact that different growers were in charge of the houses, so he exchanged the growers, but found the difference in crops constant; and he now feels certain that, at least for Rose and Carnation growing, hot water heating is superior to steam heating.

Economy

It is not possible to state which of the two systems is the more economical under all conditions. In small and fair-sized private ranges and small and moderate-sized commercial ranges, gravity hot water systems would be found to be, perhaps, slightly more economical than steam, and this is, no doubt, due more to the following fact than to any other: i. e., a heavy fire is not required to produce a circulation in a hot water system and only a mild heat is required in mild weather, but considerable fire is required to generate steam, and there is little or no circulation in a steam heating plant before steam is generated. This condition does not exist, and a greater degree of economy is attained, in larger plants, whether of steam or hot water, because in the larger plants where boilers are set in batteries and the systems are completely under control by shut-off and cut-out valves it is possible to make approximately just the quantity of hot water, just the quantity of steam, or in other words, just the number of B. T. U.* required, and the waste is less, proportionately, than in smaller plants. In the largest plants with system properly constructed and properly proportioned the writer believes that in economy of operation and consumption of fuel there is no choice between hot water and steam heating.

Proportioning Radiating Surface

A greenhouse is, without doubt, the most difficult of all structures to heat, and is, it might be said, the least responsive to scientific calculation to ascertain the required quantities of radiation. This is due to the great susceptibility of a greenhouse to the cooling effects of winds—if all outside air were at all time quiet air, the heat loss per square foot of exposed surface would be constant, notwithstanding the fact that the openings between the lapped lights of glass are not at all of the same size. Excepting sheet iron only, glass is, of all building materials, the greatest conductor of heat, and all greenhouse radiation must be figured in ratio to the exposed glass surface or its equivalent in other exposed surfaces. The ratios following have been used by Lord & Burnham Co. for years, and have given satisfaction.

For Hot Water Heating

Table of Factors for finding the number of sq. ft. of pipe surface required to heat to different temperatures in greenhouses when the outside temperature is at zero.
For 70° to 75° divide square feet of glass and equivalent by 1.8.
For 65° to 70° divide square feet of glass and equivalent by 2.25.

For 60° to 65° divide square feet of glass and equivalent by 2.62.
For 55° to 60° divide square feet of glass and equivalent by 3.
For 50° to 55° divide square feet of glass and equivalent by 3.46.
For 45° to 50° divide square feet of glass and equivalent by 4.
For 40° to 45° divide square feet of glass and equivalent by 4.67.
For 35° to 40° divide square feet of glass and equivalent by 5.5.

From the use of such a list of divisors it will appear that greenhouse heating, as practiced, is a rule of thumb business. The list of divisors is not, however, entirely a rule of thumb, but I must admit that it amounts to nearly the same thing, inasmuch as it is a fact that in the derivation of the formula from which the divisors are obtained the premises are not all absolutely correct. Therefore, the conclusion can hardly be true to all cases.

The formula is $\frac{(T-T^1)G}{(150-T)^2} = R$ Where T equals the temperature required in a greenhouse, T¹ equals the coldest outside temperature, G equals glass and equivalent exposure, 150 equals average temperature in degrees of water in pipes, 2 equals the B. T. U. given off per square foot of pipe surface per hour per degree of difference between the temperature of the air and that of the water in the pipes, and R equals the required number of square feet of radiating surface. This formula is constructed on the theory that every sq. ft. of glass surface loses 1 B. T. U. per hour per degree of difference between the inside temperature and the temperature outside, and that every sq. ft. of pipe surface effuses 2 B. T. U. per hour per degree of difference between the temperature of the water in the pipes and the air surrounding the pipes. It is evident that if one sq. ft. of ordinary vertical window glass surface loses 1 B. T. U. per hour per degree of difference between the inside and the outside temperatures, one square foot of greenhouse roof surface with its lapped glass between the lights of which the wind blows at will and which surface is nearer horizontal than vertical will lose heat at a considerably greater rate. Also, horizontal pipe coils do radiate heat at a rate of 2.25 B. T. U. and upward per sq. ft. per hour per degree of difference, and the rate may be taken as 2.2 B. T. U. without appreciable error, and, finally, the average temperature of the pipes is usually 10 or 15° higher than 150°, and on demand it may be brought to an average temperature of 180°. So it is evident that the formula is constructed from data which is not absolutely correct. Nevertheless, the results obtained are to a degree constant.

The quantities of radiation produced by these divisors are large, and assurance is felt that the temperatures required will be maintained through eight to ten hours of inattention to the fire during the night, during which time the fires are banked and provided with very little draft. It is owing to this feature, namely that hot water heaters generally get no attention at night, that large pipes are preferable to small pipes for greenhouse heating by gravity circulation of hot water. These large pipe systems—contemptuously called "water logged" by manufacturers of different devices which are calculated or are represented to produce the same or a greater amount of heat with a lesser consumption of coal—will maintain temperatures during the night, and toward morning, far better than a small pipe system can.

I have stated that the susceptibility of greenhouses to cooling winds make them hard to heat. The actual loss of heat through laps between the glass is next to impossible to calculate. In the heating of dwellings houses, hospitals, offices, and all such buildings, engineers calculate very closely the number of air changes per

*A B. T. U. is a British Thermal Unit, the standard of heating measurement. It represents the quantity of heat required to raise the temperature of 1 lb. of water 1° Fahr.

Diagram Showing Principle of Raised Bench with Under Bench Heating

be the general practice to require raised benches with under-bench heating for Rose growing.

It is not possible to say that either hot water heating or steam heating is better for all purposes, and under all conditions; each has its advantages and each its disadvantages under certain conditions. It seems to be a fact, however, that hot water heating is generally preferable on its own merits for general purposes, but it undoubtedly costs more to install than does a steam plant of the same capacity.

Hot water piping diffuses a mild heat more nearly like sun heat than that radiated from steam pipes, a more natural heat, let us say, and as it is lower in temperature it requires more units of radiation, and more pipes than steam heating requires; and because of this it permits of a better distribution and more even temperatures throughout the greenhouse.

Hot Water Systems Best for Carnations and Roses

One of the foremost growers in the Eastern States has had two large houses of the same section, the same glass

Diagram B

The roof of the large house is exactly equal to the roof over the two houses of one-half its width when the roof pitch is the same in both. The roof of the large house (from the eaves up) encloses just twice the quantity of air space that is enclosed by the same amount of roof over the two narrow houses. The whole air in the large house cannot, therefore, be changed as many times per hour through the same glass surface as can the whole air in the two small houses, and the amount of air that must be "re-heated" per hour is less, so the

large house does not require so much radiating surface as the small houses per sq. ft. of glass, and the large house is a much steadier house withal. With houses of all shapes and forms, as they increase in width, the amount of cubic contents enclosed increases more rapidly than the roof surface; therefore, all large houses are somewhat easier to heat than small houses, and this difference in the amount of radiation required and tons of coal consumed is very apparent in ranges where both large houses and small houses are used.

hour and make proper provision for the same. In a greenhouse the number of changes of air per hour, whatever it might be, is dependent first on the wind velocity or pressure, on the roof pitch or shape of this roof, on the amount of lap of the glass and on the size of the openings between the laps of glass. The sizes of these openings in turn depend on the width of glass used. The wider the glass used, the greater the "sag," i. e., the greater the openings between the lights. Four widths of glass are used—24", 16", 14" and 12", although 16" glass may be taken as a standard, it being used now almost exclusively in the best houses. 14" and 12" are used very seldom.

I have explained that the number of changes of air per hour is hard to determine. Nevertheless, the heat loss due to this cause is high, and for this reason it is comparatively easier to heat a large house than it is to heat a small house; or in other words, less radiating surface is required per sq. ft. of glass for a large house than is required per sq. ft. of glass for a small house. The proportion of glass to cubic contents is not true for all sizes and shapes of houses; with houses of the same general shape, the same height of eaves and the same roof pitch, the amount of cubic contents is higher in ratio to the glass in large houses than in small houses. This difference in the ratio of glass to cubic contents is easily shown by placing two houses of the same width and roof pitch together in ridge and furrow fashion, then comparing the glass and cubic contents of the single house to the glass and cubic contents of a house of twice its width. (See Diagram B.)

There is another fact that upsets an attempt at exact calculation of radiating surface for greenhouses. That is, that the atmospheres of a greenhouse being usually humid, when the outside temperature is in the neighborhood of zero a sheath of ice covers the glass. This sheath stops up the openings between the laps, and also changes the rate of conduction through the glass so covered. It is not possible to say at just what temperature outside this sheath forms, as the formation of this ice is obviously dependent on the degree of humidity inside the greenhouse, the inside temperature of the house and the proximity of the radiating surface to the glass.

In all calculations for the radiation of dwelling houses it is usual to consider the amount of hot water radiation required, and the amount of low pressure steam radiation required as being equal to the ratio of 1 to .6; or, in other words, where 100 sq. ft. of hot water radiation would be used, 60 sq. ft. of low pressure steam radiation would produce the same results. In the heating of greenhouses it has been found that one lin. ft. of 3½" cast iron pipe in hot water heating will produce the same results as one lin. ft. of 1¼" low pressure steam pipe, and the ratio of hot water surface to low pressure steam surface in greenhouses is, therefore, 1 to .4, 1 lin. ft. of 3½" pipe being equivalent to 1.05 sq. ft. of surface, and 1 lin. ft. of 1¼" pipe being equivalent to .43 sq. ft. of surface. This difference of the comparative values of hot water and steam heating surfaces is due to the fact that greenhouse heating systems are called upon for their very hardest work at night, and dwelling house conditions require the most heat in day time; and, again, a greenhouse hot water plant gets little or no attention for hours at night, while a greenhouse steam heating system requires a night fireman. To be brief, there is less difference in night and day temperatures of steam pipe than there is in night and day temperatures of hot water pipe.

(To be continued.)

BY EBER HOLMES

Care of the Young Stock

At this time of the year the care of the young stock is one of the most important items in the work of a Rose growing establishment. On the proper care of the young, growing plants much of the future success depends. Cuttings in the sand should be carefully potted as soon as roots are formed, and before they get too long. If left in the sand bed after this stage the roots will be broken in handling and the plants will be checked by this, in addition to the check they have already received by staying too long in the sand. After being potted, water care-

fully and shade from very strong sun for a few days, reducing the shade daily, if possible, and giving them the full benefit of the sun all day just as soon as they can stand it. If they are in good condition very little shading is required anyhow. If the plants are at all soft a judicious blending of shade and sunshine will soon bring them into good condition. Syringe carefully to keep down red spider, water the plants well on the outside edges and see that those in the middle do not get too wet.

Young Grafted Plants

Young grafted plants should be taken out of the case as soon as ready, which will be in about three weeks after grafting, generally, although in some cases, where case room is limited, or from other causes, they have been taken out in two weeks. Set them on a good warm bench and shade for a day or two. See that the Raffia does not cut the bark; this trouble occurs where it was used too thick or was tied on in a hard knot. The best plants are the ones started early, so make every effort to finish propagating as soon as possible.

White Killarney Gaining in Popularity

We have some white Killarneys which were grafted on the 25th of last April, on Manetti stock which had been started in a coldframe. These are very good, healthy plants and have done well, although from the late start they had they have been small all Winter. We are receiving orders for My Maryland grafted, although our experience makes us prefer this Rose on its own roots. A few orders are coming in for Bridesmaid, but in every case these are from gardeners on private places. There is a tendency in some places to go heavily into white Killarney, which may cause it to be overdone in certain sections. On the other hand, if some of the larger growers drop Richmond for a red this is a good kind to hang on to, for there is no red so good for an all-around Rose as this one. From present indications there will be a good demand next Winter for the Rose Mrs. Aaron Ward.

Discard Varieties Which Do Poorly

While it is very nice and interesting to grow a variety of Roses, it is more profitable to confine oneself to a few kinds that one can do well, especially if growing for the wholesale market. It does not pay to keep Rosea which are not doing well if room is needed for young stock—the sooner the poor plants are thrown out the better. As much money can be taken out of a certain space if the plants are doing well as from twice the ground if they are doing badly; and remember that it costs just as much to run a poor house as a good one.

Treatment of Old Plants

The old growing plants will take lots of food and water from this out. A good top dressing of cow manure will be of great benefit to them now. It is impossible to cut the best flowers with large, heavy foliage and plump heads through the hot Spring months if the young feeding roots are washed bare and the beds are drying out daily. Feed and water well. Syringe early and oftener than you did in the dark Winter months. Keep the dry walks well damped down and give all the air possible, and your Roses will be better for the next three months than they have been before.

Getting a Crop for Memorial Day.

We have had good results in times past with plants pinched back to bring in a large crop for Memorial Day. It means that through April and the first half of May you will not cut any, but the last two weeks in May will offset that. Allow about seven weeks at this time of the year from the final pinching. If you have never tried this way you will be surprised at the results you can get; it would pay anyone who has not tried it to take one bench or even one part of a bench for a trial. Do not let any shoots develop, but pinch them all off as you would on a Carnation, until about April 10 or 15. Feed liberally, and it is wonderful how the plants will develop. Our experience with Killarneys the past Winter was that our poorest plants at the start, after receiving a thorough pinching back before they were allowed to produce a crop, turned out to be the best, and gave us our longest stems all Winter. It should not be forgotten that the care which the plants have needed all Winter is needed now through the changeable weather of Spring. Disbudding, tying, and keeping clean during this period of rapid growth will call for frequent and special attention.

Planning for Next Winter

Make your plans for next Winter as quickly as possible if they are not already made, and if you need stock order early, while the selection is good. There can be nothing to gain by delaying this. Manetti stock has been scarce this Winter and from all appearances it will not be overplentiful next year, therefore, if you do your own grafting it is to be presumed that your order for next year is already given. Up to about five years ago we used French-grown Manetti for grafting with fair success. At that time our attention was called to the fact that certain large growers had said that they would not have French-grown stock as a gift, so we decided to try the English grown. We have never regretted the change. The English, Irish and Scotch grown cost more, but are worth the difference as they are cleaner, more evenly graded and do not sucker nearly as much, as they are

generally disbudded. However, I would not condemn the French grown; once you get it well started it will give good results.

Selecting Flowers for Spring Exhibitions

As this is the season of Spring shows a few remarks on flowers for exhibition might be in order. Look around your place and mark the best looking flowers which will be open at about the required time, by tying on them, near the top, a piece of string or raffia. These may be given a little extra stimulant if extra good flowers are wanted. In the case of single Roses the flowers may be cut and kept in a cool, dark place for from one to two weeks. If cut in the bud they will develop in water, but will be inferior in shape, substance and color to flowers which are allowed to get about half open on the plants and are then kept in water about 48 hours before being staged. The more double varieties should be allowed to remain on the plants a little longer than the others to make sure of their being expanded properly. In any case they should be placed in water for 24 hours before being staged or they are liable to wilt, as is also the case if they are not properly developed.

The best appearing exhibits, from a general point of view, are those which are the most even and well developed, without being old. A few monstrous flowers mixed in with smaller ones and some buds present a ragged appearance; and wilted flowers give a table a distressed aspect. Half-open flowers do not show up well when the judges are going around and may be passed by, although on the second or third day of the exhibition they may be the best flowers in the show. Aim to stage your flowers so that the first glance is pleasing; an exhibit may be inferior in some respects, but if the general effect is good it will be much admired by the public, prove a help to the slow and a credit to yourself, even if it does not win a first prize.

Nut Trees for Florists and Nurserymen

The use of nut trees for ornamental purposes is deserving of much more attention than it has been receiving. There is no section of the country but has some edible nut tree adapted to its particular climatic and soil conditions. Aside from the utilitarian consideration these trees are beautiful, hardy, and adapt themselves readily to planting on home and public grounds, streets and parks. When given plenty of room they make spreading tops of symmetrical form, grow rapidly under cultivation and generous fertilizing and, in the main, are long lived. In foliage, they are graceful and clean, and are not dense enough to interfere seriously with plants or grass grown in their shade.

To all their desirable qualities as an ornamental tree, the crops produced add not only a charm but lend a hand at food production as well.

The purpose of this sketch is to encourage the more extensive planting of nut trees, so that the masses, as far as practical, may share in the pleasures and profits they afford. Florists and nurserymen have a wide and inviting field for operations in this line. What they do in producing and planting nut trees becomes a permanent improvement, which increases in value and beauty as the years go by.

Probably no kind of nut tree is available to as great an extent as the Walnut. It is native in many sections of the country and the recent success in budding and grafting nut stock enables the growing of the English and other varieties on the native stock, thus adding to the prospect for growing these finer nuts over a much wider area than is practical on their own roots. In the New England and central States, in the Mississippi Valley and on the Pacific Coast the Walnut should be liberally planted.

The Hickory, which includes the Pecan of the South, is found over a large area of country. While the Pecan is a commercial crop in the South, it grows well much farther north than was formerly supposed to be practicable. Many choice varieties have been propagated and the same line is now being followed in selecting and propagating the finest varieties of Hickory which can be found.

The Chestnut is more circumscribed in its native habitat and may be more subject to insect injury and diseases than the hardy Walnuts and Hickories, but all along the eastern mountain ranges it flourishes.

All of these species make majestic trees, and the native forest trees are disappearing so rapidly on account of their great economic value in industrial operations that it seems desirable to plant them largely for growing timber, even if there were not other reasons for their being planted.

Nurserymen and florists can, by enlarging their production and pushing the sale of nut tree stock, accomplish much for the general good as well as build trade for themselves. Strong agencies are now at work which promise to popularize nuts as a staple food, and the rapid increase of the importation of nuts in recent years shows a largely increased consumption every year.

Poulan, Ga.

Dr. F. J. WILSON.

Spring Trade Edition

To be Issued next Saturday, March 19, 1910

Carnations

F. Dorner & Sons Co.
LA FAYETTE, INDIANA

Please mention the Exchange when writing.

Indianapolis

A. F. Longren of Hunt's, Chicago, spent Sunday in this city.

The State Florists' Association of Indiana had a committee meeting with the State Board of Agriculture in order to have the flower premium list at the coming State Fair revised. The list was considerably improved and quite a few concessions were granted by the Board.

At the monthly meeting of the State Florists' Association several good vases of flowers were exhibited. Those shown by B. F. Hensley of Knightstown were especially worthy.

Richard Kootz is no longer with Bertermann Bros., having accepted a position elsewhere.

Toulinson Hall Market reports a busy week, particularly in the wholesale sales.

Fred. Hukreide has been receiving a lion's share of funeral work, and reports business exceptionally good. I. B.

Seattle, Wash.

The snowstorm that raged through the West from Feb. 20 to 24, and piled up such a lot of snow in the Cascade Mountains, reached Seattle in the form of a nice even snowfall which covered the ground about 3 inches. The rain that immediately followed took the snow away faster than it fell and we have again the ground bare and green. The weather has been mild ever since Jan. 8, and the Roses and hardy Phlox have kept growing right along, so they have now shoots on one to two inches long.

The florists report business unusually dull, which of course could be expected after the close of the Fair.

Rosaria Bros., whose main store is located on Third ave. and Madison st. have opened up several small stores and stands during the Winter, until now they have eight small stores and flower stands in this city.

Bonnell, the nurseryman, is reporting business unusually dull, and very little landscape work done during the Winter.

The Seattle Carnation Co. has sold its place in Kent, Wash., and has leased a nicely located place in Auburn, Wash., where it has three greenhouses, 200 by 24 ft.

Sandahl & Son have sold their nursery at Renton, Wash., and are now devoting all their time to the retail business at 120 Pike st. G.

CARNATION CONQUEST

CONQUEST

Light Pink Overlaid with Deep Rose

The most beautiful and attractive as well as one of the most valuable Carnations on the market today. The blooms sell for 2 to 3 cents more than any other variety in the Chicago market. Why? Because everybody is deeply impressed with its beautiful large flowers on long, strong stems the moment they see it, and will not leave your place without taking some of them along. Not only a Novelty, but a Carnation that can be used in most any way. The plants have an ideal habit, early, free and continuous; therefore you cannot make a mistake by growing Conquest, the best of them all.

Rooted Cuttings; strong, well-rooted, \$12.00 per 100, \$100.00 per 1000

EDWARD J. TAYLOR, Green's Farms, Conn.

Please mention the Exchange when writing.

Utica, N. Y.

John O. Graham of Little Falls, N. Y., is the leading florist there and one would have to look for a long time to find a more genial and painstaking man in the business. He has built up a fine trade in a few years. His place at the time of my visit was looking fine—everything in good shape. He is not able to grow all he needs and calls on Utica growers for a large quantity of flowers. He is a member of the Utica Florists' Club, and we are always pleased to see him. I visited the new firm of Kipp &

Edwards at Rome, N. Y., formerly E. J. Ryan's place, and found everything looking fine. They report that trade is good; they have no complaints to make since taking the place, in fact are perfectly satisfied so far. A fine lot of Lilies are noticeable, just O. K. for Easter, and a big cut of Carnations and Roses are in sight for some time yet. One house of Queen Carnations looks like old times; I could not see but that it was just as good here as it ever was. There is also a house of Lawson, something fine to see, in fact I think that Lawson on this place is as good as ever, which all can-

RUTHERFORD, N. J.

Please mention the Exchange when writing.

not say. His Enchantress is also good. Great credit is due to the firm's manager, Mr. Percy Rogers, who seems to take a great pride in getting everything just right. They show a fine lot of Ferns of all kinds and some excellent plants of Hydrangeas that will be just right for Easter, and a fine batch for Decoration Day. I was shown some very fine Lavender Sweet Peas which were hard to beat. They grow one house of Violets with fair success. They are now trying to grow some Lettuce, Boston Head, which looks promising. It seems to be a very difficult proposition in this part of the State, but it looks as if they were on the right track. We also saw some very fine Lilacs in bloom, well done. They have a big lot of bulbs just brought in and which will be right for Easter. I found the firm very pleasant gentlemen and enjoyed my call very much.

The Utica Florists' Club held its regular monthly meeting on March 3, with a very good and enthusiastic crowd of members in attendance. The matter of revising our by-laws was brought up and a committee on the matter was appointed, consisting of C. F. Seitzer, Mr. Brant and J. C. Spencer, to report at the next regular meeting. The question of a "Social" and dinner was voted on and it was decided to hold the same about April 11, ladies to be invited. We will have some fine speakers and a generally social time, and it is the wish of President Baker that every member should attend, so that we may get better acquainted with each other. We expect some fine music. The speakers will be announced later. The members of the committee are bustlers and you can expect something fine. The committee are Robt. Boyce, Harry Brant, Harry Matthews, W. A. Rowlands and J. C. Spencer. Three new members were proposed for membership to be voted on at the next regular meeting. We are still growing.

McGowan is kept very busy just now, picking Sweet Peas that cannot be beaten, something grand. Everything at his place is just right for Easter.

Robt. Boyce of James st., Utica, has sold his place to Wm. Dobler of Little Falls, N. Y., who took possession March 1. Mr. Dobler comes well spoken of, and we are very glad to have the gentleman with us and wish him all kinds of success. He takes a place that has been operated very successfully by Mr. Boyce for several years, and finds it in first-class condition. That he will have a fine Easter trade is the wish of your correspondent.

Brant Bros. tell me they are having a big cut of Roses of all kinds at present and will have for Easter a fine lot of them, and good quality too.

I visited Humphrey's greenhouses at Rome a few days ago, and was taken in hand by John Humphrey, who showed me the place. John is always very cordial and very pleased to show and tell one about the business. They are rushed with the care of Spring plants, of which they grow thousands. The Lilies here are very good and lots of them. They are cutting well on Roses. The Carnations are not quite as heavily in cut as they have been, but there are plenty yet in sight, and for Easter. Everything at this place is spick and span, as always.

T. A. Taylor of Canastota, and Mr. Boden of Oneida were in town a few days ago.

Cincinnati

Business during the past week has been very good, stock received has been of excellent quality, and prices have remained firm. The outlook for Easter in some stocks is encouraging. Lilies will be scarce; American Beauty Roses will not be an over supply; Killarney and Richmond will be firm. Bulbous stock will not be a glut in this market. Good Ferns are scarce and are selling at \$2 per 1000; Leucothoe sprays, \$4. Callas will be in very fine supply for Easter at \$1.50 per dozen.

In our last report we spoke of the Ohio River again being on the rampage; today, March 7, the river is on a stand of 50½ ft. without any particular damage from a flood; as to the interference with traffic the only trouble so far has been with the traction lines. The gardeners in the Millcreek Valley have suffered quite a good deal, but not so much as at other times, having had time to prepare for trouble. E. G. GILLET.

Rochester, N. Y.

Little is to be said with regard to trade conditions. The usual Lenten dullness still prevailing and plenty of stock to meet all demands; particularly is this so in regard to Carnations, Valley and Roses; judging from reports from other sections Rochester is no exception to the rule, so we must take it philosophically and keep on waiting for something to turn up.

Asparagus and Smilax are getting scarce and will be an unknown quantity by Easter; there will be a good market for this stock.

The few ideal Spring days we had last week will help materially in bringing on Easter stock; some predict a shortage at that time, but when the time comes there will be no doubt be all that the market can stand.

George T. Boucher held the opening of his handsome new store on Saturday; about 5000 people took advantage of the invitation to make an inspection of the flowers and plants. Mr. Boucher was more than satisfied with the results; some extra fine Azaleas from the Vick & Hill Co. attracted much attention.

The sympathy of the trade is extended to George B. Hart in the loss of his father who died in Buffalo, at an advanced age, Friday last. Also to William Pirri, gardener to Geo. Eastman, who lost his baby child a few days ago.

At a meeting of the Rochester Florists' Association, held Wednesday, March 2, it was decided to hold the banquet on Monday, March 14. The Executive Board of the S. A. F. & O. H. will be in the city at the time and will be entertained as the guests of the Association. For the first time the ladies are invited to attend and a very enjoyable evening is anticipated.

The officers of the Association will act as a reception committee for the visiting Board, and their stay in the city will be made a pleasant one.

The use of the Association room has been offered and accepted for the meetings of the S. A. F. Directors while in Rochester. H. B. STRINGER.

Calico as a Substitute for Glass

During the past few years, travelling greenhouses have been erected, glass lights have been made that can be formed into greenhouses when fixed to portable framework, and for many years a grease-proof paper erection has been sold that has done excellent service under certain conditions. At Terrington, in Norfolk, England, horticulturists use calico very largely as roofing for greenhouses, but up to the present the value of calico does not seem to be recognized generally.

Of course, calico can never be superior to glass for many purposes, but the fact that it is used in Terrington to cover acres of plaus, and at all times of the year, proves that it is of great value. In the early Spring, calico houses are used for the forcing of Tulips and Narcissus, and even where permanent glass structures are utilized for this purpose they are lined with calico, as the shade it affords appears to be just what is required to give a delicacy of color and texture to the flowers, length to the stem, and quality to the foliage, that is unequalled by any other method, and that has gained for Terrington flowers such a high character in the markets of the country.

For Bulbs, Sweet Peas and Chrysanthemums

Houses built of lath, wood, and calico of two thicknesses, fitted with portable boilers and heated with hot water pipes of one and a quarter inch gas-pipe, are the usual forcing houses of Dutch bulbs and, when a frost of many degrees is in existence outside, a temperature of sixty to seventy degrees is easily maintained inside, as, when frost sets in, the outside calico is frozen over and becomes one solid airtight sheet, which prevents all wind from entering, as it does under the laps of the best built glass-house. After forcing is completed, the same houses are used to "strike" Chrysanthemum cuttings and raise Sweet Pea plants.

Chrysanthemum stools thoroughly enjoy a canvas house, even without any boiler, and amply repay the owner with a plentitude of cuttings. As the Spring advances, calico is used as a night covering, and if it is left on the plants during the day, an amount of light passes through it far more than through ordinary coverings. During the Summer, calico is used for shading, although it must be confessed its use this year for this purpose has not been great. Pyrethrum and Asters growing in the open ground are covered, and much improved by the process.

But it is in the Autumn that calico is used most, and that for the protection of Chrysanthemums. The very early varieties will grow and flower without protection from frost, but get very dilapidated from the effects of wind, rain, and heavy dews. The plants are grown in beds, generally about forty yards long, with paths of about two feet wide at intervals. Posts are driven into the ground in the beds, and a "top rail" of 2 by 4, 14 feet long, nailed on top of the posts. Another set of posts have "spouts" nailed on them. Lights made of 2 by 3/4 tile lath are fastened from spout to top rail. Some growers fasten their calico on to the lights, stretching it tightly, and securely fastening it down with plasterers' saw laths secured with 3/4-inch shoe brads.

General Construction

For the purpose of stretching the calico tightly, the local blacksmith has constructed a machine by which nearly thirty lights of eight feet by five have been stretched per hour by three men. Others users prefer to make lights of uniform size, and erect their houses without calico, when they appear as glassless greenhouses. Then the calico is sewn, three widths together by machine, and the whole side of a house covered with one piece, and stretched tight. The whole is built with wire nails not driven quite "home," so that they can be withdrawn and re-erected several times. The houses first built over the Chrysanthemums are to protect from rain, wind and heavy dews, so a roof only is erected. The next batch will have sides and gable end, the successional batches being heated with a specially-constructed boiler which is generally sufficient to keep out frost and damp from these houses, each forty yards by five yards. Chrysanthemums of fine quality will be cut from these houses until the end of January.

Important Advantages

The advantages of calico over glass are several. First, the initial cost. A

large bed of plants can be grown in the open air, and a house built over them at less cost than they can be lifted into a permanent structure, assuming that one exists, and many plants can be covered just to afford protection from the elements that is impossible in any other way.

Calico inserted in the sides of a shed allows plenty of light to enter, and excludes the wind and sunshine, and if backed by wire netting lasts for many years.

That there are limitations to its use, it is only right to add. Cucumber plants may be started, but will not mature fruit under the shade. Tomatoes get drawn and sickly, and Sweet Peas must not be covered long when in flower, although it is a general practice to erect a house over them, to preserve them for exhibition purposes. While Asters can be successfully raised, Stocks are no use at all under calico.

Calico can also be used to help forward early vegetables. Carrots, Lettuce and Radish can be covered until the seeds have germinated, then have air admitted during the day. A covering of calico will protect early Potatoes from late Spring frosts, and when covered during the whole of the Winter, Parsley may be obtained of good quality when the snow lies on the ground. The calico used is of a pure quality free from dressing.—*Market Growers' Gazette, England.*

Headquarters for Easter Plants

AZALEAS One of Our Specialties

PREPARE FOR EASTER

Have Azaleas to borm, the best in the land, the best in the land, the best in the land;

Azaleas in finest colors, to beat the band, to beat the band, to beat the band

If you would know the fairest sight your eyes can ever see,

Where the most perfect plants are grown, to Aschmann's come with me.

Why! Ne'er since flowers began to bloom was such a glorious show. Of all the best that florists need found in one place to grow.

The Lilies are the very best yet seen on Easter day.

Azaleas are whole sheets of flowers, perfect in every way.

The Araucarias matchless are, so are the Ferns all green.

With bulbs and plumed Spirea, the best you've ever seen.

And Aschmann gives a challenge, let every florist hear.

For flowers, or prices, either, no rival does he fear.

If you wish to gather dollars like violets in the Spring,

Then send your largest order; his plants the cash will bring.

CHANGING DON'T PAY!!

From whom will you buy your Easter plants? "I have no cause to change," several sensible men in the trade remarked the other day. "Our friend, Godfrey Aschmann of Phila., has been our reliable man of the past and shall, of course, be this year also."

Azalea Indica—Our Specialty

We look after the welfare of our customers. Be watchful, be careful! Consider what you buy and from whom you buy. You go to the man who is able to offer bargains in fine stock. We give you both—good stock and bargains, too. How is that? Very simple. The Belgian grower looks for cash—our American dollar. We have sufficient capital to do this. Therefore, we obtain the cream of Belgium's productions.

In large sizes we have the following varieties: Bernard Andrea alba (white), Nobe (white double), Dr. Moore (double pink), Memory de Van Houtte (large-flowering double pink), Mme. Van der Cruyssen (double pink; one of the best known varieties), Helena Tellman (rose; very attractive), Empress of India (double variegated), Schreverianna (double variegated), Apollo (red), all covered with buds. Price: \$1.50, \$2.00, \$2.50 to \$3.00 each.

In smaller sizes we have Empress of India (double variegated), Simoa Mardner (double pink), Vervaeckiana (one of the old standard double), Apollo (red), Mme. Van der Cruyssen (pink; the standard of all the pinks), Deutsche Perle (double white), Schreverianna (double variegated), Price 60c., 75c., \$1.00, \$1.25 to \$1.50.

Prof. Wolters, one of the so well known bright variegated, \$1.00, \$1.25 to \$1.50. Nobe, double white, 75c., \$1.00, \$1.25, \$1.50, \$1.75, \$2.00, \$2.50.

AZALEA Indica, one of our specialties for the last twenty-five years. Raised for us under contract by our Azalea specialist in Ghent, Belgium. Our stock of Azaleas that we ship is well known to our customers; it is the cream of Belgium exportation—full of buds.

To save express charges please state if wanted in or out of pots. Cash with order, please. No references will be investigated in these busy times.

GODFREY ASCHMANN

Wholesale Grower and Importer of POT PLANTS

1012 W. ONTARIO ST., PHILADELPHIA, PA.

Please mention the Exchange when writing.

What is the best pink variety? Mme. Van der Cruyssen is the name; originated by Mr. Van der Cruyssen of Ghent, Belgium. This variety is too well known by nearly every florist in America to be further talked about. All are as round as an apple, covered with buds.

Do you want to know why our Azaleas are good? Here is the pointer: We don't make a practice of selling them in the Fall, having the rubbish left for Easter, but plant them all as soon as unpacked into 6-7 in. pots, keep them cool and give them the best attention for Easter sales. Those not having many buds are kept over for another year.

KENTIA Forsteriana. Imported last Spring (1909) from Ghent, Belgium. In fine condition, 6-7 in. pots, 35-40-50 in. high, \$1.25, \$1.50, \$2.00, \$2.50, \$3.00, 4 in., 20c., Belmoreana, 6-in., \$1.25-\$1.50 each; 4-in., 25c.; 3 in., 10c.

NOTICE: LILY BULBS of the larger size (9-10 in.) were very scarce to obtain last Fall owing to the wet weather in Japan; not even 20 per cent. could be supplied. But our grower in Japan, knowing well our position, has taken good care of us, and we were one of the few fortunate to receive 5000 of 9-10 in. bulbs from him—our full order of last Spring.

EASTER LILIES, Japan Multiflorum, of our own importation, raised from special 10-in. bulbs, 6-in. pots, right for Easter. The large demand for Lilies exceeds the supply every year; we therefore, ask that you order early. Price, plants with five buds and upwards, 10c. per bud; plants with under five buds, 12c. per bud. We can satisfy all wants if ordered soon.

NO PROFIT IN LILIES.

Owing to the small profit in the growing of Easter Lilies, an order for a reasonable amount of other stock should accompany all orders for Lilies.

CINERARIA Hybrida. We have a house full 125 ft. by 2 ft. of the choicest colors—Henry F. Mitchell Co.'s best strain, just right for Easter. 5, 5½ to 6 in. pots, medium height, 20c., 25c., 30c., 50c., 75c. to \$1.00. Just right for Easter sales. Same are in bloom now for immediate sale, if you wish.

BEGONIA, New Improved Erfordii. Always in bloom, Summer and Winter; 4-in. pots, very strong, \$2.00 per doz.; 6½-in. in bloom and bud, 25c., \$3.00 per doz.

PRIMULA Obconica. 6½-in. pots in bloom, \$2.00 to \$2.50 per doz.

FERNS for dishes, 2½-in. pot, \$5.00 per 100.

Hyaclnths. Raised from first-class bulbs of our own importation. These Hyaclnths cannot be compared with ordinary stuff raised from cheap bulbs floating the market. King of the Blues (dark blue), Grand Maitre (lavender blue), Gertrude (pink), and La Grandee (white). 4-in. pots, \$12.00 per 100.

TOURNESOL TULIPS. Red or yellow variegated. This is the best selling double Tulip in the market. Will stay in bloom in good condition ten days. Three bulbs in one 4-in. pot, 6-in. pots or \$12.00 per 100. Murillo Tulips, best double pink, 3 bulbs in a 4-in. pot, \$1.75 to \$2.00 per doz. pots.

Double Van Sloe NARCISSUS. The best yellow Narcissus in the market, sells at sight; three double-nosed bulbs planted in one 5, 5½ to 6-in. pots. Price, \$2.00, \$2.50, \$3.00 per dozen pots.

IPOMOEA Noctiflora. Best pure white Moon-vine in market, very fragrant and as big as a saucer. On this variety we have a world-wide reputation as growers and shippers for the last twenty years. Price, 2½-in. pots, \$5.00 per 100, 10,000 are now ready.

COCOS Weddelliana, 3-in., 15c.

BEGONIA Flambeau. Sells at sight, 4-in. pots, 20c.; 6½-in. pots, 25c.

FICUS Elastica or Rubber Plant. Home-grown and Belgium stock, 5 to 6½-in., 25c.

LANTANA Borbonica. 4-in. pots, 20c.

HYDRANGEA Otakia. Already forced, in bud, just right for Easter, 6 to 7-in. pots, 35c., 40c., 50c., 75c., \$1.00 to \$1.50 each.

SPRAEA Gladstone, 6 to 7-in. pots, large stuff, 60c., 75c. to \$1.00 each. We have a house full of this Easter novelty, in better condition than ever—full of buds, just right for Easter. Order in time. Remember: Good Spraeas are scarce this Easter. Why? Owing to the bad weather in Holland.

FERNS, Todeaoides and Whitmani, 6-7 in. pots, 60c., 75c. to \$1.00; 5 to 6½ in., 35c., 40c.

NEW CHRYSANTHEMUM

Mrs. Jane Cockburn

EARLY PINK

Ready for February and March delivery. Blooms first week in October.

Beautiful mauve pink. Good keeper and shipper.

\$6.00 per 100, \$50.00 per 1000. Five hundred at one thousand rate. FIRST COME, FIRST SERVED.

Advertising

Suggestions for the Retail Grower

You should not overlook doing, at least, some advertising. No matter how small your town may be, or whether there is only little or no competition, that shouldn't be taken into consideration in the least. With the florist, advertising shouldn't be used much to get trade away from the other fellow as to simply call people's attention to buying flowers, to remind the public that you have something to offer, something they ought to have. If you have the goods, finding a market is the next thing. Even the smallest of florists should not let a day like Easter pass without advertising in some sort of way. There are but few of us who don't go to more or less expense to have a good stock of suitable flowers for that day, and it takes a little pushing to get rid of it. Outside of printed matter in the way of letters and cards, a few personal letters extending an invitation to visit the greenhouses before Easter is bound to do a lot of good. Sometimes we don't see direct benefits from efforts made in this direction but they are bound to be beneficial. There is a great increase noticeable in the volume of business done in flowers and flowering plants for Easter. I may say more for that day than any other, and in order to get a full share of it and help to increase it still more does not mean alone to grow better stock but to find new ways to get the public interested.

Easter

Get the Show House into Shape

We are busy getting things in shape for March 27. The show house needs a thorough cleaning. Every inch of room is needed for the Easter display. Up to the present time there have been Chinese Primulas, Cyclamens and even a number of Cinerarias among other stock in the show house, which, while not fit to be sold, helped to fill up and make a large display. They all must go now; every inch of room is wanted, every plant in the show house should be a salable one, and the display must be ready at least two weeks or so before Easter Sunday. It is true that more business is done the last three days before the Sunday than on the preceding six, and yet there are customers who will pay a visit to leave an order several weeks before, in fact some of the largest orders are always among the first ones received. The retailer who has no greenhouse may have an excuse for not carrying a great amount of stock until shortly before Easter, but not so with the retail grower. Everything should be in holiday dress as early as possible. At no other time of the year have we an opportunity to make such attractive display as for Easter. The impression the customer gets on entering the show house should be one to be remembered and talked about for months to come. Nothing should be left undone to have a good show, and to keep it up until the last customer has been served.

Bulb Stock

How to Fill and Care for Made-Up Dishes

Just a few words about filling the dishes and pans and their care afterwards. Practically every member of the bulb family will stand the change nicely, even if deprived of almost every root, as long as they are kept soaking wet afterwards. Of course, the shorter and stiffer the stem which supports the flower the better, but whenever there is a chance to permit a few roots at the end of Tulip and Daffodil bulb to be taken along so much the better. WOOD BROTHERS, FISHKILL, NEW YORK

Please mention the Exchange when writing.

Filling any dish or pan the beginner should not make the mistake of filling the dish full up to the rim with soil before doing the planting. Just cover the bottom of the dish and put in the balance when through with planting. An important matter is to get the outside row of the plants as near to the edge of the dish as possible, as well as to distribute the plants evenly. Before pressing the soil down firmly between the plants one has a good chance to shift each plant to its proper place, and by raising some or gently pressing down others they can all be brought to an even height, if anything just a little higher in the center. Always plant deep enough; this, more than anything, helps to support a weak stem; and, if at all possible, avoid the staking up of the plants. After planting, about two days in a dark cool place is of the greatest benefit to the plants; if kept

well watered during this time they will be fit to go to any temperature without wilting. Of course, the cooler they are kept the longer they will last.

Genistas

Still Great Favorites for Easter
Because they are less to be recommended for house culture than any of the other flowering plants a florist usually handles doesn't seem to affect the sale of the Genistas in the least. A plant, loaded down with hundreds of its yellow blossoms, always finds an admirer as well as a buyer. The smaller sizes sell as well as ever for Easter, and the larger ones form the finest material for the show house, or for decorating purposes. The plants intended for Easter should begin to show color now. Keep them in a light, sunny place;

they have plenty of air, and as they, no doubt, have been without a shift for several months, a little feeding is in order. Liquid cow manure is the safest. Give the plants all the room they need to develop perfect flowers from the pot on up; this means so much, and there is the greatest difference between plants which had a chance to grow without being crowded and those which did not.

Rambler and H. P. Roses

The Easter Stock Should Be Kept Rather Cool Now

There is no doubt but what the introductions of all the different Ramblers have affected the sale of the Hybrid Perpetual Roses for Easter quite a bit. While the trusses of the best Rambler ever grown will never take the place of a perfect flower of the H. P. type, yet the average customer will prefer a well grown Rambler over almost anything you can show in the Rose line, and especially have we had an unusual call for the Baby Ramblers—it would seem that the number of flowers, even if they are so very small, has had something to do with it. We are putting the plants which are beginning to open nicely into a 50° house; they want all the sun they can get and a clear and rather dry atmosphere, anything else might produce mildew, and that is to be avoided if at all possible. If the foliage is ruined, the best flowers don't count for anything on a Rose plant, and mildew will do it. Don't worry because the buds of the H. P.'s are not showing color as yet—it would almost be too early, for when they once show color three to four days of sunshine finds the flowers fully open. Let them come along slowly. All depends on the weather. If the plants have been grown in a moderate temperature and you have good sized buds now, just beginning to show traces of color, you are on time.

Azaleas

Keep a Constant Watch on the Plants

There is hardly a day now when we haven't to bring some of the Azaleas from a warm house to a cooler one, or when some which seemed forward enough a week ago have to be brought into warmer quarters. Every effort is made to get every one of these plants in for Easter—that is the day of all days to sell them. There may be a call for one after that date, yet we all feel better if the plants are disposed of by Easter Sunday. If an Empress of India, Niobe, Van der Cruysen or Vervaneana, or any of the other sorts we try to get in for Easter, shows color two weeks before that day you will have them about right. The slower they open the finer will be the flowers, the more beautiful the coloring of them, and the better will the plants support the flowers, in regard to keeping qualities. Don't forget to tell the customer who buys one that the plants should have a good watering every day while they are in bloom, and to make doubly sure that they may not suffer the day following your delivery of them, give every plant before it goes out a good watering, whether the plants need it or not.

The Spiraeas

Treatment of the Plants Intended for Easter

I am afraid there won't be many of us who will be able to get that grand pink variety, Queen Alexandra, by Easter. I have seen a few batches of other growers in the neighborhood if not quite, yet very nearly as much behind as our own. There is one thing about the Spiraeas, when at all rooted and not neglected in watering, one can apply almost any amount of heat without harming the plants; but when there is nothing else that requires a high temperature it doesn't pay to do it for a few pots of Spiraeas, and I don't think the beautiful pink coloring of this variety will be as distinct when hard forced. Whenever well done, however, it is certainly a beautiful thing, and will no doubt be more largely grown as it becomes better known. Don't overlook letting the plants have all the room they need. This holds good with any of the different sorts. A crowded Spiraea is an unsightly affair, but when grown so as not to let the plants touch one another each plant will have as perfect a shape as a well grown Cyclamen. If there is a plant on the place which gets liquid cow manure, remember that the Spiraeas are great feeders and can stand a good dose every week. A few days in a cool house, when the flowers are about half open, will give a wonderful finish to them, and a twenty-five per cent to the value of the plants.

Please mention the Exchange when writing.

NEW YORK, March 9.—Conditions have improved since our last report, although there is still plenty of stock to be had in unlimited quantities. Buyers, however, have been more active, so that while the prices remain about the same, better clearances are possible.

American Beauty Roses are still a scarce article, top grade stock realizing 60c.; a few selected flowers have been sold for 75c. Richmond Roses are an important factor, and, generally, clean up at good figures, first-class stock being held at 20c. each. Both the Killarney Roses are very plentiful, especially pink, and quantities are held over from day to day. Short Roses move better, in comparison, than higher grades.

Carnations continue to drag; the best price obtainable on standard varieties is \$2. A few sales have been made at \$3 for selected stock. Orchids remain about the same, with but little change in view. Good Cattleyas realize 50c., but the average is nearer the 40c. mark. Gardenias move only moderately. Violets move fairly well, but efforts to boost the prices at a trifle are not favorably met. Top grade flowers realize 40c. per 100; stock of questionable age is sold for any price from 20c. up. Sweet Peas are more than plentiful, and hard to move.

Lilies have stiffened a trifle, first quality flowers realizing, 10c. to 12½c. Lily of the Valley is at the glut point, and hard to dispose of at \$2 per 100. Tulips, Laffodils, Mignonette and other miscellaneous stock is quite plentiful, and considerable is sold, but the supply is away beyond the demand. Asparagus is still a trifle scarce and more could be used if obtainable.

PHILADELPHIA, March 7.—The cut flower market experienced somewhat of a spurt last Saturday, and a better clearance of all lines of stock was possible. Prices do not enter very greatly into sales that are made, as the wholesalers are only too pleased to get rid of stock under any conditions. American Beauty and top grade Richmond Roses, and Cattleyas are not over plentiful, and prices remain about as last week. Carnations, Violets, Tulips and Daffodils are over abundant, and with these articles it is not a question of price, as sales are made with the idea that so long as the stock accumulates, the more difficulty will be experienced in finally clearing out, so that every advantage to sell is fully utilized. Shipping orders remain about as usual, and but for this outlet the local conditions would be unbearable.

Southern Daffodils are arriving daily; and the average quality of all cut flowers would be conducive to good business but for the perturbed state of the public. The outlook, however, is brighter, and we hope that this week will bring normal conditions.

ST. LOUIS, March 7.—From reports, most of the retailers say that they have felt little effect of Lent so far. The downtown stores were busy all of last week, mostly with funeral work, and some large designs were seen at the different stores.

Stock at the commission houses accumulated greatly last week owing to the fine June weather we are having. The consignors to this market brought in an abundance of stock of all kinds, especially Violets and Carnations; Roses, too, are coming in heavier than usual. Bulbous stock is coming in freely in all varieties and the commission men say they are not cleaning up these days. Violets and Carnations are a glut in the market and only very low prices move them.

All kinds of greens are selling well and there is plenty of them in the market. ST. PATRICK.

BOSTON, March 8.—Conditions in the market are slightly worse than they were a week ago; in fact this has been the worst week of the year. Saturday was the best day of the week and large quantities of material were disposed of at fairly good prices. American Beauty Roses are still scarce and prices hold high for fancy material. There are some excellent Killarneys coming in now, both pink and white, and in all lengths of stem; prices are holding good. Richmond, My Maryland, Safrano and Bnn Silene are in good demand and bring good prices. In fact there is very little surplus in Roses.

Carnations are a glut on the market and naturally are slightly cheaper. Prices are from \$1 to \$3 per 100. White sorts are not quite as plentiful as the other colors. Violets are quite plentiful and prices are from \$1.50 to \$4 per 1000. Bulbous material is dragging. Good Narcissus sells at from \$1 to \$1.50 per 100. Tulips are abundant. Easter Lilies are getting more plentiful. Callas are more plentiful and the quality is very good. Lily of the Valley is getting dragg and prices are lowering. Pansies are more abundant and prices have dropped. Forget-me-nots in best quality are not over plentiful and prices hold good. Asparagus Sprengeri and plumosus are a little more plentiful.

Cattleyas are not over plentiful; prices are from \$4 to \$6 per dozen. Gardenias are selling slowly now. Adiantum cuneatum and Crowneum are scarce and prices quite satisfactory. Snapdragons, English Pansies and Wallflowers are quite plentiful and prices trend downward. Sweet Peas are plentiful but of high quality and bring fairly good prices. R. C.

CHICAGO, March 8.—The latter part of last week found the market badly glutted, with an over-abundance of stock in all lines, due to the extremely warm weather, which, fortunately discontinued Sunday. Had this warm wave been of much longer duration the crop for Easter would have been in name only; even now, with the cold days again, should they continue for a length of time the chances for a heavy crop will be small.

The quality of Roses is excellent in all lines, although the prices vary but little from quotations of last week. There is an abundance, however, of all kinds.

Carnations have depreciated somewhat in quality, and show the effect of the heat. There are, however, unlimited quantities, the only color that is really in active demand being white, which are being used to dye green for St. Patrick's Day. The market was so flooded with Carnations last Saturday that some of the growers disposed of them at 50c. per 100, and they were pretty good at this price. From \$1.50 to \$2 per 100 now is noted for good stock, \$3 being obtainable for very fancy grades. The market is suffering from the heavy shipments of Jonquils that are arriving in great quantities from the South, a yearly occurrence. This makes it hard to dispose of home-grown stock at fair prices, as the outdoor flowers are to be had for \$1 to \$1.25 per 100.

The supply of Lilies for Easter looks promising, orders are being booked at prices lower than is usual for this stock. Some quote them for Easter as low as \$1.25 per 100. Callas are coming to the front better, and have advanced a little in price.

Some good Stocks are seen at different wholesalers, and are being used extensively in funeral work. Freesias are getting scarcer, also Paperwhite Narcissus. Sweet Peas are resting for a spell, Mignonette, Candytuft, Pansies, Wallflowers, Forget-me-nots and Snapdragons can be seen in nearly every window.

Violets are a drug on the market and can be bought for most any price; many go to the garbage barrel. Orchids are not commanding as high prices as previously, but are being utilized more extensively, as nearly all the small florists have, at least, a few blooms displayed.

Green stock is in excellent shape, undoubtedly putting on its best appearance for the 17th of March. All sorts are moving fairly well. Plants are becoming more conspicuous, and are looking remarkably well in all lines.

INDIANAPOLIS, March 7.—The passing from the Winter to the Spring months, as the old saying has it, generally carries with it many deaths. This has been true in this locality and the retail shops have been very busy with many small orders for funeral work. Pleasant weather has also enabled the public to visit the flower quarters in person, to select the choicest cut blossoms and to choose from the conservatory supplies. The supply of flowers embraces a larger variety than for some time past. The general coloring and quality of stock is quite up to the standard and given every satisfaction. Window displays are of vastly more benefit at this time because passers-by stop long enough to view them and to choose from the many arrangements shown.

The Carnation crop, although a very unpromising one for Easter, is at this time exceedingly good, both in quality and in numbers. There is scarcely any good stock left over at \$3 to \$3.50 per 100; 75c. to \$1 a dozen is the customary retail figure. An approaching exhibition, such as the Rose show, nearly always indicates to the dealer that it is the period for the highest perfection of that particular flower. This is true of the Rose market at present as the grades are uniformly good. Fancy Killarneys, Richmond, and My Maryland bring \$8 to \$10 per 100; Bride and Bridesmaid are selling briskly at \$8 to \$3 per 100 for the choicest stock. Seconds bring one-half these figures and shorts about one-third. Few bulbheads are found among the American Beauty and the coloring is fine at \$5 to \$50 per 100.

Sweet Peas are offered in many quarters at 50c. to 75c. per 100. The variety of colors is unusual for so early a date. Callas, and Harrisii Lilies sell, when-

ever offered, at \$10 to \$15 per 100, but the supply is very limited. Mignonette, Forget-me-nots and Candytuft are choice articles for counter trade. Bulbous stock is selling well, when the amount grown is considered, at \$3 to \$4 per 100. These prices refer, of course, to Tulips, Jonquils, Paperwhite Narcissus, Roman Hyacinths and Lily of the Valley. The green goods market in this vicinity is nearly depleted and outside stock has to be relied upon. I. B.

Yonkers (N. Y.) Hort. Society

The first meeting of the month was held Wednesday evening, Mar. 2, with fifty members present, Pres. E. Bennet in the chair. Several new members were admitted and a number of applications received. The committee on the dinner reported progress and stated that the arrangements were very nearly completed and the tickets were selling well. The competition in Roses for the prize offered by Pres. Bennet was keen and a number of fine blooms were shown. The judges appointed were Messrs. MacDonald, Stanton and Eunn. The first prize went to J. Lamb, second to H. Scott, third to R. Cummings.

Secretary Waite read an able and instructive paper on "Gardeners and the Gardening Profession," plainly showing it to be one of the oldest as well as one of the most noble in existence.

Secretary Waite offered a box of cigars as first prize for the most meritorious exhibit to be competed for at our next meeting; S. A. Woodrow offered two years' subscription for any of the trade papers as second prize and a one year subscription as third.

Vice-President Cochrane will read a paper on the "Culture of Mushrooms" at our next meeting.

LEE WHITMAN, Cor. Sec.

CUT FLOWERS AT WHOLESALE

New York

Arthur Herrington, for 14 years superintendent and landscape gardener of the estate of the late H. McK. Twombly, Madison, N. J., announces that he has resigned his position and on and after April 1 next will engage in the practice of landscape gardening. His New York address will be c/o Thomas Young, Jr., 500 Fifth ave.; his residence will continue to be at Madison.

Chairman Sheridan of the dinner committee of the New York Florists' Club states that Patrick O'Mara will act as toastmaster at the dinner, which is an assurance that the oratorical feast will be a success. Besides speeches from several well-known speech makers, an elaborate instrumental and vocal program has been arranged, and no effort has been spared to insure that the dinner will be a huge success. It is now up to everybody who can to send in their applications for seat reservations to Mr. Sheridan at once, and he will see to it that every applicant gets the best seat in the hall.

The following have been appointed as the reception committee on the occasion of the annual dinner of the New York Florists' Club, March 17: P. O'Mara, chairman; F. H. Traendly, A. T. Bodington, Harry Turner, C. B. Weathered, W. A. Manda, F. L. Atkins, W. H. Siebrecht, Jr., A. S. Buras, John I. Raynor, J. Austin Shaw, E. Dailledouze, John Binie, C. A. Small, Wm. J. Stewart, W. E. Marshall, H. O. Wm.

The next meeting of the New York Florists' Club will be Rose and Sweet Pea Night. President Miller announces that a well-known member of the Club, who is too modest to have his name mentioned, will be present and will give a talk on Sweet Peas, and also give an account of his recent trip to California.

Secretary John Young of the New York Florists' Club will be absent from the Club meeting next Monday night, for the first time during his secretaryship. He will be in Rochester attending the meeting of the executive board of the S. A. F. & O. H., of which he is a member.

Interest centers upon the convention, opening on Wednesday next, March 16, of the American Rose Society, and the exhibition in connection therewith. The sessions, and the exhibition, will be held in the American Museum of Natural History, 77th st. and Columbus ave. In conjunction with the exhibition will be held the Spring exhibition of the Horticultural Society of New York. Both exhibitions will be open, free, to the public. As the combination will result in the greatest show held in New York in recent years, obviously, the exhibition should be visited by every florist in this section, in fact in the East. A large number of florists from the West will be in the city next week for the express purpose of visiting the show.

The Yonkers Horticultural Society held its first annual banquet at the Park Hill Inn, Yonkers, on Thursday evening, March 10.

William Elliott & Sons will hold their first auction sale of the season, March 15th next, at 12 o'clock sharp, at their auction rooms, 42 Vesey st. The offerings will include 30 cases of freshly imported Holland nursery stock, consisting of hardy Roses, Azalea mollis, conifers, Rhododendrons, shrubs, vines, roots and bulbs. A list, giving offerings in detail, may be had, as usual, upon application.

The Fruit Auction Co., 200-204 Franklin st., will start its auction sales for the season on Tuesday, March 15, promptly at 10.30 a. m. The offerings include: Roses, Rhododendrons, hardy Azaleas, rose-grown Lilacs, Berberis, Viburnums and evergreens. The evergreens consist of Picea pungens glauca (the blue Spruce), Picea excelsa anra, Picea orientalis, Arbutus Japonica, Larix leptolepis, etc. Included also will be an assortment of English grown Roses in the newest and best varieties.

John P. Cleary has returned from an extensive European tour lasting two months.

J. K. Duer recently furnished many handsome bouquets to the order of Dr. H. Neumann, a prominent ear specialist of Vienna, which were sent to the many friends of the doctor who helped make his stay in this city most pleasant.

The American liner St. Louis recently arrived at her dock, having on board a quantity of Irish earth sods and hundreds of packets of real Shamrocks, which are en route to the Irish Fellow-

ship Club of Chicago. It is said that the sod is for President Taft to stand on, while speaking to the club members on March 17.

A very fine compliment was a day or two since paid to W. F. Sheridan by one of the prominent wholesalers of New York, who, speaking of the fact that the gentleman in question may change his place of business soon, said that no matter where he went Mr. Sheridan would always do business, as his ability as a commission man was so well known.

Last week the A. T. Bunyard Floral Co. displayed in its store window a handsome vase of flowers composed of Mrs. Aaron Ward Roses, Acacia pubescens, and yellow Callas. These made a fine combination and one seldom seen, on account of the short season during which Acacia sprays can be secured.

Geo. M. Stumm of Fifth ave. and 58th st. recently displayed in his store window plants, in bloom, of the blue and white-flowered Clematis; also fancy jars of Arbutus in flower.

Spaulding & Hodgson of 718 Fifth ave. are making a specialty of steamer baskets.

Henshaw & Fenrich announce that their store is at the disposal of any visitors to New York during the sessions of the American Rose Society, and that Roses for exhibition shipped to them will be well taken care of until called for.

Wm. F. McCord of Main st., Tarrytown, says that business with him has been exceptionally good this Spring, and that several carloads of nursery stock will be shipped as soon as the weather moderates sufficiently to permit digging the specimen trees. Grass seed is quite a large item in this firm's stock as well as fertilizers, while the florist's store does quite a thriving business all the year round.

Wm. Munroe of Garrettsford, Pa., is shipping to 28th st. a fine grade of My Maryland Roses.

Alfred H. Langjahr says that orders for Easter Lilies are beginning to arrive, and that he is able to supply all comers, he having 15,000 well-flowered plants to select from.

George B. Remsen, foreman in the packing room of the John Lewis Childs establishment at Floral Park, L. I., hanged himself on Tuesday in an unfinished building at Bellerose. A year ago he was struck by an automobile and had acted queerly ever since.

Plans have been completed for a twelve story structure to be erected on the site of the building now occupied by the Growers Cut Flower Co. and W. F. Sheridan.

Paul Rigo has again entered the employ of Henshaw & Fenrich.

Adrian Van Leeuwen, Jr., of The Horticultural Co., Worcester, Mass., was a visitor in the city last week. Other visitors were S. S. Butterfield of Atoka, Okla., and Jos. H. Sperry, Purcellville, Va.

Philadelphia

Friends of Mrs. Robt. Craig will be glad to know that she has safely returned from Florida, and although not fully recovered from her recent sickness hopes are entertained that she will soon be as active as formerly.

Wm. P. Craig left Philadelphia last Monday night on a business trip to Pittsburgh, Washington, Boston and New York.

During the past week business at the retail florist stores has been anything but brisk, although Saturday and Monday were such good days that hope is uppermost in the minds of many that our city's business will not be completely upset. The car men's strike is still a serious problem and it has seriously affected the business of all the department stores, to the end that many employees have been temporarily laid off. General strike conditions prevail, and the end is apparently as far off as ever.

Many of our local Rose growers are interested in an attempt to capture at the forthcoming exhibition of the American Rose Society, the \$50 silver cup for the best six Roses, and it is understood that quite some competition will be met from Philadelphia.

The S. S. Pennock-Meehan Co. is now offering a fine list of plants in bloom for Easter trade. The list comprises everything useful for the store. St. Patrick's Day orders will be met by the company's usual facilities and readiness.

Nick Clauser, who has been confined to his home the past month, will soon resume his duties in the establishment of W. E. McKissick Co.

The Robt. Craig Co. anticipates a record-breaking Easter demand, and with this end in view an extension has been made to the packing shed at the greenhouses, which will facilitate the handling of plants to a much greater advantage.

Skidelsky & Irwin are busy booking orders for the stock handled by them. The recent attempts by irresponsible parties to injure the good name of the firm have only resulted to its greater advantage.

Berger Bros. will have a fine lot of cut and potted Lilies for Easter.

Walter P. Stokes of Moorestown, N. J., has his greenhouses replete with good things for Easter. About 1500 Hydrangea Otaka are now ready for sale. Mr. Stokes has made a specialty of this plant for several years, and considers himself fortunate in having stock that will meet with the approval of all who see it. Lily of the Valley is another specialty of his, now well known in the Philadelphia market.

T. Malbrauc, Johnstown, Pa.; Ernst Wienhoeber, and son, Chicago; J. Horn, Allentown, Pa.; Mr. Cook, Easton, Md.; Henry Pfister, Washington, Del.; Mrs. Boyer, Riverton, N. J.; and Miss Hoopes, who has charge of the well-known store of J. E. Kepner, Harrisburg, Pa., were some of the visitors to town this week.

The Leo Niessen Co. is this week handling some of the finest cut Mignonette that it is possible for any grower to produce.

Baltimore

The month of March started in here very rough, but the bad weather did not last long. The sun soon turned Winter into Spring. Our streets became overcrowded with shoppers and the trade disposed of many cut flowers. One of our growers was on the streets offering his cut flowers and bulbous stock until late at night, and the public on their way to the different amusements took advantage and he was disposing of many bunches. The stock was offered at extremely low price, Carnations 12c. per dozen, and Sweet Peas at three bunches for 25c. One of our large department stores had a stall on the street in front of the store loaded with cut flowers and plants.

The retail trade have been busy making up many floral designs. An abundance of cut flowers has been sent to the Florists' Exchange, but by Saturday night 1 was told they had been all sold. Our Lexington Market looked like a flower garden on Saturday; the streets were gilded with Carnations offered at an old price. A great deal of very poor stock was there, and it was hard to get a respectable Carnation. Roses are coming in steadily; Callas are a little heavier in supply; Sweet Peas are plentiful; bulbous stock is very heavy; Azaleas are coming in slow. Greens seem to be a little scarce. Pansies have made their appearance. Potted plants move well.

The next meeting of the Gardeners and Florists' Club will open at 7 o'clock, instead of the usual hour. At this meeting election of officers will take place.

Quite a few retail stores will set showy windows for St. Patrick's Day. That day is celebrated in many ways. James Glass is sporting a new up-to-date automobile back buggy.

Mrs. Henry Eberhardt has made her appearance in the market again.

The Spring weather has caused a rush on the seed houses, and night work is in order. The outlook is very bright and a heavy business will be done.

J. L. T.

Pittsburgh, Pa.

John Bader was confined to the house the past week with a bad cold but is able to be about again.

Wm. Falconer returned from his trip a short time ago; he has been as far south as Cuba, taking in all prominent places in Florida.

E. Wienhoeber of Chicago was a visitor the past week and spent a day at the greenhouses of the Pittsburgh Rose & Carnation Co. at Bakerstown.

Business the past week was fair, principally funeral work. Stock is very abundant and prices are low. Roses are looking fine, the weather the past week was good to them. We have had a whole week of Spring weather; the thermometer went as high as 70° last Sunday, but dropped to and below freezing a day afterward. Report of Club meeting will be found under Clubs and Societies.

Chicago

The end of last week was a record breaker in weather conditions, and it is reported by the weather bureau that Saturday was the hottest fifth of March since 1894. It was certainly a sultry day. On Sunday the temperature had fallen 40 degrees and Monday found it still colder. These warm days were the means of glutting the market with all sorts of stock, and now with a decided change, should conditions continue, there will be in all probability, a shortage in stock for Easter. St. Patrick's Day's approach is evident by the many decorations, in the shape of harps, green Carnations, Shamrocks and other novelties, displayed in the retailers' windows. The preparations are somewhat more extensive than usual, owing to the fact that President Taft will be in Chicago on this day. The florists are vying one with another to see who can be the top on the list in the way of an effective decoration.

On Monday of last week four small children, three girls and a boy, walked timidly into Judge Winde's courtroom at the County building, went up to the judge's bench and presented the aston-

VAUGHAN & SPERRY

Wholesale Florists

Valley, Carnations and Roses

52-54 WABASH AVE., CHICAGO

Please mention the Exchange when writing.

ished jurist with a huge bouquet of American Beauty Roses. Fastened about the stems was a bit of crimson ribbon, to which was attached the following note: "We offer these flowers to a loving, just man; a judge who will protect our homes; a judge, who cannot be approached by word or letter; who is true to his oath. This man is worthy of deep respect and we honor him. (Signed) The Children." Before the judge recovered from his astonishment the children had disappeared.

Miss Ida Kroeschell, daughter of Mr. and Mrs. William L. Kroeschell of Winnetka, was married Thursday, March 3, to Ernest von Ammon of Chicago. The marriage took place at the home of the bride's parents. The bride wore a wreath of Orange blossoms and carried a shower bouquet of Lily of the Valley. After April 15 Mr. and Mrs. von Ammon will be at home at Winnetka.

Percy Taylor of Elgin, Ill., who is well known to many of the florists, and who had contributed largely to many papers on horticulture and agriculture lines in past years, died on Thursday, March 3, of pneumonia, at the age of 59. Mr. Taylor was born at Portsmouth, England, and until recently resided at Elmhurst, Ill. He was a close associate of the late John Thorpe.

James C. Hill, superintendent for the Kroeschell Brothers Co., boiler manufacturers, died last Tuesday, March 1, at Rogers, Ark., where he had gone for his health. Funeral services were held Friday morning at his late residence, 9937 Avenue H, South Chicago.

Charles Schlick, for some time in the employ of the Winterson's Seed Store, buried his father on Sunday, March 6.

H. E. Philpott spent Sunday in Chicago, en route for St. Catharines, Canada, to attend the meeting of the executive committee of the Canadian Horticultural Association, which will be held at St. Catharines on Tuesday, March 8. The subject of duty on plants will be discussed at this time. The arrangements for the convention of this association, to be held in St. Catharines next August, will be perfected.

A letter from Riverside, Cal., received from E. B. Washburn, who, with Mrs. Washburn, expects to spend some time

there for the benefit of his health, states they arrived safely, and were met at Riverside by their grandfather, O. P. Bassett, whose guests they will be for some time. Mr. Washburn says he is feeling much stronger than when he left Chicago.

The A. L. Randall Co. is handling Violets, and then more Violets, these days. In the supply department a very fine display of gold boxes and other Easter requisites are shown to good advantage. A new feature is in the line of a quick pot decoration, that is conceded by all florists who have inspected same to be the best yet.

J. B. Deamud Co. have a most exquisite showing every morning of the new Carnations, shipped direct from the Chicago Carnation Co., Joliet, including Mary Tolman, Sangamo and Conquest. All look their best at the present time.

Bassett & Washburn are cutting exceptionally fine American Beauty Roses, the best, in fact, on the market, and which are being much sought after by the commission men who have to purchase this stock from the growers.

Mr. Bohannon of the Bohannon Floral Co., is again suffering from the effects of the ivy poisoning that he contracted last Fall. He says he cannot complain of business the past few weeks, as he is kept moving along nicely. Monday, March 7, he had a large funeral order, consisting of a Violet casket cover and seven sprays.

H. Van Zonneveld, of Van Zonneveld Brothers & Philippo, wholesale bulb growers and nurserymen, Sassenheim, Holland, spent Thursday, March 3, in Chicago, and was the guest of the Chicago Florists' Club. Mr. Van Zonneveld is on his return trip through the West, and is on his way to Canada, expecting to return to Holland in three weeks. He has been on his trip through the States since January 1.

The George Wittbold Co. is busy, looking orders for Easter decorations requiring such classes of decorative plants as are made a specialty of by this house. Palms, Ferns and all plants for decorative purposes are always to be found at the company's establishments.

Wietor Brothers' large cut of excellent stock is always easily disposed of, and

HOERBER BROTHERS

Please mention the Exchange when writing.

at times the firm is kept busy hunting stock to complete their numerous shipping orders.

Peter Reinberg states that his stocks of rooted cuttings and small plants of Carnations and Roses are meeting with a ready sale; some varieties at this early day are all disposed of.

That the Poehlmann Bros. Co. are coming forward in the Orchid line is evident by the blooms they are now shipping from Morton Grove, Ill.

Little shoes filled with real Shamrocks are St. Patrick's Day novelties.

A young son of Mr. and Mrs. Joseph Brooks, Morton Grove, Ill., cut his knee badly on the ice two weeks ago. His hurts failed to respond to home treatment, and it was necessary last Saturday to remove him to a hospital.

Albert Heath of Milwaukee spent Monday in town, purchasing supplies for his Easter trade.

F. R. Hills, formerly of Chicago, is starting in the florist business in Los Angeles, California.

VISITORS: M. Morgan of Bobbink & Atkins, Rutherford, N. J.; M. Shepherd, Joliet, Ill.; A. T. Pyfer, Joliet; Mrs. S. M. and Harry Ellison, of the Ellison Floral Co., St. Louis, Mo.; Ed. Fancourt of Pennock-Meehan Co., Philadelphia, Pa.; Wm. A. Gardeen of Thorley's, New York City; Harry Baisley, Detroit, Mich.

A. H. Goodman, of the W. W. Barnard Co., has returned from his trip abroad, and says that the French Riviera, near Nice, is an ideal place to spend the Winter.

Vaughan's Seed Store front is being made attractive with a new coat of paint. Sphagnum moss, which this firm ships in carloads, has been held back by the heavy snows and railroad delays, but now and then a car does get down—150 miles in five weeks—and, divided among the many orders, helps to keep the florists' stores going.

The special park commissioners of the city of Chicago are asking bids from all nurserymen on a list of trees, shrubs and plants to be used in the municipal parks and playgrounds throughout the city. The bids will be received any date between March 5 and 17, at the office of the Park Commissioners; 200 Randolph st.

The Briggs House Florist has opened another store at 167 Dearborn st., in the Saratoga Hotel. This looks like a promising location for a florist shop.

L. Vaughan, of Vaughan & Sperry is still retained by the courts, on jury duty.

Florists' Club Ladies' Night

The dinner and entertainment tendered the wives and sweethearts of the Chicago Florists' Club, at the Union Restaurant, Thursday evening, March 3, was a most enjoyable affair, and was participated in by about 125 ladies, members and guests. A short business session was held from 7:30 to 8 o'clock, after which the ladies were conducted to the banquet hall, where numerous tables were set to accommodate the guests. The hall was prettily decorated with Palms and plants, the tables were well supplied with Roses, Lily of the Valley and Carnations as decorations. After all were seated President Asmus greeted the gathering with a short address of welcome, and said he hoped soon that instead of only being able to arrange these pleasant evenings for the enjoyment of the ladies annually or semi-annually the Club would soon be installed in a hall of its own, where such entertainments might be arranged more frequently. After a most bountiful repast was served, the rest of the evening was spent in listening to some very entertaining and well rendered songs, solos, violin solos, recitations and character sketches, all well executed, under the skilled management of D. S. Robertson. At the close of the program Auld Lang Syne was sung by the company, and all departed for their respective homes declaring that the Club had outdone any previous affair of the sort.

Last week the League bowling was held Tuesday night instead of Thursday night. The Violets beat the Carnations two games out of three, the Roses beating the Orchids the same way.

March 12, 1910

Kalamazoo, Mich.

After three months of continuous sleighing, accompanied by severe cold weather, a change to bright Spring-like weather and warm sunshine is welcome indeed. Whether this change will rush the Easter stock too much is the problem now facing the grower. Certain, however, it is that at present there is an over-supply of flowers, and as always the case, a dull market. Hopes are entertained that the Spring openings will use up a quantity of cheap flowers and thus relieve the market some.

St. Patrick's Day, with its green Carnations and banquets, will bring Easter week within reach, and no doubt up to that time business will remain fairly good. After Easter, however, the cut flower grower will find it a problem to dispose of the heavy cuts promising this Spring.

I anticipate good business for the bedding out and porch box work, but I believe the automobiles, with its attending results, such as the country club entertainments and lake parties, will effectively make a considerable reduction to the after-Easter affairs at home, so the shipping trade and funeral work will constitute the main business.

The automobile business cuts quite a figure as a rival to the florist, and here we have more agents in that business than there are florists; and as every sale they make will probably mean \$1500 or so quite a little of the surplus cash usually spent in various luxuries, among which would be counted flowers, is lost to those various trades. Again it all leads on to the greater outdoor life, which, while doubtless healthy for the participants, adds but little to the income of the average florist.

The Central Nursery Co. has again moved its downtown office, this time to 104 East Main st., and a fine location.

S. B.

Providence, R. I.

Johnson Bros. report a number of decorations during the past week, among them a dinner by the Real Estate Exchange, and another at the opening of the Weybosset Jewelry Store. Their window display consists of a number of gold-etched window boxes filled with plants and cut flowers, and a large floral harp in white and green.

J. Kopelman & Co. report good sales of cut stock in wholesale quantities, which shows that business in this territory is picking up considerably. Some additional room was found necessary and was taken over March 1 in order to properly store their stock.

Florence A. Willard, 279 Mass. ave., reports that she has again taken the contract for the planting of Roger-Williams Park and also the City Hall grounds. This makes the tenth year that she has held this work. She has some 2000 sq. ft. grown to a mixed stock, among which are Orchids and Violets. The coming Decoration Day will end 15 years in which the Hope Greenhouses have been located here.

John R. Hamilton, 45 Wheeler ave., has some 5000 ft. devoted to Carnations and bedding stock. Trade here is somewhat brisk, especially in funeral work, and is as good as at any time during the past 15 years.

A. J. Johnson of Shaw ave. and Broad st. is about ready to occupy the 3100 ft. of glass just being finished. This is one of the newer stores and Mr. Johnson is very well known to local trade, having spent some time with G. H. Cushing and S. J. Reuter & Son.

Among visitors in the trade the past week was James F. Smith of Boas & Co., Philadelphia, Pa.

Thomas Tullie, 206 Bay View ave., Edgewood, does considerable wholesale trade from his 4000 sq. ft. of glass, and makes a specialty of Fern growing, in which he is very successful.

Mrs. P. F. Conley of the Elmwood Greenhouses has some 10,000 sq. ft. of glass in which some of the finest Mignonette is produced. A general line is grown here for retail trade. She has been here for the past 20 years.

J. G. Jensen of the Park Greenhouses, 1142 Broad st., has some 15,000 sq. ft. devoted to a mixed assortment of stock. He built one house 45 by 190 ft. last Summer, and has had some trouble with same during several of the larger snowstorms, owing to the absence of proper gutters between houses. Plans are under way to change this arrangement, and future trouble will be avoided. The larger house is devoted to Carnations.

Bind Your Trees With Strokum Early This Spring

IT will keep down the caterpillars and tussock moths. Don't wait until the leaves have come out, and the crawlers are in the trees eating up the tender leaves. The way to control the pests and save your trees, is to stop them before they start.

All banding substances like cotton, burlap, fly paper or tar do not do the work. Unsightly cotton is carried off by the birds. Fly paper does not fill in between rough spaces of bark, allowing caterpillars to crawl under it, and the stickiness dries up, allowing them to crawl over it; burlap they also crawl over and under. Smeared-on tar preparations dry up besides disfiguring the trees for all the year.

One banding of Strokum lasts for entire season and is not unsightly. Caterpillars or tussock moths cannot crawl under, over or through it. We guarantee it perfectly harmless to the trees. Anybody can apply it.

Send \$3.00 at once for a sample package of 15 pounds, which is enough to band fifteen trees three feet around. Delivered free anywhere East of the Mississippi. West of the Mississippi, 50c. extra.

Let us mail you our illustrated booklet.

The Florists' Exchange, 2 to 8 Duane St., N. Y.

The Mastin Automatic White-Wash and Spraying Machine is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and is brass. The pump is of brass throughout, simple and powerful. The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for fifteen minutes.

All parts are made to gauge, and may be had for repairs.

Ask your dealer about our Extension Hose, Extension Rods, and the Mastin White-wash Nozzle for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

Worcester, Mass.

H. F. Littlefield reports business as very good. Easter orders are making an appearance, although too early for many.

Funeral work is heavy. There is scarcely a paper issued, but has a long list of flowers furnished for the obsequies. The weather has been unusually warm and this, with the many sudden changes of the past two months, has been the cause of many deaths.

CAROLUS.

St. Louis

Mr. and Mrs. John L. Koenig of the Koenig Floral Co. held a house warming recently in their new residence, just completed. There was a large gathering of friends present.

Mr. J. E. Weismann, who is connected with the Drumm Seed and Floral Co. of Fort Worth, Texas, called on the trade last week.

The W. C. Smith Wholesale Floral Co. received nearly 100,000 nice California Violets daily last week from their consignor in Kirkwood, all of which were of the best quality. The only trouble was that there was not a strong enough demand to consume them all.

Chas. W. Fullgraf, formerly a student of the Missouri Botanical Garden, and late with the City Forestry Department, reports that he has entered into business as a practical forester and landscape gardener, with downtown office in the Frisco Building; he has issued a neat catalogue for his patrons.

W. C. Smith says he is keeping bachelor quarters now, his mother having left last week for a long trip to California. Mrs. Smith is the mother of Mrs. H. V. Hunkel of Milwaukee.

Rufus J. Lockland, who resigned recently as president of the Board of Trustees of Henry Shaw estate, a position which he held for twenty years, died last week at the age of 90. Mr. Lockland was a great lover of flowers and well known to the local trade. The honorary pallbearers consisted of the Board of Trustees of the Shaw Garden, Prof. Wm. Trelease, James Gurney and A. D. Cunningham. The house was completely filled with flowers on the day of the funeral.

C. H. Kuehn is receiving, daily, a fine shipment of Roses from Ammann's Edwardsville place. All Rose growers' consignments to this market have been short for some time, but from now on there will be plenty of Roses in all varieties, especially for the Easter trade.

Our seedsmen, Schisler, Plant, Young and others, are looking for a big seed trade. They say they are very busy in all branches of the seed business with large mail orders coming in daily.

Among the downtown retail stores, The Riessen Floral Co., Foster, Sanders and Grimm & Gorley, say they did a rushing counter business all of last week with Violets, Sweet Peas and Carnations; cheap prices prevailed at these places.

A meeting, which was called by several of the West End florists to organize a Retailers' Protective Association, was held on March 2, at the Washington Hotel. About twenty of the invited retailers were present and an organization was perfected with C. C. Sanders acting as chairman, Chas. Young as secretary and F. H. Weber as treasurer. They organized to protect themselves against the wholesalers selling at retail; and will not buy from those who do this. This was the only work laid before the first meeting; the next is subject to a call from the secretary.

HITCHINGS & CO.

NEW YORK—1170 Broadway
ELIZABETH, N. J.

Los Angeles, Cal.

Mr. Peter Bisset, a representative of that branch of the Department of Agriculture devoted to the introduction of new economic plants into the United States from foreign countries, is now on this Coast collecting data relative to the behavior of the subjects distributed by the Department to plant enthusiasts, both amateur and professional, for a number of years past. The custom has been to send these things to whomsoever applied for them, so long as the stock lasted, with the thought in mind that the experimenters were to make their reports from time to time as to growth and development, and the adaptability of the various plants on trial.

After years of trial, by this method of determining the value of any plant in any section of the country, the fact was learned by those in charge of the work at Washington that the information thus obtained was both unreliable and unsatisfactory. A new policy based on the experience of the years gone by is now being pursued. A trained man from the Department is now sent out on a tour of inspection. The qualifications of the experimenter for the work is being inquired into, as well as the soil and climate for which the subject is thought to be adapted. It has been learned from an expensive experience that comparatively few plant enthusiasts are qualified, either in training or in temperament, to give a plant a thorough test and furnish to the Department an accurate account of its adaptability to the climate and soil, and the use for which it is intended. Enthusiasts who lack tenacity of purpose, and those who are unacquainted with even the first principles of planting, cultivating and irrigating have been supplied with expensive plants without contributing a single item of information which the Department was after.

Then there is the careless enthusiast; competent to make a test yet too careless to keep records, and in one case here to even keep the names of the subjects received. All this is to be changed, and that too, for the better. The man and his locality are to be studied before he receives plants to experiment with, and, through the personal knowledge of some competent representative of the Department, tab will be kept on the men who are making the experiments as well as on the plants experimented with.

Mr. Bisset is the third man whom it has been my privilege and pleasure to meet. P. H. Dorsett was the first, and Dr. Van Fleet the second; and if all other agents in the employ of this branch of the United States Government are as well qualified in training and temperament as they, then it is a reasonable supposition that greater progress will be made during the next five years, in learning what plants are adapted to the various sections of the country than has been made during the last two decades.

Please mention the Exchange when writing.

The last issue of The Florists' Exchange received and carefully read. It is a superb number, brimful and bubbling over with information relative to plant novelties of the season. No gardener who cares to be well-informed should be without it and should keep it for future reference.

The description of *Dimorphotheca aurantiaca*, as given, does not harmonize with the plant grown here last year under the same name. The one tested here has solid orange-colored flowers which, when open, are dazzling. I have reviewed this plant in March number of Pacific Garden.

It is a satisfaction to know that Mr. Burbank is continuing his cultivation of the "thornless" Blackberry, as indicated by Carl Purdy's letter. The plant he had on his experimental grounds, last Summer, was as soft as velvet and as vigorous as the Wilson; if he succeeds in producing an upright growing spineless Blackberry, as prolific as Mammoth, he will deserve the everlasting thanks of the berry growers of this Coast. Logan, Mammoth and Himalaya, are wonderful growers, 20-foot canes in one season is no unusual thing, but they must be trellised. The thing that puzzles me in regard to Phenomenal is the statements of Burbank in regard to its size, quality and productiveness when, as a matter of fact, in every instance that it has been tested in this end of the State it has proved absolutely worthless. Agricultural editors are continually asked the question: "What is the matter with my Phenomenal berries? They do not bear."

Summer time, good old Summer time, has dropped in upon us. March 1, 85°; March 2, 86°; March 3, 85° maximum.

Tubular Boilers

Steam and Water

The Most Economical and Efficient Boiler for Greenhouse Heating

CENTRALIZE YOUR HEATING PLANT

The economy in heating large ranges of glass from a central plant is so great that the first cost is repaid in a few years.

Following are a few plants which we designed and installed:

THOMAS YOUNG, JR. BOUND BROOK, N. J.

150,000 sq. ft. glass heated by steam from a central plant; the exhaust from pumps is passed through a condenser which heats 2-150 foot propagating houses with hot water.

F. R. PIERSON CO. SCARBOROUGH-ON-HUDSON, N. Y.

150,000 sq. ft. glass heated by steam from a central plant; the steam is passed through condensers and the hot water is forced through the houses with circulators.

JOHN N. MAY SUMMIT, N. J.

75,000 sq. ft. glass heated by steam from a central plant.

with 30° less as the minimum, and with a relative minimum humidity of 22, 23 and 24 per cent. To date, we are six inches short on rainfall as compared with the same period last year, and no immediate prospects of rain. This dry, delightful sunny weather is enjoyed to the full by visitors from all parts of the United States, and it affords them an opportunity to have the time of their lives. As has been said before in these notes, it is a positive luxury to live in this climate. A tent pitched beneath a Pepper tree, a live Oak, or one of the mammoth evergreen Picea trees, with enough bread and water to satisfy hunger and thirst, and a daily bath, is bliss indeed.

Mr. Peter Bisset, Government field agent for the introduction of new plants, who is here now, is amazed at the growth in the open of subjects grown under glass in the East, and enraptured with the climate. The dust, which is trifling now compared with what it will be four months hence, disturbs him.

Despite the dry weather, great activity prevails everywhere in this southland in planting trees of every kind, which will, if given a chance, add wonderfully to the beauty of southern California a decade hence.

P. D. BARNHART.

New Orleans

A display of Orchids well worth going quite a distance to see was lately on view at the greenhouses of James A. Newsham, the southern Orchid specialist. Several hundred spikes of the very showy *Oncidium splendens*, with lesser quantities of *Oncidium Cavendishii*, *Lycaste Skinnerii*, *Cattleya Skinnerii*, the magnificent *Laela superbiens*, *Cypripediums*, etc., proved a veritable feast for the eyes. This grower has just received an immense importation of *Oncidium splendens* and *Odontoglossum grande*, in first-class condition. His young son, Dan Newsham, left during the past week for Central America in quest of *Cattleya Bowringiana*; he is undoubtedly the youngest Orchid collector in the field.

Bruno Werner, of the firm of Werner Bros., has taken over the business of Henry Rehm of Cherokee and Pearl sts., while Otto Werner will continue at the old stand on Hurst st.

Mr. and Mrs. Henry Rehm will leave shortly for a trip to Germany.

George Thomas is building a greenhouse, 80 by 18 ft., to be devoted to plants for the market trade.

A recent visit to the establishment of M. De Laportade finds his stock in good shape, although he reports business as being nothing to boast about.

CRESCENT CITY.

CENTERVILLE, IND.—Mr. E. Y. Teas, having passed his eightieth birthday, is desirous of disposing of his nursery and florist business, in which he has been engaged for some sixty-two years past. Mr. Teas enjoys a splendid reputation for originating and producing some very desirable plants, is reputed to have a good business and, we trust, will succeed in disposing of it to worthy successors.

SPRING TRADE EDITION

Will be issued
next Saturday, MARCH 19

Mastica is elastic and tenacious, admits of expansion and contraction. Putty becomes hard and brittle. Broken glass more easily removed without breaking of other glass as occurs with hard putty. Lasts longer than putty. Easy to apply.

WHICH EAVE ARE YOU BUYING?

L. & B. Galvanized, Ice-Clearing Eave Plate with Sash Bar Clamps, makes this strong, but extremely light eave.

It seems hardly possible that after all the talking about lighter, stronger houses, that some growers are even this very day buying eaves that are heavier but not as strong as our Galvanized, Ice-Clearing one; eaves that are a little cheaper to buy but cost dollars and dollars more each year, because of the resulting shade and repairs.

Perhaps you may be one of those who do not know that we will sell separately, the plate with sash bar clamps attached. Send orders for as many feet as you like, and we will ship promptly.

GRAFTED AND OWN ROOT ROSE PLANTS

**KILLARNEY, RICHMOND,
WHITE KILLARNEY (Waban Strain),
MY MARYLAND, RHEA REID,
BON SILENE, and SAFRANO.**

EXCEPTIONALLY fine large plants of Kaiserin, grafted and own root, which, if planted early, would produce flowers early in the Summer, when there is a good demand for them. Have also a large lot of one-year-old dormant plants, suitable for 'out-door planting; Killarney, Richmond, Rhea Reid, Bon Silene and Safrano. Send for prices.

New Double Lobelia

"KATHLEEN MALLARD"

We can furnish excellent plants of this splendid novelty in 2½-inch pots, at \$6.00 per 100, or \$50.00 per 1000.

RAWSON'S LEADING ASTERS

QUEEN OF THE MARKET ASTER

This is the best early out-of-door Aster. In colors as follows: Dark Blue, Light Blue, White, Rose, Peach Blossom, Crimson, per ¼ oz., 20c.; per oz., 60c. All colors mixed, per ¼ oz., 15c.; per oz., 50c.

RAWSON'S NEW MIDSUMMER ASTER

This is one of the best Asters for Midsummer or late crop and we recommend it highly. Flowers are large and are borne on erect long stems, often 2 feet in length. We offer the following colors: Pure White, Delicate Shell-Pink, Royal Purple, True Lavender, and Bright Rose, per ¼ oz., 60c.; per oz., \$2.00. All colors mixed, per ¼ oz., 50c.; per oz., \$1.50.

RAWSON'S LATE BRANCHING ASTER

This is the best American Branching Aster grown to-day. It is a late cropper and a money-maker. Flowers grown from our seed invariably bring from ½ to 1c. a flower more in the wholesale market than other similar strains. We can furnish the following separate colors: Crimson, Dark Blue, Light Blue, Rose Pink, Shell-Pink, Scarlet, and White, per ¼ oz., 30c.; per oz., \$1.00. All colors mixed, per ¼ oz., 25c.; per oz., 75c.

We have many other good strains of Asters and specialties for Florists all described in our special catalogue to florists (mailed free).

Special Gladiolus Offer

AMERICA

A few points of merit—Color: A beautiful soft flesh pink, very light and much like "Enchantress" Carnation, except slightly tinged with lavender. Size: growth very strong and healthy, producing beautiful dark green foliage, and strong, erect spikes of the largest flowers. Purposes: For florists' use its color makes it everything to be desired; delicate, attractive and absolutely new. It is most desirable for planting in beds in parks, private estates, etc.

AMERICA. The best commercial pink in existence, 1st size bulbs, 100, \$4; 1000, \$30; 5000, \$125.

ATTRACTION. Deep, dark, rich crimson with a very conspicuous large pure white center and throat. At once a most beautiful and attractive sort. 100, \$4.00; 1000, \$35.00.

AUGUSTA. Lovely pure white with blue anthers. 1½ to 2½ inches. 100, \$2.25; 1000, \$20; 5000, \$90.

BLUE JAY (Baron Hulot). The finest blue Gladiolus yet seen. It is a rich deep color of indigo shade. The only real blue Gladiolus on the market. 100, \$9.00; 1000, \$75.00.

BRENCHEYSENSIS. Extra fine red variety, 1½ to 2½ inches. 100, \$1.50; 1000, \$12.00; 5000, \$55.00.

COLUMBIA. Light orange scarlet, freely blotched and penciled with bluish-purple. Throat freely mottled. 100, \$2.00; 1000, \$15.00; 5000, \$70.

CIBES. Pure white, spotted with purplish rose. 100, \$1.50; 1000, \$12.00; 5000, \$55.00.

MAY. A lovely pure white flower, finely flaked, bright rosy crimson. 100, \$2.00; 1000, \$15.00; 5000, \$70.00.

NEZINSCOTT. Bright blood scarlet, with deep velvety crimson black blotches, and white mottlings in throat. 100, \$4.00; 1000, \$30.00; 5000, \$145.00.

PRINCEPS. Rich crimson with very deep shadings in the throat and broad blotches on lower petals. 100, \$10.00; 1000, \$80.00; 5000, \$400.00.

SALEM. Fine salmon-pink, maroon blotches. 100, \$6.00; 1000, \$40.00.

Gladiolus America

SULPHUR KING. The finest yellow Gladiolus. 100, \$15.00; 1000, \$140.00.

Stumpp & Walter Co.'s High-Bred Asters

Asters are our specialties, and great care is taken to have only the best and those that will give the greatest satisfaction. We have been very highly complimented on the choiceness of our strains.

ASTER. Queen of the Market. This is the earliest of all, fully three weeks earlier than other Asters. Selected stock.

	Tr. pkt.	¼ oz.	Oz.
White	\$0.10	\$0.15	\$0.50
Crimson	.10	.15	.50
Rose	.10	.15	.50
Light blue	.10	.15	.50
Dark blue	.10	.15	.50
Flesh color	.10	.15	.50
Lilac red	.10	.15	.50
Mixed	.10	.15	.40

ASTER. S. & W. Co.'s Selected Late Branching. One of the best branching Asters for cut flowers. Our strain of this splendid Aster is grown specially for us, with the greatest care.

	Tr. pkt.	¼ oz.	Oz.
Pure white	\$0.20	\$0.30	\$1.00
Lavender	.20	.30	1.00
Purple	.20	.30	1.00
Crimson	.20	.30	1.00
Shell pink	.20	.30	1.00
Rose	.20	.30	1.00
Carmine	.20	.30	1.00
Mixed	.10	.20	.75

ASTER. Hohenzollern. Excellent robust new class, with enormous flowers, superb for cutting and exhibiting; flowers often measuring 6 to 8 inches in diameter.

	Tr. pkt.	¼ oz.	Oz.
White	\$0.25	\$0.75	\$2.00
Rose	.25	.75	2.00
Dark blue	.25	.75	2.00
Crown Prince	.25	.90	3.00
Syringa blue	.50	1.50	5.00
Mixed	.25	.75	2.00

ASTER. Purity. One of the finest white Asters grown, either for pots or cutting. Trade pkt. 25c., ¼ oz. 75c., oz. \$2.50.

ASTER. Daybreak. Counterpart to Purity, with a fine rose color similar to Daybreak Carnation; very fine. Trade pkt. 25c., ¼ oz. 75c., oz. \$2.50.

ASTER. Giant Comet. Tr. pkt. ¼ oz. Oz. Pure white \$0.25 \$0.75 \$2.00 Dark blue .25 .75 2.00 Light rose .25 .75 2.00 Mixed .20 .60 1.75

ASTER. Hercules. White. Remarkable new introduction, semi-dwarf, huge pure white flowers of most refined shape; the best white flowering Aster we have ever seen. Pkt. 25c., ¼ oz. \$1.00, ½ oz. \$3.50, oz. \$7.00.

ASTER. Splendor. Upright flesh pink. In this variety we have one of great value. It has many qualities which commend it highly, not only in the habit of growth, but in size, form of flower, and in color, which is one of the most desirable in an Aster, being of a beautiful light flesh pink, a shade which can be used in nearly all floral work. The plant has the ideal habit of an upright growing sort. Pkt. 25c., ¼ oz. \$1.75, oz. \$5.00.

ASTER. Vick's Violet King. The peer of the grandest Chrysanthemum. The habit is similar to the popular Vick's Branching, vigorous in growth, long, stiff stems; petals somewhat resemble the quilled varieties but much larger and broader, completely covering the crown. In shape and size the bloom is round, full and large, many of the flowers 4 to 5 inches. Its color is a soft violet-lilac. Trade pkt. 25c., oz. \$1.50.

European Notes

February expired in a fit of hysterical weeping, having lived up to its "all dyke" traditions for twenty-six of its twenty-eight days; the traces of the mischief it has wrought will be on view for many a day to come. Viewing the matter from the standpoint of the readers of these notes it has done more to upset and dislocate business than anything that has ever occurred before in the memory of the writer, and it is now too late for matters to be put right. Many tons of valuable seed have been so badly damaged as to be unsalable, and much of that which has been saved is so seriously weather stained that in an ordinary season we should be compelled to reject it. Fortunately the supply is so limited that

"Horseshoe Brand" Products

"NOT HOW CHEAP—
BUT HOW GOOD"

The reputation of a grower is made by the quality of the flowers he markets. A good reputation is invaluable to a successful grower. Market returns are influenced by reputation. Any man with ordinary common sense knows that bulbs of good value are not cheap. That's why Horseshoe Brand Lily Bulbs are not the cheapest. They are good though and worth the money and then some. They are produced from the choicest seed-bulbs in the world and will average better per thousand bulbs than any other brand on the market. Write us or call.

J. BOLGIANO & SON

WHOLESALE SEED MERCHANTS AND
POULTRY FOOD MANUFACTURERS

BALTIMORE, MD.

Please mention the Exchange when writing.

British seed trade is thoroughly in earnest in their determination to put a stop to the time honored but detestable system of bribery which degrades giver and receiver alike. The evidence disclosed thus far is very unpleasant reading, but it is no worse than what has been known to exist for many years past. Either fear of the consequences or a growing spirit of honesty is operative just now, for a well known retail seedsmen told the writer quite recently that since the passing of the Act named above his expenses in "recognizing the skill of the gardener" were not more than 10 per cent. of what they had been before the Act came into force.

The severity of present day competition makes it necessary for the honest dealer to curtail his out of pocket expenses in every legitimate way.

EUROPEAN SEEDS.

American Notes

A Very Busy Period

One of the busiest periods of the entire seed selling season is always the fortnight preceding Easter; for the reason that, besides the activity of filling the daily increasing seed orders in all departments almost every seedsmen, to a more or less degree, makes a specialty of handling a stock of decorative and flowering plants at this particular time, even if he does not do so at any other season of the year. Even those seedsmen who are opposed to handling anything outside of seeds proper find themselves accepting orders for Easter plants—it would seem to be almost impossible not to do so. On the other hand, those houses who, in addition to seeds, habitually carry plants make an especial effort to secure all the trade possible in this line at Easter. The natural result is that between seed selling and plant distribution the days could not well be busier. Immediate seed selling during the past week has been very steadily active; almost everywhere, orders are gradually beginning to be received in such volumes that they cannot be at once executed, even with night work, and this state of affairs will continue until well into May; there will be no let up again to the rush of seed orders this season. Sales of nursery stock are reported by many seedsmen and from various sections to be far ahead of those of previous years; those of the trade who have extensively catalogued this department are much pleased with the results that are being obtained. Altogether, conditions have shaped themselves most propitiously for so early in the season.

The National Sweet Pea Society

The forming last year of the National Sweet Pea Society of America was an event of more importance than most of us realize. That this youngest of all our floral societies will prove a great success, and infuse ever increasing love and enthusiasm for the Sweet Pea there is not the shadow of a doubt; and it most certainly behooves every seedsmen in this country to encourage the good work already so ably begun. Every seedsmen in this country should see to it that he is enrolled as a member of this Society, either as an annual or life member, before the next annual exhibition, which will probably be held in early July. By becoming a member one is entitled to the annual report and all other interesting announcements that may be made from time to time, and, of course, to free access to all exhibitions. There is plenty of work for this Society to do, and the hearty and earnest support of all seedsmen is needed to accomplish the fullest success. Large as the sales of Sweet Pea seed will be this season, there is no doubt whatever in the minds of those who for the past decade have followed closely the wonderful yearly increasing enthusiasm for Sweet Peas that within a comparatively short time double the amount, or even more, of seed now sown of this superb annual will be needed to supply the demand. When it is considered that there are now listed in one form or another nearly six hundred named varieties of Sweet Peas, it will

it will not by any possibility be carried over.

Seed warehouses will be available for balls and other festivities when our season is finished, so that our friends who care to "trip it on the light fantastic toe" can come along in their thousands.

The month of March has thus far brought us a welcome message of peace and brightness; a glorious burst of sunshine ushered it in and during the first five days not a drop of rain has fallen. The Mi-Carême in Paris on March 3 was celebrated in a day of glorious sunshine and cloudless blue, and even in murky old London nine hours of bright sunshine and a maximum solar temperature of 80° Fahr. were registered.

A light frost every night helps to keep in check vegetation which is bursting in to life too rapidly and is at the same time helping to prepare a seed bed for our Spring sowings. Trade is consequently very brisk, even such sleepy articles as Clovers and Grasses coming in for a good share of attention.

Of course, it will be a long time before anything can be done with low lying lands, and unfortunately many of our plants are, or rather were, in those districts.

It is not very cheering to learn that Water Cress beds are covered with water to the depth of one metre, but it is a veritable disaster to learn that plants of Crosby's Egyptian and Detroit Beet are in the same position.

One of the most agreeable effects of the five days' sunshine is that Spinach and Radish growers are in a slightly more tractable mood, and it now appears that we shall be able to place our contracts, at any rate for the latter article, although at a considerable advance in price. The same conditions are reported from Holland, where the competition of the Sugar-Beet factories is very severe this season. Prices for the latter article have risen again and it is a highly profitable crop, which is more than can be said of Spinach growing, at the cut throat prices which have prevailed in Holland for several years past. Radish shall be more fully reported upon next week.

The prosecution of the firm of Cuthuth & Son of London under the "Corrupt Practices Act" seems to indicate that the

be realized how essential it is that some official source keep a record and authorize the introduction of new varieties. This will be but part of the work of the Society, which organization for a long time has been very much needed in this country.

Salamander Lettuce

Those dealers in seeds who do not wish to carry a full line of the innumerable varieties the list of sorts of so many vegetables present, and especially in Lettuce, will do well to bear in mind the general value of the Salamander Lettuce. This splendid variety is equally good for early or late plantings. Of course, all Lettuce do their best before the severe Summer heat comes on, but this sort will withstand a great amount of heat without burning, and is also very slow to run to seed. It forms a large, good, solid head, creamy-white inside, and of the finest buttery flavor. Taken all in all, if one were only going to carry in stock one variety of Lettuce it would be indeed difficult to find a sort that for all purposes would please customers better than the Salamander.

The Help Problem

From the number of letters and inquiries the writer has recently received, regarding the matter of securing competent people to assist in seed stores during the busy season, it is very evident that never before was there a stronger demand for good seedsmen than at the present time. Of course, to hire help in any line for a short period is always a more or less difficult matter; but in the seed business, a seedsmen very strongly objects to any engagement, except by the year, as there is in reality only one busy season and naturally it must be considered by both employer and employee as part of the entire twelve months work, and not to be separated from it. It is a serious mistake to wait until so late in the season when help is known to be surely needed; as most seedsmen contemplating a change of employers make such change around the first of the year.

V.

New York Seed Trade

The weather is slowly but surely getting more Spring-like and with the pleasant days counter trade is rapidly assuming very large proportions. That it is going to be a great season there is now no possibility of a doubt. The only question will be how to get seeds enough to supply the demand which is already here.

At Vaughan's Seed Store the staff is very busy and they certainly should be, as their location, corner of Church st. is ideal for retail counter trade. This week a very attractive display of lawn grass seed and bulbs fills the spacious windows.

C. McTaggart, at his new store, 123 Warren st., is much pleased the way retail business is starting, but finds that the sales of bulbs are particularly active this week. Mr. McTaggart wishes to express his thanks for the generous response of his friends at his opening last week.

Rickards Bros. have been having unusually large sales of lawn grass seed and other Grasses and Clovers.

At Boddington's business has started in earnest. The shipment of hardy Roses is just beginning. The sales of Cannas by the house have been enormous; in fact, up to the present time almost a half million roots have been sold.

Burnett Bros. report that the inquiries for seed catalogs have never been larger with them than this season. Their retail trade is starting very early.

W. E. Marshall & Co. will, as usual, have a choice assortment of plants for Easter sales.

Webber & Don find the orders for Sweet Pens coming in much larger volume than usual.

The help question with all our seedsmen is a most annoying one this season. It may be said, without referring to any house in particular, that everyone is short-handed; that is, they seem short-handed when the splendid amount of orders that are daily increasing are to be taken into account. There is certainly a field here for any good seedsmen who wish positions, for the season anyway.

William Elliott & Sons held their first auction sale of the season last Tuesday and were much pleased with the results obtained. Not only were the prices good but stock sold rapidly. The attendance was large, and this line of business has certainly started with a rush.

The Fruit Auction Co. also held its initial auction sale of the season last

ASTER SEED**SMITH'S PEERLESS
The Best White Aster**

IN making this statement we have given full consideration to the best varieties, having them all. It is unquestionably the most double and perfect of any of the ate branching varieties. See testimonials from those who grew it last year, page 23 of our Catalogue.

THE BEST IS THE CHEAPEST

Price:—Per oz., \$8.00; ¼ oz., \$2.50; 1-16 oz., 75c.; trade packet, 15 grains, approximately 450 seeds, 50c.; retail packets, 100 seeds, 25c.

We have the best standard sorts of Aster seeds, our own growing, at moderate prices and of unsurpassed quality, both as to germination and perfection of bloom.

Tuesday, and at 10.30 a.m., when Mr. Cleary started the sale a very large number of buyers were in attendance, eager to purchase the fine stock of Roses, Rhododendrons, shrubs and vines that were offered. A feature of the sales of the Fruit Auction Co. is the unique sales-sheet they publish. It is on the same plan as the one used in their sales of fruit and is a great help to the buyers. Future auctions will be announced from time to time and a most satisfactory season is looked for.

T. Mellstrom, representative for Sander & Sons, St. Albans, England, returned last Saturday on the Cunarder Campania from a six weeks' trip to the home office. We were favored with a call from him and he is most enthusiastic over the outlook for a satisfactory selling season. His house, has as usual, a very fine lot of everything in Orchids.

Philadelphia Seed Trade

Considerable activity is noticeable in all departments of the seed business, and much difficulty is experienced in securing help of the proper kind to take care of the great inrush of orders.

Mail orders have been particularly heavy the past few days, which is very gratifying, especially when one considers the turbulent state of affairs as published in the daily press, in connection with the car men's strike. But the outlook is good, and the situation is well in hand.

A visit to the Burpee establishment is convincing proof that more space is needed, and alterations will soon be started, the result of which will place the seed house in a position second to none. Glancing at the bulk of the day's mail, Mr. Burpee drew the writer's attention to the many orders received without the name or address of sender, thoughtless people who would soon be sending in a vigorous kick but for the system in use, whereby each order is satisfactorily placed. This week the firm shipped a large order of assorted garden seeds to Buenos Ayres, packed in bags suitable for such a trip. These precautions have been found very necessary to protect the germinating qualities of all seeds travel-

ing by water. Sweet Pea are in nearly every order received, and this fact has been considerably helped along by the firm continuing its well known policy of furnishing "seeds that grow."

Henry A. Dreer's store window on Chestnut st. has been tastily arranged with many garden seeds. Baskets of seed Potatoes catch a visitor's eye on entering the door, and the continued activity in all lines of vegetable and flower seeds keeps all the help on the jump. Asparagus roots are being asked for quite frequently, while Aster seeds seem to be uppermost in the mind of nearly every customer.

Johnson's Seed Store has experienced a good run on Cypas and Tuberous Begonia bulbs. Poultry feed and supplies of all kinds are selling rapidly.

Henry F. Michell Co. reports unprecedented sales on its Giant Aster seeds. This house is also making big preparations for a heavy demand for lawn grass seed. The store window at 1018 Market st. was the object of much interest in the past few days, on account of a display of two of the silver cups which were awarded for some exhibits at the recent show in Horticultural Hall. All these stunts bring the store into the public view, and anything that tends to increase its popularity is gladly resorted to, whether by advertising or otherwise.

Wm. Hy. Maule, Philadelphia, Pa.

This well-known house is rapidly expanding its business in flower seeds and bulbs among florists all over the United States.

When looking through the 192-page Maule catalog, 1910 edition, a reader cannot help but wonder at the variety of seeds listed, nearly all of great value

Mrs. EMMA J. KENNEL, CHILI, N. Y.

Please mention the Exchange when writing.

to the grower. To mention all the varieties would take up too much space, so that a general mention only is possible. The catalog contains, besides flower seeds, a complete list of vegetable seeds and agricultural implements, while the insides of the two covers show a collection of Sweet Peas and Pansies in colors. For many years past the house has made a specialty of Pansies for florists' use, so that now seeds of all the notable varieties—Maule's Giant Pansies—are so well known as to have become a byword, and their popularity has increased so that seed is grown by the hundredweight. Eros, Psyche, Adonis, Masterpiece, Raphael and many others of the Giant strain are seen in the markets and flower beds around Philadelphia in the Spring; the fact that the seed of these Pansies comes true to name is one of the great factors in the yearly sales. Over 35 varieties of Pansies are listed, all of which are suitable for many purposes. Peunia Ruffled Giants, and the double large

flowering types are especially featured. Phlox Drumoudii, Kochia or Summer Cypress—a plant rapidly becoming more and more popular as an annual hedge plant on account of its quick growth, easy culture and changeable colors in the Fall—Mignonette, Candytuft, Verbena, Nasturtium, Nicotiana, Papaver, Portulaca and many other useful seeds of plants for florists' use are carried in stock. Sweet Peas also receive considerable attention and the list of varieties is quite extensive. Many of the Spencer types are handled, including White Spencer, Countess Spencer, King Edward and many others which form an array of Sweet Peas which, for all purposes, would be hard to beat. The firm has been for years perfecting a brand known as Maule's new large flowering Sweet Peas, which are grown quite extensively for the foliage, long stemmed flowers and pleasing colors. Tuberosa rooted Begonias, Callas, Gloxinias and other bulbous stock are also described, while a complete list of the most popular hardy perennials is added, making the entire catalog very interesting.

It is pleasing to learn that within the past ten years the business of this house has increased from 5 to 15 per cent. each year, and with the energies put forth this season, a larger seed catalog, and more advertisements in different directions, there is no reason why Wm. Henry Maule should not increase his business at least 25 per cent. in all branches, and it will, we feel assured, repay the additional expenditure.

The Paris Floods

A Paris correspondent writes us: "In The Florists' Exchange of February 12, I read the following note from your English correspondent: 'All the buildings near the Seine are flooded, and as the majority of the principal seed firms are located near the Hotel de Ville, where the flood is at its worst, the losses will be enormous. Those acquainted with the sanitary conditions of some parts of Paris will not be surprised to learn that an outbreak of epidemic disease is feared.'

While it is true that the leading seed houses of Paris have their retail stores and offices not far from the Hotel de Ville, yet the Quai de la Mégisserie, on which most of them are located, being banked up the river higher than most other similar thoroughfares, was never flooded and none of the seed firms doing business on it sustained any loss worth mentioning. The largest of these firms, Vilmorin, Andreux & Co., had, at the worst time, 5 ft. of water—by infiltration—in their deep caves containing the engines supplying heat and light to the offices and retail store above.

Vilmorin, like all the other larger houses, have their storage buildings situated at other points, and had, therefore, no risks to run for the bulk of their stocks, even in the case of an inundation of the buildings on the Quai de la Mégisserie.

The material damages caused by the floods, on the whole, are considerable and the situation was bad enough in some of the low lying quarters near the river, without speaking of "enormous losses," where none of any great importance could be feared.

As regards sanitary conditions, notwithstanding the present unhealthy, wet, mild weather, which has now lasted for over six months, these conditions are in no way worse than in previous years, on the contrary; and we are not at all afraid of an outbreak of epidemic disease.

It is very unfortunate, that some daily newspapers, in order to be interesting, exaggerate matters and do their utmost to frighten people without reason.

I notice, by letters coming from your side, that Americans think that the whole of France (even the South, which has had a very dry Winter) has been overflooded and everything ruined.

The persistency of the rainy weather—probably unprecedented—might, however, in the end affect the outcome of some of our seed crops of 1910 around Paris and in western France. All will depend upon the weather we shall have during the next few weeks."

HUGO L. GROTE, 1123 Broadway New York

The Late James J. H. Gregory

When Abbot Hall was completed the late James J. H. Gregory, seedsman, of Marblehead, Mass., gave the tower a bell and a clock for the tower. On the bell is a characteristic verse:

1 ring at 12 the joyful hour of noon;
 1 ring at 9 to slumber sweet of night;
 1 call to Freeman in my loudest tone;
 "Come, all ye men, and vote, your noblest right!"

Mr. Gregory's ruling maxim in life was honesty and some of his terse expressions are worth quoting.

"What a man gives away he saves."
 "Money given away wisely is never lost."

"Life is in seeing other people enjoy theirs."

"To make the world better and happier is the noblest work of man or woman."

A New Potato Disease

The wart disease is a new enemy of the Potato crop which is attracting great attention in Europe, and which is liable to be introduced into the United States at any time. It affects the tubers, forming large rough unsightly warts and, in severe attacks, completely destroys the crop. Once the fungus gets into the soil it is impossible to grow a crop of Potatoes on the land for several years. It is spread by using affected Potatoes for seed, and, as this country imports considerable quantities of Potatoes every year, there is danger that it may be introduced. The U. S. Dept. of Agriculture has recently issued a circular (for free distribution) giving a brief account of this disease.

SORGHUM.—The U. S. Dept. of Agriculture has recently issued two publications relating to Sorghum—a bulletin on "The History and Distribution of Sorghum," and a circular for free distribution on "Three Much Misrepresented Sorghums." These publications contain much valuable information on which it is desirable seedsmen who handle that seed should be well posted regarding some mistakes and misrepresentations.

WALDEN, N. Y.—The C. W. Brownell Co. has been incorporated with a capital stock of \$20,000. Incorporators are C. W. Brownell, R. C. Brownell and J. D. Brownell. The company will deal in flowers and plants.

New Rose American Pillar

NO Climbing Rose is attracting the attention that "American Pillar" does, and most deservedly so.

It is by far the best single-flowered climbing rose for outside purposes; and on account of the great durability of its flowers, it is the best single-flowered forcing rose.

Gentlemen: July 12, 1909.

Let me tell you, too, that the American Pillar is a better Rose than you know, perhaps. The plant I had from you, which was planted this Spring under unfavorable conditions, is now giving us a succession of most exquisite bloom.

Yours truly,
J. HORACE McFARLAND,
Pres. of American Civic Association, Harrisburg, Penna.

COMMENT FROM THE LONDON GARDEN

"A most notable feature in this glorious display (Temple Flower Show in London) was the New 'American Pillar' Rose. The large and attractive rich rose pink blooms are produced in immense clusters, the white centers of the blooms adding to their attractiveness. —Florists' Exchange.

2½-inch pot plants, \$1.50 per dozen, \$8.00 per 100, \$75.00 per 1000.

AMERICAN ASSOCIATION OF NURSERYMEN
 F. H. Stannard, Ottawa, Kan., President; N. P. Stark, Louisiana, Mo., Vice-president; John Hall, Rochester, N. Y., Secretary; C. L. Yates, Rochester, N. Y., treasurer.

MADISON, WIS.—The Sturgeon Bay Orchard & Nursery Co. has filed an amendment to its charter, increasing its capital stock from \$20,000 to \$40,000.

MT. PLEASANT, TEX.—The Vine Hill Nursery has been incorporated with a capital stock of \$20,000. The incorporators are M. Black, E. C. Lilienstern and H. W. Peterman.

FREMONT, NEB.—G. L. Welch & Co. of the Plumfield Nurseries will grow twenty acres of nursery stock across the river in Saunders Co. this season, for their out-of-town trade.

DUNDEE, ILL.—The D. Hill Nursery Co. has been incorporated with a capital stock of \$25,000. David Hill, George Wm. Hill, Arthur H. Hill and Vernon D. Hill are the incorporators.

ALBERTA LEA, MINN.—O. M. Peterson, manager of the Alberta Lea Nursery, in company with L. W. Jasper, recently purchased 144 acres. It is the purpose of the management of the nursery to grow a general line of nursery stock on this new farm, and to make, as heretofore, a specialty of evergreens and small fruits.

The Simons Bill

The following is a copy of a letter written by F. W. Kelsey of New York to Hon. Chas. F. Scott, Chairman, House Committee on Agriculture, Washington, D. C.

Dear Sir:—Unless you wish to paralyze the nursery industry, will you not pigeonhole or report adversely the Simons Bill, H. R. 15656—one of the most impractical measures ever introduced? To attempt the proper inspection of nursery stock at ports of entry would not, or could not, accomplish the objects sought and would inevitably entail delay, heavy loss and injury without any compensating advantages, anywhere. It is surprising that such a bill should receive favorable consideration from any source!

Balcony Planting

It does not require a large place in order to produce beautiful effects in planting. In the illustration herewith will be seen a pleasing collection of trees and shrubs, not many of each, for the grounds are small, but so nicely arranged about the dwelling as to give a picture one likes to gaze upon. It is the planting in connection with the mansion that calls for admiration. Notice how well the Rhododendrons set off the plants grouped along the base of the porch! There is not a great variety of plants in all; Rhododendrons, Berberis Thunbergii, and a few ferns and other plants constitute the whole, with the hanging baskets above them. Yet how it all combines with the elegance of the house itself!

The covered carriage way adds to the harmony of the whole. Trees have grown up on the left of the entrance, and at their base and close to the front pillar is another Berberis Thunbergii. Following the drive there is well placed shrubbery on the left, with some shapely Lombardy Poplars in the background, to hide carriage buildings from view, as well as to add to the embellishment of the whole.

Grafting Elaeagnus longipes As all seedlings of Elaeagnus are not fruit bearing one has to run the risk of what will result from such plants. It prevents the selling of them until they are three years or so old, waiting for their flowering, that their sexes may be determined. This prevents the sale of one- or two-year-old seedlings which could often be made if the fruit bearing part could be guaranteed. Because of this grafting has been resorted to, the grafts from fruit bearing plants being placed on seedlings of this species, longipes, or on umbellatus, either one answering very well. Umbellatus is oftener used than the other, the cions take well on it, and if the seedlings of longipes are let grow on, many of them will prove fruit bearing, and can then be sold as larger plants than seedlings are considered.

If small seedlings could be had for stocks, grafting could be done indoors in advance of Spring, placing them when grafted in a cool, moist place ready for setting out as soon as frost leaves the ground. If to be grafted outdoors do it as soon as the buds on the stocks begin to swell, but cut the wood for cions now, burying them under ground in damp soil in a quite cold cellar, or in the open ground, if a spade can be forced into it, until the stocks are ready to receive them.

Red and Yellow Barked Willows and Dogwood

For decorative purposes a pretty combination is made of mingling in a vase some shoots of the flame colored Willow, the yellow one and the red twigged Dogwood. The flame Willow is the Salix Britzensis, the yellow, S. vitellina, and the red twigged Dogwood the Cornus alba. These three are highly ornamental when they take on their Winter color in early Winter, a color they retain until the return of Spring. A dozen of so of these shoots mingled with some evergreen sprigs is interesting and beautiful. It is seldom that these shoots have lost their color at Easter; and their use in the way described, though sometimes seen, is not often thought of.

When these shoots are to come from home grown stock, the plants need a close cutting back in early Spring, that vigorous shoots may ensue, as it is these that will be required for cutting when the time comes toward Spring. The plants themselves delight in deep and damp soil, and should be planted early in Spring.

Native Azaleas It is not so many years ago since the wild northern Azalea, A. nudiflora, was the only one to be had in quantities in nurseries, and even this one was not exactly nursery raised but had been dug up in the woods and transplanted to nurseries, being ready for sale a year or two later. Today the variety is larger, but the plants are of the same nature, dug up wildlings, with a year or two of nursery care later. Besides the nudiflora there are now the Vaseyi, viscosa, and calendulacea, and in some collections one called arborescens, a tall growing one with flowers of a

for aside from squirrels it is very doubtful if anyone here would gather them up, there is so little meat to a nut. This one, Juglans Californica, seems the same out, as that of J. rupestris, the one common in Arizona. In size they are the same, both very small, the Californica appearing rather the smoother of the two, if there is any difference.

California nurserymen value the nuts of the California species for sowing to raise stocks for grafting the finer sorts of Juglans regia on, it making an excellent stock for this purpose, making a strong, rapid growth, resulting in the production of good selling trees of the J. regia in a short time. As the nuts are easily obtained, our nurserymen here might find them useful for raising stocks, but as the question of the variety's hardness would have to be tested it might prove unsuitable except in the warmer States.

As there is a limit to the hardness of the Juglans regia when on its own roots, would it not be adding to its hardness to graft it on our black Walnut?

Among all the many kinds of Walnuts, not omitting the Japanese ones, there are none the equal of the J. regia, English Walnut as it is called, especially the improved kinds. The Japanese ones, J. cordiformis and J. Sieboldiana, are no improvement on anything known before. The nut of Sieboldiana has a Butternut flavor, but our own Butternut is superior in every way, as also is our black Walnut in comparison with J. cordiformis. A good hardy English Walnut is what we want, and perhaps if grafted on our black Walnut it would help to get it.

Balcony Planting

light pinkish white, a good deal like nudiflora, and it flowers at the same time, early Spring. Vaseyi is a deep pink, a beautiful species, the handsomest of all of that shade of color. Calendulacea is the yellow, or flame-colored one, a most beautiful variety; the color varies from a light to a deep yellow; and it has rather larger foliage than any of the others.

Viscosa flowers in Midsummer. It is white flowered and quite fragrant. In some way, perhaps from it not being as abundant as some of the others, it is not found in collections to the extent others are. In some cases it will be valued because of it doing well in quite damp places. In its wild home it is often found on the borders of swamps, its fragrant flowers mingling their odor with that of the Magnolia glauca.

Our nurserymen do not have the patience of those of Europe, who make a business of growing Azaleas and other shrubs for other markets, otherwise there would be nothing to hinder a business in growing these lovely Azaleas, both for forcing in pots for Easter and for the planting in groups on grounds, as is now done with the thousands imported every year.

California Black Walnut

So far as its use for eating purposes is concerned, the black Walnut of the Pacific Coast, Juglans Californica, is not nearly as good as the J. nigra, the common black Walnut of the middle States. Its comparatively small size is against it. It is no more than half the size of an average black Walnut as they are found here, yet possessing a thick shell. The wonder is that the nuts are thought worth saving for Winter, as we find they are,

Cut Leaved Birch Leads All

For Winter effect, as well as for that of Summer, but few trees surpass the Birches, more especially the varieties having white bark. Were it for white bark alone, the native one, Betula papyracea, would lead all, but when we consider the drooping character of the Cut Leaved Weeping Birch, we have to accord it first place. In this tree there is the beautiful white bark, the same as its parent form, the European white, Betula alba, added to which are the graceful weeping branches. These branches are not too drooping, but are pendulous to some degree, enough to render it pleasing to look at at all times, the limbs drooping as the tree ascends. Because of this it is prominent, wherever planted, both in Summer and in Winter. The Paper Birch, already referred to, is a conspicuous object in Winter, because of its pure white bark, and in Summer it is considered the best of Birches for shade, having foliage much larger than any other species. Besides B. alba, there is a native Birch, B. populifolia, having white bark, but it is not as good a white as any of the others named.

For Winter effect the Red, or Black Birch, Betula rubra, is greatly admired. The bark scales off as that of the white Birches do, but instead of in whole layers it is in ragged flakes and, being red in color, it is not at all unsightly as some ragged barked trees are, but, on the other hand, is considered interesting and pleasing to view, as it certainly is. This is the Birch which is found close to river courses, frequently overlapping narrow streams, adding to the beauty of the scene.

New Seedling Rose

Radiance

A seedling from Cardinal, a brilliant rosy carmine with opaline tints in the open flower. The form is fine, large, with cupped petals, bud long, brilliant, radiant, with extra long stems, a constant bloomer, fragrant, foliage abundant and of splendid substance.

A. T. DE LA MARE PTG. & PUB. CO., LTD. 2-8 Duane Street, NEW YORK

Nassau County (N. Y.) Hort. Soc.

A meeting of this Society was held in Pembroke Hall, Glen Cove, March 9, with over 30 members present and President Duthie in the chair. One petition for membership was received and six new members elected, among whom were E. Stanley-Brown, East Moriches, and W. H. Hunt of Boddington's. We elected our first life member, Mr. Mortimer L. Schiff of Oyster Bay, and the following gentlemen as honorary members: Mr. L. Tiffany, Mr. Emilen Roosevelt, Mr. Chandler Moore, all from Oyster Bay; Mr. A. G. Hadenpyle, Locust Valley; Mr. Colgate Hoyt, Center Island; Mr. D. Munger, Glen Cove, and Congressman W. W. Cocks of Washington, D. C. Credit is due our President for securing all these members to the Society. There was also a shower of checks for our Fall show. We were sure of the goods, now we are sure of the cash, which gives hope for the most successful show held so far. The date of the Summer show is set for June 15. Messrs. Robertson, Eccles and McQuinn acted as judges, making the following decisions: Roses: White, J. Everet; pink, J. Everet; any color, G. Wilson. All three exhibits were of superior merit. First for Sweet Peas, H. Gaut. Cultural certificate to R. Marshall for two beautiful Cyclamens; to J. McDonald for a splendid Schizanthus; to Alex. Mackenzie for a grand vase of Golden Gate Roses; to L. Trepas for a fine specimen of *Cologynne cristata*, which was a mass of blooms, and made a most gorgeous display. Honorable mention to E. Petrocchia for Primulas. A hearty vote of thanks was awarded J. J. Johnston for a splendid exhibit of conifers. We are to hear from him next meeting in the form of an essay on Evergreens. The next meeting will open at 7 o'clock.

OSCAR E. ADDOR.

Lenox (Mass.) Horticultural Society

A regular meeting of The Lenox Horticultural Society was held on Saturday, March 5, with President G. Foulsham in the chair. The meeting was largely attended, and was full of interest from start to finish. The following were unanimously elected active members of the Society: Alfred H. Diprose, Rochester, N. Y.; Joseph Manda, West Orange, N. J. and L. E. Stickles. The schedules for this year were adopted as read, and the following exhibitions will be held: Annual and Perennial, July 27; Fall Show, October 26-27. In addition to the Society's money prizes for the latter show, three silver cups have already been generously donated, namely by Henry A. Dreer for a group of miscellaneous plants arranged for effect, 100 sq. ft.; Eustace Jacques for eighteen varieties of vegetables; W. B. Field for twelve varieties of vegetables; and it is safe to predict that the high standard of vegetable culture for which Lenox is so famous will be fully maintained this coming Fall. E. Jenkins gave an interesting description of the recent Boston Midwinter show, and congratulated that Society on its splendid exhibition; special praise, however, he bestowed on Wm. Craig's collection of Orchids. The annual dinner of this Society will be held on Wednesday, March 30, and is being looked forward to with much interest by the members and their friends. Some excellent talent has been engaged for the occasion. Rose and Carnation night will be Saturday, April 2, and competition in the various classes will be keen. George Breed will also read a paper on "The Neglected Orchards of the Berkshires."

GEORGE H. INSTONE, Secretary.

Yonkers (N. Y.) Hort. Society

The first annual dinner of this Society was held at Park Hill Inn, Yonkers, on Thursday evening, March 10, and was voted by all as the best ever. About one hundred members and their friends from New York City, Long Island and other places were present. The dining room was very tastefully decorated, and much thanks is due to Secretary W. H. Waite for supplying the plants for the decorations, also to W. MacDonald for arranging the same. All the speakers took occasion to warmly compliment the Society on the excellent showing it has made since its start two months ago,

Carnation (Sangamo)

SANGAMO

BRILLIANT PINK

Experienced Carnation growers, who have visited our place and have carefully watched Sangamo this season, claim it will produce at least twice as many blooms as any other variety grown to-day. It is not only the most prolific Carnation, but the calyx does not burst, and the stem is always long and stiff, therefore Sangamo increases your profits more than two-fold. We not only invite growers to visit our place to see for their own satisfaction, but we will pay your railroad fare from Chicago to our place and back again, if you will only come. It is not too late for Sangamo. Our best plants were propagated in March and April last year.

Strong, healthy, well-rooted cuttings ready.

New Jersey Floricultural Society

An Orchid night was observed by the Society on March 11, at its rooms in Orange, with exhibits by Lager & Hurrell of Summit, N. J., and Joseph A. Manda of West Orange, N. J. and others, as well as a paper by Rev. Lewis H. Light upon "Our Native Orchids," illustrated by fifty mounted specimens from the author's herbarium. An enumeration of the various genera with description and habitat was followed by mention of certain plants which might, by hybridization with the beauties staged in the assembly room, be made to produce plants grown in the open, and improve some whose beauty was apparent only upon a close inspection and of interest chiefly to the botanist. The specimens had been collected during walks over the Orange Mountains, and more extended trips in Florida and other of our southern States. The same genera found in New Jersey, New York or Pennsylvania would be met with in the South upon mountains of consider-

A.T. De La Mare Ptg. & Pub. Co., Ltd., 2 to 8 Duane St., New York

Don't Get Left—Last Call on Rooted Cuttings, April Delivery

You still have one opportunity to get a stock of rooted cuttings of our splendid new Carnation, Dorothy Gordon, for Fall and Winter trade. Early orders took our entire stock during February and March, but we offer a limited

quantity of fine rooted cuttings for April delivery—which, from past experience, however, won't last long. Meanwhile our

CARNATION DOROTHY GORDON

has added to its laurels: At the Toronto show, just closed, a gold medal was awarded this splendid Carnation when exhibited in competition with others. Carnation Dorothy Gordon is a winner—a winner of prizes and a winner of profits, as our customers are learning.

Some of its merits are: Strong constitution—absolutely free from disease; wonderful productiveness—50% more flowers than Enchantress; good color—clear, uniform pink; splendid form and keeping qualities—flowers last four and

six days after cutting; and enormous size—averaging three inches in diameter. We know of no variety possessing all those strong qualities.

Order NOW some of the splendid stock we offer for April. Prices remain the same—\$10.00 per 100, \$75.00 per 1000—and you'll find, long before the season is over, that it was the best investment you made this year. If you want to investigate first, come to see us, or write for particulars—but don't delay, for the stock won't last!

able elevation, and for this reason embraced a region from Maine to Florida and New Jersey to California. Much of the data given was taken from the interesting work by William Hamilton Gibson.

In the large exhibit by Lager & Hurrell of especial interest were Cyrtopodium Orion (never before exhibited), Phalaenopsis Stuartiana and Epiphronitis Vetchii. The collection was in charge of George W. Strange.

Joseph A. Manda staged fine specimen plants of Cattleya speciosissima, intermedia, superba, and amethystoglossa, Miltonia cuneata and Ansellia cuneata.

D. Kindsgar, gardener for William Runkle, contributed a Dendrobium Wardianum with many large flowers. Among the exhibits of flowers from nearby estates were some from Frank Drews, gdr. to Thomas A. Edison, Roses and Violets; William Reid, gdr. to S. and A. Colgate, Carnations and Hydrangeas, among which was a white seedling Carnation of merit; Albert F. Larson, gdr. to A. B. Jenkins, Roses and Carnations; Max Schneider, gdr. to Charles Hathaway, Carnation Rob Roy and Victory, Tulips, Schizanthus, Mignonette and Stocks; John Dervan, gdr. to A. C. Van Gaasbeck, Carnation Victory.

This was the first exhibition in the contest for twelve silver cups to be given in January next by numerous patrons of the Society, the schedules for which were distributed.

J. B. D.

St. Louis Florists' Club

The local Florists' Club held its monthly meeting last Thursday afternoon, February 10. President Windler was on hand early to greet the members as they came in. When the meeting was called to order twenty-five had responded to the pressing notices sent out by Secretary Beneke and it was noticeable for the first time that the attendance of the city members was much larger than that of those who live in the suburbs, which was commented on by several of the members. The meeting opened promptly at 2 o'clock with all the officers in their respective seats; the usual preliminary proceedings opened the meeting.

A. J. Bentzen, chairman of the trustees, reported on the death of our fellow member, L. N. Van Hook, and stated that the trustees had arranged for the members to attend the funeral and send the usual floral emblem to the family of the deceased member. The chair then appointed a committee consisting of F. J. Fillmore, A. S. Halstead and C. DeWever to draw up suitable resolutions on the death of Mr. Van Hook, and such resolutions were duly presented and accepted by the Club.

The committee on the Club's monthly bulletin then reported, through Mr. DeWever, the chairman. The report was accepted, and by a vote the bulletin was endorsed by the members, who voted to place the Club's monthly notice to its members in each issue of the bulletin. Mr. DeWever's committee will meet this week and make preparations for the first issue.

A letter from the Convention Bureau of St. Louis, Mo., was read asking the Club to unite with it in extending an invitation to the American Association of Nurserymen to hold its annual convention, in 1911, in St. Louis. On a vote the chair appointed Frank A. Weber, C. C. Sanders and A. S. Halstead a committee to draw up the invitation. All of these gentlemen are members of the Nurserymen's Association.

President Windler, for the good of the Club, read an interesting paper on what he saw at the Illinois Florists' Association held in Urbana, Ill., recently; at its close a great many of the members wished they had attended and got in on some of the good things Mr. Windler read about it. C. S. Smith, the treasurer of the Club, announced that the Club was in good financial condition. The question box at the close of the meeting brought out some good discussions and a great many points of interest to several of the growers present.

April 14 is the date for the next meeting of the Club. ST. PATRICK.

CARNATION CUTTINGS

My stock has not been allowed to throw over three blooms per plant and is, therefore, very vigorous, producing cuttings strong and full of life. Cuttings from such stock will produce more and better flowers next Winter than the ordinary grade from stock that has been flowered to death.

Violets and
Sweet Peas
A Specialty.

JOHN H. SLOCOMBE
FLORIST
555 Townsend Ave.

New Haven, Conn., March 7, 1910.

Aphine Mfg. Co., Madison, N. J.
Gentlemen:—

After using your product for past three months find that it has effectively killed all the green and black fly on double and single violets in our houses—without injuring in the least the flowers, or even tender center leaves. We sprayed our young sweet pea vines, which were badly infested with green fly and that one application has cleaned out every aphid visible to date.

We have placed order for ten gallons Aphine with your local agents to keep on hand—as we cannot afford to be short should another crop of fly appear.

Yours truly,
J. H. SLOCOMBE.

See pages 513 and 543 for other Aphine endorsements.

Morris Co. (N. J.) G. and F. Society

"Carnation Night" proved a very interesting event. A large portion of the membership was brought out, and a very creditable exhibition awaited the meeting. There were not as many of the new candidates for honors on hand as we would like to have seen, but what was short in quantity was made up in quality. E. L. Enggren of Aqueduct, L. I., N. Y., had a grand vase of a new seedling, color cerise pink; stems were excellent and flowers large and erect. If this should prove a cropper, as Mr. Enggren claims it is, it will be a fine addition to our list; a certificate of merit was awarded it.

Henry Eichholz, Waynesboro, Pa., staged his new seedling Princess Charming, color Enchantress pink—a very beautiful thing and very fragrant. Awarded certificate of merit. He also staged Washington, a Lawson colored sport of Enchantress, which showed up nicely. Honorable mention.

The Chicago Carnation Co., Joliet, Ill., showed a vase of its new Carnation

Conquest, and a vase of Mary Tolman. Unfortunately these suffered in transit and could only receive a vote of thanks. Mr. Enggren, who was there, told how well these varieties stood up at Pittsburgh, where they reflected credit to the introducer. The Cottage Gardens Co., Queens, N. Y., sent a vase of Alma Ward and a vase of Mrs. C. W. Ward, in fine condition. These need no description, as they are so well known, both having been here before. They received the Society's vote of thanks.

John Downing, Florist to Dr. D. H. McAlpin, Morris Plains, N. J., had a magnificent vase of Winsor, which was awarded a cultural certificate.

Wm. H. Duckham had a peerless exhibit, in four varieties, Robt. Craig, Bay State, Enchantress and Rose Pink Enchantress. The Enchantress varieties were of great size. Cultural certificate.

A general discussion of the Carnation then ensued. Mr. Enggren gave us a nice little talk, so did Mr. Herrington. Mr. Duckham was asked to tell how he got the size. He believes in indoor culture and practices what he preaches. The size, he thought was an accident.

Carnations

F. Dorner & Sons Co.
LA FAYETTE, INDIANA

Please mention the Exchange when writing.

C. H. Totty and many other members had something to say and something to ask on the subject. Members and friends carried away bunches of Carnations as souvenirs.

April 11 with be "Rose Night." Madison can, if she will, put up a grand show. We had one last year, and expect great things this year. Roses are unusually good around Madison and Chatham. We are after some of the new ones; they are what draws the crowd.

P. J. Noonan, Morris Plains and John Prendergast of Morristown were elected members. E. R.

Washington, D.C.

There has been a marked improvement in the sale of bulbous stock this season due, many of the retailers think, to the new idea of bringing Tulips, especially, to the stores before they have advanced to the usual stage. This prolongs the chance of sale for the store man, and seems an additional incentive to the purchaser, easily recognized.

Azaleas and Rhododendrons have sold better than usual this season, and many fine specimens are in good shape for Easter.

The retailers are making their usual yearly rounds looking over the various sources of supply. The wholesale business of the past week was above the average.

Arbutus from the South has made its appearance on the streets. There is a good demand for green Sweet Peas. Carnations, and Shamrocks tied to hampers, with green ribbon in commemoration of St. Patrick's Day.

It is understood Gude Bros. & Co. will exhibit some of their choice home-grown Roses at the coming exhibition in New York City. JAS. L. CABBRY.

We wish to impress upon our readers that all questions intended for this department must bear the name of the sender, not necessarily for publication but as a guarantee of good faith. We will endeavor to answer all questions submitted to us by subscribers, but we cannot recognize anonymous communications.

IDENTIFICATION OF PLANTS

When sending specimens for names correspondents should send some lower leaves of herbaceous plants as well as upper ones, and of all plants, flowers and seed vessels if possible. In addition to this, if stated whether it be shrub, tree, herbaceous, wild or cultivated, location where growing, it would often enable identification of specimens difficult to determine otherwise.

(65) **Gladiolus**.—Will Gladiolus rot in the ground if left over Winter and covered with manure so they will not freeze? How deep should they be planted? How long can they be left in the ground? Will they bloom just as good as if planted every year?—Old Timer.

—Gladiolus should be lifted every Fall, replanting the best for flowering purposes the following Spring, planting the bulbets in a separate patch to grow on for another season. Plant 2½" to 4" according to nature of your soil and firm bulbs thoroughly.

(66) **May Flowering Tulips**.—Should they be thrown away when done blooming, or can they remain where they are undisturbed, and will they bloom again satisfactorily?—Old Timer.

—We suppose you mean bulbs planted outdoors in the border. These bulbs seldom do as well the second year and if good results are looked for would advise replanting the border every Fall, and setting out the old bulbs in an out of the way corner.

(67) **Narcissus Victoria**.—Can bulbs of this variety be planted outside next Fall and will they bloom again satisfactorily?

ARTHUR T. BODDINGTON

Seedsman, 342 West 14th St., NEW YORK CITY, N. Y.

Please mention the Exchange when writing.

ily? How should they be treated, or are they of no more value after forcing?—Old Timer.

If the Narcissus Victoria have been subjected to severe forcing would suggest discarding them. Otherwise plant the bulbs where wanted now (if the space is idle) or dry them off, and store in a cool dry cellar till next September, when they can be planted.

(68) Weed Killers.—Is there a reliable preparation in the market? I tried one from a chemical works last year; it killed the weeds on top and two weeks later they grew faster than before.—Old Timer.

—For planted grounds we know of no more effective weed killer than a man with the hoe; for walks and driveways a strong solution of coarse salt is the cheapest.

(69) Chrysanthemums. — Will all Chrysanthemums taken from stock plant with roots be just as good in every particular as regular cuttings?—Old Timer.

—Yes, if stock is healthy.

(70) Would it be all right to set out my Carnations this Spring on land that I grew my Princess of Wales Violet plants on last Summer?—C. R. L. N. H.

—We see no reason why your Carnation plants should not do well in such soil. A good top dressing of well-rotted manure, ploughed in, will greatly assist the plants. If you could scatter slaked lime on the ground before ploughing it will considerably sweeten the soil.

(71) Setting a Funeral Window.—I have a window in my store which is 12 by 12 ft. square, and have been thinking for the past few weeks whether it would be advisable to make a setting representing a room occupied by a casket, with a general decoration of floral designs. My trade is mostly of the design nature, and being on a side street I thought that something out of ordinary might attract attention. You will greatly oblige by advising me in the matter.—A. E. C., Conn.

—We could hardly advise the setting of a window so gruesome in character. Why not make a setting suggestive of a corner in a chapel, which would make a suitable background for a display of designs. We think the public would gaze on such a display without experiencing the "creepy" feelings which the window you suggest might excite.

(72) Scale on Trees.—I am mailing you, under separate cover, a piece of a limb, covered with a scale. Will you please advise me what it is and if it can be killed? Most of the shade trees are covered with it. We cut some Bean poles last year from the infected trees, and when the Beans were bearing, they dried up and died from the roots. We did not get a handful of beans from that field. Would that scale affect the Beans?—D. G. K., Penna.

—The scale on twigs sent here is Mytilaspis pomorum, the common oyster shell scale. We hardly think it possible for the scale to injure the Bean crop to such an extent, and expect that the vines were attacked by blight during the fruiting season. The scale can be killed

with kerosene emulsion, whale oil soap, Kil-o-Scale or Scalecide, the last two named being, perhaps the most beneficial; they can be procured from any of the large seed stores.

(73) Best Fertilizer for Carnations in the Field.—We would like you to give us the best commercial fertilizer for use in Carnation field. We have put a light covering of cow pen compost on land, but would like to add some commercial fertilizer and want to be sure that we use the best.—J. L. O'Q. & Co., N. C.

—A good fertilizer to use in connection with stable manure on a Carnation field would be blood, bone and potash. There are various brands marketed by the several fertilizer companies, each having a different name, but the combination of blood, bone and potash or any mixture having the same analysis would be found a good food for the Carnation field.

(74) Remedy Requested for Snails on the Greenhouse Bench.—Would also like to ask you what is the best remedy for keeping down snails or slugs in greenhouses? They seem to breed in our houses by the thousand, eating many dollars worth of Carnations. Some of them seem to be in shells, many others just soft slugs about the size of a large pea. We know it is said to handpick them at night but this, in a dense Carnation bench, is a hard thing to do. Now, if there is any way of stopping them, by poison or otherwise, we would like to know. Sprinkling lime and salt only answers for a day or two, as moisture will soon destroy the effect of

either of these preventives. We have used sugar, wheat, bran and a little Paris Green to some good effect, finding snails lying close by dead from eating it. We have also poisoned different fruits and laid around in conspicuous places and occasionally get one that way.—J. L. O'Q. & Co., N. C.

—If the poisons and lime do not exterminate the snail, the only thing we could suggest would be to cut into small pieces, potatoes or carrots, scoop out a hollow place and place these on the beds with the hollow side down. The snail will crawl underneath during the night and in the morning they could be gathered and destroyed. This may seem a slow method, but sometimes it seems to be the only one which will accomplish anything. DIANTHUS.

(75) Camellias Infested with Mealy Bug.—enclose a few pieces of a diseased Camellia branch. If there is any possible cure for the disease kindly answer through your Question Box, at your earliest convenience.—R. M., Conn.

—Your samples of Camellia sprays were covered with mealy bug, to get rid of which it will be necessary to spray all over the plant with Aphine, Nicotinic acid or some other equally effective insecticide. The black stuff on the leaves appears to us to be the result of soot carried in from the roof by the drip, or leaks in the roof. Hand washing or good strong syringing will have to be resorted to in order to clean the foliage. Had you kept the plants properly syringed the bugs would not have gained such a foothold.

(76) Trouble with Lilies.—Will you kindly inform me the cause of the trouble with Lily plants sent herewith? I purchased two lots from different seedsmen, and they are turning out this way.—E. A. L., New York.

—Your Lily plants show the same trouble which many florists are now experiencing. We attribute the cause to too rapid development of the plants, which has had its effect in intensifying a disease which Lilies are subject to. Our representative, in visiting many greenhouse establishments in the East, has repeatedly seen this condition, and was generally informed that it was caused by the plants being forced into bloom in a temperature too high which, coupled with the short space of time in which the plants had to bloom from the time of potting the bulbs until now, and in many instances with poor root action to commence with, makes one wonder that so many good Lilies are being offered to the trade.

Los Angeles, Cal.

Enclosed find a few florets of Bougainvillea lateritia, which, I trust, will reach you without losing any of its color. With it you will also find several diminutive Poinsettia leaves plucked from a bush growing in the same yard as that of the Bougainvillea. That you may compare the colors I send both. Grown under glass a red-flowering Bougainvillea has a faded, washed-out color, both of foliage and of flower bud, grown in the open, this variety, when in full bloom, is a sight never to be forgotten. There is one plant in this town (which covers the side and roof of a two-story house) from which a two-horse wagonload of top is cut annually, and what a sight it is when in flower! Some varieties of the magenta-colored sorts make prodigious growths, yet are such shy bloomers that they are worthless for that purpose; there has not been enough care exercised on the part of our nurserymen in the selection of varieties, when propagating, to get wood of the best. There is no excuse for this carelessness since wood may be had for the asking—and that, too, in quantities sufficient to produce enough plants to cover all southern California.

[The specimens noted were received in good condition. As to comparison, while the color of the two subjects was almost identical, that of the Poinsettia appeared about two shades more brilliant. —Ed.]

There is a large scarlet Ranunculus grown near here which would make a fairly good substitute for the Peonies of the Atlantic States of the same color; the crimson herbaceous Peonies not grown here. It would be well for florists to investigate and become thoroughly acquainted with this class of bulbs, that their wonderfully beautiful flowers might be found in our markets eight or nine months of the year. Unlike most bulbs, they do not deteriorate in productive capacity for several years if not planted out. I know of one instance where the head clerk of one of our seed stores planted a number of the bulbs which had been in the store three years, yet gave the most gratifying results.

P. D. BARNHART.

Rochester, N. Y.

Little improvement, if any, is noticeable in the condition of trade here, and large quantities of stock still accumulate, especially so in Carnations. Roses also are now in quantity, and difficult to move without a sacrifice in the prices. Lily of the Valley and Harrisii Lilies are quite out of the running altogether. Violets are in much better demand and have cleaned up readily in the last few days. With the present weather conditions there will be ample supply of cut flowers for Easter trade, and it is to be hoped the growers will not resort to the custom of salting stock.

S. A. F. Executive Board Meeting

The members of the executive board of the S. A. F. & O. H. arrived here Saturday morning, March 12, and were met at the Seneca Hotel by the officers of the Rochester Florists' Association and escorted to the Association's room, where they started business promptly. C. H. Vick of Rochester was appointed superintendent of the trade exhibition. Resolutions were passed endorsing the bill now before the N. Y. Legislature for a grant of \$50,000 for the purposes of erecting a range of glass, and to extend the work of the Department of Floriculture at Cornell University at Ithaca, N. Y. On Monday the board visited Convention Hall and found the appointments there all that could be desired; the members were unanimous in saying that it was the best for the purpose they had ever met with in any city. The second annual banquet of the Rochester Florists' Association was held on Monday evening and the members of the executive board of the S. A. F. & O. H. were the guests of honor. The banquet was a pronounced success; about 150 ladies and gentlemen were assembled. The tables, with decorations of Bridesmaid Roses, made a very charming picture. S. A. F. President F. R. Pierson responded to the toast to "The S. A. F."; W. N. Rudd to "The Convention"; W. C. Barry to "The Flower City"; Judge Vesey to "The Ladies"; W. F. Kasting to "The Man that Holds the Bag"; J. A. Valentine to "The Retailer"; H. B. Dornier to "The Carnation"; George Asmus to "The Rose". E. S. Osborne acted as toastmaster and, as usual, did the honors admirably. Informal speeches were made by Prof. L. B. Judson of Cornell, Prof. Craig of Cornell, and Woodworth Clum. Now work will start in real earnest for the banner convention of the S. A. F. & O. H.

H. B. STRINGER.

Syracuse, N. Y.

Ten days of glorious sunshine and ideal Spring weather, after our long Winter was most welcome, and all stock showed marked improvement; trade, too, was greatly stimulated; a larger sale of flowering plants was noticeable. The florists have all been very busy, for large funeral orders have been quite frequent of late and this has kept all classes of stock well cleaned up.

Many of the florists have been visiting nearby cities looking for extra stock, as a very heavy Easter trade is anticipated. The weather is a great factor, and at present writing is not very promising, as we are having snow and heavy frosts again.

Most of the craft have the larger part of their Lilies just right. The usual Easter prices for pot stock and cut flowers will prevail.

Headquarters for Easter Plants

AZALEAS One of Our Specialties

PREPARE FOR EASTER

Have Azaleas to burn, the best in the land, the best in the land, the best in the land,
Azaleas in finest colors, to beat the band, to beat the band, to beat the band

If you would know the fairest sight your eyes can ever see
Where the most perfect plants are grown,
To Aschmann's come with me.
Why! Ne'er since flowers began to bloom
Was such a glorious show
Of all the best that florists need found in
one place to grow.
The Lilies are the very best yet seen on
Easter day.
Azaleas are whole sheets of flowers, perfect in every way.
The Araucarias matchless are, so are the Ferns all green,
With bulbs and plumed Spirea, the best you've ever seen.
And Aschmann gives a challenge, let every florist hear,
For flowers, or prices, either, no rival does he fear.
If you wish to gather dollars like violets in the Spring,
Then send your largest order; his plants the cash will bring.

CHANGING DON'T PAY!!

From whom will you buy your Easter plants? "I have no cause to change," several sensible men in the trade remarked the other day. "Our friend, Godfrey Aschmann of Philadelphia, has been our reliable man of the past and shall, of course, be this year also."

Azalea Mme. Van der Cruyssen

The best pink Azalea in existence, so well known to every florist in America and Europe. Have three houses full, so covered with buds and flowers that the foliage is hidden. 75c., \$1.00, \$1.25, \$1.50, \$2.00, \$2.50 to \$3.00.

In large sizes we have the following varieties: Bernard Andrea alba (white), Niohe (white double), Dr. Moore (double pink), Memory de Van Honfte (large double pink), Mme. Van der Cruyssen (double pink); one of the best known varieties, Helena Tellman (rose; very attractive), Empress of India (double variegated), Schreveriana (double variegated), Apollo (red), all covered with buds. Price: \$1.50, \$2.00, \$2.50 to \$3.00 each.

In smaller sizes we have Empress of India (double variegated), Simon Mardner (double pink), Verveana (one of the old standard double variegated), Apollo (red), Mme. Van der Cruyssen (pink; the standard of all the pinks), Deutsche Perle (double white), Schreveriana (double variegated). Price 60c., 75c., \$1.00, \$1.25 to \$1.50.

Prof. Wolters, one of the so well known hight variegated, \$1.00, \$1.25 to \$1.50.
Niohe, double white, 75c., \$1.00, \$1.25, \$1.50, \$1.75, \$2.00, \$2.50.

AZALEA India. One of our specialties for the last twenty-five years. Raised for us under contract by our Azalea specialist in Ghent, Belgium. Our stock of Azaleas

To save express charges please state if wanted in or out of pots. Cash with order, please. No references will be investigated in these busy times.

GODFREY ASCHMANN

Wholesale Grower and Importer of POT PLANTS

1012 W. ONTARIO ST., PHILADELPHIA, PA.

Please mention the Exchange when writing.

F. E.—The Best Advertising Medium

that we ship is well known to our customers; it is the cream of Belgium exportation—full of buds.
What is the best pink variety? Mme. Van der Cruyssen is the name; originated by Mr. Van der Cruyssen of Ohent, Belgium. This variety is too well known by nearly every florist in America to be further talked about. All are as round as an apple, covered with buds.

Do you want to know why our Azaleas are good? Here is the pointer. We don't make a practice of selling them in the Fall, having the rubbish left for Easter, but plant them all as soon as unpacked into 6-7 in. pots, keep them cool and give them the best attention for Easter sales. Those not having many buds are kept over for another year.

KENTIA Forsteriana. Imported last Spring (1909) from Ghent, Belgium, in fine condition, 6-7 in. pots, 35-40-60 in. high, \$1.25, \$1.50, \$2.00, \$2.50 to \$3.00; 4 in., 20c. Holmsteana, 4 in., \$1.25-\$1.50 each; 4-in., 25c.; 3 in., 10c.

EASTER LILIES. Japan Multiflorum, of our own importation, raised from special 10-in. bulbs, 6-in. pots, right for Easter. The large demand for Lilies exceeds the supply every year; we, therefore, ask that you order early. Price, plants with five buds and upwards, 10c. per bud; plants with under five buds, 12c. per bud. We can satisfy all wants if ordered soon.

NO PROFIT IN LILIES.

Owing to the small profit in the growing of Easter Lilies, an order for a reasonable amount of other stock should accompany all orders for Lilies.

CINERARIA Hybrida. We have a house full, 125 ft. by 21 ft., of the choicest colors—Henry F. Michell Co.'s best strain, just right for Easter, 5, 6 1/2 to 6 in. pots, medium height, 25c., 35c., 50c., 75c. to \$1.00, just right for Easter sales. Same are in bloom now for immediate sale, if you wish.

BEGONIA. New Improved Erfordii. Always in bloom, Summer and Winter; 4-in. pots, very strong, \$2.00 per doz.; 6 1/2 in., in bloom and bud, 25c., \$2.00 per doz.

PRIMULA Obconica. 6 1/2 in. pots in bloom, \$2.00 to \$2.50 per doz.

FERNS for dishes, 2 1/2 in. pot, \$5.00 per 100.

Hyacinths. Raised from first-class bulbs of our own importation. These Hyacinths cannot be compared with ordinary stuff raised from cheap bulbs floating the market. King of the Blue (dark blue), Grand Mat (lavenar blue), Gertrude (pink) and La Grandesse (white). 4-in. pots, \$12.00 per 100.

TOURNESOL TULIPS. Red or yellow variegated. This is the best selling double Tulip in the market. Will stay in bloom in good condition ten days. Three bulbs in one 4-in. pot, \$1.50 dozen pots or \$12.00 per 100 pots. Murillo Tulip, best double pink, 3 bulbs in a 4-in. pot, \$1.75 to \$2.00 per doz. pots.

Double Von Sion NARCISSUS. The best new Narcissus in the market, sold at sight; three double-nosed bulbs planted in one 5, 6 1/2 to 6 in. pots. Price, \$2.00, \$2.50, \$3.00 per dozen pots.

IPOMOEA Noctiflora. Best pure white Moon-vine in market, very fragrant and as big as a saucer. On this variety we have a world-wide reputation as growers and shippers for the last twenty years. Price, 2 1/2 in. pots, \$5.00 per 100, 10,000 are now ready.

COCOS Weddelliana, 3-in., 15c.

BEGONIA Flambean. Sale at sight, 4-in. pots, 20c.; 6 1/2 in. pots, 25c.

FIGUS Elastica or Rubber Plant. Home-grown and Belgium stock, 5 to 6 1/2 in., 25c.

LATANIA Borbonica. 4-in. pots, 20c.

HYDRANGEA Otakka. Already forced, in bud, just right for Easter, 6 to 7 in. pots, 25c., 40c., 60c., 75c. \$1.00 to \$1.50 each. A whole house of Hydrangeas.

Can supply all wants.

SPIRAEA Gladstone, 6 to 7 in. pots, large stuff, 50c., 75c. to \$1.00 each. We have a house full of this Easter novelty, in better condition than ever—full of buds, just right for Easter. Order in time. Remember! Good Spiraea are scarce this Easter. Why? Owing to the bad weather in Holland.

Philadelphia and Atlantic City is well located for visitors, and these are cordially invited. The listing of Dahlias is a select one and embraces comprehensive listings in all the several types. Additionally, the catalog contains a select list of Hardy Perennials and Hardy Shrubs.

OTTO BEYRODT, Berlin, Germany.—A compact and very complete listing of Orchids, the specialty of this House. The front cover contains a half-tone picture illustrative of a locality where Orchids are collected. An item of interest in this booklet is a half-tone picture of Mr. Beyrodt's establishment, showing a symmetrically arranged series of plant houses and the manner in which the grounds have been laid out in the endeavor to make the place an attractive one to visitors.

DAVID HERBERT & SON, Atco, N. J.—This catalog is confined entirely to Dahlias, in which this firm are specialists, and throughout its pages will be found a very complete listing of all the best known Dahlias in cultivation. The catalog shows pictures of the David Herbert & Son offices, where the roots are planted for propagating and other buildings connected with the establishment. It is additionally well illustrated with cuts of leading varieties of Dahlias.

BACHELOR SEED STORE, Utica, N. Y.—Farmers' Guide 1910. This catalog of 64 pages and cover contains a complete list of requirements for the general planter and farmer, is printed on good paper and well illustrated throughout. Considerable space is given to Farmers' Requirements, Poultry Supplies, Tools and Requisites. The covers are printed in duotone ink; showing on the front a field of the firm's "Monitor Brand" Ensilage Corn and on the back an artistic arrangement of flowers.

L. DAENFELDT, Odense, Denmark.—Wholesale 1910 Catalog, containing an extremely comprehensive listing of Vegetable and Flower Seeds, etc. This catalog is somewhat notable in that it is copiously illustrated with full page plates showing the gentlemen connected with the establishment, views in the seed store, the storage warehouses, seed cleaning room, trial fields and other views, one of the most interesting of which are those of the five buildings, where the concern has been quartered at succeeding intervals, the first one shown being the firm's original location in 1854, a minute building as compared to the one now occupied.

E. F. WINTERSON CO., Chicago, Ill.—Winter's Garden Guide, Spring 1910. This firm has issued the Winter's 1910 a comprehensive catalog of Vegetable and Flower Seeds, in which will be found advertised all the standard novelties of the day. Considerable space is given to listings of Sweet Peas, Flowering and Ornamental Bulbs and Tubers, Gladioli, Dahlias, Cannas, Hardy Garden Lilies and Hardy Perennials, followed by a select list of Hardy Garden Roses, Decorative Trees and Plants, Flowering and Ornamental Vines, selected Shade, Ornamental and Fruit Trees, with a careful selection of small fruits of the better varieties. Tools, Sprayers and Fertilizers are also advertised. The front cover carries an illustration in colors of Meehan's Mal-low Marvella.

CHAS. F. SAUL, Syracuse, N. Y.—Saul's Select Seeds for 1910. This well established House presents, as usual, an attractive catalog, copiously illustrated and printed in large clear type. A select list of Vegetable and Flower Seeds is given, and particular attention is paid to the listing of the firm's specialties being their "Madaga and Columbia Brands" of Timothy, of the first of which they sold over 25,000 bushels last year. Other specialties mentioned are Red and Alsike Clover, American Beauty Seed Oats and Southern grown Millet. Poultry Supplies, Tools and Requisites are also listed in goodly assortment. The covers are in green ink, a representation of vegetables is being shown on the front, and on the back a beautiful view advertising Saul's Central Park Lawn Mixture.

NEW ENGLAND NURSERIES, Bedford, Mass.—Trees and Plants for 1910. The grounds occupied by these nurseries comprise 800 acres in Bedford, Mass., and Geneva, N. Y. From this fact it will be readily understood that the nursery listings should be exceedingly comprehensive—and they are—everything in the line being offered in a full selection. A specialty is made of Roses adaptable to the New England climate, a number of pages being devoted to this one subject. This is followed by a listing of choice Hardy Perennial Plants, Rock Garden Plants, Hardy Grasses, Gladioli and other Summer blooming bulbs, Bedding Plants, Water Lilies and Bog Plants. Dahlias and Sweet Peas are also listed, as well as a choice collection of small and standard Fruits. The catalog comprises 80 pages which are of large size. This book should be in the possession of all New England florists and growers. It is copiously illustrated,

Easter . Notes

OF INTEREST TO THE RETAIL GROWER

By FRITZ BAHR

Pan of Tulips Couronne d'Or

The Easter Display

Much Depends on the Proper Presentation of Stock

After all, it should not make a bit of difference whether one is located on Fifth avenue or on a side street in a small town, a display for Easter is necessary if a retail trade is conducted. The more attractive the display the more business will be done. At no other time during the year have we a better chance to make a display than at Easter; and while Christmas is getting, with many of us, more and more a day for the disposal of pot plants, Easter always was the day for this, long before there was any trade at all for Christmas, in this country. Now, about the show house. It is almost needless to say that it should be well shaded for Easter, for bright sunlight on a warm day will finish a pan of Tulips, or an Azalea a little far advanced, in short order. It matters little what is used to keep the sun out, only don't resort to a mud wash if the roof isn't in perfect condition—in case of unexpected rain this might prove expensive, with Lilies especially.

There is no doubt but what a show house with very low benches, or no benches at all, is the most satisfactory in which to display the plants. A 3 ft. or 3½ ft. bench is certainly not a thing on which to show off a tall Crimson Rambler Rose, or even a Lily—one doesn't want to look up to see these plants.

We know the small grower often uses one of his houses for show purposes at Easter, one which is to be filled up with bedding stock right afterward, and that the pipes under the benches will prevent him from using the floor space for anything else. However, it is well to bear in mind, whenever erecting a show house, the expediency of placing the heating pipes either altogether under one or two side benches, or hanging them against the wall, which is even better. There is hardly a plant, Lily, Lilac, Azalea or Rose which doesn't show off 50 per cent. better when looked down upon.

This holds good even with the bulbous stock or dishes of Pansies and Violets. A bench 18" or 20" in height won't hurt, but when it comes to the ordinary height of a greenhouse bench one sacrifices effect.

It might seem to some reader a waste of space to write about a show house, for most of us have such a place; but to such I will say that I am personally acquainted with men who conduct retail places without having set aside a space for the display of their stock—and some of them are good growers. You will find the Lilies in one house, Azaleas, Rhododendrons and Spireas in another; on a side bench, in some corner, is a hatch of Kaiserkrone Tulips, and in another house we find some

Hyacinths, and so on; this may sound unreasonable, but nevertheless it is so.

Taking Care of the Easter Display

It should be one man's job to look after the show house; when left to two or three there is trouble. The display should be re-arranged every day during the week preceding Easter Sunday. Every unsightly plant ought to be removed; so with every faded flower—one bad flower on a Primula obconica or Azalea may cost a sale. Who of us hasn't had that experience? At this time of the year one can go over plants of either of the two above mentioned varieties once every day and find bad flowers.

The beginner's attention should be called to the necessity for removing the pollen of the Lilies. Here and there we get a customer who objects to a Lily flower without its pollen, but these cases are only few compared to the number of customers who complain if the pollen has remained long enough to soil the flower.

Don't ever permit a plant which is sold to remain in the show house. It seems that the minute a customer sees a plant with a tag marked "sold" on it, such plant look better than anything else on the place. Remove the plant and put another in its place.

Don't allow stock to be scattered all over the house. As soon as it begins to thin out use only a part of the house, or bench the plants are on, but keep up the show. It is far better to have the balance of the house empty than to have here and there a plant, or a few pots of

A White Wistaria

Lilies where the tops have been cut off to fill an order for cut flowers. A show house not kept up properly is worse than none at all.

Delivering the Easter Stock

Necessity for a System

As necessary as the show house is a proper place to store the plants which are sold and are to be delivered for Easter on Saturday and Sunday. In almost every case, the plants selected are blooming ones, such as will need a shady and cool place to keep them in good shape and insure their being at their best for Sunday.

There are certain things to which the beginner especially should pay the strictest attention if he wants to go through this world with as little trouble as possible. Among them, at Easter, the necessity of getting the right address to which a plant is to be delivered, the time it is to be sent, and seeing to it that it gets there on time. There is nothing more important after a sale has been made than this, and nothing that could create more trouble than failure to carry out instructions. Mark on the tag—preferably on the back of it—when the plant is to be delivered, and note what else, if anything, is to accompany the plant so tagged. If the plant is to be

sent as a present, with the sender's card, the placing of the card in a waterproof envelope and fastening of it to the shipping tag on the plant is about the safest way for the average retail grower. When it comes to an up-to-date store, other and even better plans, which, however, entail more bookkeeping, are made use of.

Now, if you deliver a Cyclamen or Azalea required for Xmas on December 24, in the morning, there is every possibility that the plant will be in perfect shape by dinner time on Xmas Day. At Easter, however, when a few hot days are not unusual, and you have sold a dish of Daffodils, the flowers in which were wide open, and the dish perchance had been kept in a cold, dark place for some time, it would be in a very poor shape by dinner time on Easter Sunday if delivered early Saturday morning and exposed to a high temperature for 24 hours. Don't do it. Make every effort to have what you send out at its best on Easter Sunday—that is what is was bought for. Go over your deliveries the evening before, divide your orders into sections, north, south, east and west. Many steps are often saved by having one good man take care of this end of the work. Even if you are only doing a small business, have a system—it is absolutely necessary in order to be successful, for by it a far greater volume of business can be done, easier, and with better satisfaction to your customer as well as yourself.

The Bulbous Stock

Easter Is the Day to Dispose of It

Outside of Lilies, the bulbous stock plays an important part with many of us at Easter. We sell more for that day than we do for the six weeks previous or following, and the best way to sell either miniature Hyacinths, double and single Tulips, Daffodils and Jonquils is in pots and dishes. A dozen cut Daffodils present an appearance not to be compared with twelve flowers in a 7" bulb pan, and while 60c. per dozen for the cut blooms is about what the average florist realizes, a customer will pay \$1 for the same number of flowers when in a pan. And so with the Tulips. What a showing twelve well grown Murillo, Tournesol or Golden Crown Tulips will make in a low dish!

All of the bulbous stock should be practically open on the Monday before Easter; especially does this hold good with the double Tulips, which, if they are then put into a rather dark and cold place will improve every day up to Easter.

Don't put too many of them in the show house or store, as heat, even without sun, will open the flowers wide and soon spoil them. Have just a few on display. Of late years we have not grown any of the bulbous stock in the pans or dishes they are sold in. We find it better to grow them in flats, allowing a little room between the bulbs, and giving them plenty of time to get into bloom; in a light, cool house we get short stocky plants which never suffer on account of being transplanted. Don't wait until the last minute before filling the dishes; have them ready fully a week ahead, as you will no doubt be so busy the last few days that it is folly to put anything off that can be attended to a week before. If the stock isn't all sold the flowers will be just as good to cut as those in the flats. We fill pans from 4" in diameter up to 12", and while we have call for both we find pans of about 7", such as can be disposed of at \$1, the best sellers.

The white, light blue and shell pink miniature Hyacinths are excellent material for the pans, only be careful not to have them too far advanced, which is liable to happen with a few warm days. Keep the bulk of them in a cool place, and have a few good open ones on show to take orders from. A Hyacinth when full open usually needs support, and with a pan containing 12 to 15 plants,

A Well Flowered Azalea

Basket of Rhododendrons, Azaleas and Ericas

supporting is quite a job, when you have everybody busy. Keep the plants cool; one day, even in a Rose house temperature, will bring about a wonderful change, even to those which are decidedly backward.

The Importance of a Good Salesman

If you have, for instance, an extra quantity of white Tulips on hand, which you are anxious to sell for Easter, it will never do to take up most of the space in the show house with them in order to dispose of them. Just the opposite plan is the correct one. Have only a few neatly filled dishes, hampers or pans on display; but when a customer enters, undecided as to just what to buy, that is the time to talk white Tulips. If you do this nicely you will get rid of far more of them than you would by having them displayed in quantities, for the average customer is much more likely to select something of which there are only a few pots in sight than in the other case.

This, of course, holds good with other flowers, outside of Lilies, which always sell. If a customer comes in to select other plants, in nine cases out of ten it means the writing of a tag for a Lily. A good salesman can do a great deal, especially when a customer is undecided as to what to buy. Calling attention to the good points of a plant, such as its being appropriate for the occasion wanted; its keeping qualities, being unusually well grown stock, its great popularity and so forth, will all help to induce the customer to decide in favor of it; and there is nothing wrong in this method, it is perfectly proper. Blooming stock sold for Easter is meant for that day, and the customer wants it at its best for that day—hardly ever is it a question of how long the plant will really last.

The Roses

Wonderful additions have been made to the list of Roses suitable for Easter. The Rambler family has proved indeed most valuable for this purpose and, by the way, a well grown Crimson Rambler is hard to beat, only we don't see enough of them—far less in the West than the East. Here and there you find a few good plants, but extra fine stock seldom. If you have a nice stock of the Baby Rambler every one will find a buyer. A good stocky plant with shiny green foliage and plenty of flowers, the pot neatly trimmed with waterproof white crepe paper is a great seller with most out of town florists.

We have a few of that beautiful little Rose Tausendschon which promise to be just right for March 27, and surely will sell. You won't make any mistake if you prepare a good stock of this variety for another year, as also of the pink Baby Rambler Mrs. Cutbush, Dorothy Perkins and Lady Gay. Watch out for the Hybrid Roses in pots; they may seem a little backward a week before Easter, but a few hot days, such as we have every reason to expect at this time of the year, will open them flat, never to close again.

The Stock Usually Carried for Easter

Among the plants other than Lilies for which there is a demand the Azaleas are away up to the front in popularity, and there are more of the variety Van der Cruyssen grown and sold than any other. While the large stores have an occasional call for a \$10 or \$20 plant, the average florist wants stock which he can retail at from \$1.50 to \$3. Azalea mollis is also grown more extensively than ever. The only way we ever have a chance to see it in bloom in the West is in the greenhouse, for it will not stand our Winters; and this holds good with the Rhododendrons. I might say of the latter

that far more plants could be sold if the public were to see more of them.

As next in importance I might mention the Hydrangea. With us there has been a falling off in the demand for them at Easter and an increase around Decoration Day. Last year we had quite a number of calls for them on Decoration Day from people who wanted something better than 25c. Geraniums; and Hydrangeas, while by no means to be considered ideal plants for a grave decoration, as far as lasting is concerned, certainly make a show.

The Primulas, such as veris and obconica, are also considered most important plants for Easter, in particular the obconicas. We have plants on hand which have, practically, bloomed all Winter and are now at their very best. Either as single or made-up plants they are valuable.

Spirea, like the Roses, have seen a number of beautiful sorts added to the list, among them that excellent white, Gladstone, which makes the Japonica look cheap; and that grand pink, Queen Alexandra, which, however, is not at its best when Easter comes so early.

A beautiful Easter plant, and, by the way, not grown in quantity enough, is Bougainvillea Sanderiana. This plant is of the easiest culture, requires so little care, and is so showy when in bloom that every retail grower should have a good stock of it, both pot plants and a few plants in tubs for cut flowers.

The Genistas are just right with us, and this year as many as ever will be sold; there has not been an Easter in the last 30 years when we were without them, a little more than we can predict for the future.

Basket of White and Red Carnations, Pussy Willows, Asparagus Sprengeri and Ribbon

A good, bushy Marguerite, with 50 or 75 open flowers and a dark green pot cover will catch my lady's eye as much as anything you could present. Don't forget to fill some low dishes with small stock in bloom; this is one of the very best sellers; we never have enough.

Bulb pans, in sizes from 6" to 12", filled with blooming Geraniums out of 2½'s and 3's, is another item the average grower should not overlook. There are other things one might especially grow for Easter which don't sell one-half as well.

Violets, if you have them on the grounds, form another good seller when planted in dishes. The Lady Campbell variety, even if a little pale in color, can't be beaten as a pot plant. Blooms are what you want, and if the plants should be small use several for a dish, sufficient so as to have the foliage cover the rim of the dish. The soil in the dish should never show.

Pansies? Yes, Easter is the day to sell them as made-up plants in low dishes.

Of Lily of the Valley in pots provide a good stock, there is great demand for them.

Lilacs fill the bill when a customer wants to spend \$3 to \$5. The one objection to them is their bare stems—some trimming by the artist is needed to overcome this defect.

While the above form about the main assortment with most of us, the following shrubs, when well done are all beautiful and well worth having: for instance, a Wistaria when in full bloom is a grand thing, so are the flowering double Almond, Prunus triloba, Hawthorns, Spiraea Van Houttei, and others.

New Books

INDOOR GARDENING, by Eben E. Rexford. J. B. Lippincott Company, Philadelphia and London.

Seedsman and florists are importuned, through nearly all the four seasons, for advice in the line of directions of how to plant, cultural directions, soil to use, and other score and one questions. The obliging salesman tells all he knows, and the customer, much gratified, goes away—in the majority of cases to promptly forget the directions or else to get the advice given so inextricably mixed as to make it worthless. It is to be understood we are speaking of the amateur customer.

To relieve salesmen of much of this strain—and, incidentally to save the House's time, particularly valuable in rush months—many good books have been written, among them this one, which solves in minute description and easily understood poraseology a large majority of the problems so bothersome to the uninitiated.

"Indoor Gardening" is the newest book on this order. In all probability it was not written with an eye solely to the purpose for which we now recommend it, but as it is essentially a book for amateurs, and as this notice will not be read by that class, it is therefore only through the professional we can expect to see it so recommended.

Mr. Rexford's book aims to supply in plain and simple terms such information as the amateur gardener stands in need of; to state that he has performed his task thoroughly and in a pleasing manner is our verdict. The flower lover who follows this author's directions will never go far wrong.

The subjects treated are practically all such plants as can be grown indoors; the text is large, making for easy reading, the language used pleasing and not at all dictatorial and the book is well and sensibly illustrated. It is a safe work to recommend to customers.

National Sweet Pea Society of America

Additional Prizes Offered for the 1910 Exhibition

THE PETER HENDERSON & Co.'s PRIZES. A \$10 gold cash prize to be awarded the amateur exhibitor of the best and most distinct collection of 25 varieties of Sweet Peas, including not less than six of the Spencer type; the number of sprays to each variety to accord with the Society's rules. Also a \$10 gold cash prize to be awarded the amateur exhibitor of the two best vases of the flowers George Washington and Martha Washington Sweet Peas, each vase to contain not less than 25 sprays.

THE HENRY F. MICHELL Co.'s PRIZE. \$10 for the best three vases of Sweet Peas (one vase of each variety) varieties Frank Dolby, White Spencer, Mrs. Alfred Watkins. 1st prize \$5, 2d prize \$3, 3d prize \$2.

THE C. C. MORSE & Co.'s PRIZE. A silver cup, value \$25, for the finest collection of Sweet Peas. Open to the trade only.

THE FLORISTS' EXCHANGE PRIZE. For best vase Countess Spencer, 1st prize, \$3; 2d prize, \$2.

HARRY A. BUNYARD, Sec.

342 West 14th St., New York City.

[The above list is supplementary to that published by us on page 167, issue of Jan. 29. A full schedule of prize offers is now in preparation, and may be had on application to the Secretary.]

A Well-flowered Purple Rhododendron

GREENHOUSE HEATING

By Fredk. J. Elder, Heating Engineer for the Lord & Burnham Co.

Concluded from page 480B

Systems of Greenhouse Heating

Water Hot	a. Open tank gravity	{ 3 1/2" C. I. pipe 2" W. I. pipe	Propeller driven by electricity, Centrifugal or Rotary Pump driven by steam, electricity, or gas or oil engine Piston pump driven by steam	"rust" caulked joints or screwed joints
	b. Closed tank or pressure	{ x. Safety valve y. Mercury Seal		
	c. Forced Circulation			
Steam	a. Water heated in C. I. boiler			
	b. Water heated in Converter or Feed water heater			
	c. Water heated in Tubular Water Boiler			
2.	a. Low Pressure Gravity Return			
	b. Low Pressure Return by Steam Trap			
	c. High Pressure at Boiler, Reduced Pressure in Greenhouse and pumped return.			

Open Tank Gravity Hot-Water

I have mentioned that there are over-bench and under-bench heating systems. However, the whole of the radiation or even the bulk of it is very seldom placed overhead, although the mains are often carried overhead on roof supports. The coils are then fed at the far end of the greenhouse, and all coils in this system are return coils. This plan is much used in the western States, but not much used in the East. Its principal virtue is that a deep pit is not necessary with it for the heater, and as there are many sites where it is not possible or practicable to secure a boiler cellar of reasonable depth, because water is near the surface, or rock formation makes it too expensive to excavate, this system is at times a matter of necessity. The great objection to the overhead system of hot water heating is that it is difficult to heat the greenhouse evenly, because the far end of the house is bound to be warmer than the near end or that adjacent to the boiler cellar. This is due to the fact that the coils are fed at the far end and the fault is more noticeable in long than in short houses. The most common and the simplest arrangement of piping for hot water is in coils of parallel lines under the benches—these coils being vented at the high end, which is at the far end of the greenhouse. The coils may be either vented by air cocks, which must receive regular attention, or by automatic air headers which require no attention. The most even distribution of temperature is procured by dividing the coils into an equal number of flows and returns (see diagram).

I have mentioned that large pipes and small pipes are used for hot water heating. The large pipes referred to are 3 1/2" cast iron pipes which are cast in lengths of 9' 0" and are caulked together by the use of the rust joint. This joint is made by caulking into the head of the socket of the pipe or fitting several strands of tarred rope for a foundation. On top of this foundation iron borings moistened with water are caulked. This joint when tightly and properly caulked is one of the best joints possible, for it is then of the same substance and same consistency as the pipe itself, and is, therefore, subject to the same degree of expansion and contraction.

I have explained the great advantage of using large pipes, i. e., that they carry their heat better through the night than do smaller pipes. There is another and quite as important a quality, which is that cast iron pipe will often last twice as long as wrought pipe. Cast pipe resists corrosion longer than wrought pipe. There are many systems still in use which were constructed thirty-five or forty years ago of cast iron pipe.

The small pipe referred to is 2" wrought iron pipe, which is used now more extensively in commercial plants than in private systems. The reason for this is, doubtless, that wrought iron pipe is cheaper per lin. ft. and cheaper per sq. ft. of surface than cast pipe, and also because the commercial grower is willing to give some attention to his heating system if necessary, through the night, if his plant is small, and if his plant is large he keeps a night fireman, so the carrying power of the larger pipes is not expected and is not so necessary.

The coils of 2" pipe are constructed in the same manner as those of 3 1/2" pipe and are placed in the same way under the benches, only it is necessary to place more lines of 2" pipe than would be necessary of 3 1/2" pipe. 1.68 lin. ft. of 2" pipe is equivalent to 1 lin. ft. of 3 1/2" pipe in superficial surface, and contains a little more than one-half the quantity of water contained in

one lin. ft. of 3 1/2" pipe. Two-inch pipe fittings and automatic air headers are now made with hubs so that 2" pipe may be caulked into the fittings with rust joints, and a variety of hubbed coil fittings may now be found on the market that are not to be duplicated in screw fittings. The use of such fittings is attended with a considerable saving of labor and expense for tools.

The mains of a gravity hot water system are generally run parallel to each other in cellar and trenches. The flow main and return main are of the same size of pipe. The expansion tank should be placed as high as possible above the radiation and be connected to the return main near the boiler or to the boiler itself, as low as possible, by the expansion pipe. The capacity of the tank should be about 1-24 of the aggregate capacity of the coils, mains and boilers. The boiler should be located in a pit which it is always an advantage to have as deep as practicable. The lower the heater below the radiation the more positive will be the circulation through the pipes.

Closed Tank or Pressure System of Hot Water Safety Valve Control

With this system, which is very little used now—excepting that there is a growing use of the mercury seal—the coils of pipe are arranged in the same way, whether of large or small pipe, as in the open tank sys-

water being heated by live steam from the boilers, the circulation forced by a large steam driven centrifugal pump, rotary pump or double acting piston pump, and perhaps a secondary or exhaust steam heater is used, through the coils of which exhaust steam is passed, so getting as fine an economy as possible.

Pea-coal, buckwheat, rice coal, screenings, or slack, the cheapest fuel procurable, is burned by means of a fan or forced draft. In still other cases the water is heated in a large tubular boiler. A smaller steam boiler furnishes the power for driving a small engine required for the operation of the fan and pumps, and the surplus live steam from the steam boiler may be used for auxiliary steam radiation for burning sulphur or tobacco in the houses, keeping gutters free from ice, or for cooking manure water, and very little heat need be wasted.

The mains for such a system are small. They are smaller than are necessary for the steam main of a steam system of the same size, which are in turn considerably smaller than those required for gravity hot water systems. Forced circulation of hot water is, without doubt, the ideal heating system for large ranges of greenhouses, whether for private or commercial use. By this system a mild heat so much desired for plant culture is obtained. The system has a range of heat almost as great as a steam plant. It is nearly as responsive and does not require such large pipe for mains or connections as either steam or hot water. Neither does it require large pipe for radiating surfaces, because it does not depend on a large quantity of heated water in order to keep up the required temperatures.

Low Pressure Steam Gravity Return

The radiating surfaces of this system are placed in the same general positions as are hot water radiating surfaces, that is under benches and on side walls. There are as many or more ways of constructing and laying steam coils as there are of hot water coils. It is only necessary, however, to avoid water pockets, or in other words to secure a good natural drainage, i. e., by gravity of the water of condensation. This is obtained by arranging the piping in proper size and pitch.

There are two principal ways of arranging the coils, under the benches and at the sides of the house. One

Mercury Seal Control

The Mercury Seal, or heat generator as the manufacturers call it, is a device placed on the expansion pipe between the boiler and the tank in such a manner that the increased volume, or expanded water, must force itself through a pot of mercury, the specific gravity of which is 13.6, which keeps all the water between the boiler and the seal at a pressure of about 13 lbs. This device is safer than a weighted valve, but the same purpose may be accomplished by increasing the elevation of the expansion tank, which is certainly simple, although it is not always possible. It might be added here that simplicity is undoubtedly a virtue in greenhouse heating. Every valve and every device of every kind should be as nearly fool proof as possible.

way is converging the coils so that the steam and return valves are at the same end of the house. The pipes begin at one end of the house, a considerable distance apart, and pitch so that at the far end of the house they approach each other very closely. The condensation is then carried with the flow of steam, the pipes pitching all the way. (See diagram). The other way is to carry the mains overhead in the same way as previously described in hot water overhead mains. This system is not objectionable for steam, as it is for hot water, for the reason that there is little loss of pressure in the length of the coils, and consequently very little change of temperature in the length.

The steam mains may be run with the return mains in a trench, or the steam main may be overhead. It is only necessary to keep the steam main free from water.

Low Pressure Steam with Steam Return Trap

In many cases it is not practicable, perhaps not possible, and maybe not desirable to excavate a pit of sufficient depth for the boiler so that the water of condensation may be returned by gravity. In such cases the water is returned to the boiler by means of a return steam trap. There are a number of different designs of return traps, but they all work on about the same principles. They are usually placed at a height of about 3 ft. above the boiler and connected to the boiler by two pipes, a steam pipe to the top of the boiler and by a water feed pipe to the bottom of the boiler. They are also connected by a vertical pipe to a receiver, into which the returns drain. The operation of these return traps is, briefly, as follows: The condensation of steam in the vessel of the trap causes a partial vacuum to be formed, and as there is some pressure against the water in the receiver, the water is forced up into the vessel which is so fixed as to tilt when it has received its load. This tilting opens a valve, which turns the steam into the trap, thus putting the full boiler pressure of the steam upon the bucketful of water, and closing the check valve in the pipe connected with the receiver, so that the whole charge of water in the return trap falls into the boiler by gravity.

High Pressure Steam

High pressure steam is not adaptable for use in radiation in greenhouses—the heat is far too intense. However, high pressure steam is often used with a reducing valve, so the average temperature inside the greenhouses is considerably less than that in the mains or at the boiler. It is then found necessary to use a pump to return the water of condensation, and this pump may be operated by the high pressure steam. The pipe coils are distributed through the greenhouse in the same manner with this system as with other steam systems.

Among the Growers

A Visit to George Field, Washington, D. C.

It is popularly, but often erroneously held that an Englishman cannot appreciate humor and a joke, but when on Saturday last your correspondent called on George Field of Brightwood ave., he was found, as usual, a living contradiction of such statements, full of vivacity, wit and humor, and possessing a cordial manner of which any man may be proud. Here is the story of a selfmade man, who talks freely and in a most instructive and intelligent manner on any subject, but maintains a silence concerning personalities which is exemplary.

After a social and most entertaining half hour in his library the greenhouses were visited and it can be truthfully said no courtesy was omitted. There are sixteen houses in all, or a total aggregate of 60,000 sq. ft. of glass, devoted exclusively to Orchids and Summer-blooming Roses in proportionate number. The houses were built a good many years ago and designed for Roses and Carnations but, later, when the neighborhood became

more thickly settled and soil for replenishing the benches was no longer to be had in sufficient quantities, the culture of Orchids was commenced.

Like many other beginners, and in spite of his earlier training, many failures and obstacles were encountered and conquered, until today a flourishing business, the largest of its kind in this vicinity, stands substantially as a monument to Mr. Field's energy, and is a fitting exchange for the various earlier vicissitudes and experiences. For years, Mr. Field's ambition was to produce Orchids all the year round and thus even up receipts accordingly. This entailed much risk and the purchase of many varieties, but he now believes a proper solution has been reached.

One entire house of Cattleyas is kept for Summer use, and also a large quantity of *C. gigas*, which are in excellent shape. One of the first and most lasting impressions of a visit to this place is the healthy and vigorous appearance of all the stock. Being my misfortune to go at a time when there was a minimum of bloom, I was invited to come when the houses are in full crop, which invitation was accepted. Local retailers consume 25% of the output of this place, while the remaining 75% is shipped to other cities. Only the best and tested commercial varieties of Orchids are grown with Cattleya Trianae held in highest esteem as a bread winner. The majority of Mr. Field's importations come direct from South America, Colombia, and the adjacent isthmus, the varieties varying with their respective altitudes. Many purchases

are made from the owners of the Orchid bearing lands distant, while others are from collectors and import houses North.

Cattleya gigas being a shy bloomer and in demand, requires a position with more light than the others, and each house has its own hospital ward located in easy access where, at this the season of going over and re-potting, the sick and weak plants are concentrated together.

One house is devoted exclusively to *Dendrobium Phalaenopsis*; this is a specialty, and contains some 1200 plants the picture of health. *Dendrobium Formosum giganteum* is also a favorite and is proving a great success.

There is a limited stock of *Odontoglossum crispum* and *Pescatori*, very difficult of culture but which are succeeding well; these, like many other varieties of Orchids, are grown outside under slat houses all Summer.

Mr. Field has been conducting an experiment with *Aphine*—(by request)—on his *Cypripedium* with very pleasing results; they were infected with white scale.

Being strictly a commercial place, all varieties of Orchids are grown in pans or pots on slat staging, arranged at varying heights from the ground. Under these stages are grown *Asparagus plumosus*, *Adiantum cuneatum*, and *A. tenerum*. In the eight Rose houses are grown *Roses Kaiserin*, *My Maryland* and *Cardinal*, while outside are a fine lot of *Maman Cochet* for Summer bloom.

JAS. L. CAREERY.

Purchasers of stock from advts. in these columns will confer a favor by making this statement in their order: "Saw your advt. in the Exchange"

Santa Barbara, Cal.

In a decision handed down by the Superior Court of Santa Barbara County on Feb. 21, Dr. Franceschi, formerly president of the Southern California Acclimatizing Association, was enjoined from selling any of the plants at Montariso, Cal., a nursery recently established by him and conducted by his daughter; he was further ordered to give an accounting of those plants already sold, as also to surrender the seeds, plants and correspondence he had received while president of the Association.

Dr. Franceschi is a man of wonderful energy, enthusiasm and a lover of plants, as well as a botanist of no mean accomplishments, and has done more in the way of introducing valuable, ornamental and economic plants to the Pacific Coast than all other men and agencies combined, Burbank's experimental grounds included. Attempts are quite likely to be made on behalf of Dr. Franceschi that he may be enabled to continue his work, his services to the community being too valuable to be lost to posterity.

A City Greenhouse for Scranton, Pa.

Herewith we illustrate the greenhouse to be built at Nay Aug Park by Hitchings & Co., of New York City, and to be turned over to the Bureau of Parks of Scranton, Pa., as the gift of John Cleland.

The new greenhouse will be located at the lower end of the park, along Park Drive, and near Arthur ave., between Linden st. and Ridge Row. It will be 100 ft. in length and 30 ft. wide. The material used in the construction will be mainly glass and iron, the glass being double thickness. At the lower end, shown on the left in the cut, will be the potting room. Below this will be the boiler room, where a hot water heating system will be installed.

The structure will be divided into four compartments, the service room on one end, and three sections of 30x33 ft.

Tradescantia Thuringia.—This novelty is recommended in Moeller's *Deutsche Gaertner-Zeitung* as an improvement on *Tradescantia laekenensis*, which was introduced last year. While the variegation in *T. laekenensis* has not proved constant, and requires a continuous replanting of variegated cuttings in order to preserve the desired coloration in a hanging basket, plants of *T. Thuringia*, so far under observation, have continued to produce leaves true to the new type, being light green with white stripes. In pretty contrast with this coloration are the sky-blue flowers; these have only two petals, the place of the third being taken by the stamens and pistils, thus giving the flower a somewhat imperfect appearance, and its flowering period also of rather short duration. Nevertheless, the general effect of the plant is very charming, and it may well be regarded as the most handsome *Tradescantia* now on the market. It was originated by F. & O. Spittel of Arnstadt, in the province of Thuringia, Germany.

A friend to whom we sent a copy of Mr. Oliver's Bulletin, "New Methods of Plant Breeding," writes: "You sometimes hear it said, 'There is nothing new under the sun,' but Mr. Oliver, through his experiments, has proved that in plant breeding we have yet much to learn, and that the lesson, when learned, will be an advantage, not only to horticultural, but to agricultural interests generally, and so conduce to increase the wealth of the nation through the production of improved forms of fruits and vegetables. * * * To me the chapter on the crossing of flowers has an especial interest and will be given careful study."

DEPARTMENT OF PARKS,
City of New York,
Boroughs of Brooklyn and QueensTo the Aphine Manufacturing Co.,
Madison, New Jersey.

Dear Sirs:—

Having received your sample of Aphine, I at once made a test for mealy bug on coleus and crotons and the effect was marvelous; the mealy bug dried up without any damage to the plants. Have since purchased four gallons of Aphine and used the same according to directions, with Spray, on green and white fly, also scale on palms, with the same success. I am more than pleased at the results of your insecticide, and will continue its use, as it is safe, sure and reliable, and can honestly recommend it to all my brother craftsmen.

Very Respectfully Yours,

EDWARD J. WALTERS,

Head Gardener, Forest Park Greenhouse and Nursery

123 WARREN STREET
(Near West St.) NEW YORK

NOTICE

To My Friends and the Public.

I have leased part of the building at the above address for a term of years.

I am now in a position to serve my Friends and the Public more faithfully than ever, and will be greatly pleased to have an enquiry or call.

Tested and Reliable Seeds,
Bulbs and Plants. Anything
you want for the Garden.

And at Reasonable Prices.

You can pay more—you cannot get any better qualities.

C. McTAGGART

SEEDSMAN AND FLORIST

123 WARREN ST. (Near West St.)

NEW YORK

I cannot thank too sin-
cerely my old customers
and business associates
for the kindly and hearty
response with which the
announcement of my
starting into the Seed
Trade for myself has
been received.

FOUNDED IN 1888

A Weekly Medium of Interchange for Florists, Nurserymen, Seedsmen and the Trade in General.

Exclusively a Trade Paper.

Entered at New York Post Office as Second Class Matter.

Published every Saturday by the A. T. De La Mare Ptg. and Pub. Co., Ltd., Proprietors, 2, 4, 6 and 8 Duane Street, New York. A. T. De La Mare, president and managing editor; Jas. H. Griffith, secretary; David Touzeau, treasurer. The address of the officers is the address of this paper. Start address: P. O. Box 1697, New York. Telephone 3765-6 Beekman

PRINCIPAL OFFICES

Chicago: Margaret T. Flint, room 614, No. 60 Wabash Avenue; tel. Randolph 2000. Office hours: 9:30 to 12.
Boston: Robert Cameron, Cambridge, Mass.

Philadelphia: A. H. Secker, 306 Wood Building, No. 34 So. 16th St.

Yearly Subscriptions.—United States and Mexico, \$1.00. Canada, \$2.00. Foreign countries in postal union, \$2.50. Payable in advance. Remit by Draft on New York, Post Office or Express Money Orders; if paid in cash please register letter.

The address label indicates the date when subscription expires and is our only receipt therefor.

Registered Cable Address: Florex, New York.

Telegrams.—Telegrams received in this office up to 3 p.m. Wednesday, containing changes in advertising, will receive attention for the issue of the Saturday following; likewise, telegrams having informative matter intended for our news columns will be received up to Thursday 9 a.m. News telegrams should be forwarded after 5 p.m. Wednesday and marked "Night Press Message, Collect." These will be forwarded by the Telegraph companies at their newspaper rate, providing the material so forwarded contains news for the paper.

A Correction

In our last week's issue, page 462, we mentioned that M. H. Stetzer of Knoxville, Tenn., is enlarging his greenhouse and will install a new boiler. The address of Mr. Stetzer is Morristown, Tenn., not Knoxville.

S. A. F. and O. H.

Department of Registration

As no objections have been filed, public notice is hereby given that the registration of the Begonia "Glory of Cincinnati," by J. A. Peterson of Westwood, Cincinnati, Ohio, becomes complete.

H. B. DORNER, Secretary.

March 10, 1910.

Canadian Horticultural Association

At a meeting of the executive committee held on Tuesday, March 8, at St. Catharines, Ont., the following arrangements were completed. The Association will hold its convention this year on Aug. 10, 11 and 12, at the Carnegie Library, St. Catharines, the first session opening on Aug. 10 at 2:30 p.m. On Friday, Aug. 12, the delegates will be the guests of the city and the local club. A trade exhibit will be held in a hall adjoining the Library. The Society will make the Welland Hotel its headquarters. It is the intention of many of the visitors to this convention to go to Rochester, N. Y., after the meeting, to attend the S. A. F. convention.

Our Easter Number

The idea of publishing a Spring or Easter issue, for the purpose of drawing trade attention to the opportunities open for business at that time of the year, was first conceived and carried into effect by The Florists' Exchange; this was in 1890. The regular weekly issues at that time averaged four pages; the big Spring number ran this up to ten pages.

In 1891, the idea had gained headway and our Spring issue consisted of twenty-four pages, the regular issues averaging from eight pages in the dull months to sixteen pages when business was brisk.

Since then the development of the florist industry has been almost continuous with the exception of the periods of panic.

Our issue this week contains 72 pages, the largest Spring trade number we have ever had. From beginning to end it is a straight business proposition without frills or padding.

Much valuable reading matter has been incorporated which, we trust, our readers will find leisure, even at this busy season, to peruse.

We return our hearty thanks to the live advertisers who are our patrons and recommend our readers to purchase of them. Practically every seasonable want of florist, seedsmen or nurseryman can be supplied from the offers in this issue.

New York Florists' Club

The regular monthly meeting of the New York Florists' Club was held in the Club rooms, Grand Opera House Building, 23d st. and Eighth ave., on Monday evening, March 14. President A. L. Miller occupied the chair and there was quite a large attendance of members. In the absence of the secretary, John Young, who was in Rochester at the meeting of the Board of Directors of the S. A. F. of which he is a member, the office of secretary was filled by J. H. Pepper.

After the reading of the minutes, Patrick O'Mara called the attention of the Club to the fact that Secretary Young was absent from his post for the first time in twenty years and expressed the thought that some action should be taken looking to his punishment for the offence.

Walter F. Sheridan, chairman of the committee having in charge the arrangements for the annual dinner, made a report. He stated that Mr. O'Mara would officiate as toastmaster on the occasion and that an interesting program had been prepared. He detailed all the arrangements which had been made, and which, by the time this report is read, will undoubtedly have led to the success of the dinner.

J. H. Pepper, for the committee having in charge the preparation of the memorial on the death of the father of C. W. Scott, read the resolution prepared by the committee which, on motion of W. F. Sheridan, was adopted.

H. A. Bunyard, for the outgoing committee, reported progress. He said his committee had already chartered the Steamer Isabel to convey the party to its picnic grounds and that the day fixed was July 1. He emphasized the fact that it was expected that this outing would eclipse all others and that it would be a family affair in the extreme sense of the term. He asked the support of every member toward the fulfillment of the desire of the committee.

Joseph Striet

President Buffalo Florists' Club

A. Hanig of Brooklyn, nominated for membership at the last meeting, was elected to membership; and Charles Krick of Brooklyn was nominated for election at the next meeting.

C. B. Weathered referred to the remarks of Mr. O'Mara upon the absence of Secretary John Young and gave it, as his opinion, that although Mr. O'Mara had not treated his topic seriously, the matter was indeed a serious one. He thought it a serious thing that a man who had been in office 20 years, had dared to absent himself from one meeting to attend a meeting in another city in his official capacity as a director of the S. A. F., and thought that in this instance he should be "penalized." He, therefore, moved that the Club vote him a vacation for and during March 14 and (on the suggestion of R. M. Schultz) that there be incorporated in the motion the stipulation that such vacation be allowed "with pay." Frank Traendly seconded the motion which was carried unanimously. Alfred H. Langjahr moved that the resolution be telegraphed to Mr. Young by the acting secretary, which motion was also seconded and carried unanimously.

J. A. Manda called the attention of the Club to the exhibitions of the American Rose Society and the Horticultural Society of New York, to be held on March 16, 17 and 18. President Miller in commenting on the exhibitions asked the support of all members of the Club to make them successes.

H. A. Bunyard, secretary of the National Sweet Pea Society, by invitation explained the objects of his society and requested the support of all members of the Club in the furtherance of its objects. Harry Turner, president of the Society, also made an address in which he endorsed all that Mr. Bunyard had said and explained the importance of the mission which the Society had taken upon itself. Arthur T. Boddington also spoke on the subject, and, as an illustration of the scope of the Society's work, pointed out the need of work in the direction of nomenclature. He said that the nomenclature

committee had sometime ago completed arrangements for variety trials at Cornell University this season. Seed of every variety of Sweet Pea which was possible to secure had been forwarded to Cornell and trial tests were in the hands of Professors John Craig and A. C. Beal. These tests, it was hoped, would be of much service to florists and private gardeners, as it was expected they would check all the synonyms under which the trade was now being hampered. He thought this work alone was quite sufficient reason for asking the support of the Club membership in the work of the N. S. P. A.

It was expected that this evening would be a Rose and Sweet Pea night but the exhibition tables were bare of these flowers. C. H. Totty, for the Rose growers, believed the absence of exhibits was due to the fact that the American Rose Society was holding an exhibition two days later, and the attention of the growers naturally concentrated upon that exhibition. One or two Sweet Pea enthusiasts apologized for the absence of Sweet Peas as being due to a similar exhibition, that of the Horticultural Society of New York, which was scheduled for the same dates as the exhibition of the American Rose Society.

President Miller announced that there were present with them that evening, two of the charter members of the Club, James Dean and Alexander S. Burns. These two gentlemen were escorted to the platform and pressed for addresses. Mr. Burns was the first speaker, and he explained his non-attendance at the Club meetings for some time, as being due to purely personal reasons. Mrs. Burns, he said, was an invalid as the result of an accident some years ago and the occupations of his sons necessitated his being at home every evening. It was his intention, however, to be present at the annual dinner and though necessity compelled his continued absence from the meetings, he was still enthusiastic in Club matters and assured all that his interest in the Club had not in the least abated.

Mr. Dean followed with an address largely of a reminiscent character. He stated that not for years had he been in New York City of an evening; in fact, so long, that he had become lost in reaching the Club quarters that evening. He believed, however, that a recent change in residence would enable him to become a frequent visitor in the future. He then spoke of the florist business of the years ago. Speaking of Carnations, he expressed his thought that if the varieties of years ago were grown under present day methods it was more than likely that great satisfaction would result. Such a variety as La Purité, for instance, which had been so satisfactory, might rank with many of the leading varieties of today. Three-inch flowers of Carnations were not so very uncommon those days, grown under 6x8 or 7x9 glass. If Carnations had been handled in the sixties and seventies as they were today, he saw no reason why the varieties then in existence should not have produced flowers which would be prominent among the market varieties of today. Of course, they had not the varieties of Roses which were in commerce today, but they used to grow some splendid Glory de Dijon, Malmaison and Safrano, and often Carnations in the same house, but they could not in those days get the stems. He well remembered the stock Mr. Weir, father of John Weir, of Brooklyn, used to grow in a little lean-to house with 6x8 glass; that house was a mecca for florists, who came from far and near to see how the plants were handled. In that house were the then popular varieties, Lamarque and Marechal Niel. He much doubted whether Bon Silene and Safrano were done today as they were in those days. He believed that a good deal of the progress made in both Roses and Carnations could be attributed to the new ideas in greenhouse construction, and he would certainly like to see some of the old varieties of Carnations and Roses grown in some of the fine establishments of today, so that their merits under latter day treatment might be noted. He spoke of the old-time use of the Camellia in florists' work. When six Camellias were a usual portion of a bridal bouquet. He remembered one time when Mr. Weir had an order for a bridal bouquet and could only find five Camellias, and went all the way to Philadelphia in order to secure the sixth. Mr. Dean further stated as his opinion that while greenhouse construction had advanced very materially, the science of heating used was much in the same condition as it was a quarter of a century ago.

John Birnie also fell into a reminiscent mood and spoke of the time of Camellias. He remembered three Camellia plants, which he would prefer to call trees, occupying a whole house about the dimensions of the Club's meeting room, and the flowers brought a dollar each. He, too, often thought that if the old Carnations had been handled as Carnations are today and received the same treatment, big flowers would be the result; fully as big as those of today. He quite agreed with Mr. Dean in his statement that heating methods had not shown anything like the advance shown in greenhouse construction; in fact, he could not see that they had advanced much in the last fifty years.

Mr. Weathered took up the cudgels in behalf of heating conditions and facetiously called to his support a remark made by Mr. Birnie sometime ago, subsequent to the installation of a Weathered heating plant at his greenhouses. He thought that everybody would agree with him when he said that the old-time boilers could not take care of immense houses such as are built today.

Central plants would have to be a feature of the modern large greenhouse establishments.

Mr. Dean said that possibly the non-advance in heating might be attributed to the fact that the manufacturers had invested very largely in patterns, etc., and for this reason could not be expected to advocate much of a change.

The committee of awards made a report of their examination of two exhibits staged that evening. One was a staging of ten plants of a new sport of *Nephrolepis Bostoniensis*. The committee thought that this form should prove an acquisition to the commercial varieties of *Nephrolepis*, but before final judgment was made, they would like to see the new variety compared with *N. Scottii* and other sports of a like character. The other exhibit was a vase of *Purity Friesia* staged by William W. Mathews of Great Neck, L. I. For this the committee recommended a cultural certificate. The report of the committee was, on motion, accepted and passed.

Chairman Nugent of the house committee provided the usual good things for the "canteen," which were fully enjoyed during recess.

More than one florist benefited through his generosity and he helped many of them out of hard places and put them on the highway to success. Even horticultural trade journals were helped by him in the hard struggle of their infancy.

He was also a prominent member of the Massachusetts Horticultural Society for many years.

We can say of Edward Hatch that he was a genial, earnest, exceedingly generous and conscientious man, his heart always beating for the welfare of others, never for the aggrandizement of himself. His life was unostentatious, quiet and modest, and his great loss afflicts all who knew him with sorrow and grief.

Good, generous man, farewell! Your memory shall forever live in our hearts!

Mr. Hatch never was married. He lived at 328 Commonwealth ave. with his two sisters who, with one brother, John C. Hatch, of the Exchange Trust Co., survive him.

ROBERT CAMEBON.

naturally grow in it, there are many exceptions. Norway Spruce and Austrian and Scotch Pine have been carried from their native home to other parts of Europe and to America, and have been found well worth the attention of the grower of timber. Several of our own species have met with favor in Europe and flourished there, such as the Douglas Fir, Black Walnut, and others. The Australian *Eucalyptus* is proving a great find for America and South Africa.

Our own White Pine long ago crossed the Atlantic in response to the needs of Europeans, whose forests are comparatively poor in tree species, and is now grown commercially on such a scale that, when it is wanted for planting in its own native habitat, the German nurseryman is often ready to deliver young plants here for a lower price than our own nurserymen will quote. Now the Germans are going to try the Western Larch also. The request from the German nurseryman instructs the collectors to gather the choicest seeds when ripe this fall.

The objects of the Guelph planting are, according to local accounts, to protect the town's water source by a forest cover over its springs in the hills, to make a beautiful woods for a public park and to provide for a future timber supply as a municipal asset. In foreign countries, forest tracts are often owned and managed by towns and cities as a paying investment and to insure a permanent supply of wood for local consumption, but in America planting by municipalities other than for parks and for watershed protection, has scarcely been thought of. The kinds of trees to be grown in the Guelph park have already been decided upon by the Ontario Agri. College. The proposed reforestation promises to be of so great economic and sanitary value that the estimated cost of \$8 per acre for importing and planting the seedlings and caring for the growing trees is regarded as well worth while.—U. S. Dept. of Agriculture, Forest Service.

Obituary

Frederick G. Brotje

Frederick G. Brotje, a florist of Mt. Tabor, Portland, Ore., died on March 4 at his home, 31 East 61st st. in that city. He was 49 years of age and had lived in Mt. Tabor for the past 26 years. He is survived by a widow and four sons.

Edward Hatch

Edward Hatch, treasurer of the Gardeners and Florists' Club of Boston for the last seventeen years, died on Friday, March 11, at Columbia, S. C. Mr. Hatch had been in feeble health for the last year and a half and went to South Carolina a few days ago to spend the Spring months.

He was born in Boston and educated in the public schools of that city and, in 1859, left his studies to enter business life. For many years he was one of the foremost real estate auctioneers in Boston. We are not so much interested in his real estate business as we are in the work he has done for horticulture.

The G. and F. Club of Boston has lost its most generous member. He was a man who never let his left hand know what his right hand was doing. Many is the helping hand he gave to the Club that the majority of the members never knew about. He was an excellent treasurer and he fought many a battle to keep the money of the Club from being spent foolishly. He was much interested in the landscape class and gave many gifts to it, one of his last acts being to send a check for \$100 for its use.

The Late Edward Hatch

Forest Planting by a Municipality

The enterprise of German foresters, and the importance of tree planting for forest purposes, are strikingly shown by two items of news which come, the one from Montana, the other from Ontario. It is reported that a demand has developed for Montana Larch seeds to be used by German nurserymen, while White Pine seedlings are to be imported from Germany by the town of Guelph, Ont., for planting a 168-acre tract of land belonging to that municipality.

The Germans recognize that the introduction into their forests of valuable trees native to other countries may be decidedly to their advantage. Although, as a rule, the forest trees best adapted to each region are those which

Our Mission

TO work, with our every energy, for the welfare of the Trade we represent, in which endeavor is included our determination to assist in every way possible to bring about

A change in Free Seed Distribution as at present conducted and its Direction into Channels of Real Economic Value;

The establishment of a Parcel Post, of equal service and at as low rates as is now enjoyed by many of the European Nations

—Both big undertakings, we must confess

CHAS. W. JOHNSON, Secretary

The American Rose Society

Eleventh Annual Meeting and Exhibition

New York City, March 16 to 18, 1910

Held jointly with the Spring Show of The Horticultural Society of New York, in the American Museum of Natural History

Officers Elected for 1910-11

President, **WM. H. ELLIOTT**, Brighton, Mass.
 Vice-Pres., **ADOLPH FARENWALD**, Hillside, Pa.
 Secretary, **BENJ. HAMMOND**, Fishkill-on-the-Hudson, N. Y.
 Treasurer, **HARRY O. MAY**, Summit, N. J.
 The two latter officers were re-elected.

Next place of meeting

Boston, Mass.

At the time of the National Spring Flower Show to be held there.

THE eleventh annual exhibition and convention of the American Rose Society opened in the American Museum of Natural History on Wednesday, March 16, and was continued on the following day. The exhibition was held in the large hall in the west wing of the big building, which was ideal for the purpose. The staging of the different exhibits reflected much credit upon the management, and particularly upon J. A. Manda, the manager. Instead of the usual straight lines of benches, the exhibition tables were all set in zig-zag fashion, which allowed of a much better view of the exhibits and was no unimportant factor in the judging. While in some respects the exhibition lacked some of the important features of previous exhibitions, it excelled them in magnitude. Considerable disappointment was expressed in regard to the small number of exhibits of American Beauty Roses, four stagings of cut flowers practically representing this section, and these so much off in quality that the judges were compelled to make hard decisions.

White Killarney vied with Richmond in popularity. The stagings of both were certainly grand, especially of Richmond, for which Adolph Farenwald of Hillside, Pa., carried off the honors.

My Maryland was very conspicuous, the stagings of this variety showing very high quality.

The old-time Bride and Bridesmaid were seen only to a small extent, but such stagings as were in evidence were high in quality.

Poehlmann Bros. Co. of Chicago were practically the only Western exhibitors, but much cannot be said of the East, from which section so much was expected.

One or two novelties were on view, chief of which was a sport from My Maryland, exhibited by Myers & Samtman of Philadelphia. This variety, in form, is almost identical with its parent, but deeper in color. If comparison can be made at all, it may be said that it shows the same difference that Bridesmaid did when compared with Mermet, the two leading pinks of their day. The staging represented blooms cut from a stock of 80 plants, which speaks well for the excellent showing made at this, its first public appearance. Another novelty shown was Miss Sarah Nesbitt, exhibited by Benjamin Dorrance of Dorranceton, Pa. This was a creamy white, with the edges of the petals touched with cerise—very pleasing in appearance, but short of stem. It, however, scored twice in the prize list.

The exhibits of pot plants was much larger this year than ever before. H. C. Steinhoff of West Hoboken, N. J., carried off the bulk of the prizes, his exhibits in the Rambler class being particularly extensive.

The judges, the Hon. Philip Breitmeyer of Detroit, S. S. Pennock of Philadelphia, W. F. Gude of Washington and W. J. Palmer of Buffalo, are to be congratulated on the efficiency of their work. It was late in the evening before their task was finished, and it was necessary to make many very close decisions.

The exhibition of the Horticultural Society of New York, which was held in conjunction with the American Rose Society's exhibition, was very creditable, although the stagings were not nearly so numerous as expected. The Orchid displays of Lager & Hurrell, Summit, N. J. and Julius Roehrs Co., Rutherford, N. J., were grand for this season of the year and included many rare varieties.

Thursday Morning, March 17

Owing to its being impossible, on account of details in connection with the exhibition, to hold a business session on Wednesday, the first session was opened at 10:30 on Thursday morning. President Poehlmann made the following address:

The President's Address

It affords me great pleasure to address this large gathering, which may be safely considered the backbone of our Society. Also those members of the Horticultural Society of New York, who are willing and anxious to assist us, as attested by their presence.

Through the courtesy of the trustees of the American Museum of Natural History, we meet here in our eleventh annual convention. With the hearty co-operation of the Horticultural Society of this city, we have made it a success. Necessarily, much of the preliminary work devolved upon a few members of the executive staff living within easy distance, headed by that able leader, Mr. F. R. Pierson, our untiring secretary Mr. Benjamin Hammond, and Mr. Joseph A. Manda, manager of the exhibition. Many absentees would gladly be present, but for various reasons, principally lack of time, must forego the pleasure and be contented to wait for the reports as transmitted through the trade papers. The Florists' Exchange, Horticulture, Gardener's Chronicle, American Florist and Florists' Review have all been largely instrumental in spreading the news, have made faithful reports, and deserve the thanks of this Society.

It has been suggested that greater interest in our Society would manifest itself if it were possible to hold our annual meetings and exhibitions in conjunction with the American Carnation Society. This would undoubtedly be true. One could not possibly detract from the other. The scheme ought to be carried through as it will unquestionably lead to good results, and show a large saving of time and money. Co-operation would certainly make for a much larger exhibition and a better attendance. The idea is not to incorporate the two bodies into one, but each to retain its individuality. It is not because of the number of societies that many florists object, but they find it impracticable to attend so many different meetings and exhibitions. This is a question requiring further consideration. Today's exhibition speaks for itself.

Wm. H. Elliott of Brighton, Mass.
Elected President American Rose Society

Nine days less than a year ago we thought that we had the best display of Roses at Buffalo. How does our show today compare with it? The spirit of the times must be with us. It permits of no back sliding, but is ever for advancement. Credit is due to those who constantly strive to outdo their previous efforts, and who have brought forth their product for your inspection and judgment.

Rose culture is increasing rapidly in all sections of the country. The demand from the South and West is fast increasing. New Roses of merit are eagerly sought. The field is constantly widening. Millions of blooms are produced where ten years ago there were so many thousands. It is indeed a growing business without a limit.

It is not necessary to dwell at length on the aims of the Society. Pre-eminently they stand for the advancement and distribution of the Rose, as expressed in its desire to place "a Rose in every Home and a Bush in every Garden." How well this is being accomplished can be told by figures showing the annual sales of Rose Plants, running well into millions.

General View of the Joint Exhibition

New insecticides have greatly lessened the evils of insect pests. Chemical fertilizers, as they are becoming better understood, are being more generally used, while the good cattle manure is becoming scarcer and each year harder to obtain. Bulletins issued by the nitrate agencies contain valuable information to florists regarding the use of chemical fertilizers.

I have made my address brief because so much matter of value has already been published that little remains to be added. Our program provides for a number of essays, which I am sure will be of high merit, and hold your attention.

We gladly welcome new members to our ranks. The secretary will be glad to furnish information as to terms of membership.

I want to take this opportunity to thank everyone who has been instrumental in furthering the work of this exhibition, on behalf of the American Rose Society, and thank you for your kind attention.

Secretary's Report

The records of the year show that the American Rose Society blooms and grows in strength and influence. The idea "A Rose for every Home, a Bush for every Garden" takes hold. During the past twelve months there has come to hand more inquiry for information than ever before, and the weakest point in the organization is the lack of a quarterly publication, absolutely its own, that may be sent to every member and to kindred societies. In my opinion, until this is done the membership will continue restricted.

The interest and fame of the Rose Society surely is increased by the judicious use of its medals. These afford much pleasure and are not bestowed loosely. They carry with them esteem, and when given for good work in home gardens, in the communities where local interest is taken, stir up a lot of earnestness in Rose planting. The Annual Bulletin was issued for 1909, being sent to every member on record, filed in many libraries, and is called for by horticultural societies.

The last year, our life membership fund has passed the \$3000 mark.

The Society owes much, especially to ex-President Simpson, H. O. May, F. R. Pierson and the Executive Committee, for detail work in doing the many things required for such an exhibition as we are holding today. The A. R. S. is favored with many workers who freely serve for the general success.

The Florists' Society of Indiana have filed a request for the annual exhibition to go to Indianapolis in 1912, following the great National Flower Show to be held in the city of Boston.

Treasurer's Report

The annual report of the treasurer of the Society showed the receipts for the year to be \$4524.32, with disbursements \$3902.13, leaving a balance of \$622.19 in hand. The permanent fund was scheduled as amounting to \$3050, and the Hubbard medal fund \$250.

Secretary Hammond announced that Peter Crowe of Utica had come into the life membership fold, his fee bringing the fund thereof to the \$3000 mark.

The question of investing certain of the Society funds came up, and a good deal of discussion ensued as to advisable ways and means of making investments. Finally, a committee was appointed, consisting of the secretary, treasurer and incoming president, to decide the matter.

The place of meeting for 1911 was the subject of the next business and, on motion of Wallace R. Pierson, Boston was decided upon. Patrick Welch of Boston explained that his city was the best that could be selected, for the reason that the time of the meeting of the A. R. S. would correspond with the dates set for the National Flower Show and the meeting of the American Carnation Society.

The secretary announced that Dr. Sulinger of Vancouver, Wash., who was preparing to sail from New York next May, to visit France and other European countries as representative of the rosarians of Washington State, was desirous of being the accredited representative of the A. R. S. during his trip, which was to be devoted to horticultural research. After some discussion the matter was left in the hands of the secretary to take action.

Election of officers was the next business. P. Welch was nominated for the office of president but declined to stand, for reasons which he said made his declination imperative. The names of A. Farenwald and W. H. Elliott were then presented but, realizing that it was more to the interests of the Society, on account of the meeting being in Boston in 1911, to have Mr. Elliott at its head, Mr. Farenwald withdrew and Mr. Elliott's election was made unanimous.

Mr. Farenwald was elected vice-president by a unanimous vote. Secretary Hammond and Treasurer H. O. May were re-elected. J. A. Valentine and August F. Poehlmann were elected to vacancies on the Executive Board, and Wallace R. Pierson was elected to fill Mr. Farenwald's unexpired term therein.

Mr. Farenwald then read a paper on "The Roses, the Brightest of Flowers," which will be found on page 519.

Wm. F. Gude called the attention of the meeting to the death, recently, of Mrs. Gertrude Gardiner G. Hubbard, a patron of the Society, and moved that the secretary be instructed to prepare a suitable memorial to be sent to the family of the deceased lady. The motion was carried.

A paper by S. B. Sibson of Portland, Ore., was next read by Secretary Hammond, on "North Pacific Roses." A vote of thanks was passed to Mr. Sibson, after which the meeting adjourned until the afternoon.

The Awards of the American Rose Society

Division A.—Pot Roses

Best display of hardy Roses in bloom. All types and classes of Roses suitable for outdoor planting may be exhibited in this class. First prize \$100, offered by Hon. Philip Breitmeyer, Detroit, Mich.—1, H. C. Steinhoff, Hoboken, N. J.

Collection of Teas and Hybrid Teas is not less than 5 in. pots, 25 plants; first prize \$25, offered by John N. May, Summit, N. J.; second prize \$15.—2, H. C. Steinhoff.

Collection of Hybrid Perpetuals, 6 in. pots or over, not less than 25 plants; first prize \$25, offered by Welch Bros., Boston, Mass.; second prize \$15.—1, H. C. Steinhoff.

Six climbing Roses, in not less than 7 in. pots.—1, H. C. Steinhoff; 2, J. Roehrs Co.

Six Roses, not climbing, in not less than 7 in. pots.—1, H. C. Steinhoff.

Twelve Baby Ramblers, any variety, in not less than 4 in. pots.—1, H. C. Steinhoff.

Specimen in pot or tub, not climber.—1, H. C. Steinhoff.

Specimen Crimson Rambler in pot or tub.—1, H. C. Steinhoff.

Specimen Hiawatha in pot or tub.—1, J. Roehrs Co.

Specimen Dorothy Perkins in pot or tub.—1, H. C. Steinhoff; 2, J. Roehrs Co.

Division B.—Teas and Hybrid Teas. Twenty-five Cut Blooms. Open to All.

For the best American Beauty, stems not less than four feet or more than six feet; first prize \$15, offered by Arthur T. Boddington, New York City; second prize \$10.—1, Gude Bros. Co., Washington, D. C.; 2, Brant, Hentz Floral Co., Madison, N. J.

In classes 108 to 129 the prizes are, in each class, first prize \$10, second prize \$5. The varieties are as follows:

Bride. First prize offered by A. H. Langjahr, New York City.—1, Poehlmann Bros. Co., Chicago; 2, L. B. Coddington, Murray Hill, N. J.

Bridesmaid.—1, H. Hentz, Jr., Madison, N. J.; 2, Poehlmann Bros. Co.

Kaiserin Augusta Victoria.—1, Robt. Scott & Son, Sharon Hill, Pa.

My Maryland. First prize offered by L. B. Coddington.

Adolph Farenwald of Hillside, Pa.
Elected Vice-President American Rose Society

ton, Murray Hill, N. J.—1, J. Welch Young, Philadelphia; 2, E. H. Behre, Madison, N. J.

Mrs. Jardine.—1, Wm. Geiger, Oak Lane, Pa.; 2, Robt. Scott & Sons.

Golden Gate.—2, Gude Bros. Co.

Mme. Abel Chateau.—1, Robt. Simpson, Clifton, N. J.; 2, U. S. Cut Flower Co., Elmira, N. Y.

Ivory.—1, U. S. Cut Flower Co.; 2, Gude Bros. Co.

Sunrise.—1, Benj. Dorrance, Dorrance, Pa.

Wellesley.—1, Gude Bros. Co.

Killarney. First prize offered by Walter F. Sheridan, New York City.—1, J. Welch Young; 2, W. F. Badgley, Chatham, N. J.

White Killarney.—1, F. R. Pierson Co.

Richmond. First prize offered by Wm. C. Badgley, Chatham, N. J.—1, A. Farenwald, Hillside, Pa.; 2, E. Towill, Hillside, Pa.

Any other named disseminated variety.—1, Robt. Simpson with Enchanter; 2, Gude Bros. Co., with same variety. Under the discretion allowed in this class Benj. Dorrance was given a second with Miss Sarah Nesbitt.

For the largest and best collection of Teas and Hybrid Teas, 6 or more varieties, not less than twelve flowers of a kind; first prize \$30, offered by Robert Simpson, Clifton, N. J.; second prize \$20.—1, Gude Bros. Co.

Division C.—Twelve Cut Blooms

Open to Private Gardeners and Amateurs only.

Bridesmaid.—1, Wm. Hastings, Tuxedo, N. Y.

Any other named disseminated variety.—1, Wm. Hastings with Richmond.

Special Prizes—Division F.

The Dorrance challenge prize for the largest and best display of cut Roses; offered by Benjamin Dorrance, Dorrance, Pa.—1, Benj. Dorrance with Miss Sarah Nesbitt.

For the best 50 White Killarney, \$25 offered by Poehlmann Bros. Co., Morton Grove, Ill.—1, F. R. Pierson Co.; 2, Waban Rose Conservatories, Natick, Mass.

For the best 50 My Maryland, \$25 offered by Poehlmann Bros. Co., Morton Grove, Ill.—1, Myers & Samtman, Chestnut Hill, Pa.

For the best 50 Killarney, a silver cup, value \$25, offered by Henry F. Michell Co., 1018 Market st., Philadelphia, Pa.—1, Poehlmann Bros. Co.

For the best 50 blooms White Killarney, a silver cup, value \$25, offered by The Waban Rose Conservatories, Natick, Mass.—1, Poehlmann Bros. Co.

For the best new Rose, American origin, of 1909 and 1910, silver cup, value \$25, offered by Alexander Montgomery, Natick, Mass.—1, Myers & Samtman, with sport from My Maryland.

For the best 50 American Beauty, \$25 offered by John L. Raynor, New York City.—1, Brant-Hentz Flower Co.

For the best 50 My Maryland, \$25 offered by Pennock-Meehan Co., Philadelphia, Pa.—1, Ed. Towill.

For the best 50 Richmond, \$25 offered by H. E. Froment, New York City.—1, A. Farenwald.

For the best 50 Bridesmaid, \$25 offered by William F. Kasting Co., Buffalo, N. Y.—1, L. B. Coddington.

For the best 50 Mrs. Jardine, \$25 offered by Robert Scott & Son, Sharon Hill, Pa.—1, Wm. Geiger, also Silver Medal for arrangement.

For the best 36 My Maryland, \$15 offered by John Cook, Baltimore, Md.—1, Myers & Samtman.

For the best 6 Roses, American Beauty excepted, two to be white and four to be red, pink or yellow. This means that the number of varieties must be at least two and may be as many as six; and that two Roses, and only two, are to be of any white, or near white, variety, the other four of any colored variety, except Am.

Beauty. Length of stem is limited to only one joint. Solid silver cup, offered by Moore, Hentz & Nash, New York City.—Won by U. S. Cut Flower Co. of Elmira, N. Y., with four Chateaux and two Ivory Roses. There were thirteen entries in this competition.

(Concluded on page 520)

Entries for Best 50 White Killarney. The Prize Winners were Respectively F. R. Pierson Co. (the second vase from the left), and Waban Rose Conservatories (the extreme left vase.)

Ideals of Horticulture

A paper by James Wood, President of the Horticultural Society of New York, read before the Convention of The American Rose Society, New York, March 17, 1910.

The true horticulturist takes delight in the study and cultivation of his plants as well as in the admiration of the beauty of their forms and foliage, or of their flowers. He finds that contact with and study of this department of Nature's wonders has a refining and elevating influence upon his character. If he is a true member of the brotherhood of man, he desires that this benefit and this pleasure may be shared by others and be extended as widely as possible; indeed, it may be said that the highest ideal of horticulture is to make, if possible, the earth more beautiful and mankind better and happier because of its benefits, an ideal closely related to the beautiful imagery of the Messianic prophets of old when in glowing terms they described how even the desert should be made to blossom as the Rose. The true horticulturist pursues his vocation not for his own pleasure and profit alone, but for the joy it gives him to have other lives brightened and benefited by his work.

Horticulture as an Art

Horticulture and agriculture alike have to do with the cultivation of plants. The former is the more closely confined to the work, agriculture having a wider range in its operations, including the animal kingdom as well. The distinction between the two is, primarily, based upon the limitation of the area of horticultural operations as compared with that of agriculture. *Ager* applies to a field of larger extent and, perhaps, entirely unenclosed, while *hortus*, the garden, applies to an enclosure surrounded by a fence or wall. While the distinction between the two terms is based entirely upon this, the difference in their operations is indicated by the definition.

The practice of horticulture embraces both its science and its art. The art cannot be carried on to its best results without a considerable knowledge of its science. Next to the broad ideal to which reference has been made, the most important ideal of horticulture is the attainment of the highest degree of perfection in the results accomplished; and while the so-called "rule of the thumb" may answer for ordinary routine, it rarely results in any material advancement. Such advancement must necessarily result from the application of the laws of Nature to the operations from which improvement may be expected. The requirements of the science of horticulture are very complex, and I desire to refer to it in connection with the attainment of ideals, partly because it is at the very foundation of the subject and also to show that the highest practice of horticulture involves an acquaintance with many departments of science.

Soils and Plant Growth

The beginning of all operations is necessarily with the soil and this involves a knowledge of the vast variety of soils, both in their composition and in their mechanical condition. Soils are heavy and close in their texture when they contain a large percentage of clay; they are light and loose when they have a large percentage of sand; and between these are a great variety of loams with their varied constituents. It is important to know something of the character of the soil of the native habitat of a plant in order to understand the conditions under which it has been produced and maintained. But while this knowledge is useful, it is not of very great importance, because the native habitat may not present the best conditions for the particular plant. Various causes may have prevented its growth in locations that are better suited to its requirements. It may have been crowded out from this by other and stronger growing plants, or it may never have had an opportunity to grow in such a situation; but the knowledge of the soil upon which it has developed is important as indicating the root formation and root work of the plant itself. In open and loose soils roots are far reaching and grow to a great depth, while in heavy and retentive soils they grow nearer the surface; and plants with fine fibrous roots thrive best in a soil with a large percentage of decaying vegetable matter, furnishing a large amount of humus which greatly favors their growth and development. The necessity of soil being opened to the operations of the air is absolutely indispensable for the growth of plants of the higher orders. When the interstices between the particles of soil are occupied by water the air cannot penetrate the soil and growth cannot be maintained. Of course, this is not true with aquatic plants, but it is true of all plants of the higher order of development. This fact is the governing principle of drainage. Drainage is necessary to remove water from the soil so that the air can enter it and the chemical changes of Nature's laboratory be carried on there. Beside this requirement of the proper amount of water and the mechanical condition of the soil, the plant food contained by the soil is the next important consideration. This plant food is both mineral and vegetable and must be in a condition to be dissolved in water before being taken up for the use of the plant. Beside the soil, the other conditions, outside the plant itself, that the horticulturist must consider, are the exposures to moisture, heat and light. The proper

requirement of moisture is of great importance, and the maintenance of a proper degree of heat is equally important, while the exposure to light is an absolute necessity for all green plants.

The amount of light to which a plant is exposed has a great deal to do with its best development, and it is an interesting fact that the light from the sun, in greenhouses, can be supplemented by artificial light to great advantage. In England, where the sunlight is much more limited than it is in America, electric light is used to advantage on dark days or for lengthening the light in the short days of Winter. This is used both in the development of flowers and in ripening of fruits in fruit houses. This use of light is parallel with the use of artificial heat supplementing that of the sun.

Nature and Art in Reproduction

Passing these external conditions of the plant we come to the plant itself, and we must understand the processes of its growth, development and reproduction. The plant may be reproduced from seed, or propagated from buds, cuttings or layers, but the cuttings and layers are but other forms of bud propagation. The production of the seed involves the infinite variety of flower formation and the operation of the sexual organs they contain. At the very basis of plant cultivation lies the knowledge of Nature's method of reproduction by seed. Nowhere can we find more wonderful organs than those contained in flowers for this purpose, and nowhere can we find more interesting formations than those which regulate the fertilization of flowers by the agencies of wind or insects. In the first place, it is a remarkable fact that in plants that are not self-fertilizing there is a great difference in the showiness of the flowers of those that are fructified by the agency of wind or by insects. Those fructified by the wind are almost always inconspicuous, while the marvellous display of color and attractiveness of flowers is almost always among those where bees and insects are necessary for the conveyance of the pollen of one to another.

Not less wonderful is the provision that Nature makes in some flowers to prevent self-pollination and to provide for the bringing to the pistils of the flowers the pollen from the stamens of some others. The most striking of these are found in the Orchid family. Among the most curious of this varied flower structure is that of plants where, in some flowers the stamens and pistils of unequal length are so placed that only a bee bringing pollen from the long stamen of one flower can reach the long pistil of another, or one bringing pollen from the short stamen of one flower can reach the short pistil of another; and then again there are some plants with perfect flowers where the stamen and pistil do not mature at the same time, so that when the pollen of the stamen is ready the pistil is not prepared to receive it, or when the pistil is ready to receive it the pollen of the stamen has either lost its vitality or is not yet matured. This makes it necessary that the pollen from some other plant maturing when the pistil is properly developed should be brought to it by the agency of wind or of insect.

All this information is of practical utility in obtaining ideal results in horticultural operations. The growth of vegetables under glass in Winter where the wind cannot convey pollen from one flower to another and where there are few, if any insects to do the work, makes hand pollination necessary. This is particularly the case with Cucumbers, where the flowers are unisexual—it is necessary to convey the pollen from the stamen of one flower to the pistil of another by hand, using a camel's-hair brush for the purpose. In Tomatoes, where the flowers are bi-sexual, fertilization does not act with freedom because the stamens are stuck together by a gummy substance, which in the open air loses its tenacity and allows the stamens to separate so that their pollen can be loosened. When the sun is shining brightly, if the stamens of a Tomato flower in a greenhouse are slightly opened with a pin point they will fly apart and scatter the pollen in every direction, but without such aid a very large proportion of them do not separate and consequently the pistil is not fertilized. An example of this same matter, in outdoor cultivation, is found in some varieties of Grapes. The Brighton, a Grape of excellent quality, does not develop its pollen at the same time that the pistils are matured, and, consequently, if left to itself, a very imperfect fructification takes place. When the vine is grown near other Grapes whose pollen matures at the proper time, the Brighton pistil is fructified by the pollen blown by the wind or carried by insects. In my own vineyard I have a row of Brighton vines to the east of rows of Delaware and Campbell's Early. The prevailing Summer wind is from the southwest. When there are such winds during the days of Brighton blooming good bunches of Grapes are formed, but when for two or three days at that time there happens to be easterly winds, imperfect fructification takes place and very ragged clusters result. Similar facts are found in growing Muscat of Alexandria under glass, where it is necessary to disperse the pollen by gentle blows upon the vine or ragged clusters will be obtained.

Hybridization

This matter of cross fertilization introduces the great subject of horticultural development by means of hybridi-

zation where crosses of different species are made. It makes possible an almost endless variety of production and is a most promising field of horticultural development. Those who attended the plant-breeding conference held by the Horticultural Society of New York a few years ago, and which was attended by prominent scientists of European countries, the West Indies, as well as of all parts of our own country, will remember the most interesting papers and discussions upon this subject. Indeed, it may be said that there is no limit to the development that may be made by this means. The discovery of Mendel's laws governing the results of hybridization furnishes a guide to these experiments which will greatly aid in the accomplishment of important results, and the achievement of our highest ideal.

The propagation from buds is the method by which plants are obtained from cuttings and layerings, while in some cases buds are formed upon the roots of plants, as in the *Pyrus Japonica*. Propagation from buds involves the interesting fact concerning bud variation, through which plants are produced of a distinct character from the parent plant. This also produces some striking changes which we call "sports." Familiar illustrations of this are found in the production of the pink Bridenaid Rose from the white Bride, and the white Killarney from the pink parent.

Bud propagation also involves an interesting variety in the case of those plants where rudimentary buds are formed on the margin of the leaves, or at the leaf axis, as is the case with members of the *Begonia* family.

Growth and Development

After a plant is obtained by the germination of seed, or by propagation from buds, its growth and development next require our attention. This involves not only proper conditions of soil but the plant food which the soil contains.

The ultimate object of the production of the plant and of its growth and development is its reproduction. For this operation the flower of the plant is formed. And flowers, whether for their own sake or as the necessary precursors, are objects of the greatest concern to the gardener. As the reproduction process, of which the formation of the flower is the first stage, is an exhaustive one, it is necessary that the plant should be well established before it flowers. When the growth of a plant from any cause is too vigorous it is sometimes necessary to check the growth of the vegetative organs as the necessary preliminary to the development of the flower. This is sometimes done by root pruning, but commonly, in greenhouses, by the use of pots. In some countries where the Grapes do not form flower sufficiently for a good crop, the vines are partly lifted so as to check the operation of the roots. The flower itself is usually produced at the end of the shoot or a spur from the side of the branch. Sometimes the flower buds for next year are formed soon after the dropping of this year's flowers as is the case with Pears among fruits and Chinese Magnolias among flowers. More frequently the flower is formed at the end of the new growth of the shoot and is a special development of the foliation. Indeed, a great portion of flowers perform the same function as leaves, while the highly colored petals do not have this function. Double flowers are formed by the development of stamens and pistils into petals so that, as a rule, double flowers have fewer seeds than do single flowers. Indeed, this development of stamens and pistils into petals sometimes goes so far as to leave none of the organs for the formation of seed.

I have already referred to the functions of the different organs of the flower in the seed formation. All these various and varied functions of the different parts of the plant belong to the science of horticulture, and, as I have already said, while the work of the art of horticulture may go on by established methods without a knowledge of these scientific facts, no probability of advancement can be had without the application of the knowledge I have described, so that the great ideal of horticulture in the attainment of the highest possible production demands a knowledge of all these departments of natural science. Indeed, in this brief notice nothing like all of the scientific principles have been stated.

Horticultural Art in Practice

We come now to the practice of the art of horticulture. A large portion of this is dependent upon experience. Experience is the resultant of the rule that "what has been may be" and since in practice it has been found that certain things result from certain procedure, we continue to practice established methods. Large improvements may sometimes be made by finding that some change in procedure results in a benefit and, conversely, other changes result in injury. In the application of scientific principles in the practice of horticulture the best results are obtained.

The divisions of horticulture are those embracing flowers, vegetables and fruits. In practice, these are distinct, though all three are often carried on in the same garden. I myself have a house in which all three are carried on together today. The three are not now carried on together in outdoor gardens so much as formerly, as it is found to be better to grow flowers, vegetables and fruits each by themselves. It is much more common to see them growing together in English gardens today than in this country.

There is one quite serious injury resulting from modern methods of seed distribution through the seed trade. Before this trade was so developed as it is at the present time gardeners were much more dependent upon the production of their own seed. This stimulated a great interest in the selection of the very finest specimens for seed production and not infrequently in important experiments in seed production by cross fertilization or hybridization. I can myself remember the great care practiced in gardens of my own home some sixty years ago, when all flowers grown from seed were carefully examined for the types most desired, and also specimens of vegetables that met the grower's ideal were carefully preserved for seed. Here was a practical ideal of horticulture for which there is now but little opportunity. It is very much easier to make up our list of seeds for our flowers or vegetables and send them to the great "omnium gatherum" of the modern seed store. Occasionally we find, even today, some true lover of the art of horticulture who still practices the home production of seed.

Peculiarities of Plants

In considering the question of plants to be grown in any flower garden, the temptation is very great to confine ourselves to such as produce the most showy flowers, but it is often the case that plants of the very greatest interest produce inconspicuous flowers. Some plants, of course, such as *Ferns*, are grown for the beauty of their form and foliage alone, but it is often desirable to have a department of the garden devoted to plants of peculiar interest apart from their flowery display. I will illustrate this by reference to the marvellous carnivorous plants which have the most curious and complete arrangements for the capturing of flies and other insects, such as some of the *drosera*, *dionaea* and the *Venus fly traps*. It is wonderful, when it is considered that these plants secrete a digestive juice similar to the gastric juice in our own stomachs, by which the substance of these insects is rapidly decomposed and absorbed into the tissue of the plant. Another very interesting illustration of this portion of the garden is the so-called compass plants found upon our semi-arid plains of the West, where the natural light is too strong for the leaf organs, and instead of exposing their plain surface to the sunshine as other plants do where the glare of the light is less intense, they turn their edges to the light so as to shield the broad surface of the leaves from the powerful rays of the sun. This function is so marked that travelers of the desert can ascertain the points of the compass from the position of the leaves of these plants. Such a department of the garden excites a great interest with visitors and is a helpful stimulant to the children reared upon the place.

One of the ideals of horticulture is thus to stimulate an interest, which is quite as important as the mere gratification of the eye by beauty alone, and here the skillful gardener who is in charge of the garden and greenhouse of some wealthy proprietor can find an opportunity to overcome one of the most trying facts of his position. There are many wealthy owners who know, or care little for the work of plant growth and flower production, and are willing to incur the expense involved simply that their houses may have the flowers which are considered necessary for their proper furnishing. These people look upon flowers as something that can be obtained from the florist at so much per dozen, and to them they mean little more.

"A Primrose by the river's brim,
A yellow Primrose was to him
And it was nothing more."

This relation to the proprietor is a very difficult one for the gardener, and if he can by tact and skill have something of interest, outside the ordinary, to which he can occasionally ask the attention of the members of the family, it gives him an opportunity for exciting an interest on their part which may grow into a higher and better appreciation of the work, as, indeed, this should be the aim of every gardener in charge of such a place. Fortunately indeed is the gardener where the members of the family take an interest in everything pertaining to his work, and where they love the flowers they have seen grow and take a pleasure in arranging them to display their beauty.

I have occasionally presented flowers to ladies who accepted them as they might a box of candy, and who usually hand them over to a servant to be arranged. The sensations in making such a gift are very different from those where the recipient takes the keenest delight in each flower, and loves to hold them in her own hand and arrange and rearrange them according to her fancy. Naturally, gifts to the latter are made with frequency, while the former rarely, if ever, receives flowers a second time.

The High Ideal of Horticulture

One of the best examples of the high ideal of horticulture is found in the work of Dr. Wm. Saunders, the head of the Experimental Farms in Canada. Members of our Horticultural Society may remember Dr. Saunders at the conference of plant-breeders a few years ago, when he presented an admirable paper on his work. The

development of the western portion of Canada has been made possible through Dr. Saunders' skill and persistence in finding and producing plants suited to the rigorous climate of that region. His greatest work belongs to the department of agriculture, where by hybridization and selection he has produced a variety of wheat that will ripen in ninety days from the sowing of the seed, which is rapidly revolutionizing the wheat supply of the world. Dr. Saunders desired that settlers in that bleak region should have comfortable and attractive homes with fruits and vegetables and flowers. Practically no fruits would grow there, and only a few flowers that were known to practical horticulture. By planting wind breaks of the native trees of the region he made it possible to have secondary borders of evergreens. Under the shelter of these, garden plots were laid out in which fruits, vegetables and flowers of many varieties and of the choicest quality are grown, and gradually the hearts of the lonely residents of those vast regions were gladdened, which added no little pleasure to the happiness of mankind.

Sharing Horticultural Pleasures

The production of perfect flowers and fruit, while a pleasure in itself, gives an added pleasure when others are allowed to share in their enjoyment. We have had a beautiful example of this in the practice of our late lamented vice-president, Mr. Spencer Trask. At his beautiful place, "Yaddo," at Saratoga Springs, the public were invited to enjoy with him the splendid results of the high art of horticulture practiced there.

In every work in life it is well to have ideals. They set something for us to strive for, and it is only by effort that the best advancement is made. The standard of our ideals in horticulture will usually be the measure of our achievement.

The Rose, the Brightest of Flowers

A paper read before the Convention of The American Rose Society in New York, March 16, 1910, by A. Farenwald, Roslyn, Pa.

When I received word to write a paper on the above subject I felt that it was sent to the wrong man. I am a Rose grower, not a poet, so I tried to wriggle out of it; but the "powers that be" wanted me to stick to the gun, and as I am an enthusiastic member of this Society, and a lover of Roses as well as a grower, I consented. I shall now do my best to honor the "Queen of Flowers." If I fall short you must remember that I am only a Rose grower, not a poet.

Of course, there are other flowers in the race, such as Orchids, Carnations, Violets, and a host of other "also rans." They are all beautiful; they all fill their places, but what one has sufficient popularity to fill the place of Queen? With its exquisite form, its graceful carriage, its thousands of different hues of color, coupled with the grandest foliage imaginable, we see it—the Rose—the embodiment of all that is beautiful in the kingdom of flowers. For ages the poets have sung their praise of its charms. The composer has put to music what stirred his soul when face to face with its matchless beauty. Innumerable times the painter has tried to copy its wonderful forms and colors.

Our Queen is the symbol of our fondest affections as well as of our deepest sympathy. Her mission is varied, fitting all occasions and all lives. Her bright coloring and delicate perfumes are silent messengers of comfort and cheer to the sick in body and soul. She also brings to the memory of most of us thoughts of the long ago—"the days of love and Roses." No human being can resist the charms of our Queen, no matter how lowly his station or how crude his ideas of beauty.

Truly, fellow members, no nobler profession exists than ours—the Rose grower's—whose everlasting patience and skill tries to improve on Mother Nature. To think that we send every day to thousands and (blessed be) to millions these messages of love and cheer! No, we need not be afraid of any other flower taking the place of our beloved Queen, as long as we keep on producing and improving in the future as we have done in the past, to which fact the present exhibition now being held in this hall testifies. All growers of Roses are Rose lovers. Whether they produce the flowers for commercial purposes, or simply for pleasure, the aim is one—perfection. A few weeks ago I said, publicly, in Philadelphia that the Carnation was pushing hard for first place. Of course, we know the Carnation has its charms, but the Rose is its superior, and always will be. It is simply the fact that its producers, as a class, are putting forth their best efforts. But, if all Rose growers should strive as hard what marvelous results might be obtained.

The Rose Society has a motto—"A bush for every garden, a Rose for every home." It is to educate the masses of our people to the point of appreciating the value of the Rose as a means of culture, so that in the future men will discuss with each other the merits of their several Rose gardens, and compare notes on the different varieties. In the Springtime, before leaving in the morning for their places of business in the dark and dusty cities, they will take a run into their gardens and receive an inspiration from the bedewed beauties such as will enable them to wrestle more effectively with the problems of the day. Furthermore, they will enjoy talking to their neighbors and friends on these beauties of Nature, instead of simply filling each others' minds, as they do now, with exchanges of opinion on the various sports of the day, stocks and bonds, etc. That education no other flower can bring, as no creation of Nature has attained, as I said before, such beauty, and won such universal love as our Queen, when once thoroughly understood by the great amateur public.

The Rose, the Brightest of the Flowers. When I started on this subject, I felt that I could not do it proper justice. But I caught the inspiration as I thought upon it, as everyone must be inspired when once thoroughly aroused to the charms of the Queen of Flowers. I have tried to convey some of my innermost thoughts on our glorious Queen, and doing it has brought back to my memory dreams of long, long ago; and I hope that for some, or all of you, it will also call up memories of the "days of love and Roses."

The Royal Horticultural Society of Great Britain is in a most satisfactory condition so far as finances are concerned, having £50,000 invested in gilt edged securities, a condition of opulence sufficient to provoke the envy of all the horticultural societies of the world.

American Museum of Natural History, 77th St. and Central Park, West, New York, where the Meeting and Exhibition of the American Rose Society was held jointly with the Spring Exhibition of the New York Horticultural Society

Prize Winning Vase for Best New Rose of American Origin Captured by Myers & Santman with a Sport from My Maryland

(Continued from page 520)

For the best 25 Richmond; first prize \$10; second prize \$5; offered by Stump & Walter Co., New York City. Open to private gardeners only.—1, A. Farenwald; 2, E. Towill.

Awards of the Horticultural Society of New York

Flowering Plants—Miscellaneous

Cyclamen, for the best 20 plants (special prize offered by Messrs. R. & J. Farquhar), Silver Medal.—J. Stuart, Mamaroneck, N. Y.

Cyclamen, for the best specimen plant.—1, J. Stuart; 2, Mrs. A. Siegel, Mamaroneck, N. Y.

Rhododendrons, for the best 6 plants, in not less than 3 varieties.—S. Untermyer, gdr. W. H. Waite.

Schizanthus, best 6 plants.—S. Untermyer, gdr. W. H. Waite.

Best collection, foliage plants, arranged for effect, covering 50 sq. ft., Silver Medal.—Julius Roehrs Co., with collection of Crotons.

Orchids

For the best display, covering 50 sq. ft. of table space.—1, Lager & Hurrell, Summit, N. J.; 2, Julius Roehrs Co., Rutherford, N. J.

Cattleya Trianae, for the best specimen.—1, W. A. Manda, So. Orange, N. J.; 2, J. Roehrs Co.

Cattleya Schroderae, for the best specimen.—1, W. A. Manda; 2, J. Roehrs Co.

Cattleya, any other variety, for the best specimen.—1, Frank L. Moore, Chatham, N. J.; 2, Lager & Hurrell.

Cypripedium, for the best display.—1, Lager & Hurrell.

Dendrobium nobile, for the best specimen.—1, W. A. Manda; 2, Lager & Hurrell.

Dendrobium Wardianum, for the best specimen.—1, W. A. Manda; 2, J. Roehrs Co.

Foliage Plants

Neprolepis Bostoniensis, for finest and largest specimen.—F. R. Pierson Co., Tarrytown, N. Y.

Neprolepis Piersoni, for finest and largest specimen.—F. R. Pierson Co.

Neprolepis, any other variety, for finest and largest specimen.—F. R. Pierson Co., with N. elegantissima compacta.

Exhibits Not for Competition

John Lewis Childs, Floral Park, N. Y.—Three plants Calla Elliottiana.

Julius Roehrs Co., Rutherford, N. J.—Group of new Croton F. Sander.

H. C. Steinhoff, West Hoboken, N. J.—Group of Formosum Lilies.

A. N. Pierson, Inc., Cromwell, Conn.—Adiantum Farleyense plants, vase of Lily of the Valley, vase White Killarney, vase Pink Killarney, vase of My Maryland.

F. R. Pierson Co., Tarrytown, N. Y.—Three specimen plants Neprolepis Bostoniensis exaltata.

Thos. DeVoy Sons, Poughkeepsie, N. Y.—Six vases of new Violet, Marie Elise, sport of Marie Louise.

Cottage Gardens Co., Queens, N. Y.—Vase of Seedling No. 405, vase of Mrs. C. W. Ward and vase of Alma Ward.

The Rosary Flower Co., New York.—Floral hat and muff, composed of Violets, Dendrobium Wardianum and Farleyense Fern.

A. L. Miller, Brooklyn, N. Y.—Exhibit of potted Marguerite Daisies and boxes of Pansies.

Among Those Present

Wm. Geiger, S. S. Pennock, Frank P. Meyers and Martin Samtman, all of Philadelphia.

A. Farenwald and E. Towill of Hillside, Pa.

Wm. A. Leonard and Aug. Doering of Lansdowne, Pa.

Francis G. Marscham and A. Dorrance of Dorrance, Pa.

F. Lautenschlager and August F. Poehlmann, Chicago, Ill.

John R. Andre, Doylestown, Pa.; P. T. Barnes, Harrisburg, Pa.; P. J. Donahoe, Natick, Mass.; Wm. Nicholson, Framingham, Mass.; Louis J. Reuter, Westerly, R. I.

John A. Evans, Richmond, Ind.; Richard Vincent, Jr., White Marsh, Md.

A. Gude and W. F. Gude, Washington, D. C.; Hon. Philip Ereimyer, Detroit, Mich.

Wm. F. Kasting, S. Palmer and Prof. F. Cowell of Buffalo, N. Y.

F. Burki, Bakerstown, Pa.; Prof. Judson, Ithaca, N. Y.; P. Welch, Boston, Mass.; S. S. Skidelsky, Philadelphia, Pa.; E. G. Hill, Richmond, Ind.; J. A. Valentine, Denver, Colo.; and Peter Crowe, Utica, N. Y.

The Joint Exhibition at Philadelphia

The annual Spring show of the Pennsylvania Horticultural Society combined with the convention and exhibition of the National Gardeners' Association, opened on Tuesday evening. Coming about ten days early the exhibits were not quite so numerous as usual, but, as always at this show, the quality of exhibits was very high.

Some disappointment was expressed that so few members of the Gardeners' Association came over from New York; are they afraid to compete against the gardeners of Philadelphia? At least it looks so. We can assure them that had they competed and got beaten it would not have been to their discredit as our private gardeners do produce some exhibits of very high standard.

In cut flowers all attention was given to the seedling Carnation Wodenethe, exhibited by Winthrop Sargent, Fishkill-on-Hudson, N. Y. (F. C. Wittey, gdr.), a grand white, flowers 4" in diam., stems 26", flower, perfect and of good substance; the best white Carnation ever seen here.

In other Carnation classes prizes were taken by P. A. B. Widener (Wm. Kleinheinz, gdr.), John Wanamaker (John H. Dodds, gdr.) and Countess Eulalia (Thomas Gaynor, gdr.); all of these staged grand blooms of the leading varieties of today.

The prizes for Tea Roses were taken by C. B. Newbold (Sam'l Batchelor, gdr.), Prof. H. E. Osborn, Garrison, N. Y. (James Bell, gdr.) being second.

On Roses in pots, John W. Pepper (Wm. Robertson, gdr.) took most prizes, exhibiting such varieties as The Farquhar, a climbing Rose, The Lion, Harry Kirk, Walter Speed, Geo. C. Waud and Mrs. Aaron Ward, all being well done, with good foliage from the pot up. In the class for Cyclamens, the prizes were taken by C. B. Newbold and John W. Pepper; the former had a grand lot of plants in 6" pots, bearing 30 to 50 flowers each, the flowers being of large type; this exhibitor also staged a plant of white Cyclamen, named Crosswick's White, a seedling, the flowers being of very large proportions; a grand plant.

Cineraria Stellata was, as usual at this show, very well done; the plants from C. B. Newbold were particularly good, dwarf and about 3½ to 4 ft. through.

A group of foliage and flowering plants staged by C. B. Newbold was the admiration of every one, the flowering plants in the group consisting of Wisterias, Laburnums and Lilacs in several varieties; in the center was a fine plant of Dracaena Godseffiana, 3 ft. through. Azaleas were exhibited by C. B. Newbold, Mr. F. C. Penfield and John W. Pepper, the first named having one plant of A. Indica 5 ft. in diameter.

First prize for pair of specimen Palms went to C. B. Newbold for Caryota urens, 10 ft. high, second to Mrs. F. C. Penfield (John McCleary, gdr.) for a pair of Phoenix Roebelenii, the best two ever seen here, about 5 ft. high with a spread of 4½ ft.

There were some very fine vases of Antirrhinum flow-

The Popular Brand of Lilac Handled by John W. McIntyre of Philadelphia

ers at this show shown by Mrs. R. B. Ellison (Axel Lindroth, gdr.) Countess Eulalia and John Wanamaker. Winter forcing Stocks were also quite numerous; both of the above are being grown quite extensively in this section.

In Tulips, the most noticeable were three plants of l'Unique, a new variety of single Tulip; it bears a white flower striped with lemon yellow and is a splendid acquisition. All Tulips and Hyacinths were very good; of the latter the best varieties were Kob-i-noor, Moreno, Czar Peter, Innocence and Lord Balfour.

In Spiræas, outside of S. superba, other varieties shown were not so good this year.

Henry A. Dreer, Inc., made a very good display of foliage plants. Lager & Hurrell a display of Orchids. Alphonse Pericat a display of Orchids.

The National Gardeners' Association held a banquet at Dooner's Hotel, Tuesday evening, at which 68 were present. On Wednesday, the delegates visited the principal florist's establishments and, in the afternoon, paid a visit to the nurseries of Henry A. Dreer at Riverton, N. J.

On Wednesday evening the business meeting of the Association was held, Wm. Kleinheinz being re-elected president and W. E. Maynard re-elected secretary. The Association decided to hold their next meeting and exhibition in 1911 at Boston, during the S. A. F. National Flower Show.

Lager & Hurrell's Prize Winning Table for

Best Display of Orchids

Our arrangements for careful packing and prompt shipment are perfect

Price List :: Easter 1910

COME AND SEE OUR STOCK

Any Buyer seeking quality will be well repaid by inspecting our large stock of Crimson and Pink Ramblers, Hydrangeas, Lilies, Azaleas, Rhododendrons, Spiræas, etc., etc.

The early Easter will make absolutely no difference to us. Our stock is excellent and timed just right for Easter. Send us your orders at once to insure satisfaction.

Lilies

Our stock is exceptionally good this year. Plants from 4 to 8 blooms... at 12c. per bloom
Made up pans from 12 to 20 blooms... at 12c. per bloom
Plants with less than 4 blooms, at 15c. per bloom

Azaleas

Our stock of Azaleas is the largest and finest we have ever had and includes:

Van der Cruyssen, Vervaeana, Emp. of India, Emp. of Brazil, Noble, Bernard Andrea Alba, Prof. Wolters, etc., etc., at 75c., \$1, \$1.25, \$1.50, \$2, \$2.50, \$3, \$3.50, \$4, \$5, \$6, \$7.50 and \$10 each.

Pyramid Azaleas, very fine, at \$3, \$3.50 and \$4 each.

Azalea Mollis, Anthony Koster, the best yellow, at \$15 and \$18 per doz.

Azalea Mollis Ass't, very large plants, at \$2.50, \$3 and \$3.50 each.

Small Azaleas for Basket Work, at \$4 per doz., \$20 per 100.

Crimson Rambler Roses

These plants are unusually fine and will be just right for Easter.

6-in. and 7-in. pots... at \$1, \$1.25 and \$1.50 each
8-in. pots... at \$2 and \$2.50 each
Plants trained in fan and globular shapes, extra fine, at \$2, \$2.50, \$3, \$3.50, \$4, \$5 and \$6 each.

Pink Rambler Roses

Lady Gay and Dorothy Perkins

In great condition, trained into fan, globular and pyramidal shapes. At \$1.25, \$1.50, \$2, \$2.50, \$3, \$3.50, \$4, \$5 and \$6 each.

Special Ball Shapes, at \$1.50, \$2, \$2.50, \$3 and \$3.50 each

Special Wire Fan Shapes, at \$3 and \$3.50 each

Standard Lady Gay Umbrella Shape, \$3.50 each

We want to call your attention to this Special Standard Lady Gay Umbrella which we have in exceptionally fine condition. This, we believe, cannot be duplicated anywhere.

Tausendschon (New)

"Thousand Beauties"

This was our finest Climber last Easter and this year the plants are still better. We cannot recommend the Tausendschon Rambler too highly.

Strong plants in 5-in. and 7-in. pots, at \$1, \$1.25 and \$1.50 each.

Trained plants, Fan, Globular and Pyramidal Shapes, at \$2, \$2.50, \$3, \$3.50, \$4 and \$5 each.

Baby Rambler Standards

Exceptionally fine plants, 3 to 5 foot stems, at \$1, \$1.25, \$1.50, \$2 and \$2.50 each.

White Baby Rambler Standards

At \$1, \$1.25 and \$1.50 each.

Standard Double-Budded White and Red Baby Rambler on Same Plant

At \$1.50 each.

Baby Ramblers

Good strong stock, well flowered, at \$3, \$6 and \$9 per doz.

Hiawatha

The best of its color.

6-in. and 7-in. pots, trained in globular and fan shapes, at \$1.25, \$1.50, \$2, \$2.50 and \$3 each.

Mrs. Cutbush (New)

Pink Baby Rambler

This is a good one, in 5-in. pots, at \$6 and \$9 per doz.

Baby Dorothy (New)

Pink Baby Rambler very similar to Mrs. Cutbush.

4-in. and 4½-in. pots... at \$4 per doz.

5-in. pots... at \$5 per doz.

6-in. pots... at \$9 per doz.

Hybrid Roses

We have an unusually large stock of Hybrids which will be just right for Easter; all the best varieties, including:

Richmond, Kaiserin, Mrs. Henshaw, Killarney, etc., at \$6 and \$9 per doz.

Magna Charta, very fine, at \$9, \$12, \$15 and \$18 per doz.

Hydrangeas

At \$6, \$9 and \$12 per doz.

Large plants at \$1.50, \$2 and \$2.50 each.

Hydrangea Otaksa, Standard (New), at \$2, \$2.50 and \$3 each.

Rhododendrons

Shapely, well-budded plants, including all the best varieties, at \$1.50, \$2, \$2.50, \$3, \$3.50 and \$4 each.

A few larger plants in tubs, very handsome, at \$5 and \$6 each.

Rhododendron Pink Pearl (NEW)

The most beautiful of all the Rhododendrons, at \$2.50, \$3, \$3.50 and \$4 each.

Lily of the Valley

5-in. pots... at \$6 per doz.

6-in. pots... at \$9 per doz.

Bougainvillea Glabra Sanderiana

Magnificent plants, exceptionally well flowered, at \$2.50, \$4, \$5, \$6, \$7.50 and \$10 each.

Genistas

A grand stock, grown cool and just right for Easter, at \$2, \$3, \$4, \$5, \$6, \$9, \$12 and \$15 per doz.

Spiræa Gladstone

Our stock is in superb condition.

6-in. pots... at 60c. each

7-in. pots... at 75c. each

8-in. pots, made up... at \$1 each

9 and 10-in. tubs, made up... at \$1.50 and \$2 each

Pink Spiræa

Queen Alexandra, very beautiful

6-in. pots... at \$9 per doz.

Double Daisy, Queen Alexandra

Well grown and well flowered.

4-in. pots... at \$2.50 per doz.

5-in. pots... at \$4 per doz.

6-in. pots, very fine... at \$6 and \$9 per doz.

Marguerites

Very well flowered, 6-in. pots... at \$4 per doz.

Oranges

5-in. and 6-in. pots, 4 to 8 fruits, at 60c., 75c., \$1 and \$1.50 each.

Nephrolepis Scottii

6-in. pots... at \$6 and \$9 per doz.

8-in. pans... at \$12 per doz.

10-in. pans... at \$1.50 and \$2 each

Nephrolepis Todeaoides

The London Fern.

We have a large stock for growing on, in

2-in. pots, at \$5 per 100, \$45 per 1000.

6-in. pots... at \$5 and \$9 per doz.

11-in. tubs... at \$2.50 each

Nephrolepis Amerpohli

The Philadelphia Lace Fern.

5-in. and 6-in. pots... at \$6 and \$9 per doz.

Nephrolepis Whitmani

9-in. pots... \$2 each

Nephrolepis Scholzei

Ready Now.

2½-in. pots... at \$8 per 100, \$75 per 1000

Asparagus Plumosus

2-in. pots... at \$4 per 100

Areca Lutescens

Exceptionally fine stock.

5-in. pots... at \$7.50 and \$9 per doz.

Dracaena Massangeana

Perfect plants, 6-in. pots, at \$18 and \$24 per doz.

Dracaena Fragrans

6-in. pots... at \$6 and \$9 per doz.

Crotons

We have the largest stock of Crotons in America. Well colored plants.

4-in. pots... at \$25 per 100

5-in. pots... at \$50 per 100

6-in. pots... at \$75 per 100

Large plants... at \$1, \$1.25, \$1.50 and \$2 each

Made up plants... \$2.50 to \$10 each

Pandanus Veitchii

Well colored

4-in. pots... \$5 per doz., \$40 per 100

English Hawthorn

8-in. pots, 3½ to 4 feet tall... at \$2 each

Standard Prunus (Plum)

Very handsome plants... at \$2 each

Wistaria (Blue)

at \$1.50 and \$2 each.

Flowering Apples and Almonds

at \$1.50 each

Ficus Pandurata

6-in. pots, 24 to 36 inches high, at \$2, \$2.50 and \$3 each.

Larger plants... at \$3.50, \$4 and \$5 each

Branch Plants... at \$2.50, \$3, \$3.50 and \$4 each

Begonia Gloire de Lorraine

We claim to have the largest and finest stock of this grand Xmas plant in America.

All plants propagated from leaves and twice shifted. Shipped from 2½-in. pots, at \$15 per 100, \$140 per 1000.

Special prices on lots of 5000 plants, or over.

It will help us, and you, if we have your Easter order early

An early Easter makes no difference to us, we are always ready

Notes on Flowering Shrubs for Easter

By JOSEPH MEEHAN

Pussy Willows in Boxes

There is one flower that is always welcome at Easter, the Pussy Willow. It seems that every one knows this Willow and its Easter flowers, either from having seen one in their old home in childhood days or from having seen it so often used at Eastertide. Its general appearance is in the way of cut shoots, cut a short time in advance of their being used, and forced along by placing them in a warm cellar. It takes but a short time to bring them into flower on the approach of Easter. In fact, when Easter comes late this Willow is sometimes in flower in the open air. The "pussies" are the male flowers. They are much larger than the female ones. The latter make so little display that no one would think of forcing branches for the sake of getting them.

To grow this Pussy Willow in boxes young plants should be used to start with, for the reason that older plants have such large roots. The plants should be cut back to near the ground, aiming to secure by this a growth of some half dozen or more of strong branches. Then they should be planted in the nursery in early Spring. Dependent on their having made a good growth they should be lifted in Autumn and heeled in, in a potting shed, ready for placing into boxes soon after Christmas, if wanted for Easter. If little or no growth was made in Summer there would be no use in using them for forcing, for the flowers come on the shoots made the preceding Summer.

Euonymus Japonicus aureus

An attractive plant when grown in pots is the golden leaved form of the *Euonymus Japonicus*, known as *aureus*. There are two forms of this, one having a golden center with green edgings, the other a reversal of this, the golden part being the edgings only. Both are most attractive when seen in pots, and are apt to find many purchasers, especially at times when decorations indoors are desired. It cannot be claimed that there are berries as well, for though all varieties of *Japonicus* bear berries it is not until they are large bushes, or at least larger than such as in mind for pots. There are, besides the golden-leaved some variegated-leaved sorts, which are handsome; and even taking the old green-leaved one, the common *Japonicus*, it is a handsome bush when in good soil.

In southern Pennsylvania these *Euonymuses* are quite hardy, being often used in cemeteries; and even farther north they do very well if not set in a trying position. There is a scale having a fondness for this *Euonymus*. It has come to be called the *Euonymus* scale; like all other scales it cannot withstand a strong odor of oil, or some of the miscible oils now offered for sale for spraying purposes.

Forcing Hydrangea alba grandiflora

At Easter time the pots of *Hydrangea Hortensis* in flower are common in all florists' windows, and from their beauty and usefulness as shrubs nearly hardy they are in much demand. There can be added to this favorite another species, the new sterile flowered variety of *H. arborescens*, called *alba grandiflora*, becoming now well known as a Summer blooming shrub, but which has not been taken hold of for forcing as yet, though this Easter may see some of it. There is a second sterile flowered new one, a variety of the *H. cinerea*, which its introducer, E. Y. Teas, calls *Teas' Snowball Hydrangea*.

As when growing in the shrubbery these sorts flower at the same time as the *Hortensia*, when growing alongside of it, it of course should force as well as it, and would require about the same time to do it. When outdoors it flowers in late June as a commencement, keeping up a succession for a month or more, when the plant is bushy.

These two hardy sterile forms must be pruned differently from the *Hortensia*. They must be cut well back to give strong shoots with large heads, but if many heads of smaller size are preferred then do not cut them back more than a third of their length. Florists know well that *H. Hortensia* must not be pruned back at all.

One of the prettiest small evergreens with red berries grown for Easter decoration is the *Skimmia Japonica*, a neat evergreen from Japan. It is a rather common evergreen in the gardens of Europe, being much used in borders and like positions where quite low growing plants can be used to advantage. As seen in florists' windows the plants offered are usually of about six to twelve inches high, and are well furnished with red berries; and often at the same time the plants are bearing their white flowers.

The *Skimmia* is quite hardy in the vicinity of New York City, preferring a partly shaded position and deep soil to do its best.

Forcing Shoots of Shrubs

Besides the several shrubs that are nipped and forced for Easter, there are several sorts the shoots of which may be cut off and forced with much satisfaction. It does not take very long to get these shoots to flower, as only those shrubs that flower in early Spring are

cut from, and when undisturbed on the bushes they flower in a few weeks from the time of the opening of Spring. The usual plan is to cut the shoots as wanted, some in Midwinter, perhaps, others a few weeks later and so on, to furnish a succession of bloom. For Easter use it does not take so long a time to bring the shoots into bloom as it does earlier in the year, because the flower buds are more expanded then; in fact, some of the very earliest of the early ones, such as the Golden Bell, for instance, will flower in two weeks if not cut before some time in March. The following list of trees and shrubs may all be tried; some of them are well known useful sorts, others are not so well known, but as all are of the very early flowering lot, and are pretty when in flower, they should be tried. It may be added that commission and other houses say that it really is no great matter to have these shoots in at Easter or on any holiday, they sell at any time. The trees are: Red Maple, Flowering Apple, Cherry, Plum, Peach, Pear, Willow. The shrubs are: *Amelanchier*, *Amygdalus*, *Caragana*, *Corylus*, *Daphne*, *Dentzia*, *Exochorda*, *Forsythia*, *Lonicera*, *Ribes aureum*, *Spiraea* (Spring varieties), *Staphylea*, *Syringa*, *Pyrus arbutifolia*, *Weigela*. The *Corylus* take in the Hazel nuts, the catkins of which are quite pretty; the *Daphne* in mind is the *Mezerium*, the blossoms of which are so sweet scented. The *Forsythia* is the well known Golden Bell; the *Lonicera* in mind, principally, is the fragrantissima, though the Tartarian group has good ones in it for the purpose. Where command of shoots of the *Jasminum nudiflorum* can be had, and the shoots have flower buds on them, they force well.

Treatment of Shrubs After Forcing

The after treatment of shrubs used for forcing purposes requires some consideration. Lilacs, *Staphyleas*, *Snowballs*, *Spiraeas*, hardy *Hydrangeas*, *Flowering Almonds* and other shrubs are on the list, and, as a rule, it is desirable to have the same plants flower again next season. Every one of these shrubs must make fresh shoots if we are to have flowers from them next Spring, excepting the *Hydrangea*, which may be cut back in Autumn, flowering from the shoots it makes when it pushes afresh in Spring or when forcing starts. The rest of the kinds named must not be thrown aside if to flower again another year, but should be placed in some light, warm place where the growth they have made will continue to progress, remembering that the more growth made the more flowers they will have. Kept where growth is unchecked until safe to place them outdoors, they are then best planted in nursery rows, taking care not to disturb the roots greatly when taking them out of pots. When Autumn comes they must be lifted, heeled in, in a shed or some place where they can be reached a month or two later, then again placed in pots. Some prefer the plan of having two sets of plants, one to rest a year and a half in planted out positions before being again forced. Whether necessary to do this or not depends on what shoots the plants make the Summer first succeeding their planting. If there are a nice lot of young shoots made this is all that is required, and the plants may as well be used again as not without waiting another season for them.

Aucuba Japonica

Aucuba Japonica

Aucubas are well known ornamental shrubs, natives of Japan, and are much prized for planting with other evergreens, where they are hardy. This is especially true of the one of golden spotted foliage, its foliage doing much to relieve the green of the other evergreens surrounding it. This one, the writer presumes, must be a male form, as no berries have ever been observed on it, and *Aucubas* are known to be dioecious plants. The green leaved ones, such as our photograph represents, are female plants, and when fertilized naturally by other plants near them, or artificially, they become full of berries, as our plant is. When in this condition there is much attraction in them. For both Christmas and Easter use they are always welcome, their bright red berries and deep green leaves combining so well together.

The writer has never tried the green leaved ones for hardiness, but the yellow-spotted leaved one, so familiar to all as the old *Aucuba*, is much hardier than is supposed. Some of our works speak of them as enduring 5 or 6 degrees of frost, when in a pit. The old *Aucuba* endures the Winters of Philadelphia, where they get zero weather at times, provided there is some protection from both sun and wind.

When desired for selling in the holiday seasons, it is best to keep them in pots or tubs all the time, setting the plants outdoors in some cool place in Summer, and treating them well to rich food.

There is a good demand springing up in the South for *Aucubas*; and those who may wish to propagate them can do so by making cuttings of the half ripened tops.

Azalea Indica alba

In addition to the beautiful greenhouse *Azaleas*, now so prominent a feature of Easter time, attention may be called to a species which had much to do with them, the *Azalea Indica alba*. This was one of the parents of some of the earlier named kinds in florists' use. Besides its worth on account of its white flowers, it is the more valuable than many because of its being very hardy. It is so hardy that when of good size and well established it is not hurt in zero weather, which, surely, places it well among hardy shrubs. There are a few very large bushes of this *Azalea* growing in gardens in Philadelphia, some of which have been in their positions for years; and one is growing in Laurel Hill Cemetery, in that city, which has been there for 30 years, to the writer's knowledge.

It is, therefore, advisable for anyone having a plant of it in a collection to plant it out permanently when Spring admits of it. Set it in a high position rather than a low one. It ripens its shoots better there, which is a great advantage when hard freezes come later.

Azalea Indica alba

When You Buy Your Aster Seed of James Vick's Sons

You Are Coming Directly to Headquarters

WE believe it is beyond dispute that this concern, which has introduced more new varieties of Asters than any other Seedhouse, and growing each year an acreage of more than double that of any competitor, has done more for the development and dissemination of High Grade Asters than all other American Seedsmen.

Before You Place That Aster Seed Order

look over our **"Aster Book for Florists."** Just notice it doesn't give you the impression that each and every variety is exactly alike in its superiority over all other kinds, but it points out to discriminating Florists what characteristics each variety possesses under certain, not all, conditions. The problem of what to grow this Summer will be made comparatively easy, if you study carefully our **"Aster Book for Florists."** If you have mislaid your copy, or if you failed to get one, just drop us a line saying you are a Florist and we will mail a copy immediately.

Don't delay. Look this matter up at once.

One of these fine days you will need those seeds, and of course you want the best seeds. Get that **"Aster Book for Florists"** at once and become acquainted with all of the leading varieties, not only those introduced by us, but all the leading kinds from whatever sources. Attend to this matter today.

VICK'S MIKADO PINK "ROCHESTER" ★

REDUCED TO 1/2 NATURAL SIZE

*The story of its new name is of more than passing interest. Members of the Rochester Chamber of Commerce, which has recently chosen the Aster as the representative flower of this city, were so pleased with the color, shape and size of Vick's Mikado Pink, that they have selected it as the official flower of Rochester, and have requested that we rename it "Rochester." Therefore, in addition to its former name it now bears the honored name of this city.

During the recent Industrial Exposition reproductions of this Aster have appeared in countless papers, programs and private advertising matter. Thousands of souvenir spoons, watch fobs, and hat pins, carrying a design of this Aster, have been sold by various concerns. The design and coloring of this beautiful flower are an important feature of the mural decorations of the Temple Theatre, just finished, which, by the richness of its appointments, in many respects, surpasses any other playhouse between New York and Chicago. It will also appear in the color schemes and figurative designs of the decorations and furnishings of the handsome new lake steamship, The Rochester.

Naturally we are proud of the various honors which have been bestowed upon this flower, especially in view of our prediction last year that it would spring into popularity surpassing that of any other variety in the last ten years.

JAMES VICK'S SONS, Rochester, New York

Golden Gate Park

This large and beautiful park, of which so little is known in the East, is unique in many of its features, notably for its setting, presenting, as it does, a frontage

The Site of Golden Gate Park, 30 Years Ago

of half a mile to the broad Pacific Ocean; and for the finished problem of park building which it represents: for when this tract, 1040 acres, was taken over by the city of San Francisco, in 1871, it consisted of nothing but a waste of barren sand dunes, the greater portion of which was absolutely bare of vegetation, not a blade of grass to be seen, a waste of drifting sand, changing in contour every day, and reminding one, from a distance, of great snow drifts. On the upper portions the native scrub Oak and wild Lupin grew, but it is safe to say that at least three-fourths of the acreage was a mass of moving sand.

Naturally, the first problem to be worked out was the tying down of the sand to prevent it from drifting, and after many experiments extending over as many years, this was accomplished by means of the Sea Bent Grass—*Ammophila arenaria*—the seeds being imported from France.

The sand shifting having been stopped, the next operation in the work of park building to be undertaken was the planting of the grounds with trees and shrubs. After experiments with a great many of the hardy varieties, including those especially suggested by European foresters, it was found that the only ones to successfully withstand the test of facing the storms and the blasting influence of the sand-laden winds in the more exposed places were the *Pinus maritima*, *Cupressus macrocarpa*, *Pinus insignis*, the Common Blue Gum—*Eucalyptus globulus*—and the Red Gum—*Eucalyptus viminalis*—*Acacia longifolia*, and *Lep-*

tospermum laevigatum, these hardy species forming in time a perfect shelter for the less hardy varieties. They grew fairly well for about ten years, but after that time they seemed to become bark bound and stunted, showing that the trees, after they begin to form heart wood, require a richer soil than that composed of pure sand; it was, therefore, necessary to supply them with a foreign fertilizer. This was done by utilizing the street sweepings from the downtown streets, which were

brought out on electric cars and distributed among the starving young trees. A few months later the trees took a fresh growth and appeared to get new life and vigor, the leaves becoming darker and more richly colored. In addition to the street sweepings, thousands of cubic yards of loam, clay, etc., have been carted into the park each year for the formation and growth of lawns and shrubbery groups.

Perhaps, to a plant lover, one of the most notable

features of Golden Gate Park is the diversity of the plant life exemplified, for here we find

driveway, eighty feet wide, meets the eye, disappearing in groves of *Acacias* and *Eucalyptus*. To the right can be seen the park lodge and executive offices, set off by fine plantings. Here are *Fuchsias*, 35 ft. high, covered with thousands of their gay colored flowers. On the north wall of the lodge are planted *Lapageria*, varieties alba and rosea; on the south side *Clematis* and *Bougainvillea Sanderiana*, vying to outdo each other with their great masses of flowers. After passing on through the

Music Concourse and Band Stand, Golden Gate Park

Acacia groves one comes to the Mexican garden, with its great collection of *Agaves*, *Yuccas* and succulents; here may be seen the Century Plant at perfection, with its great flower spikes towering up to 40 ft. Then, graduating away from this, is the sunken garden with its many beds of gay colored flowers, backed by the park conservatories containing grand specimens of *Palms*, *Cycads* and hothouse plants of every description. Here and there, in sheltered nooks, can be seen plantings of *Tree Ferns*. This class of plants do remarkably well here, especially *Cyathea medullaris* and *Dicksonia antarctica*. So well have they done and do they harmonize with their surroundings that there will be plantings made, this Fall, of something like a thousand stems in one canyon. This, I believe, will be a unique feature in park planting the world over.

Especially noticeable are the water effects in the park, the largest of which is Stow Lake, and which completely surrounds Strawberry Hill, affording abundant room for boating, etc., with its area of over a mile. This lake contains two good-sized islands, and accommodates a large collection of water fowl, which breed on the islands. Tumbling into Stow Lake is a magnificent waterfall, named Huntington Falls, \$25,000 having been donated for its construction by the late Collis P. Huntington. In addition there are the "Chain of Lakes," extending across the park a distance of half a mile, Lloyd Lake, a most charming and beautiful little lake, and Spreckles Lake, devoted to the sport of miniature yachting, and two other good-

Conservatories, Golden Gate Park

growing the Cedar of Lebanon from Mt. Atlas, the Araucarias of Chile, Brazil and Norfolk Island, Magnolia

grandiflora of our Southern States, the Elms of New England, the fragrant feathery *Acacias* of Australia, thickets of Bamboo, masses of *Azaleas*, *Camellias* and *Rhododendrons*, as well as the Yews of England, *Sequoias*, *Cypresses* and *Pines* of California, together with the stately Rubber tree; while hundreds of other varieties of trees and shrubs are to be seen, natives of many climes, all of them apparently happy and healthy in their new home.

Starting at the main entrance, on Stanyan st., a grand sweeping

ing and beautiful little lake, and Spreckles Lake, devoted to the sport of miniature yachting, and two other good-

CHILDS' GLADIOLI

Are Noted the World
Over for Superior
Merit

GLADIOLUS "AMERICA" The peer of all Gladioli. This is conceded to be the most beautiful and valuable variety in the world. Color: Beautiful flesh pink tinged with lavender. A certificate of merit has been awarded wherever exhibited. By far the most vigorous and easily-grown Gladiolus known. Strong and healthy, with luxuriant dark green foliage and a freedom of growth and flowering surpassing all others. It is the florists' variety of today. Per doz. 60c., 100 \$4.00, 1000 \$35.00.

GLADIOLUS "BLANCHE"
A sterling white variety having but faint marks. The flower is very large and while not new we consider it one of the most valuable, and we continue to hear highest words of praise for it. Per doz. \$1.50, 100 \$10.00.

A Grand New White Gladiolus "ALINE"
One of the grandest pure white sorts ever introduced. The flower is pure white and very large, bell-shape, well formed, on a strong spike; extra fine. Per doz. \$3.00, 100 \$20.00.

GLADIOLUS "CARDINAL"
A perfect flower and spike, very large and the brightest, cleanest and most intense cardinal scarlet yet seen. This variety always stands out conspicuous, and is of such sterling merit as to please everybody that loves a scarlet flower. Per doz. \$1.00, 100 \$3.00.

GLADIOLUS "CONTRAST"
Flowers of great substance and a beautiful compact spike of perfect form. Color intense scarlet with a large, distinct pure white center which is neither tinted nor mottled. One of the most striking and beautiful Gladioli ever introduced, always attracting special attention whenever exhibited in a collection at shows. Destined to become one of the most valuable varieties to be obtained. Per doz. \$3.00, 100 \$20.00.

Every One of the Following Gladioli Represents Real Merit

Attraction. Deep dark, rich crimson with a very conspicuous large pure white center and throat. Per 100 \$4.00, 1000 \$30.00.
Blue Jay (Baron Hulot). The finest blue Gladiolus yet seen. It is a rich deep color of indigo shade. Per 100 \$10.00, 1000 \$90.00.
Brenchleyensis. Vermilion scarlet. Per 100 \$1.50, 1000 \$10.00.
Brilliant. Beautiful orange-red with carmine and white throat. Per 100 \$3.00, 1000 \$25.00.
Capt. C. B. Tanner. Brilliant crimson and white freely mottled. Per 100 \$6.00, 1000 \$60.00.
Canary Bird. Fine yellow. Per 100 \$6.00, 1000 \$50.00.
Ceres. Pure white, spotted with purplish rose. Per 100 \$1.50, 1000 \$12.00.
Dr. Hogg. Mauve, suffused with rose; center white. Per 100 \$4.00, 1000 \$30.00.
Emma Thurnaby. White ground; carmine stripes. Per 100 \$3.00, 1000 \$20.00.
Eugene Scribe. Perfect tender rose, blazed carmine-red. Per 100 \$4.00, 1000 \$30.00.
F. L. Oakley. Bright salmon tinged scarlet, with a pure white center. Per 100 \$6.00, 1000 \$50.00.
Geo. Phil Sheridan. Flery red, white line running through each petal. Per 100 \$3.00, 1000 \$26.00.
Glory of Brightwood. Scarlet; with lemon throat. Per 100 \$4.00, 1000 \$30.00.
Isaac Buchanan. Very fine yellow. Per 100 \$4.00, 1000 \$35.00.
I. S. Hendrickson. A beautiful and irregular mottling of white and bright deep pink; in some the pink, and in others the white, predominating. Flowers and spikes very large and fine. Per 100 \$8.00, 1000 \$76.00.
Irene. Color a fine shade of pink, freely flamed bright crimson. Per 100 \$5.00, 1000 \$40.00.
Kate. Blush white, with crimson blotched throat. Per 100 \$4.00, 1000 \$30.00.
Little Blush. Dwarf habit, compact spike of a bluish white. Per 100 \$3.00, 1000 \$25.00.
Klodyke. Light yellow, crimson maroon blotch. Per 100 \$6.00, 1000 \$40.00.

Lamarek (De). Cherry, lightly tinted with orange. Per 100 \$1.50, 1000 \$12.00.
Octoroo. A beautiful salmon-pink; very distinct. Per 100 \$4.00, 1000 \$30.00.
Reine Blanche. Pure white, dark carmine blotch. Per 100 \$3.00, 1000 \$20.00.
Richard Coeur de Lion. Fine spike of large flowers of a bright crimson-red color flamed and edged with garnet. Per 100 \$6.00, 1000 \$40.00.
Shakespeare. White, very slightly suffused with carmine-rose, large rosy blotch. Per 100 \$6.00, 1000 \$60.00.
Scribe. A beautiful, large, wide-open flower and an enormous spike. Color like the fine old Eugene Scribe, tinted white, freely striped carmine. A very attractive sort. Per 100 \$12.00, 1000 \$100.00.
Salem. Fine salmon-pink, maroon blotches. Per 100 \$3.00, 1000 \$25.00.
Superb. Enormous flower and spike, one of the very largest; pink, flaked and striped. Per 100 \$5.00, 1000 \$40.00.
Sulphur King. Beautiful clean, sulphur yellow, finest and clearest of yellow sorts; without any doubt this is the very best yellow variety yet introduced. Per 100 \$15.00, 1000 \$120.00.
Wild Rose. Very bright rose or blush tint, exceedingly delicate and pretty. This variety needs only to be seen to be appreciated and we predict a great future for it. In its particular color it stands alone. Per 100 \$15.00, 1000 \$120.00.

Pink and White Mixture (New)

This is the ideal mixture for the florist who wants something extra fine for particular trade. Some of our best whites and pinks are used, including "America." Per 100 \$3.00, 1000 \$26.00.

Blue Hybrid Seedlings

This mixture is the result of sowing seeds of the best blue shades obtainable from Europe and the variation of colors is beyond description. Per 100 \$5.00, 1000 \$40.00.

Complete catalogue of other varieties of Gladioli, as well as a full line of *Iriza*, *Lilliums* and other Summer-Flowering Bulbs, free on application.

John Lewis Childs, Floral Park, N.Y.

sized sheets of water. All of these are, of course, artificial, but are charmingly natural in their effects, the aim appearing to have been to bring them back as closely as possible to Nature.

The children's quarters have been made quite a feature. There is a large stone main building, where refreshments are served at a minimum cost to women and children, also a large merry-go-round, and goats and donkeys, a charge of two and a-half cents being made for each ride. Swings and slides, sand boxes, etc., are provided free of charge for the little folks, while a good-sized ball ground adjoins, for the use of small boys.

Tennis courts, to the number of twelve, are provided free of charge, and are decidedly popular, being crowded every day to their utmost capacities. There is also a fine bowling green, which is likewise very popular, especially among the "Scots." Every Saturday afternoon may be seen a gathering of the clans.

A large stadium, the finest in the world of its kind, has been constructed in the western portion of the park—completed just prior to the fire of 1906, the first meet being held there July 4, 1906, which was San Francisco's means of celebrating Independence Day, fireworks being prohibited in San Francisco on that day. The stadium is surrounded by a three-quarter mile trotting track, 60 ft. wide, and from it, sloping inward, are grassy slopes 30 ft. wide, which provide accommodation for an unlimited number of spectators. Within this, and about 15 ft. below the trotting track, there is a bicycle track, and inside of this a running track, upon which is provided a 220 yd. straightaway cinder path. The inside of the stadium is covered with grass, providing accommodations for cricket, football, basketball and lacrosse, a quarter-mile cinder path, and, of course, facilities for pole vaulting, jumping, shot putting, etc.

In addition, there is provided a reinforced concrete grandstand for use of the spectators of the trotting races. This will be extended from time to time until the whole track is encircled with one great grandstand, adorned with high towers, and embodying every comfort and decoration known to art. Adjoining this is a fine building containing dressing rooms, lockers, shower-baths, etc., for the runners and players, also a swimming pool for their use.

For the baseball players there has been set aside a fine sheltered valley, laid out in lawns, consisting of 20 acres. Any day, one may sit on the banks and see several fine games of this, the "king" of all American sports, in full action.

breed freely and the numbers of each herd are increasing year by year.

A music stand, the gift of the late Claus Spreckels to the city and costing \$80,000, is a massive stoue structure, and one of the finest of its kind to be seen anywhere. Around it is a seating capacity for 20,000 people, benches being placed among the trees in front of the stand, and at a slightly lower elevation than the surrounding drives, in order to give thorough protection to the listeners. Surrounding the concourse are drives, bicycle paths and walks, vehicles being compelled to keep on the move for safety. Concerts are given every Sunday afternoon during the year.

Adjacent to the music concourse are the museum and a Japanese garden. The latter covers a space of over 6 acres, and in it tea is served, at a minimum cost, by dainty Japanese maidens, in little tea houses scattered among the miniature lakes. The Japanese garden is a gem and a work of art, perfect in every respect and, I am told, as fine as anything of its kind to be seen, even in Japan. In it may be found grand specimens of dwarfed trees, plantings of Azaleas, Camellias, Iris and Peonies; and the fences, bridges and buildings are as fine as can be built by any Japanese artisans.

The Acacias are especially noticeable at any season of the year; one or the other of the twenty-five or more varieties planted here are in bloom the year around, beginning with *Acacia longifolia* in January and ending with *Acacia calamifolia* in the late Fall. Some of these varieties obtain the proportion of great trees in this gorgeous clime. For instance, the Fern-leaved Acacia—*A. mollissima*—will reach a height here of from 60 to 75 ft., with a spread as great. Imagine how effective such a tree must be with its great masses of sulphur-yellow racemes, rivaling in the beauty of its flowers the well-known *Acacia pubescens*. *Dracæna indivisa* grows exceedingly well here, attaining a height of 35 ft., and the specimens are unique in effect when planted in groups. Along the drives and pathways may be noticed great masses of *Abelias*, *Berberis*, *Genistas*, *Cassias*, *Ceanothus*, *Cestrum*, *Choisya*, *Coprosma*, *Daphne*, *Datura*, *Diosma*, *Duranta*, *Ericas*, *Escallomias*, *Eugénias*, *Fabiana*, *Gardenia*, *Habrothamnus*, *Hypericums*, *Laurestinus*, *Leptospermum*, *Melaleuca*, *Metrosideros*, *Myrtus*, *Nandina*, *Nerium*, *Olea*, *Pittosporum*, *Polygala* and *Veronicas*; in fact, everything in the way of hard-wooded plants grows luxuriantly here.

A great problem with which it is necessary to contend continually in the maintenance of this park, is the

In addition to the pumping station, considerable of the water supply is obtained from two large Dutch windmills, erected about 100 yds. from the ocean line at a cost of \$12,000 and \$20,000 each. Both are supplied with heavy sets of pumps, each with a capacity of 15,000 and 75,000 gallons per hour, in a 15 knot breeze. The arms on these mills are each over 100 ft. long, and may be seen for 15 miles out at sea. These windmills, on account of the trade winds which blow continuously here all Summer long, average 6,000,000 gallons of water per week, and force it a distance of 3 miles to one of the lakes, at an elevation of 350 ft.

The park has, for the last twenty-two years, been under the supervision of John McLaren, and all credit is due him for the masterly way in which he has handled this great problem of park construction, under adverse conditions transforming a barren waste of drifting sand to one of the most beautiful parks in the world, a living monument for all time.

M.

An Important Form of *Begonia Incarnata*

Begonia Incarnata—Improved Form

The genus *Begonia* has a large number of species and varieties, and many of them make fine specimen plants. There are just a few kinds handled by commercial plant growers. *Begonia Gloire de Lorraine* is the principal one grown for Christmas. There is no doubt that it is the greatest acquisition that has come to the trade and private gardeners in the last three decades. It has been said, by good authority, that *Begonia Gloire de Lorraine* and *Asparagus Sprengeri* have brought more money to the florists than any two plants that have been introduced in the past twenty-five years. *Begonia Gloire de Lorraine* has some drawbacks; one of the worst is that it drops its flowers badly when it is brought into the dwelling house. There are many still who are not successful in its propagation, and it is rather fussy in its younger stages.

I wish to call the florists' attention to a *Begonia* that is sure to give satisfaction. It is easy to handle, easy to propagate, and I think it will make an excellent Easter trade plant. The *Begonia* I refer to is *Begonia incarnata* (improved form). This *Begonia* was raised by Charles Sander, gardener for Professor Sargent, Brookline, Mass. As far as I know it is a seedling from *Begonia incarnata*. Mr. Sander is a lover of *Begonias* and has many forms and varieties, but I think this form of *B. incarnata* is the best thing he ever raised, although he has many other things which are very promising.

The plant from which the photograph was taken was one of two dozen exhibited by Daniel White, gardener to Winthrop Ames, North Easton, at the Mass. Hort. Soc. Midwinter exhibition. The plant was about one year old, started from a cutting and grown along during the Summer, stopping the shoots occasionally to make it more bushy. A good porous loam with a little well rotted cow manure and leaf mould suits its requirements. A temperature of 50° to 55° in Winter suits it well. It can be brought into flower about Easter. It has a pleasing color of a light pink shade, and I have no doubt that when the plant is better known it will be largely grown by florists.

ROBERT CAMERON.

Superintendent's Lodge, Golden Gate Park

There is also a large collection of animal and bird life here, although no attempt has been made at a menagerie, all of the animals being provided with abundant space. The aviary consists of wire enclosed cages, covering approximately 3 acres, with a walk 20 ft. wide and 12 ft. high down the center. Part of the aviary is enclosed with glass, inside the wire netting, to give protection to the birds during storms and rainy weather. It contains a fine collection of small birds, specimens from all over the world, and they enjoy almost perfect freedom, nesting among the trees and bathing in miniature fountains and rivulets. There are also squirrel cages and pheasant cages, as well as a large cage for eagles, etc. Elks, of which there are about 40 head, have a space of 30 acres in which to roam. Buffalo are accommodated with two paddocks, one of 5 acres and the other of 20 acres, there being about 20 head of these, now almost extinct, animals. In addition there is a large paddock of about 15 acres in which small deer, moose and kangaroos are kept. Bears, eight in all, have large accommodations. All the animals

water supply. In order to appreciate what this means it is necessary to bear in mind the fact that San Francisco is without rain for practically nine months of the year, making it necessary to supply water by artificial means, to sustain the grass and plantings throughout the entire park. During these nine dry months there is a force of sixty men kept busy, watering all the time. A very good idea of the enormity of this item, is presented when it is considered that about 2,000,000 gallons of water are used daily, and this is distributed, from the mains entirely, by means of hose, 15,000 ft. of it being daily in use for this purpose.

The water is supplied by a system of artesian wells, and is raised by means of pumps having a capacity of 1,500,000 gallons per 10 hours. The water is raised to the top of Strawberry Hill, the highest point in the park and having an elevation of 500 ft. above sea level, whence it is distributed to Stow Lake and the various other Lakes, which act as storage tanks, as well as objects of beauty in the landscape.

HIDS ORCHIDS

An Easter Basket of *Deutzia gracilis*

By The Rosary Flower Co., New York.

Transportation of Flowers

A paper read by H. E. Philpott of Winnipeg, Can., at the twelfth annual convention of the Canadian Horticultural Association, in Toronto, Nov. 11, 1909.

The subject upon which I have been asked to read you a paper at this convention is a very important one, and one which embraces so much that I feel it is impossible to dwell long on its several parts.

There are also many theories as to the best way of growing, handling and packing both plants and cut flowers.

However, I will tell you some of my actual experience, both in growing and in receiving through the express companies from wholesale houses, with short and long distances of travel. Having been around with the wholesale growers, both in Canada and the United States, a great deal during the last few years, I feel I can at least say something which may arouse interest and a helpful discussion.

The express companies will also come in for a few remarks from me later on.

Packing Plants for Shipment

First, then we will take up the subject of packing plants for shipment. All will admit that it is a very important one, for no matter how fine and nice the plants are before shipment, if improperly packed, or if they are handled carelessly by the express companies, so that they arrive at their destination in poor condition, dissatisfaction is sure to follow. Therefore we have not only to consider the condition of the plants when shipped, but also the condition of them on arrival at destination.

There are a number of things to be considered in every stage of the proceedings. First see that the plants are in perfect condition for shipping, that is, thoroughly hardened or finished to stand the trip. If to be shipped without pots, the plants should be well rooted through, so that the roots may hold the ball of earth intact. Above all, see that the plants are thoroughly watered before packing.

The plants being in good condition, the question of shipping with or without pots must be decided, and this will depend upon the requirements of the customer, as well as the needs and nature of the plants. Palms and other plants not having fibrous roots to hold the soil, should be shipped in pots, some support being necessary to keep the soil from crumbling. The Neposet or paper pots are excellent for this purpose, being light, not subject to breakage, also packing closer in the crate. Packing wrapper or sacking, firmly tied around, is often used instead of pots, and answers the purpose.

In this connection I might say that plants are usually packed without pots unless specially agreed upon, and in the latter case a small additional charge is generally made, to cover extra expense of crates and packing, as plants in pots require much more room and care; it also adds considerably to the expense of shipping, owing to increased weight.

Preparing Plants for Crating or Boxing

The above conditions being settled satisfactorily, the next step is to prepare the plants for crating or boxing. This will depend to a great extent upon the season of the year and the class of plants. Such plants as table Ferns, Asparagus, small Roses, Chrysanthemums, Geraniums, bedding plants, and plants of like nature, should be knocked out of the pots, a little of the top soil removed, and each plant wrapped in a small piece of paper, with the top open in mild weather, and with larger papers and the top closed in colder weather.

In long distance shipments a little damp moss should be placed around the roots of each plant.

Larger plants, such as Boston Ferns, Aracarias, Ficus, Palms and flowering plants, should first have paper wrapped around the ball of soil, or pot, and then a larger piece of paper, covering the entire plant and coming high enough to prevent the tops from being bruised in transit. In the case of flowering plants, and plants with tender foliage, tissue paper should be used inside the newspaper or other heavier paper, to prevent bruising.

Boxes and Crates

The plants being wrapped and collected, the next thing to be considered is the boxes or crates to be used in packing. Crates as light as possible, consistent with strength and safety, should be selected and well nailed.

Experience has taught us that as a rule plants travel better, arrive in better condition and give more satisfaction when packed upright in light, strong crates, with plenty of ventilation in Summer or in mild weather. In cold weather boxes should be used instead of crates, and should be well lined with paper. In extremely cold weather, sheet wadding also should be used to keep out the cold.

In every instance the plants should be securely cleated, to hold them in place in the crates, should they be accidentally or carelessly tipped over while being handled in transit.

There may be some objections to the packing of plants upright, on the ground of extra expense of packing and transportation, but I believe that in ninety-nine out of every hundred cases the better condition of plants and consequently greater satisfaction, will more than make up for the additional expense.

I would strongly urge that no boxes or crates weigh more than 150 pounds, as they can be handled by the express company much more easily. This would then prevent the danger of their being tilted on end, and in some cases turned upside down.

If, however, it seems desirable to pack small plants of Carnations, Roses, Chrysanthemums, and other stock, lying down, then comparatively small boxes should be selected, and plenty of excelsior used in the bottom and between the layers of plants to prevent heating and bruising of the foliage.

The crates or boxes should always be well cleated over the top, to secure a low freight rate and the special plant rate of twenty per cent. less than regular merchandise rate by express, which is allowed only when plants are well crated or boxed.

Crates or boxes should be plainly marked on top with the name and address of the consignee; also marked, "This side up with care," "Live plants, perishable," "Keep from extreme heat and cold." Also in express shipments there should be a notice calling the attention of the express agent to the classification, and to the fact that the shipment should be billed at 20 per cent. less than regular merchandise rate.

In this paper I have treated the subject in a general way, and taken up points that are of importance to both consignor and consignee. There are, however, special kinds and sizes of plants that require special packing and handling, and they must be treated accordingly, but I cannot enter into details here.

One thing I have always been interested in and have found of great benefit, and that is to watch the various shipments unpacked at the conventions and exhibitions, and profit by adopting their good points and avoiding their mistakes.

This one rule always applies: Pack lightly but securely, with plenty of ventilation in warm weather, and secure from frost in cold weather.

Cut Flowers

Now as to cut flowers. In the first place, I shall dwell mostly on the Carnation, as that is the flower chiefly affecting the Canadian florist. Carnations should be propagated from clean, healthy stock. I prefer stock grown outside during the Summer; these should be properly and carefully handled, to keep them free from disease at all times. After they are put in the houses, which is generally done during the months of July and August, they should not be allowed to come into bloom until the last part of September or the first part of October. This should be done by carefully pinching back any shoots that are showing buds too early. Care must now be taken to have the bloom in the proper stage of development when cut, so that it will arrive at its destination in the best of condition.

Carnations for Shipping

It is not a hard matter to arrive at a decision as to how Carnations should be cut and handled during the early part of the season, or until the middle of Novem-

ber or the first part of December, when the plants have been given practically no feeding at all, but the hardest time of the year to ship Carnations and have them reach their destination in perfect condition, is from Dec. 1 to March 1, and again in the Spring when the weather gets extremely warm and the plants make a quick, soft growth. Therefore we will take into consideration the proper way to handle Carnations through the middle of Winter.

In the first place, the plants should never be given an uneven temperature at night, but the temperature should be kept at 48 to 54 degrees, according to the variety. Feed sparingly, but often, rather than give a heavy feed occasionally. In feeding, use only well-rotted cow manure or pulverized sheep manure, as I prefer these to commercial fertilizers. Keep the plants in a steady growth, but do not cause a soft growth to be made from overfeeding or high temperature, giving as much air as possible during the day. It may be necessary to keep the steam circulating through the pipes to keep up the temperature, so as to allow the ventilation to be open to give the plants as much fresh air as possible, especially on bright, sunny days.

When the bloom reaches the proper stage of development, which is not quite fully developed, it should be cut with a sharp knife between the joints.

As soon as one or two hundreds are cut, they should be immediately taken to the packing shed, where they should be placed in water. Have the stems in from 12 to 18 inches of water, if possible. A cold cellar for storing Carnations, where the temperature is about 45 degrees, is best.

Never crowd too many Carnations into one jar, but give them plenty of room to absorb as much water as possible before shipping.

From three to five hours I consider would be long enough for Carnations to remain in the water before packing them, according to the distance they would have to travel. In cases where they are shipped 1000 miles, requiring 40 hours to make the trip, flowers would be best in water from four to six hours before shipping.

Use strong wooden boxes for packing them in, lined with paper inside.

Now as to packing. There are a variety of ways, some packing flat with wet paper over each layer of stems, others in bunches of twenty-five with a piece of ice laid on paper on the stems; others, again, with no wet paper or ice. I have unpacked thousands of each, and noted results of each way.

I prefer them laid flat with the stems in the center of the box, and wet paper across each layer until the box is full. By wet paper, I do not mean a piece of paper simply put in water and taken out again, but one that is soaked through and through.

Then place two cleats across the stems and nail them down securely, so they cannot shift. The box is now ready for the lid. I prefer the box covered with paper, thus making it as air-tight as possible.

The Carnation is the same as everything else: it will only stand so much mistreatment, and the nearer you can keep it to Nature the better results we shall have; the better we grow the Carnation the more popular it will become and the sooner it will pave the way to be one of our national flowers.

Roses, Sweet Peas and Violets

I do not propose to say much about the care of Roses, the cutting and packing being practically the same as for Carnations, except that in long distances a piece of ice is preferred.

As regards the packing of Sweet Peas, as soon as they are cut, place them in water for two or three hours in a cold room, at about 50 degrees; then pack them with wax paper and no ice. Place a sheet of wax paper between every row of bunches. Use flat boxes and only one layer in each box. Sweet Peas handled in this way can be shipped 1000 miles and more with good results.

In warm weather keep them as dry as possible and if they get soft in transit it will not hurt them if they are put in water, and placed in an ice-box as soon as unpacked.

The same also will apply to Violets, with the addition of wet paper around the stems.

Improvement in Express Service

I feel I cannot close this paper without reference to the necessity for better equipment for transit, and perhaps more care in handling while en route.

Express cars are not properly equipped for handling flowers, especially those on through trains, such as "Toronto and Winnipeg." In the first place, cars are loaded full and it is necessary for messengers to shift flowers from one part of the car to another, when sorting express matter for the many routes throughout the west. It is impossible to maintain one temperature, or nearly so, as required for safety in handling these shipments during cold weather, unless properly protected.

The only way flowers can be handled with satisfaction under such circumstances would be when special compartments are built for them in through cars, about six feet from the side door, in the fore part of the car (this need not be a fixture), and when placed in this compartment they could be kept at almost one temperature and not subjected to draft as at present, while messengers are working local stations.

DECORATION DAY ROSES

The right time to buy Roses is when they are fresh and well ripened. Roses potted up in the Winter be-
come better established and force better, and are more satisfactory in every way, and you can retard or force
them at your leisure.

Rose, Frau Karl Druschki

Baby Rambler Roses

BABY DOROTHY. The same in habit as Baby Rambler,
but the color of the flowers is similar to Dorothy
Perkins. It makes an excellent pot plant for forcing.
Price for strong, field-grown plants, 85c. for 5, \$16.00
per 100.

CATHERINE SEIMETH. A White Baby Rambler Rose,
larger and better flowers than the type. White with
yellowish center. 85c. for 5, \$15.00 per 100.

MRS. WM. H. CUTBUSH. Color intense crimson and
exceptionally free-flowering. 85c. for 5, \$15.00 per 100.

MME. NOBERT LEVAVASSEUR (Baby Rambler).
Strong, field-grown plants, 85c. for 5, \$15.00 per 100.

THE TREE BABY RAMBLER. (Grown as a Stand-
ard.) The popularity of the Baby Rambler has sug-
gested the growing of it as a tree or standard. 40c.
each, \$3.75 for 10, \$35.00 per 100.

BABY DOROTHY. (Grown as a Standard.) For de-
scription, see above. 75c. each, \$6.25 for 10, \$60.00
per 100.

Something New in Roses for Florists Half Standard Baby Ramblers

These are Baby Ramblers, grown on stems or
standards about one and half feet high, and will
be a novelty for your trade you cannot profitably
overlook. They are offered for the first time in
this country in the following varieties:

BABY DOROTHY (Half standard). Deep pink.
60c. each, \$6.00 per doz., \$45.00 per 100.

BABY RAMBLER (Half standard). Crimson.
45c. each, \$4.50 per doz., \$35.00 per 100.

BABY CATHERINE SEIMETH (Half stand-
ard). White. 45c. each, \$4.50 per doz., \$35.00
per 100.

BABY "STARS and STRIPES" (Half stand-
ard). White and red grafted on the same plant;
most attractive. 50c. each, \$5.00 per doz., \$40.00
per 100.

Hardy Hybrid Roses

We offer extra-strong forcing two-
year-old dormant, low-budded stock,
in the following varieties, true to
name:

Price, 75c. for 5 (of one variety),
\$12.00 per 100, \$110.00 per 1,000
(immediate delivery)

Abel Carriere. Crimson.

Alfred Colomb. Carmine-crimson.

Anne de Diesbach. Bright carmine.

Ball of Snow (Boule de Neige). Pure

white.

Baron de Ronstetten. Blackish crim-

son.

Baroness Rothschild. Satiny pink.

Capt. Christy. Flesh color.

Cho. Satin blush.

Duke of Connaught. Rosy crimson.

Duke of Edinburgh. Bright vermil-

ion.

Eugene Verdier. Crimson-violet.

Fisher Holmes. Dark crimson.

Frau Karl Druschki. The finest

white.

Gloire de Margottin. Dazzling red.

Gen. Jacqueminot. Brilliant crimson.

John Hopper. Bright rose.

La France. Pink.

Mme. Charles Wood. Bright carmine.

Margaret Dickson. White, with pale

flesh.

Marshall P. Wilder. Cherry-rose.

Magna Charta. Dark pink.

Mme. Gabriel Luizet. Satiny pink.

Mrs. John Laing. Satiny pink.

Paul Neyron. Dark pink.

Perle des Blancches. White.

Persian Yellow. Yellow.

Prince Camille de Rohan. Dark crim-

son.

Ulrich Brunner. Cherry-red.

For prices see above

Ramblers and Other Climbing Roses

PAUL'S CARMEINE PILLAR. Flowers large and free;
color rosy carmine. Two-year-old, field grown. 85c.
for 5, \$15.00 per 100.

CRIMSON RAMBLER. American Grown. The only
stock for forcing. Large heavy plants, two years
old, mossed and packed in bundles of 10, 3 to 4 feet,
\$1.25 for 10, \$12.00 per 100; 4 to 5 feet, \$1.75 for 10,
\$15.00 per 100; 5 to 6 feet, extra heavy, \$2.25 for 10,
\$20.00 per 100.

DOROTHY PERKINS. Lovely shell-pink color. \$1.25
for 10, \$12.00 per 100.

TAUSENDSCHON. The new Rambler Rose. The name
translated means a "thousand beauties." Color beau-
tiful rose, shading to pink. \$2.25 for 10, \$20.00
per 100.

LADY GAY. A seedling from the popular Crimson
Rambler, which it resembles in habit and general
effect. The flowers are of a delicate cherry-pink
color, which fades to soft white. Strong plants, field-
grown, 4 to 5 feet. \$1.75 for 10, \$15.00 per 100.

Flower of Fairfield The Everblooming Crimson Rambler

This variety is a sport from the beautiful Crimson
Rambler, is similar in color, more brilliant and lasting
than the old favorite. It also possesses the further
advantage over the Crimson Rambler in the fact that
it flowers profusely on the young wood the first year.
Flower of Fairfield is a vigorous grower and free
bloomer. It starts to bloom early in the Spring and
continues until late in the Autumn. It is rightly
termed "perpetual blooming." 40c. each, \$3.50 for 10,
\$30.00 per 100.

Veilchenblau (Violet-Blue)

It has long been the desire of rosarians to secure a
blue Rose. In Veilchenblau we have practically ap-
proached this color. The steel-blue flowers of this
new Rose appear in large clusters, are semi-double,
of medium size and keep in bloom a long time. The showy
yellow stamens contrasting with the blue flower, give
the whole a striking appearance. 60c. each, \$5.75 for
10, \$55.00 per 100.

Rose Raising in Ireland

To any lover of the Rose it must be a most enjoyable experience to pay a visit to Belfast during the Summer, with a chance of inspecting the three great Rose nurseries of Messrs. Alex. Dickson & Sons, Messrs. Hugh Dickson & Sons, and Messrs. S. McGredy & Son. These three nurseries all lie within a few miles of the city of Belfast, and it was my great good fortune to be able to visit them at the end of July last. To see thousands of glorious blooms staged at the great Metropolitan exhibition of the National Rose Society is good; but to see tens of thousands of them growing in their own homes is much better, even though the season has been a bad one and the weather at the time leaves a deal to be desired.

From what I saw and heard I gather that these three firms alone grow about a million Rose plants every year. Where do they all go to? That is the mystery, especially when one remembers that there are also such places as Colchester, Chestnut, Waltham Cross, Hitchin, Oxford, etc., all producing their hundreds of thousands.

Seedling Roses

The majority of the plants that I saw were, of course, specimens of old established varieties. But when I found myself favored by fortune with the opportunity of seeing hundreds—or, rather, thousands—of glorious new seedling Roses as yet unknown to the world, many as yet not even granted the distinction of names, but merely designated by mysterious numbers, then I am afraid that, like silver in the days of Solomon, these old varieties, glorious, as they were, were "nothing accounted of in the days of" my visit. My poor brain was in such a state of bewildered ecstasy with the new gems that I had no time to devote to the older favorites.

Methods Employed

In all up-to-date nurseries the raising of new varieties has now become an intricate science, requiring infinite care and patience in crossing, selecting, proving, and improving the new seedlings; and the greatest care is taken that only the very best of those raised are sent out. It is by attention to these principles that such marked success has been achieved by Messrs. Alex. Dickson & Son during the last twenty years, and by Messrs. Hugh Dickson & Sons and Mr. McGredy more recently. Here one sees nothing of the old haphazard system of collecting seed in the open air, which may have been fertilized by any passing insect with the pollen of any flower in the nursery, though this system may be still employed in countries more favored with sunshine than our own, and at times with astonishingly gratifying results.

In Ulster, all the Rose seed is carefully raised in glass-houses, close tiled against all intruders from the insect world, who might play havoc with the results during the fertilizing period. The plants of the seed parents are grown in pots or in beds in the house, and each flower at the appropriate moment is fertilized by the hand of the hybridizer with the pollen of the Rose desired for the "cross." The fertilized flower is then carefully labelled with the name of the pollen parent. In due time the seed is ripened, harvested, and sown; the seed from each hip is kept separate from others, and through all stages a careful record of its parentage is kept.

Selection of Parents

It is in the selection of parents that a successful hybridizer shows much of his skill; but even with the greatest skill he cannot hope to have more than a very small percentage of successful seedlings. Probably, on the average, out of 100 seedlings raised not more than seven or eight will, after the first flowering, be saved for further trial, and of these probably only one will ever find its way into the trade lists. The selected seedlings are subjected to a prolonged trial before being sent out. I saw many seedlings dating back as far as 1899, still being tried, still without names, and not likely to be issued to the public for several years to come. The reason for this long trial is that sometimes a Rose does not show its true form when first flowered, but by budding year by year from selected stems it may have its habits, constitution, and even form so improved that it can be issued to the public with the faults of its infancy eradicated. As an example of the value of long trial one may quote the case of Frau Karl Druschki. The true story is not quite so romantic as is sometimes supposed, but it is romantic enough. This magnificent Rose, now universally recognized as the finest of all white H.P.'s, in its first year did not flower at all. In its second year it gave a few thin blooms. In its third year it did a little better; but in its fourth year it did so well that it was placed second for the prize for the best Rose of German raising. But in the same year some plants were sent to American growers, to be tested! them. Their verdict was, "Not worth anything"; and when first seen in England the verdict was the same. Yet, in 1907, this previously despised Rose was elected for the Nickerson award as the finest Hybrid Perpetual of recent introduction. One cannot help wondering, with Mr. H. Molyneux, how many champion Roses may not have been lost to the world by the too hasty discarding of unnamed seedlings.

Propagating House of S. J. Reuter & Son, Inc., Westerly, R. I.

The propagating house of S. J. Reuter & Son Co., here shown is claimed by them to be second to none in its adaptability for rooted cuttings. By their arrangement of the benches they are able to treat each batch independently. There are thirty benches running crosswise of the house (each holding 4100 cuttings) which are so constructed as to avoid any danger of fungus. The sides are of cement and the bottom of brick. This arrange-

ment gives them an ideal propagating house where the best of results may be obtained. They are able to regulate the bottom heat for each individual lot and to give each lot its own particular attention. This also affords the opportunity for keeping the different varieties by themselves, thereby avoiding chances for mixing. The stock on these benches can be rooted cool, keeping it in proper condition for shipping.

In the Seed House

On entering a seed house or the first time one is likely to be astonished at the miserably unhealthy appearance of the plants that are to be the parents of future possible champions. The explanation of this would probably be the necessity of keeping the house closely shut up during the fertilization period and the subsequent high temperature required for the ripening of the seeds. Then one will notice that the ripening hips are not at all like those that one occasionally sees in one's garden. They are more like good sized Crab Apples, fairly bulging with fertilized seeds; in some cases even the pips will be seen extruding through the top of the fruit for want of room within to contain them. Then, noticing the enormous number of these ripening hips, and the fact that each is labeled with the name of the pollen parent, one begins slowly to realize that one is up against a big thing, and that the raising of champion Roses is not just a bit of luck, but is the natural result of hard, steady, scientific work.

The Seedling Fields

As I walked through the fields of seedlings and saw there thousands of these unnamed gems, waiting for the selection of their best to be sent out to the world, I realized that whatever was sent out from these nurseries, at any rate, would be exceeding good. And remembering that this same process is going on in other places, in England, Germany, France, America, and elsewhere, I could not help thinking that if not another flower were fertilized for the next ten years there must be enough good things now in the nurseries to keep the Rose world with as many excellent novelties every year as it can possibly assimilate. If the N.R.S. has had trouble in the past in compiling its catalog, what will the difficulty be

in the future? I fear that many an old favorite will have to go to make room for younger and more successful rivals.

Value of Preserving Fragrance Realized

It has been urged, and not without reason, that many of the good new Roses of recent years have been without scent, and in that way behind the older varieties. From my observations at these nurseries, I should confidently say that this charge will not be fairly levelled against these hybridizers in the near future. Without pretending to statistical accuracy, I should say that the majority of the seedlings that I saw were deliciously fragrant. The variety of scent was also wonderful. We have there the strong rich perfume of the dark H.P.; we have various grades of La France scent, often intensified; we have the subtly dainty odor of Augustine Guinoisseau and of the Teas and Noisettes, and the resinous fragrance met with in Leonie Lamesch. But, in addition to these, I noted among the seedlings many varieties of scent that were, to me at least, new in the Rose. There was the fragrance of the Primrose, of the Violet, of the Cowslip, of the ripe Raspberry, of the Apricot, of the Almond, and many others. This was hardly what I expected to find in a Rose garden.

Families Raised

As far as I could see, the whole attention of these three firms has been devoted to the raising of new H.P.'s, H.T.'s and Teas; other families, such as Chinas, Rugosas, Polyantha, Pompons, Multiflora, Scandens, and Wichuraiana, do not appear as yet to have been touched by them, though we have raisers in England who are not neglecting these branches of the Rose family.—A. H. W. in the *Journal of Horticulture*.

House of Carnation Enchantress at Range of Covey & Vansant, Newport News, Va.

DREER SPECIALS IN HARDY PERENNIALS

Japanese Anemone.

ANEMONE JAPONICA. Many thousands of well-established pot plants.
Japonica Alba. Large snowy white. Doz. 85c., 100 \$6.00.
Japonica Rubra. Beautiful rosy red. Doz. 85c., 100 \$6.00.
Elegantissima. Semi-double satiny-rose. Doz. \$1.25, 100 \$8.00.
Prince Henry. Large double, deep pink. Doz. \$1.25, 100 \$8.00.
Queen Charlotte. Very large silvery pink. Doz. 85c., 100 \$6.00.
Rosea Superba. Delicate silvery rose. Doz. 85c., 100 \$6.00.
Whirlwind. Large semi-double, pure white. Doz. 85c., 100 \$6.00.

ACHILLEA, BOULE DE NEIGE. A decided improvement over "The Pearl," with flowers one-half larger; a valuable cut flower. Doz. 2.00, 100 \$15.00.

ANCHUSA ITALICA, DROPMORE VARIETY. (Improved Italian Alkaner). One of the showiest and most useful plants for the mixed border or for planting between shrubbery that we know of; the plant grows from 5 to 6 feet high, producing throughout the season large but graceful spikes of beautiful blue flowers. Doz. \$1.50, 100 \$10.00.

AQUILEGIA. A splendid stock of the popular Columbine. All the leading varieties in strong plants. Doz. 85c., 100 \$6.00.

ARTEMISIA LACTIFLORA. A new plant, an introduction from China, grows 2 to 4 ft. high, with elegant dark green cut foliage and large spikes of graceful, creamy white, Spiraea-like, light and graceful flowers. Strong plants 30c. each, doz. \$3.

HARDY ASTER GRANDIFLORUS. The latest of all to bloom, frequently being in good condition as late as Thanksgiving Day; flowers large, of a dark bluish violet; always attracts attention in our grounds, being the last plant in flower. Strong plants \$2.00 per doz., 100 \$15.00.

ASTILBE ARENDSI, CERES AND SILVER WHITE. These are the result of crossings between Astilbe Davidii, Japonica compacta, Astilbes and Thunbergii. They are of strong, robust habit, growing from 2½ to 3 ft. high, in much branched panicles; the former with light rose colored flowers, the latter with silvery white flowers. Excellent subject for a semi-shaded moist position. Each 50c., doz. \$5.00.

ASTILBE GRANDIS. An introduction from China, growing from 5 to 6 ft. high; the panicles of white flowers range from 2 to 2½ ft. in length. Each 35c., doz. \$3.50.

DELPHINIUM BELLADONNA. The freest flowering of all the Delphiniums and the most valuable of any variety for cutting, its beautiful turquoise-blue flowers appeal to all who see it. Plant these early and you will have a continuous display of bloom from June until freezing weather. We offer an exceptionally fine lot of extra heavy one-year-old plants. Doz. \$2.00, 100 \$15.00, 1000 \$75.00.

DELPHINIUM, DREER'S GOLD MEDAL HYBRIDS. Unquestionably the finest strain of mixed hybrids ever offered, being seedlings of one of the best named collections and containing some wonderful varieties. Strong one-year-old plants. Doz. \$1.25, 100 \$8.00, 1000 \$75.00.

DELPHINIUM FORMOSUM. A splendid strain of this favorite and popular dark blue variety. Doz. 85c., 100 \$6.00, 1000 \$50.00.

GYPSOPHILA PANICULATA FLORE PLENA. We consider this one of the most valuable Summer cut flowers we have, a plant which is destined to become a most important subject for cutting. Strong plants, doz. \$2.00, 100 \$15.00.

HELENIUM RIVERTON GEM AND RIVERTON BEAUTY. Two splendid perennials of our own originating, the former having flowers of old gold color suffused with terra cotta, changing as they mature to a wall flower red; the latter a pure lemon color with a large disc of purplish black. Doz. \$1.50, 100 \$10.00.

HEMEROCALIS AURANTIACA, AURANTIACA MAJOR AND FLORHAM. These are the three handsomest forms of the Day Lily, with very large trumpet-shaped yellow flowers. Doz. \$1.50, 100 \$10.00.

HEUCHERA, FIVE NEW VARIETIES. Fantasia. Sulphur yellow, tinted green; tips of petals bronzy red.

Greide. Bright red, tinted carmine; very vigorous.

Phie de Pen. Bright raspberry-red; very free.

Profusion. Ivory white.

Virginal. Large creamy white.

Each 35c., doz. \$3.50.

NEW IRIS GERMANICA.

King of Iris. A striking novelty, with flowers of perfect form; the standards clear lemon yellow, while the falls, which are very large, are a deep satiny brown, with a broad border of golden yellow. Ea. 50c.

Lohengrin. One of the strongest growers yet introduced, both foliage and flowers being of gigantic size, the flowers being nearly 5 in. deep, with petals 2 in. wide, and of that beautiful pink color peculiar to the Cattleya. Each 75 cents.

Nibelungen. Flowers as large as the preceding; standards olive green suffused with sulphur yellow; falls deep violet purple suffused with creamy white on the edges. Each 75c.

Princess Victoria Louise. Standards pure sulphur yellow; falls rich plum color with cream colored edges. An entirely new and distinct combination of colors. Each 75 cents.

Rhein Nixe. Standards pure white, falls deep violet blue with white margin; will attain a height of 3 ft., with many branched stems. Very free flowering. Each 50 cents.

The collection of 5 varieties for \$2.25.

IRIS INTERREGNA.

(Introductions of Goos & Koenemann)
 An interesting new type of Iris, the result of crossing Iris Germanica with I. Pumila Hybrida, and for which there promises to be a great future. They flower earlier in the season than the German Iris, and while the flowers are of the most approved and perfect form, they also combine large size with the most beautiful and decided clear colors. The foliage is dwarf and healthy, holding its freshness throughout the season; the flower stems, which are about 18 inches high, hold the flowers well above the foliage.

Hafdan. The entire flower is of a pure creamy yellow, of absolutely perfect form.

Helge. Light citron yellow with pearl colored center, a beautiful soft color.

Ingeborg. Both standards and falls are pure white; the flowers are 5 in. deep and have petals 2 in. wide; a grand perfect flower.

Wallhalla. Standards rosy lavender, falls claret red; a most distinct and beautifully formed flower.

Price: Each 50c., doz. \$5.00; the set of 4 varieties for \$1.75.

Gypsophila paniculata fl. pl.

IRIS PUMILA HYBRIDA, THE BRIDE. This is without question the prettiest dwarf white Iris yet introduced. The flowers which are of ideal form, on first opening are of a creamy white color, changing to pure white as they mature. They are produced on stems from 10 to 12 in. high, which appear in great profusion early in May. Each 25c., doz. \$2.50, 100 \$18.00.

TWO HANDSOME NEW LUPINUS

Polyphyllus Moerhous. The most beautiful variety yet introduced; a combination of light and dark shades of pink difficult to describe and without a trace of magenta. Each 35c., doz. \$3.50, 100 \$26.00.

Polyphyllus Roseus. A decided improvement on the old variety, immense spikes of showy rosy pink flowers; a desirable acquisition. Each 20c., doz. \$2.00, 100 \$15.00.

PHLOX DIVARICATA LAPHAMI (Perry's Variety). A wonderfully improved form of the popular Phlox Divaricata, of more robust habit, larger flowers and of a more intense color. Doz. \$1.50, 100 \$10.00.

Lupinus Polyphyllus.

THREE FINE NEW HARDY PHLOX

Selected from a collection of over fifty new varieties of the past two seasons; distinct from all other sorts.

Elizabeth Campbell. Bright salmon-pink with lighter shadings and dark crimson eye; an entirely new and much wanted shade in Phlox.

Frau Anton Buchner. The finest white yet introduced, largest truss as well as individual flower; of dwarf habit.

Rosenberg. Bright reddish violet with blood-red eye; individual flower as large as a silver dollar.

Each 35c., doz. \$4.00; one each of the 3 varieties for \$1.00.

PRIMULA CORTUSOIDES SIEBOLDI. This Japanese Primrose is not so well known as it deserves, it is not only valuable for the hardy border but will also find ready sale as a pot plant for the window. We offer six distinct varieties, varying from the purest white to deepest rose. Doz. \$1.50, 100 \$10.00.

RUDEBECKIA, RAYS OF GOLD. An improved form of the popular Golden Glow with which it is identical, excepting that it has narrower petals and a fuller center, it is really a redefined form of the old variety. Doz. \$1.00, 100 \$7.00.

Anchusa Italica, Dropmore Variety.

PYRETHRUM HYBRIDUM FLORE PLENA. A fine lot of strong plants in 5-in. pots. Double white, pink and crimson. Doz. \$2.50, 100 \$18.00. Choice mixed seedlings, 3-in. pots, doz. \$1.00, 100 \$7.00.

SEDUM SPECTABILIS, BRILLIANT. Originated with us as a sport from the variety atropurpurea, and is by far the richest colored variety yet introduced, being a bright shade of amaranth-red or dark crimson. Strong plants, doz. \$1.50, 100 \$10.00.

STOKESIA CYANEA, BLUE AND WHITE. Strong pot grown plants, 4-in. pots. Doz. 85c., 100 \$6.00.

SWEET WILLIAM, SUTTON'S GIANT WHITE. Immense trusses of large pure white flowers; splendid for cutting; strong 4-in. pots. Doz. 85c., 100 \$6.00.

TRITOMA PEITZERI. A splendid lot of strong plants. Doz. \$1.25, 100 \$8.00, 1000 \$75.00.

Packing Plants for Shipment

The continued growth of the plant industry, and the fact that plants in bloom are becoming more popular each year, has led us to believe that an illustrated article, describing how plants are packed for shipment, would be of interest to our readers, whose business is such that packing must be resorted to.

Fast trains, carrying express packages and boxes, have made it possible for growers to extend their field over an immense range of country, as a visit to some of the larger wholesale plant growers will show. Plants in bloom are now successfully shipped in the coldest of weather, and this through the good use of common sense packing methods, watching the railroad timetables for best connections, and seeing to it that plants are in proper condition before wrapping.

The accompanying illustrations will give a good idea of the methods pursued by one of our prominent Eastern plant growers, which firm has built its reputation on its good packing methods, thereby insuring the safe arrival of plants, which when received are in perfect condition for immediate sale.

The first precaution to be taken before starting to wrap the plants is to be careful to see to it that they have plenty of moisture at the roots. If there is one thing worse than another, it is when a lot of fine plants have arrived at a customer's store dry, and with the blossoms ready to fall off. The first impressions received under such conditions are poor, and have often been

the means of losing future orders.

Azaleas, Hydrangeas, Spiraeas and other water loving plants should be particularly seen to that each plant gets enough water, so that the moisture reaches to bottom of the pot, a teaspoonful of water on the top of soil is of no good, better not any. As the appearances are deceitful, each grower or retailer should look all plants over or have competent help do so, as soon as plants have been picked out for shipment.

Several of the large shippers have every outgoing pot scrubbed clean, and while this entails quite a little labor, the advantage to the store man is apparent, as plants can be handled to greater advantage by all concerned if the pots are free from the green scum which usually gathers on them during the season of plant development.

Our first picture (Fig. 1) shows plant wrapped ready to pack. Lilies should have the buds and flowers secured firmly with tissue paper, in such a manner as to prevent them from bruising each other. All plants should have a stake which at least reaches to the flowers; this saves crushing and also supports the flower stem. After securing the blooms in tissue paper, the entire plant and pot is then wrapped in several thicknesses of newspaper which is tied above the flower, and around the pot, taking care not to catch the flower and bruise it by tying too low or too tight.

Where large shipping orders are handled, boxes are prepared well in advance of time wanted. These average 4 ft. long, 2 ft. wide, 8 ins. deep, and are nailed together quite substantially, an extra cleat being used in each corner of the box to strengthen it.

Fig. 2 shows a box lined ready to receive plants. This is accomplished by having sheets of corrugated paper cut the proper length, one each for the bottom, sides and ends. These are placed in the box in such a manner that no air can get between the sheets, being quite a bit larger than the box so that when in position they overlap each other. Several thicknesses of newspaper are then placed around the inside of the box, leaving enough hanging over the sides to cover the tops of plants when in box. Excelsior is then used. This should be secured by the bale and, a few days before needed, watered a little, shaken apart and placed in a large box or bin until wanted. This operation can be done by boys, and it will be found of service to have a stock on hand ready for immediate use.

Place some excelsior (sometimes called sanerkrant) in the box already lined, have a good wad of it tight to

end of box, and pack in your first row of plants, all of which, of course, have been previously wrapped. More excelsior and more plants, and so on until box is filled, making sure that each pot is packed solid before putting in the next, with sufficient excelsior between each to keep them from jarring against each other. If there are not plants enough to fill the box, pack the intervening space with the packing material solidly and, as it is light, an extra handful used in the right place has often saved the whole crate of plants from breakage.

Fig. 3 shows the plants already tied, after several handfuls of excelsior had been packed between the tops of plants, which prevents them from knocking against each other, or from getting broken by any sudden jarring the crate may be subjected to. The top of plants is secured by a covering of several thicknesses of newspaper, over which is placed another sheet of corrugated paper, which is overlapping the sheets used to line the

Fig. 1—Plant Packed Ready for Crating

Fig. 3—Assembling the Plants in Crate

box. The crate is then ready for cleating; this is done with cleating lumber secured from the lumber yards, 12 to 16 feet long, 4 inches wide and ½ inch thick, cut up into varying lengths, usually 3, 4 and 5 ft. long, and which can be suited to the height of plants to be shipped.

Fig. 2—Box Lined Ready to Receive Plants

All should be nailed securely together as shown in Fig. 4, and after the label (with correct address written in large letters and in ink) has been tacked on in a conspicuous place the finished article is ready for its journey.

It is seldom that plants are stood pot on pot, as it has been shown in many instances that this method is ruinous because the plants cannot be secured from the jostling which they receive after leaving the shipper's hands. Above all, remember when shipping, that a day ahead is better than a day too late, especially when the express companies are so rushed during the holiday season.

A. H. S.

Novelties from Rivoire & Son, Lyons, France

We note the following novelties for 1910 from the special catalog of Rivoire & Son:

Dwarf Geranium "PETITE AIMEE" (Little Love), a sport from Geranium "Petit Henri" (Little Henry), the popular French dwarf Geranium for borders and small baskets. Little Love is of the same habit as the parent plant, both as to height and in the size of its flowers. The latter differ merely in color, which is a delicate pink. Instead of bright pink, and each petal is rimmed with white.

Red Begonia GLOIRE DE CHATELAINE, is a variety of the pink Gloire de Chatelaine, introduced by Rivoire & Son some time ago, and which they claim to be the most popular of the many Begonias originated within recent years. The novelty they now offer is different merely in color, while preserving all the good qualities of the parent plant.

Variegated Lantana "Arlequin" (Harlequin) is particularly ornamental because of its fine foliage, in which the yellow striations are prominent. The color of the flowers is a very delicate flesh pink with a few yellow florets in the center of the cluster.

The Trailing Double red Nasturtium "Fou Follet" (Will-o'-the-Wisp) should prove a welcome acquisition for trellises, balconies, terraces, etc., because of the rarity of double Nasturtiums.

Fig. 4—Crate is Now Ready for Shipment

ORCHIDS ORCHIDS

Of all kinds, and for all purposes. The following freshly imported Orchids have arrived in good condition: Cattleya Warnerii and C. Labiata.

Cactus Aster Celestine

Cactus Aster Celestine.

—The flowers of this novelty are larger, and petals narrower and more twisted than in the carmine rose Cactus Aster of Benary introduction last year. The color is pure soft lilac, admirable for bouquet work.

Some of the 1910 Novelties of Ernst Benary, Erfurt, Germany

Carnation Blooms with Foliage

On page 170 of the EXCHANGE Mr. W. T. Bell remarks that the appearance of Carnation flowers would be improved if foliage were combined with them. This thought occurs: would it pay to grow Carnations specially for foliage?

The strong growing seedlings, such as we term "Jacks," might possibly pay this way if an odd house could be given over to them. As previously stated, the Jack Carnation is always a sore point with us, because some person or persons grow them specially for hawkers (peddlers), who foist them upon unsuspecting buyers as choice named border sorts, fancy names of course being attached to them. Only a week or so ago, some parties were prowling around Kent with these Jacks, the plan of selling being particularly bold. The hawkers, after ascertaining certain householders' names, were calling at residences, when the heads were at business, with the information that the gentleman (giving name) had ordered so many plants, which were to be paid for on delivery. In many cases the unsuspecting lady would pay the amount, only to find afterwards that the husband had given no such order. These Jacks are invariably red singles.

Seed Selling "Claptrap"

I was particularly pleased to observe that the seedsman's disclaimer case was upheld, as reported recently, for no honest seedsman can safely warrant his seed beyond the point of replacing the same free of cost if it fails from any cause whatever. There are, however, a few who talk in a big way over here, but the average buyer will, I think, set down such talk as mere claptrap.

The weather conditions and cultural skill will always influence a crop one way or the other, therefore one can only express astonishment to find people in business advertising that "it is impossible to find customers who have been dissatisfied after using So & So's seed," and that "It is impossible to meet anyone who would purchase elsewhere after being introduced to such seeds."

When one considers the natural aptitude for grumbling of some folk, and also that the seed in question is identical to that sold by scores of other firms, as I know it is, it can only be assumed that sheer claptrap claims, with no bona fide backing, are being made, for the object of catching custom.

T. A. W. (England).

The Skinner System of Irrigation

Dr. R. Schiffman's famous grounds at Pasadena, Cal., of which we have been privileged to show several views in the past are fully equipped with the Skinner Sprinkling System, a valuable adjunct in that climate. By turning a swivel the force of the stream can be regulated by the valve. The view shown here is taken along the border of the grounds, which is planted with shrubs of different varieties, mostly evergreen, and demonstrates the adaptability of the system to the work required.

Pitcher & Manda Employees Assoc.

The much talked of organization of
the old employees of the former firm of
Pitcher & Manda was effected at the
convention of the American Rose So-
ciety, held in New York, March 16.
The Association is formed for the pur-
pose of holding an annual reunion, and
a committee was appointed to arrange
for the first meeting, which is to be held
sometime in June. The committee is
composed of A. J. Coan, A. Nelson and
H. A. Bunyard. The officers elected
were Charles Russel, president; Fred
Atkins, vice-president; A. T. Boddington,
treasurer; Chas. W. Merkel, secretary.

Newport, R. I.

Mr. James S. Cowles who, with his
wife and son have been spending the
Winter in England, has returned.

Henry M. Wilson of the Middletown
Nurseries is quite ill at his home, the
result primarily of a severe cold.

Prof. A. E. Stene, State nursery in-
spector, is to lecture this Saturday even-
ing before the Newport Natural His-
tory Society on some of the insect pests
affecting shade trees. The members of
the Horticultural Society are invited
and, as the subject is important and
Mr. Stene is an interesting speaker, there
is likely to be a large attendance.

For St. Patrick's Day great green
preparations were made with green Car-
nations and Shamrocks in galore.

One enterprising fish dealer headed
out a Shamrock plant free to every
patron making a purchase in the early
part of the week.

The prospects for a good season in the
Cottage Colony is of the best, that is
judging by the number of places already
rented, and in the trade a banner year is
confidently expected.

In the case of nursery stock the sup-
ply of large specimens of evergreens is
not expected to be equal to the demand.
Travelers in town, representing Hol-
land bulb firms, report the best trade
ever.

SOUTHBIDGE, MASS.—George C.
Butler has resigned his position as head
gardener for Hon. W. A. L. Bazeley,
Uxbridge, Mass., and has accepted a
position as superintendent of the Messrs.
Wells' estate in Southbridge, Mass.

An Easter Window Decoration

Arrangement to Show a Portion of a Store Interior

First see that the window is thoroughly cleaned, as many a pretty window has been spoiled through the glass being dirty. Then cover the entire top with long symmetrical sprays of Southern Smilax, hanging them perpendicularly from the ceiling, allowing some of the sprays to hang as low as four feet from the top, while others may graduate to about two feet from the ceiling, in order to give an irregular effect.

Now take two Cibotium Ferns, one about 4 ft. to 4½ ft. spread, the other about 3 ft.; use two screw hooks, ½ in. long, and screw one into the ceiling on the wall side, just far enough away from same to permit the hanging of the larger Cibotium, with fronds almost touching the side, and as close to the ceiling as possible, adapting a slanting wire pot hanger for this purpose, which will enable you to take the plant down easily for watering. Screw the other hook on the door side of the ceiling, far enough over from the side to permit the hanging of the 3 ft. Fern, which should be hung the same as the larger one, fronds almost touching the side of the window next the door, and as close to the ceiling as possible.

In case it is impossible to screw the hooks in the ceiling, owing to it being metal work, plaster or some other material which might be damaged by the former method, take a strip of wood 3 ins. wide and 2 ins. thick, paint it the same color as the ceiling and nail it across the top of the rear of the window, fastening it in the casing at either side, and screwing the hooks into this.

A very pretty effect can be obtained by fastening a hanging jardiniere, suspended by brass chains from the center, and about 3 ft. down from the ceiling, filled with tall yellow Juncos, Acacia and Asparagus.

In giving the dimensions of the Ferns, etc., I am calculating on a window 10 ft. high by 8 ft. wide, which I believe is about the average sized store window. In case a window should be larger than this, there may be added another 3 ft. Cibotium Fern in the center. If smaller, reduce the size of the plants to conform with the size of window.

Having finished the top, now cover the entire bottom with green sheet moss, as bright as it is possible to obtain; dampen it well after spreading.

Make a large Easter egg, 3 ft. long, 22 ins. high, 18 ins. wide at its broadest part, in order not to occupy too much floor space, in the following manner. Get a wire-worker to make a wire frame in the shape of an egg, to measure as previously stated, leaving a hole in the top, well over to the heavy end, about a foot in diameter. Cover the frame neatly with white cheese cloth or muslin, sewing it where necessary. Then mix some plaster of Paris and cover the entire egg with the same. Another way would be to cover the muslin with a thick paste made of flour and water, crinkling wax paper on it with the fingers, while the paste is wet.

Place the figure of a rabbit, about 20 ins. high, sitting on the small end of the egg, posing it as driving a dozen little stuffed chicks, as shown in the illustration. The chicks can be bought at any supply store for not more than \$2.50 a dozen, and probably less; while the rabbit can be procured at any novelty store at a trifling cost. Place the egg well in the foreground of the window, with a slight point toward the interior of the store. Put a jardiniere, filled with water, inside the

opening and fill it with specimen stalks of cut Easter Lilies, and sprays of yellow Acacia, tied with a broad, pale blue ribbon 4 ins. wide, leaving long streamers falling to and on the floor.

Now place a 3 ft. Cibotium Fern on a standard plant stand 6 ft. high, directly under the large hanging Cibotium, and tilted at the same angle; next bank around the stand blue Hydrangeas, with a corner of yellow Genista, and an edge of Scottii Ferns placed on a slant so as to hide the pots.

Take a well furnished symmetrical Kentia Palm, about 7 ft. high, clean it thoroughly and place it in the opposite corner of the window, as shown in the illustration. Bank around it with pots of white Lilac bushes, bordered with yellow Genista, Scottii Ferns, or large Maidenhair Ferns.

Now place a jardiniere and pedestal, 3 ft. high, in the center, and as far in the background as space will allow. Fill it with cut Lilies, sprays of Acacia and Asparagus Sprengerii. Next take a 1 yd. piece of broad yellow ribbon, of good quality, 4 ins. wide, and fasten one end behind the Hydrangeas, bring it up to the top of the jardiniere, make four loops about 15 ins. long, tied with a fine rose wire to one of the Lily stalks, and bring the remaining streamer over to the Lilacs, making a bow with a short streamer as shown in the illustration.

A very effective detail may be added by wiring a few glass Orchid tubes on green rose sticks, so that they can be stuck in the pots of the Cibotium Ferns and filled with yellow spray Orcaus, such as Oncidium varicosum Rogersii, which give color and effect to the ceiling arrangement.

Another detail which would undoubtedly prove quite an attraction would be to place a dozen medium length Bride Roses in blue dye over night, (this dye can be obtained at any florists' supply store) then place them well in the foreground of the window, opposite the egg, with a low vase of Gardenias or some other small cut flower on either side of them; being careful not to have anything high in the foreground, or anything that will conflict with the general color scheme of the window, which you will note has a blue and gold, white and green effect. You will also note that in the arrange-

Easter Basket—Azalea Prof. Wolters, Trimmed with Pussy Willow and Ribbon

The Effect of Artificial Light On the Colors of Flowers

TRANSLATED FROM DIE BINDEKUNST

It is a well known fact that artificial light, either lamp, gas or electric, changes color effects materially, and it is of the utmost importance that florists should familiarize themselves with such variations, not only in making up bouquets to be carried by ladies in evening dress, but also in decorating rooms to be used for functions where artificial light is employed. It is not sufficient for the florist to consider the effect of his floral creations in his shop; he must also know beforehand how they will appear in the place and under the conditions designated for them.

The principal factor producing variations of effect is to be found in the different spectral analyses of the kinds of light. All our artificial lights are composed of the same colors as the light of the sun, but these colors are not found in the same proportion in the different artificial lights, hence vary in the spectrum. In the artificial lights there is generally a preponderance of yellow, which causes changes of color as compared with sunlight. The electric arc light has the least effect on colors, only changing the tints somewhat, according as the light is strong or weak; this light is therefore used in stores, studios and shops where it is important to get the true colors at night.

Incandescent gas lights change the colors considerably more, since this light contains a large percentage of yellow rays. By gaslight it is very difficult to recognize the true colors as in very few cases only does it not affect them, and it is interesting to study the differences as seen in the various shades of the same color. Neutral colors grow in general more delicate, and bright colors become much brighter, especially warm colors in which there is yellow, as yellow, orange and red. While bright red does not change at all, except to become more brilliant, cerise is deepened, orange appears a golden yellow, and the latter assumes the hues of cadmium yellow. The different behavior of the different colors is illustrated by canary yellow, which loses its greenish tinge, and chamois, which becomes whitish.

The pink colors, again, each behave differently by gaslight: Bengal pink loses nothing of its brightness, while purplish pink easily seems muddy and insignificant; this is due to the fact that this color has a great affinity for yellow rays. And, similarly, all shades of grey lose their attractiveness, being, at its were, swallowed up by the light, with the single exception of silver grey, which as-

Retail florists are invited to send us items of trade interest for publication on this page; clear photographs of good designs will also be appreciated. These latter should always be packed carefully between boards.

An Easter Window Decoration

ment of this window there is not much material used other than what any florist would have in stock at this time of the year.

JAS. MEIKLEJOHN.

PLEASE NOTICE THAT

Items of interest to the Retail Trade are not confined to this page but will be found throughout the entire paper.

Florists in good standing throughout the country can avail themselves of the advertisers' offers in this Department and accept, without hesitation, orders from their local customers, transmit same to an advertiser in these columns, and thus avail themselves of the opportunities for extension of trade which are open to all. Let your customers know you fill orders by telegraph to any part of the country.

DIRECTORY OF RELIABLE RETAIL HOUSES

The retail firms advertising under this heading are all considered by the publishers of The Florists' Exchange as being responsible, and will accept and fill orders for Flowers, Plants and Floral Designs for Steamer Orders, departing Trains, or any given point within their reach, forwarded them by mail, telegraph or telephone, in the respective districts to which their trade extends, the usual commission being allowed. While no guarantee is expressed or implied by this paper as to the satisfactory fulfillment of orders sent to parties whose names appear in this Directory, we will state that only concerns of known good standing will be admitted in this Department. The use of Arnold's Telegraph Code No. 16, a copy of which is placed in the hands of every advertiser, will greatly facilitate this interchange of business.

sumes a pinkish tinge; but this shade is difficult to combine with any but the purest subdued colors.

A very light blue appears grey, and skyblue retains its shimmer, while Forget-me-not blue may become dull and seem greenish. Navy blue appears almost black. Green does not change to any extent, keeping its own hues, but seeming lighter or darker, according to the amount of blue it contains. Yellowish green is especially brilliant by incandescent gaslight. The violet colors are absolutely inconstant by gaslight; in part they change entirely, assuming brown or even black tints, and some become dull and wholly ineffective. Violet red only retains its lustre, but seems more reddish.

Incandescent electric light is the most powerful of all in changing the colors. With its very large percentage of yellow and orange rays it may lead us entirely astray in judging colors. No absolute laws can be laid down here, but it may be said, in general, that the red colors become warmer, more fiery and more yellow; orange becomes more brilliant, taking on a strong tinge of yellow; yellow becomes lighter and loses in intensity; green becomes yellowish; the blue colors seem more reddish and in part more greenish, and also fade somewhat; violet takes on a reddish tinge. In mixed colors the probabilities of change are still greater, depending on the fundamental colors they contain.

Finally, the translucency of leaves and of the differ-

All advertisers in this column are provided with Arnold's Florists' Telegraph Code No. 16.

ent flowers must be taken into consideration. This is exemplified by the fact that, if some Spring morning we stand facing the sun and look at it through the young foliage of a tree, the leaves will appear as a bright, transparent green, which seems almost like a brilliant cadmium yellow; but if we look at the same tree with the sun at our back, the color of the leaves will be an opaque emerald green. It is this quality of translucency which makes flowers appear so charming to the eye on festive occasions in brilliantly lighted rooms. And it is eminently worth the time of the florist engaged in decorative work, to study the changes wrought by the different kinds of artificial light with which he has to deal.

[At a recent exhibition of electrical lighting eight wide bands of silk dress goods stuff, consisting of eight entirely separate colors were revolved in a sub-divided compartment, lighted by ten differing electric lights, but all of them representative types of the lights in actual commercial use. Each light was shut off from its neighbor by means of light proof partitions, and the spectator looked through square apertures. The appearance of the silks under the different light effects was startling in the extremes of contrasts given out. One light, however, appeared to give the actual color effect, such as would be seen under sunlight, and this was the Tungsten, a film which is rapidly coming into favor.—Ed.]

Providence, R. I.

Wm. Appleton, who has been located at 294 Broadway for the past 25 years, has some 2500 sq. ft. which he uses as display room for his retail trade. Very little stock has been grown here for several years. The principal trade is in funeral work and some good business is also handled in the seed line and landscape jobbing.

The Westminster greenhouses are now run by E. C. Scott, who spent several years with Frank J. Sullivan, the former owner. One house is arranged as an aquarium and fern house and the goldfish trade is a leading feature of this establishment. Considerable stock is grown here in nearly 10,000 sq. ft. Large quantities of Azaleas and bulbous stock are forced.

Thomas Curley has some 10,000 sq. ft. of glass, part of which was recently erected and is somewhat of a novelty in its unique design of fancy carved woodwork and paneled effect. This was formerly a private greenhouse of octagon shape and the effect now produced is that of a number of church windows with the arches and ornaments. Mr. Curley commands a good trade in landscape work. For a number of years, he has had all the work at the Normal School and the State House grounds.

P. K. Sweeney, 560 Broadway, is one of the oldest florists of this town, hav-

STRATTON'S GREENHOUSE, C. D. Stratton, Prop.

Lancaster, Wis., Feb. 28, 1910.

Aphine Mfg. Co., Madison, N. J.

Gentlemen:—

The "Aphine" purchased through your agents, of Chicago, is certainly O. K. I have had universal success with it both as a spray and as a dip. Have dipped plants in full bloom, such as primulas, cinerarias, roses, etc., with no apparent ill effects on the plants or blooms, but with death to the bugs.

Would like to ask if you would consider it safe to use on edible vegetables such as cabbage, cauliflower, lettuce, etc.?

There ought to be a large sale of "Aphine" when the people become acquainted with it and can be sure of obtaining the results claimed.

Yours very truly,

C. D. STRATTON.

See Pages 509 and 513 for other Aphine endorsements.

Please mention the Exchange when writing.

AN UNUSUAL OPPORTUNITY FOR A LIVE FLORIST

The subscriber offers for sale his fully equipped Florist Store and Business, very nicely situated in the theatre district of a thriving city in the State of New York; a city with a population of over 75,000. My trade is thoroughly established and the best in the city. This business will net a live man from \$50.00 to \$100.00 per week. I will sell most reasonably, as I have other business needing my whole time. My store is in every way up-to-date and fully equipped, containing two very large ice boxes, safe and cash register (cash register cost \$532.00). The windows are tiled, and everything is finished in white. A good live party can easily get back the price I am asking for this business in a very short time. This is not a run-down place. Address, F. A., care The Florists' Exchange.

Please mention the Exchange when writing.

ing been in this neighborhood for 23 years. He was formerly a grower, but is now doing a retail business.

M. Sweeney of Broad and Pine sts. has been here since 1873 and his location opposite Grace Church cemetery secures some excellent funeral work.

Eugene McCarron has a nicely finished store and some 4000 ft. of glass at 398 Hope st. The glass is devoted to the varieties necessary to a retail place and to propagating of nursery stock to supply part of the needs of his growing landscape work. Mr. McCarron has several somewhat originally designed frames made up and one of them—a of a standing diamond shape—is becoming very popular.

F. O'Connor has some 150,000 sq. ft. devoted to growing part of the stock used in his store on Westminster st. This range is one of the largest in the country devoted entirely to retail trade. Mr. O'Connor has been located here for 50 years and built one large house last Fall for growing Ferns, Mignonette and Cyclamen.

Geo. Johnson of 521 Elmwood ave. celebrated his 81st birthday on Feb. 5. Practically all his life has been spent as a grower—40 years as private gardener. Since 1883 he has conducted the Elmwood Nurseries, Elmwood ave.

Wm. E. Chapell, 333 Branch ave., has some 6000 sq. ft. of glass devoted to

ture in the State of Maryland. The banquet committee consisted of James Boone and F. O. Bauer.

The Market

The trade realizes that there is a glut of cut flowers now on the market, and the only thing to do is to stand the strain. Stock being overabundant is sold at little profit. I am told the cut stock is decreasing somewhat, and the prospects are encouraging for Easter. There are some complaints as to the Easter Lilies, and it is feared stock will be plentiful, in fact nearly all bulbous stock will come in all right. Some of the retailers are beginning to look up Easter stock, in readiness for the usual rush. Carnations are selling at all kinds of prices, and the street fakirs have them by the thousands. Roses are coming in heavier. Southern Jonquils are a glut, selling at 5c. a dozen. Bulbous stock is coming in large quantities. Callas, from indications, will be in well for Easter as well as Sweet Peas. Pot plants are in about the usual supply, and a little slow in moving. Greens are scarce and some are shipped from out of town here. Violets are still plentiful and find ready sale.

Different reports concerning the retail trade conditions are received. Some of the retailers claim business is excellent, while others are finding it slow. The Lenten season helps to decrease business somewhat and the abundance of cut flowers on the streets takes many an order from the stores. One of our retailers had a customer call the other day for Carnations, and his price was 50c. a dozen, made up in the usual way; the customer was somewhat surprised and politely told him she could buy them on the street for 12c. a dozen, and an order was lost.

GRAND RAPIDS, MICH.—Wencesl Chskerski, former superintendent of city parks, is completing his new greenhouses at West Fulton st. and Valley ave. and will have an opening on Easter.

KNOXVILLE, TENN.—A disastrous fire, thought to have been of incendiary origin, destroyed the grafting house of the Knoxville Nursery Co., nine miles west of this city, at midnight, Mar. 7, with a loss estimated at \$35,000, only partially covered by insurance. As a result of the fire, fifty men will be thrown out of employment. The plant will be rebuilt at once.

CINCINNATI, O.—On December 6, 1908, there was a break in the water mains on Madison road, near Oakley, and the water was shut off at a point which affected the supply to George & Allen's greenhouses. The result was that no water could be secured for the boilers and the heating plant was ineffective. The weather was cold and flowers and plants for the Christmas trade were frozen. George & Allen sued the city, asking for \$5,695.57 damages. The case was tried before Judge Cushing and a jury, and a verdict was returned last week awarding the complainants \$1,065 damages.

A Matter of Mind

HENRY.—"James, can you, an intelligent youth, tell me the difference between a gardener, a billiard-marker, a gentleman, and a verger?"

JAMES.—"I cannot, Henry; all men are liars—is there any difference?"

HENRY.—"You shock me. Certainly there is a difference. A gardener minds his peas, a billiard-marker minds his cues, a gentleman minds his p's and q's, and a verger minds his keys and pews."

St. Louis

H. Dichman of Kirkwood is building two new greenhouses 25x200. Mr. Dichman is a new man and will grow Carnations, Sweet Peas and Violets for this market.

Ostertag Bros. had a great many floral decorations to make last week in the Coliseum for the different exhibitors at the big Household exhibition which took place there.

Miss Tillie Meinhardt had charge of the big floral booth in the Coliseum for the Household exhibition last week; she says cut flowers sold well.

A. G. Fehr of Belleville, in company with his wife, spent last Friday in the city buying supplies; Mr. Fehr reports a good trade.

Henry Lorenze, proprietor of the Park Floral Co., is back attending to business

after a spell of sickness lasting several weeks.

There was quite a large attendance at the lectures on farming given by Prof. W. H. Chandler and Dr. J. C. Whitten at the Y. M. C. A. rooms on Grand ave.; the lectures were on truck gardening and orcharding and free to the public.

L. N. Van Hook of Ferguson, Mo., died last week; he was a grower of Carnations and Violets. The florist business was a side line for him as he was secretary and treasurer of the St. Louis Cotton Exchange. Mr. Van Hook was a member of the Florists' Club and leaves a wife, son and daughter; also a host of friends in the trade to mourn his loss.

The Tingley Seed Co. are now located next door to the St. Louis Seed Co. at 4th and Lucas ave. Both firms say they have been very busy all of last week. The St. Louis Seed Co. have an extra force working.

Elberon (N. J.) Hort. Society

The Elberon Horticultural Society held a regular meeting March 7, President Peter Murray was in the chair and there was a good attendance. A. Bauer read a paper on "The Culture of Bulbs," which was very interesting. Quite a discussion took place after the reading. Mr. Bauer also displayed a very fine collection of bulbous plants, which was awarded a cultural certificate. The novelties in the Tulips were much admired; the best ones shown were Queen of the Netherlands, delicate pink; Flamingo, dark pink; Pink Beauty, Tournesol, double yellow; Van Del, a magnificent single white, the best of the lot. The bulbs were supplied by Stumpp & Walter Co. The following points were awarded: Wm. Seymour, White Enchantress, 90; Peter Ewen, Dracena, 90; A. Bauer, Antirrhinum, 90. The next meeting will be Rose night.

ALEX. FLEMING, Rec. Sec.

Firms Who are Building

POMFRET CENTRE, CONN.—Robert Rust is building an addition to his greenhouse.

CONCORD JUNCTION, MASS.—Leonard Cousins will erect a new greenhouse as soon as the weather permits.

GLOVERSVILLE, N. Y.—Thomas Barson contemplates making an addition to his greenhouses on North Ferry st. The addition is to be as large as the present structure.

AURORA, ILL.—The Batavia Greenhouse Co. has announced plans for a big branch establishment to be erected at Garfield ave. and Harrison st., Batavia. The company's business has grown enormously the past year at the small plant located at South Batavia ave. and Main st., and an extensive addition has already been made this Spring to the office building. The new plant is to consist of 50,000 ft. of glass.

THE third edition of our Design Book is now ready to be mailed out to purchasers. It has been thoroughly revised and greatly improved and is easily worth Ten Dollars a copy to any one with a Retail Trade. Sixteen pages have been added, older designs eliminated and many new and beautiful suggestions incorporated.

The Florists' Exchange Design Book

HANDSOMELY PRINTED ON ENAMELED STOCK, AND CONTAINING 80 PAGES,
SIZE 9 x 12 INCHES, WITH STRONG PAPER COVER.

New York

The Wilson-Hoyt Co., of 1 Madison ave., manufacturers of greenhouse cement benches, is more than pleased with the outlook for the coming year. The forms for cement benches, which the company supplies to florists who build their own benches have been much in demand, so much so that several additional sets of forms are being made. Florists having benches recently completed by this firm are S. Lum, Chatham, N. J., four benches 150 x 4 ft.; Hy. Hentz, Madison, N. J., eight benches, 170 ft. long; Godfrey Martin, Arlington, N. J., five benches 96 x 5 1/4 ft.; Chas. Weber, Lynbrook, L. I., 10 benches, each 96 ft. long. Orders for the forms have been received from Canada as well as many points in the western States, and it is the intention of the company to establish branch offices in other large cities, as soon as the required additional forms for benches can be built.

David Mackenzie, the well known grower who has charge of the establishment of the late John Scott at Flatbush, is very pleased with the result of his efforts to secure a goodly number of flowering plants for Easter. His Hydrangeas, Ramblers, Baby Ramblers, Spiraeas, Ferns and other plants all show Mackenzie form. Owing to the short space of time in which to perfect multiflorum and giganteum Lilies from the time of receipts of bulbs till now, the Lily plants have not been so successful this season, which, of course, is not the fault of the grower.

The Growers' Cut Flower Co. of W. 28th st., through the efforts of Manager Coan, has secured the store at 41 West 28th st., and will occupy the same during the rebuilding of the structure wherein the company is now located. Occupancy of the new quarters will not be taken until after Easter.

A. Demeusy of Flatbush, whose place is well known for its cleanliness and system, has had fine success with all his Carnation plants this season. He speaks well of the iron gutters used in the two new houses erected last year, and says it is the only gutter for a florist to use. He contemplates repainting his entire range of houses this Summer and hopes to get through the work in good time, so that he and his family can attend the convention at Rochester, N. Y.

The plants used to decorate the tables at the Yonkers Horticultural Society's dinner, last Thursday were grown from seed secured from Boddington's Seed Store. Cyclamen and Primula were mostly used, and the plants were much admired for their color, size of bloom, and foliage.

John Young, F. R. Pierson and E. Dailledouze left New York on the 20th Century train last Friday, March 11, for Rochester, N. Y., at which place the executive board of the S. A. F. has been in session discussing plans for the coming convention. While there the board was the guest of the Rochester Florists' Club at its second annual banquet given March 14.

Bonnet & Blake of Brooklyn are making a specialty of catering to the wants of out-of-town customers. This firm is daily receiving large quantities of home grown Daffodils, besides Carnations, Violets, Valley and other seasonable stock.

The popularity of G. W. Crawbuck, manager of the Greater New York Florists' Assn., is responsible for the increased sales in every department of the

Association's business. Violets, Roses, Ferns and florists' supplies have received a general boost in the right direction the past few weeks.

G. Messenberg of Lenox road, Brooklyn, has been successful in growing a fine lot of flowering plants, especially Queen Alexandra Marguerites, Genistas, Deutzias, Primulas, Azaleas, etc., all of which are timed about right for Easter.

Moore, Hentz & Nash, in the Coogan Building, are headquarters for the bulbous products of the Hubert Bull Co., Portsmouth, Va. The firm is again handling German Iris from Wm. Bleuthgen, Hudson Heights, N. J. They are extra fine and of purple and lavender colors.

The Growers' Cut Flower Co. will handle many thousand Lily flowers in the next few days, and their stock is A1. Roses, Carnations and Violets are also leading features of the house.

Ford Bros. will have a fine supply of American Beauty Roses and white Violets for Easter, as well as all other seasonable stock.

E. C. Horan is offering to growers choice young stock of American Beauty Roses, cuttings which were taken from clean, healthy stock.

Callas and all kinds of bulbous stock can be secured from Phil Kessler, in the Coogan Building.

Traendly & Schenek are featuring Carnations for their Easter trade. Orchids and other seasonable stock also form part of the firm's offerings.

Kessler Bros., W. 28th st., are prepared to handle an extensive plant business this Easter. They are making a specialty of Bougainvillea plants of many sizes, in full bloom. Hydrangeas, Daisies, small table Ferns and other plants offered by them should prove money-makers to those handling them. An extensive business is done by the firm in loaning Palms to florists and store men for all decorative purposes.

Henshaw & Fenrich will be able to take care of all orders for Violets and Sweet Peas, these articles being specialties with the firm, and handled by them in very large quantities. The increase in shipping orders for these two articles steadily continues.

James McManus says he will have enough white and yellow Daisies, Wallflowers, Orchids, Gardenias, etc., for all corners.

H. E. Froment is offering American Beauty and Tea Roses, Lily of the Valley, Carnations and other seasonable stock in any quantity and of the best quality.

The New York trade was well represented at the banquet of the newly formed Yonkers Horticultural Society, held at the Park Hill Inn, Yonkers on Thursday evening, March 10, a report of which appears elsewhere in this issue. Arthur T. Boddington presided as toastmaster, and his introductions of the different speakers were both clever and witty. H. A. Bunyard made what he termed his "maiden" speech, after an introduction as one who "belonged to about every society on the globe and the Sweet Pea Society." Al and Wm. Rickards, introduced as "Sons of Thespis" lived up to the relationship with some capital songs. The Society already boasts of 80 members and President Benet hopes to extend the membership to 200 within a year.

Visitors on Wednesday were Mr. and Mrs. W. J. Palmer and Mr. and Mrs. W. F. Kasting of Buffalo; Peter Crowe of Utica, N. Y.; Richard Vincent, Jr., White Marsh, Md.

BOSTON, MASS.

Please mention the Exchange when writing.

NEW YORK, March 16.—Conditions in the cut flower market have changed for the better, and a livelier feeling prevails. The demand for all kinds of flowers has increased, and this with the shortening up of supply has enabled better movement of stock in all lines to be made. American Beauty Roses are scarce, and the demand is good; top grade flowers average 60c. Tea Roses of all varieties are moving better, with good demand for white. Short stemmed stock cleans up well daily, although no fancy prices are secured. Carnations have sold well, and efforts to increase the prices on them were partly successful. White was in good demand this week, best quality stock

reaching \$4. This was on account of their being wanted for St. Patrick's Day. Other grades sold at \$1.50 to \$3.

Good Cattleyas are scarce, and realize stop prices. Cattleya Schroederæ seems to be plentiful, and sells at prices ranging from \$2.50 to \$5 per dozen.

Lilies are plentiful. The bulk of stock is being offered at \$6 to \$10 per 100. Many flowers have short stems, a condition which seems to prevail. Callas hold their own, and quality is good. Gardenias are not moving very freely. Violets have been very poor the past few days, so that good prices have been hard to secure, the range of prices is from 20c. to 40c. per 100. Good stock is in demand.

A. L. YOUNG & CO., 54 West 28th Street and Manhattan Flower Market, 46 West 28th Street, NEW YORK

Sweet Peas have improved in quality and large quantities are being received. Varying prices make regular quotations difficult, as the flowers are coming in so many grades. Lily of the Valley is also quite changeable in price, top grade flowers selling for \$3; the majority of sales are made at \$2 to \$2.50 per 100. Asparagus and Smilax move well, and more could be used if shipped in. Bulbous stock of all kinds is moving quite freely.

PHILADELPHIA, March 14.—During the past few days quite a little activity has been noticed in the cut flower market, and better clearances have been possible in all lines although no advance in prices has been made. The outlook for the next few days is brighter, and it is hoped that as soon as strike troubles are settled, business will rapidly gain its normal state.

American Beauty Roses are still quite scarce, and will be for the next two or three weeks; top grade flowers realize 75c. each. Other grades also realize good figures, according to quality. Tea Roses are plentiful, and white seem to clear up more quickly than pink, while best Richmond realize from 18c. to 25c.; the latter, of course, are used in place of Am. Beauty, but good quality flowers only bring the top price. Special white Roses are held at 10c. to 15c., and a good demand is felt for short stemmed Roses of all colors.

Orchids are heavier in supply than the demand calls for, consequently prices remain about 40c. to 50c. each. Gardenias also are plentiful and sell at from 50c. to \$3 per doz.

Carnations are very plentiful, and a good demand is noticed for white, on account of their being secured for dyeing, for March 17. Prices for general stock are still low, especially for pink, 50c. to \$1.50 per 100 being the rule. White Carnations sold better, in lots, at \$1.50 to \$2, but this was only for fresh stock. Street fakirs handled thousands of Carnations, to the relief of the many ice-boxes, last Saturday, most flowers selling at very low prices.

Lilies have shortened up in supply and it is expected that prices will reach 10c. to 12c. for good flowers at the week end. Many poor flowers are being received which are hard to move. Violets continue in good demand, although the quality is poor; first-class flowers realize 60c. per 100, those of questionable age bringing anywhere from 30c. to 40c. per 100.

Tulips and Daffodils are plentiful and are hard to move, except at bargain prices. Sweet Peas continue to be called for, and good stock is somewhat scarce. Asparagus and Smilax are in very good demand, and much more could be used if obtainable. Smilax at this writing is selling at 20c. and 25c. per string, and of poor quality. Lilac is still in good demand, and is sold at prices ranging from 50c. to \$1 per bunch.

BOSTON, March 15.—There are great quantities of flowers in the market and prices have dropped somewhat, but on the whole the market is not too bad. Carnations are very plentiful and prices are lower, except for whites which are in demand for St. Patrick's Day.

Roses are not as plentiful as Carnations, but there is a decided better supply than there was two weeks ago. American Beauty are in good demand and are still bringing good prices. Killarney, White Killarney, Richmond, My Maryland and Bon Silene, are all holding their own well, taking everything into consideration.

Bulbous material seems to be more plentiful each week, and prices now are very low. English Primroses, Wallflowers, Ixias, and Gladiolus are be-

coming quite plentiful, and the prices are satisfactory. Sweet Peas are in great quantity now and prices are low, except for extra quality. Lily of the Valley is plentiful and moves slowly. Cattleyas still bring good prices, but are not quite as plentiful now. Dendrobiums are abundant and prices good. Adiantum Croueanum is still scarce. Asparagus Sprengeri and plumosus are more plentiful now, and prices are good. Plants in pots seem to be very plentiful and indications are that they will have a large sale at Easter. Shamrocks are in good demand, selling from 3c. to 5c. for small pots. R. C.

CHICAGO, March 15.—Contrary to last week, stock is moving nicely and there is very little surplus in any line. White flowers are still in greater demand than any other, but this is on account of the amount used for dyeing for St. Patrick's Day. Roses have eased up to some extent; the only color that seems to hang at all is pink, of which there are quantities of good stock and the roses are disposed of as soon as displayed. Prices, however, remain about the same as quoted last week.

Carnations have stiffened, in all colors, and prices have advanced half a cent on colored stuff, while white is commanding 3c. and 4c. at the present time. These prices are likely to continue on account of the close proximity of Easter. The prospect for Easter is very encouraging; the amount of shipping orders booked is a guarantee of good business. Lilies are the one article on which it is impossible to give any definite information as to whether there is going to be a sufficient supply for the demand or not. The outlook for plant Lilies is that the plants will be mostly dwarf, as there seems to be very few tall ones available. It is also likely that the cut blooms will all be of short lengths. Callas continue in good form and at present they are not in great supply, due probably to growers holding stock back as much as possible. Lily of the Valley is to be had in good quality, and there is ample quantity. The supply of Tulips has slackened most perceptibly and there are very few to be found on the market at the present writing, although it is stated that the crop coming on for Easter promises to be fine. There are plenty of Daffodils, price ranging from \$1 to \$2 per 100, with some real fancy stock commanding 3c. Sweet Peas are not quite so abundant so move better. Violets still drag, although many are being used up for funeral designs, their cheapness making them desirable for such work.

Orchids are holding their own, although the demand is lighter. These flowers are being held over for the Easter trade for which there are many orders booked.

All miscellaneous stock is looking fine and while not quite so much in demand as the staple varieties of flowers, it is being used extensively for window displays. Green stock is in brisk demand, and all sorts are sought after.

ST. LOUIS, March 14.—The cut flower trade of last week was fairly good among the retailers throughout the city. While we say good, it was by no means rushing, and the bulk of the work was funeral designs. Outside of this, nothing much was going on. The expected glut at the commission houses did not come, and only Violets and Carnations were there more than the commission men could handle. Violets brought from \$1 to \$2 per 100; all of these come from Kirkwood. Carnations, too, were more than could be sold at from \$1.50 to \$2 per 100. Roses run from \$3 to \$8 per 100 and are becoming more plentiful each day. Long American Beauty Roses,

too, are more plentiful than for some time back, at \$4 to \$5 per doz. for long fancy.

In bulbous stock, there are plenty of Von Stern Narzissus, Tulips and Dutch Hyacinths, at \$3 to \$4 per 100; Callas and Harrisii Lilies at \$12.50 to \$15 per 100. Callas are more plentiful than the Lilies. Roman Hyacinths and Paper-white Narcissus sell for \$2 to \$3 per 100. Lily of the Valley at \$3. Sweet Peas sell at 35c. to 50c. per 100. In greens, the market has plenty.

The outlook for Easter is good, as plants at the different large establishments are looking well and the growers say that if this fine weather keeps up for any length of time, everything in season will be plentiful at Easter.

ST. PATRICK.

INDIANAPOLIS, March 14.—A general clearance was effected through last week by means of a liberal supply of funeral work and counter trade which was much improved by bright, warm weather. The price of flowers, because of the heavy increase in bulbous stock, had, if anything, a downward tendency. This will, no doubt, be more than regained in a short time because of the closeness of Easter. Spring plant decorations, while not so profuse as they might be, are plentiful enough, and while this end of the business is certainly not the most profitable there are no complaints heard.

A large number of Roses have been disposed of lately as the quality remains very fine. Bride and Bridesmaid show that they have not lost out entirely in the race, and are selling readily at \$6 to \$8 a 100 for select stock. The Killarneys are bringing \$6 to \$10

as are Richmond. Am. Beauty are received in fine condition at \$5 to \$35. The outlook for the coming holiday is most promising.

St. Patrick's Day calls for little else than green Carnations in this vicinity. The price is \$1 per dozen. Novelties, such as are displayed by Eastern firms, are interesting but hardly profitable in Indianapolis.

Some of the growers are already reporting an off crop in Carnations and the result is easily noted in the markets. Prices for good stock range from \$2.50 to \$4, common grades moving slowly at \$1.50 to \$2.

Spring flowers, as Lilies, Magnolias, single Violets, and Hellebore, receive a steady call from the best class of trade. Sweet Peas are a most staple article in many beautiful colors at 60c. to 75c.

Reports from Easter Lily growers are much more optimistic than those of a month ago. There will probably be more than enough to go around at \$12.50 per 100. This price is current at present, for these, as well as Callas. If quality and beauty count in the flower business the conservatory should, at this time, receive especial attention from flower lovers, as the supply is certainly all that could be requested of nature. Rhododendrons, Azaleas, Spirea, Acacias, Cinerarias and Roses show a magnificent wealth of color, and are indicative of what is in store for Easter.

Tomlinson Hall market enables the growers to rid themselves of much at good prices. The shop men, in particular, have been good customers of late and little of the fancy stock remains for the retail buyers.

Boston

In a recent visit to John McKenzie's greenhouses, North Cambridge, I saw a large house of Azaleas that will be in perfect condition for Easter. His houses of Easter Lilies look very well and most of them will be in good flower for his Easter trade. A house of Carnations carried a splendid crop. While there he was busy packing a large order of Easter plants to be shipped to Florida. He ships heavily to other States outside of Massachusetts, the city of Portland, Me., having some of his best customers.

E. J. Harmon of Portland, Me. was in town this week buying large supplies of Easter plants from many of the Boston growers. His flower store in Portland is as well equipped and as fine a store in all respects as any in New England.

Geo. M. Stumpp of New York was a visitor this week, and visited some of the leading commercial plant growing establishments in this vicinity. He was much pleased with Mr. Roland's place at Nahant, and considered his plants of exceptionally high quality. We think around the Hub that there are very few men in the country that can beat Mr. Roland in plant growing.

Callistemon speciosus, the Australian bottle brush, is spoken of very highly as an attractive Easter plant. Its curiously shaped flower heads are very interesting and well-flowered specimens make an attractive card at this time in any retail florist's window. W. W. Edgar Co. of Waverly is shipping two finely grown and well-flowered specimens to Mr. Harmon, Portland, Me.

Now when the snow is gone and pruning is the principal outdoor work, we can see more easily the damage done to trees and shrubs by the December snowstorm. Shrubs which suffered the most are Lilacs, Honeysuckles and Hawthorns. However, the loss is not as serious as we anticipated it would be.

Some fine specimens of Erica melanthera are to be seen in the retail store windows. This heath is the best and easiest of this genus to grow in our climate. Others which should do well are Erica arborea, E. arcolata with pure white flowers, and E. medel with purple flowers. E. melanthera makes a very satisfactory house plant. If it is put in a cool window or room it will last in blossom for some time. Cut sprays last well and are very satisfactory. The best plants seen around come from Thomas Roland.

There is quite a demand arising for uncommon kinds of plants and flowers among the cultured people of the city, and one florist's window on Park st. contains new kinds of flowers and plants continually. This week the fragrant Osmanthus fragrans was prominent by a good-sized shrub. This is one of the most pleasing fragrant flowers grown and is not overplentiful, probably from the fact that it is very slow growing and takes a long time in rooting from cuttings. Another uncommon plant noted was Cytisus filipes with small white, very fragrant pea-shaped flowers. Nicely flowered specimens of Wistaria and Acacias in variety were seen. In cut flowers we noted the following: Ixias, Dimorphotheca, Anemone coronaria, Schizanthus, Lupines and Rose Mrs. Aaron Ward. The man who helps to make people love flowers and introduces new kinds is a benefactor, therefore we think Henry R. Comley deserves praise for the time and work he is putting into the ornamentation of his windows and trying to introduce new things.

Zinn's retail store on Park st. has the best display of appropriate things for St. Patrick's Day seen so far. In the middle of the window was displayed a calendar and on each side were two Irish clay pipes, or as they call them in the "ould" country "Cutties," decorated with green ribbons, and around these were arranged, artistically, nicely grown small pots of Shamrock (Trifolium minus). The calendar and its ornamentation received much comment and attention.

Large displays of Azaleas, Carnations and Roses, mostly American Beauty, very artistically arranged make Wax Brothers' windows very noticeable this week.

Roses are more plentiful than they have been for some time. The Easter supply is just beginning to come in. Most of the large growers had their crops regulated by stopping, and other means, to come right for Easter, therefore they have been scarce for some weeks past.

Wm. H. Elliott is shipping more Roses this week than he has done for some weeks past. He has a new Rose,

to which he has given the temporary name of Beacon Hill. Its flowers are as large as American Beauty and of a delicate pink color. It's a fine looking Rose with long stems and good glossy foliage. He finds the Rose Mrs. Aaron Ward rather hard to propagate because it is a slow grower. If he can get enough stock propagated, of which he is quite doubtful at the present time, he will plant a house of it for next year.

shipping some nicely grown Shamrocks in small pots. He had some good Sweet Peas which are through flowering, and he is replanting his houses with Cucumbers.

Carnations are very plentiful this week, and not much call for them, except for white, which is bought up quickly, so as to have them on hand for dyeing for St. Patrick's Day.

Norris Comely of Lexington has had the decorations at the large Automobile

Show in Mechanic's Building this week. He had to use many plants which he had to force for this decoration. The decorations were much admired and very artistically done.

John Fee of Jamaica Plain is shipping to the Flower Market, at 1 Park st., some excellent bulbous material. His Tulips, Hyacinths and Narcissus are extra good.

Nurserymen in this vicinity are receiving very large orders for fruit trees this Spring. Apple trees are the most sought after. The large exhibition of New England fruits held at Horticultural Hall last Fall has created a great interest in fruit growing.

Seedsmen report trade as being 100 per cent. better in March this year than last year in the same month. Some of the seed houses are afraid they will run short on tuberous Begonias, the demand is so large for them at the present time.

Hugo Kuehl is now in charge of the seed department of the W. W. Rawson Co.

Chas. Holbrow of Brighton is on the jury, which is rather unfortunate for him at this time, on account of his Easter business.

In Doyle's window we noticed this week two finely-grown and well-flowered specimens of Callistemon speciosus (Metrosideros). For an undergrowth of plants they used under these large specimens Adiantum Farleyense in pots.

Members and friends of the Gardeners and Florists' Club are asked to take cars at Park st. station, Subway, at 1 p.m. on Saturday, March 19 for Waverly field day. W. W. Edgar Co. expect a large crowd and they have everything in fair shape. A better date could not be selected to see this fine establishment.

Private gardeners are digging and preparing the soil for early vegetable crops. Early Peas and other early vegetables are being grown. Sweet Peas can also be grown now in light dry soils.

John K. L. M. Farquhar delivered a lecture before the Houghton Hort. Society of Lynn, last Friday evening, March 11. His subject was "Formal and Informal Gardens." The lecture was beautifully illustrated by stereoscopic pictures. This is an enthusiastic, progressive society, and 250 attended the lecture.

Welch Bros. are shipping large quantities of Lilies, in cases of twenty-five, and they are the best stock seen around Boston.

Robert McGorum of Natick, who has had his flowers sold in the market the past season, has changed, and is now shipping all his Roses to Welch Bros.

George Cruickshank of the R. & J. Farquhar Seed Co. is to lecture before the North Shore Hort. Soc. on Friday, March 18. His subject is "Modern Methods of Cyclamen Culture."

The landscape gardening class of the Gardeners and Florists' Club is doing creditable work this year. At present the young men are kept busy on topographical work.

The lecture at Horticultural Hall on Saturday, March 12, was by E. S. Miller, Wading River, New York. His subject was "Lilies in the Home Garden," and Mr. Miller read a good paper and illustrated his lecture with some of the best lantern slides of Lilies that have ever been seen in this city. There was a large audience, and a good discussion followed the reading of the paper. William N. Craig said that Lilium candidum which is grown and exported from France is by far the best kind to grow; they haven't a single sign of disease, while those from other parts of Europe are a complete failure here. E. H. Wilson, the famous collector of Chinese plants, gave an interesting talk on Lilies. He gave many useful hints on how to grow and treat Chinese Lilies. He said the greatest mistake made in growing them was planting them in peaty soil, as most people did. Out of thirty species of Lilies indigenous to China only one species grew in peaty soil, all the others grew in good loam. The last lecture in the course given by the Mass. Hort. Society will be on March 19. The subject is "The Dietetic Value of Fruit," by Prof. William R. Larnzhy, State University, Columbus, O.

Visitors in town this week were: E. J. Harmon, Portland, Me.; A. W. Dyer, Portland, Me.; Miss Bennett, florist, Portland, Me.; Samuel Parsons, New York, and Mr. Lennie, superintendent of parks, Rochester, N. Y.

John Beaton of the R. & J. Farquhar Seed firm is back to work. He has been very bad with rheumatism, and has been at home for five or six weeks. We are sorry he is quite lame still.

R. C.

Cut Flowers for Easter

We expect a large supply of cut flowers for Easter. No scarcity that we can see, excepting Beauties.

EASTER LILIES

Generally reported scarce. We will have our usual supply and of good quality. \$15.00 per 100.

SWEET PEAS

Always in good demand for Easter. Will have them in all shades. \$1.00 and \$1.50 per 100.

VALLEY

Very choice. \$3.00 and \$4.00 per 100.

TULIPS and DAFFODILS

Double and Single. \$3.00 and \$4.00 per 100.

WHITE and YELLOW DAISIES

\$2.00 per 100.

Our supply of

ROSES and CARNATIONS

will be large and of the usual high standard.

We have the stock as well as the facilities for doing a large holiday business. You can depend on the customary care and attention, which makes our service the best to be had.

monously voted to hold a joint meeting with other horticultural societies, beginning the last Tuesday in January, 1911, and continuing ten days, the idea being to have the first seven days devoted to horticultural institute work, the last three to the annual meetings of the societies. Three other societies were represented by delegates who voted the same way.

H. A. Philpott returned last Friday from his trip to St. Catharines, Canada, where he, as president of the Canadian Horticulture Association, attended a meeting of the executive committee.

J. A. Valentine of Denver spent Thursday in Chicago, leaving on Friday in company with W. W. Rudd and George Asmus of Chicago, and H. B. Dornier of Urbana, Ill., for Rochester, N. Y., to be present at the meeting of the executive committee of the S. A. F. A. Lange has had built by the Studebaker Co. a specially designed automobile to be used for the delivery of flowers, etc. It is Mr. Lange's intention, if this one reaches his expectations, to have two more built after the same model. Mr. Lange's store has been kept busy the past week on funeral work. One special piece was a canoe five feet long filled with yellow roses; it was made for a member of the Rod and Reel Club of the South Side. In the window this week is displayed special novelties for St. Patrick's Day.

Mangel's window, as usual is up to date, St. Patrick's Day novelties figuring largely in the display.

Fleischman's windows are also most attractively arranged with flowering plants and vases of cut flowers.

Friedman has a beautiful showing of miscellaneous flowers in his always artistically arranged window, which cannot help but attract the eyes of the many people who pass on Michigan ave. At Hauswirth's, as usual, one finds many vases filled with contrasting flowers, ready for the tables of the Congress Hotel dining rooms. This display is in evidence every afternoon.

Peter Reinberg states that the outlook at his establishment is promising for a good crop of all sorts of flowers grown for the Easter trade.

Bassett & Washburn are still receiving a good supply of American Beauty roses, although not in as great quantities as last week. The O. P. Bassett Carnation is still on its best behavior and is arriving daily in prime condition.

Winterson's Seed Store has received a carload of Caladiums and Tuberoses. This house is also having a heavy run on American Gladiolus; three carloads of imported nursery stock, including hardy roses, box trees, etc., are reported as on the way to Chicago.

At the store of George Woodward of 4973 Lake ave. the show window last week was blown completely in, during a heavy windstorm, and it was several days before the damage was repaired.

H. Van Teylingen, representing Van Zanten & Co., Hillegom, Holland, arrived in Chicago March 13, and spent several days in calling on his old customers. Mr. Van Teylingen says that the past winter has been the most severe experienced in Holland for many years; never has he seen so much snow. W. Bond, for nearly five years head

EASTER PLANTS

SPIRAEAS, 6-in. pots, 25c. to 50c. each.

LILIES, 10c. a bud.

RHOPODENDRONS, 75c. to \$1.00 a plant.

gardener for Mrs. G. B. Wilson, Philadelphia, Pa., is going to establish himself in business at Naperville, Ill., where he will devote himself to Orchid growing for cut flowers.

Wm. Abrahamson, formerly of Chicago, has gone into bankruptcy in the city of Denver, Colo. Several florists of Chicago are losers.

Geo. Peiser, who has been in charge of Hoerber Brothers' wholesale cut flower department, is no longer in their employ.

Harry Rowe says he had the usual demand for the miniature pots of Shamrock that are a special feature in the plant line for St. Patrick's Day.

Nic Miller says that during his recent trip through Michigan the prospects for Lilies for Easter were not any too good, as far as regards quantity. The outlook is that there will be but very few tall plants available, as Easter is so much earlier this year. The plants have had to be forced too quickly, retarding their growth.

Mr. Grimm of Grimm & Gorley, St. Louis, Mo., spent a few days in town last week, presenting all in the trade with a pocketpiece, a mounted cent, with the inscription "You will never go broke as long as you have us with you."

Mrs. Wm. Romaine of Park Ridge, N. J., daughter of the late John Thorpe, arrived in Chicago on Wednesday, accompanied by Mr. Romaine, en route for California, where they are going to spend three months for the benefit of Mr. Romaine's health. They spent a short time with their sister, Margaret Flint, before proceeding westward.

Visitors: Mr. Schafer, of Schafer Floral Co., La Crosse, Wis.; J. A. Valentine, Denver, Colo.; Mrs. Ella Sullivan, Superior, Wis.; James Aldons, Jr., and wife, Des Moines, Ia.

Paul Beyer, of Beyer Floral Co., South Bend, Ind.; A. M. Augsperger, Peoria, Ill.; Theo. Meyer, Waukegan, Ill.; Ed. Amerpohl, Janesville, Wis.

Bowling

The Florists' Bowling League met as usual Thursday night, March 10, with the following result:

CARNATIONS	vs.	ROSES
728 740 716		GSS 750 738
ORCHIDS	vs.	VIOLETS
767 697 691		GSS 668 776

J. C. Yarnall gained 140 pins over Victor Bergman, making him now high average man.

AZALEAS

We offer a fine lot of Azaleas, shapely specimens, well "headed," double and single flowered, which should make splendid plants for Easter sale.

We offer the well known and popular sorts:

Mme. Van der Cruyssen, Niobe, Deutsche Perle, Mme. C. Van Langenhove, Vervaeneana, Empress of India, Helen Thielman and Simon Mardner.

The Mastin Automatic White-Wash and Spraying Machine is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass. The pump is of brass throughout, simple and powerful. The mixing device keeps the contents of the tank well stirred up from start to finish. When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for fifteen minutes.

All parts are made to gauge, and may be had for repairs. Ask your dealer about our Extension Hose, Extension Rods, and the Mastin White-wash Nozzle for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

LITERAL—"This is a dogwood tree," said the guide. "How can you tell," said the stranger. "By its bark," replied the guide.

The

Week's Work

BY

FRITZ BAHR

The Cyclamen

Don't Neglect Them On Account of the Easter Rush

From now on one will notice, more and more, that there is life in the little seedlings. While some they make but little headway, but that shouldn't discourage the beginner. With Cyclamens one has to have patience, and only by faithful attention and proper care can good results be expected. The foundation is now being laid in the way the little plants are being taken care of, as to what to expect next August and September, when with the approach of cool nights the plants are making their strongest growth. If neglected now the stock will most likely be stunted forever—no culture afterward will be able to make up. I don't know any other plant we grow which is more particular about this. Don't allow moss or weeds to get established in the little pots. Stir up the top of the soil and give the plants a light sunny bench. On the hot days a spraying is what the foliage wants; always maintain a moist atmosphere in the house they are in—a dry one is bad for them. Avoid overpotting, and yet if the small stock is in 2's, and after examining them it is found that there are a number of heavy white roots present, give them a shift even if there are not as many leaves as you would like to see—if the roots are active everything else will come all right.

Carnations

Seasonable Notes on the Old Stock
The good grower will not let up in caring for his plants in the benches any more now than he did before Christmas. The disbudding should go on as regularly as the fungitating. Because Carnations are not bringing a high price in the market is no excuse for not disbudding and yet we have growers who are inclined to think so. Keep on cultivating—the oftener the better—keep the surface of the bench stirred up, let it breathe, let a few rays of the sun get into the soil. It doesn't hurt one bit to remove some of the grassy growth certain varieties make at the base of the plants. New life begins to show in every plant from now on, and encouraging the Carnations by doses of light liquid cow manure or some other fertilizer is of the greatest benefit—if ever fertilizing is necessary it is now. A great change in the size of the flowers will be noticed a couple of weeks after an application of cow manure, on a bench which had but little food during the Winter months. Another good thing is to give a top dressing of well rotted manure and some light, fine soil—all this helps, and surely pays, too. You can't expect to keep on cutting good flowers without proper care, so don't let the rush of other work make you neglect the Carnations—it does not pay. As long as the plants are inside and expected to furnish flowers they are in need of good treatment; otherwise they will soon be worthless.

Seeds

What to Sow at the Present Time
It's a little early yet for the annuals, such as we sell in Spring for the old fashioned flower border. By the way, quite a trade can be worked up in this line. Take, for instance, Asters, Marigolds, Zinnias, Cosmos, Scabiosas and many others, transplanted seedlings of any of these will sell at 25c. to 35c. per dozen in May. In every town quantities of these plants can be disposed of with a little advertising. Let the people know you handle this class of stock and you are bound to sell it; twelve Asters take up but little more room in a cold frame than a 10c. Geranium would on the bench; in fact, if the Geranium is a good plant it will require more room than a dozen of transplanted Aster plants. Compare the prices! You don't sell many Asters, that is true, but every dozen you do sell helps, therefore push this branch. We will later talk about the varieties of annuals best to grow for cut flower purposes—there is plenty of time for most of them yet. However, certain varieties can be sown now, among them Snapdragons—these always take several months before they are fit to be planted out. Get the dwarf sorts, even they grow tall enough. Cosmos Lady Lenox, that grand sort, can be sown now. Grow a few plants on in pots; by pinching them back nice bushy specimens in bloom can be had by the middle of May. Sow now another lot of Verbenas—they will make fine stock for late blooming; also Petunia Howard Star.

Asters
Time to Think About the Early Sorts
We are just about to sow out a few flats with the early Asters. What kind? I give it up. For years, ever since 1891, we had Reine de Hailes, in English Queen of the Market, but there have come out so many new varieties that one hardly knows just what to do. What we are now principally using for those we grow for cut flowers is Hohenzollern, for the best early one. This is a beautiful and large-flowering sort and seems to fill the bill. For the retail grower it is well to sow out in separate colors. Many of us have quite a call for transplanted seedlings, and among them the Asters are much in demand, and separate colors are wanted for this purpose. It is always well with Asters, as well as with any other plant, to give every new variety that comes well recommended a fair trial; but if one would want to attempt this with all of the different varieties we now have in the Asters it would take a good deal of space, and entail an awful lot of bookkeeping. One thing, however, is certain, that while we, only a few years ago, depended entirely on Europe for the seed and the varieties, wonderful changes have taken place. Since a Semple's Branching was introduced and Rochester got busy, some of the grandest of the midseason and late sorts are of American origin and surpass anything that Erfurt has to offer for our climatic conditions and wants. It is too early yet for the sowing out of these sorts, but for the early branching and others a sowing should be made now.

The Pansies
The Plants Over-Wintered Outdoors
It is a good many years since we have had such an ideal Winter for the Pansies and Forget-me-nots which were outdoors. Since the snow has disappeared we find the plants in as good condition, exactly, as they were last Fall. The thing now to do is to keep them so, and for that reason we have been covering the frames with sash every evening, removing them during the day time. When there is frost or hard freezing, such as we can still expect, if it should keep on for several weeks without snow won't do the Pansies any good; they really ought to have a covering of some kind for protection—sash will keep out quite a little of it, and if the freezing should be too severe, place a few shade frames or boards over the sash, and thereby keep the plants dark while in a frozen state. It is also time to put a few sash over

Payne Dripless Center Gutter

THIS gutter is constructed to take care of the water of condensation from the under side of the glass, and also the sweat from the gutter proper. All of which is connected by the drip plate and carried by the condensation gutters to the pipe supporting the gutter, through which it is carried down along with the roof water to the drain. It casts the least amount of shadow, and is an absolutely strong gutter made of steel in 16 foot lengths and supported by malleable iron brackets. These gutters are used in connection with

the frames which are to receive the Pansies which are now in flats inside. The sash will help to dry out the soil somewhat and make it possible, in a few days, to give the soil a turning over. The first week in April the Pansies can be planted out—that is, if weather conditions are at all favorable—but be sure to have the soil in proper condition. Don't do any planting, no matter of what kind, in wet, sticky soil. The plant you use may be ever so common, and even grow in such material, but the soil, if of a heavy nature especially, should never be handled while wet.

Vegetable Plants

A Good Paying Proposition for the Retail Florist

If you conduct a retail business you are bound to have a call for Tomatoes, Egg Plants and Peppers. With some of us this is quite an item; in fact, for more so than to be considered a side line. We sell, each Spring, from 3000 to 4000 Tomatoes in 2½-in. pots; they sell at 50c. per doz. We have tried almost every kind and novelty which came to our notice, and while we find Earliana about as good a one as any for this section of the country—where we hardly ever get any Tomatoes much before the middle of August, and a frost is to be expected about September 10, yet the variety we mostly grow for our Spring trade is dwarf Champion. After all is said in favor of all the others this is still a good one. It makes a splendid little plant in a pot, better looking than any other, is quite as early as a bearer, doesn't need staking in the garden, and produces about as many good Tomatoes as any other sort. The 20th of March is about right to make the first sowing. When large enough transplant into flats and later into 2½'s; and if short on room, place the pots in frames outofdoors later on. It is also time to sow some New York Purple Egg Plant—you cannot get the plants too large for planting out. We try to get them into 3½'s or 4's. You cannot grow a large enough plant in a 2½. Peppers also can be sown now—they won't get too large. If you have call for early Cabbage and Cauliflower, seed of them can also be sown; this can be done either in flats in the greenhouse or in a hotbed.

F. E.—Best Advertising Medium

MY FRENCH GARDEN

A HORTICULTURAL HOWL BY
RICHARD HARBOTTLE

One thing I admire about Lobbins is his cheerfulness in adverse circumstances. Then, he is so practical. He has only one hobby in life—gardening. He knows all about it; at least, he said he did, and I thought he did until I found that he didn't. What he doesn't know about gardening would fill any ordinary book on the subject, especially on French gardening.

When he dropped in and suggested that I should forego the ordinary sowing of vegetable seeds for the amusement of the fowls next door, and try French gardening instead, the idea rather tickled me—until he mentioned the outlay. But he explained that the original sum would easily be covered ten times over by the stuff I should produce. Being forced, and out of season, it would fetch enhanced prices.

"It's the simplest method of gardening under the sun," he said. "The usual way is to grow everything in a bed of fertilizer to get heat, and cover it with glass. But that's getting old-fashioned. The new method of running hot-water pipes under the soil is the idea."

He didn't say whose idea—which, perhaps, was as well. But he gave me a list of the appliances required, and told me to let him know when they arrived. My part was simply to pay expenses. He would put in all the brains and I should take all the profit.

There were to be fifty "cloches" or bell-glasses, and twenty-five "chassis." Having ordered these, I had to persuade a local plumber to get a horticultural bent in his mind, for the purpose of putting the hot water pipes under the soil. It was only necessary, then, to order the seeds for things to be getting well in hand.

The plumber started on the same afternoon, and brought enough piping to reach from St. Paul's to John o' Groat's, put end to end. Having seen this deposited

on one side of the garden I left him digging up the other side.

The next afternoon I met him wandering about the passages of the house and in the cellars. He said somebody had moved the piping he brought. We searched for a couple of hours, and then the old fool found it where he had left it, underneath the earth he had thrown up. While he was excavating I popped round to Lobbin's house to report progress. In my absence a carman arrived with a load of cloches in a cart. He "upended" this in one corner of the garden, and smashed forty-nine out of the fifty.

"Didn't know they were breakable," he said.

"A bit awkward," said Lobbins, unperturbed; "but they're only eighteen-pence each. Better order some more. What about the chassis?"

The chassis came that afternoon. Somehow, my order had strayed into a motor works, and instead of vegetable covers with three lights each, I got the first consignment of frames for fifty motor-cars. That's the worst of these French terms.

Owing to a few profuse leakages in the pipes we were paddling about in hot water half the time. This proved to be rather a nuisance. Every now and again I had to go and bawl my plumber away from his dinner to see to a leakage, and he would have to disintegrate a bed of Cantaloupe Melons to get at the vital spot. He said it was the last time he would ever take on a job of subterranean plumbing.

It was the last time he ever would for me. If that conglomeration of pipework had been intended to flood the district with hot water it would have been a howling success; for that's what it did. Any time of the day you could go down in our coal cellar and get a hot bath without needing to prepare it.

Jimson tried to sneer at our efforts. He is jealous of Lobbins.

"There's one thing, old man," he said, "if the gardening don't pan out well you've got a grand imitation of the Paris floods—so that's something."

Meanwhile, the plumber's failure was getting me into hot water. My neighbor, Galpood, complained that his rabbits were being stewed in their beds and the chickens had taken to laying hard-boiled

eggs. More than that, the early Carrot seed went off on the flowing tide out of my garden and took root among his prize Orchids.

I tried a new plumber then and got the thing properly done. This accomplished, I threw off my coat and had the whole of the seeds in in one day while Lobbins sat on a barrel and directed operations. There were early Cauliflowers and Tomatoes, Mustard and Cress, Cucumbers and Strawberries, and Rhubarb and Radishes.

Seeing that these things have a way of simply bounding up out of the ground under the French system, I took the opportunity that evening of erecting a shed by candlelight to store my goods when Nature started hustling them through the earth. To lose no time, I hurried down into the town, and fetched a contractor out of bed to arrange for carting the goods round to the dealers.

Nothing had happened by the next morning, except that the local cats imagined my clothes were meat covers, and had raked a few tunnels into them. The hot water arrangements worked splendidly in heating the frames ready for my young Lettuce. In the interval three of them were inhabited by tramps, who seemed very unwilling to turn out.

The first real excitement came the next night, when the hull from an adjoining meadow broke through the fence under the impression that my garden was a china shop. A few generous wayfarers tried to drive him out with a volley of bricks, but owing to their erratic aim, about seventeen of my chassis were soon put hors de combat.

This is where Lobbins's philosophy comes in. Nothing discourages Lobbins. "It's heartbreaking at first," he said; "but the joyful time is when the seeds begin to come up. A few days more, and you will lie in bed and hear the Lettuces nosing their way through the soft, brown earth, and then you will know success is at hand."

It was a tempting prospect. I waited three days for it to happen. On the fourth morning the first Lettuce nosed its way through about three a. m. with a fearful report. It shook a few ornaments off the mantelpiece, and brought down one of the chimneys. I don't

The Bench
Problem
Solved
At
Last

Concrete Steel BENCHES

BY the use of our steel forms, scientifically constructed along the lines of the most important points favorable to growing plants or cut flowers; we offer to the grower what has been proven to be by four year's actual test, made by several responsible growers in this country, the only practical concrete bench. This style of bench far surpasses wooden construction in many ways; by being rust-proof and fireproof, and vermin do not find a lodging place in any portion of its make-up. It grows firmer with age, is pleasing in appearance, and can be kept sweet and clean at all times. The strength of concrete is an accepted fact, and your men can work with barrows on our benches without fear of breaking through.

Drainage can be regulated to suit the requirements of any soil.

The heating apparatus can be so arranged as to give well regulated heat.

We use no bolts or iron work on our benches, and they will outlast many times, steel or tile constructed benches.

Carnations and Roses grown on our concrete benches invariably produce better results than when grown on any other style bench. Send us the dimensions of the benches you anticipate building and we will quote you the cost. Cheaper than wood.

The book of WATER GARDENING

By PETER BISSET. Price, postpaid, \$2.50.

A. T. De La Mare. Ptg. & Pub. Co. 2 to 8 Duane St. New York

know how the soft, brown earth took it, but the velvety night seemed to have got a shock. Success was evidently at hand in earnest. When I went down to investigate, I found it wasn't a Lettuce at all, but the boiler my new plumber had sunk at the top of the garden. It had burst, and brought up all the seeds, and the earth, too, and had distributed them over Acacia avenue. The underground pipes were hanging on the front facade of our villa, and fragments of cloche and chassis, which anon had explored the Milky Way, were dropping with a soft patter.

The same afternoon I sold the mangled pipes to a ragman for twopence, and opened the front door every few minutes to hear what some neighbor had to say about my French experiment in plain English.

But the result of that little seed shower was curious. In the ensuing Spring young Lettuce and Cauliflower might be seen sprouting on the roofs of our neighborhood, and householders began to find Radishes among their Panisies and long Parisian Turnips lurking in the Mignonette.

My theory was that Lobbins made a mistake in being too advanced with his hot water apparatus. So a little later, I quietly got in a few loads of fertilizer from a lively stable keeper, and experimented in French gardening on my own.

And I found in this case that my fertilizer effectively kept away tramps. It also kept off visitors, and it was only the cook's deep-seated affection for us that prevented her giving notice.

Unfortunately, at the moment when my first hatch of seeds got through there came a frantic wire from Miriam's mother. She was in the hands of three doctors and did not expect to recover. We tore away to the bedside and remained there an anxious fortnight.

Of course, she got well. But when we returned to Dulham, I had some difficulty in finding our house. The fertilizer had done its work so well that Acacia Villa now stood in a jungle of giant Turnips, mammoth Cauliflowers, and Lettuce Eiffel-towers. It was a tribute to the French method of forcing, but I draw the line at being forced out of the house and home. I cut my way through to the back door, rescued the cook with the empty brandy bottle in her hand, and telephoned for help.

It took some time to get the garden back to its primeval state. But it will take longer, I'm afraid, to banish the memory of that fertilizer. Even now people walk by habit on the other side of the road. And the garden ground is still so rich that it takes my odd man most of his time to keep the weeds down.

I am thinking of silencing it for ever with a broad bed of concrete.—From *Answers* (Eng.)

New Bedford, Mass.

The cut flower trade has been rather slow the past week. Funeral work is very good. Flowers are now quite plentiful here. Carnations that are coming in this market are of good quality, retailing at 50c. and 60c. per doz. Roses sell at \$1.50 per doz.; Violets at 75c. to \$1 per 100; Sweet Peas at \$1 per 100. Bulb stock is quite plentiful. Callas and Lilies, \$2 per doz. retail. Mignonette at 50c. per doz. Freesias are about all gone; these flowers are used here mostly for funeral work.

Wm. P. Peirce on Union st. has some nice flowering plants in his window these days; he is still receiving some of those famous Violets from J. Harvey Briggs.

J. H. Cleary finds plenty of use for his handsome delivery wagon.

E. H. Chamberlain was on the sick list the past week, and unable to be at the store most of this time.

A few Spring openings have helped business a little the past week. Wm. P. Peirce had some nice little Shamrocks from Leonard Cousins for St. Patrick's Day; these sold at 10c. the pot.

Our street fakir was with us again last Saturday; he had an enormous quantity of Roses and Carnations for sale; an effort will be made to put a stop to his cheap business, as this must be a grievous harm to the high rental stores uptown.

Prospects for Easter trade are good.

Garden work will now soon be commenced around here. Peter Murray of Fairhaven does a large business in this line, he having as many as 20 men going at times. He will build additional houses this coming season.

HORTICO.

Tubular Boilers

Steam and Water

The Most Economical and Efficient Boiler for Greenhouse Heating

CENTRALIZE YOUR HEATING PLANT

The economy in heating large ranges of glass from a central plant is so great that the first cost is repaid in a few years.

Following are a few plants which we designed and installed:

THOMAS YOUNG, JR.
 BOUND BROOK, N. J.

150,000 sq. ft. glass heated by steam from a central plant; the exhaust from pumps is passed through a condenser which heats 2-150 foot propagating houses with hot water.

F. R. PIERSON CO.
 SCARBOROUGH-ON-HUDSON, N. Y.
 150,000 sq. ft. glass heated by steam from a central plant; the steam is passed through condensers and the hot water is forced through the houses with circulators.

JOHN N. MAY
 SUMMIT, N. J.
 75,000 sq. ft. glass heated by steam from a central plant.

THE KROESCHELL BOILER

IS THE ONLY PERFECT
HOT WATER BOILER

Made in 15 sizes, heating from the smallest greenhouse up to 60,000 square feet of glass to 50° at 15° below zero.

Prices and Catalogues on application

KROESCHELL BROS CO.,

468 ERIE STREET, CHICAGO

TILE DRAINED LAND IS MORE PRODUCTIVE

Earliest and easiest worked. Carries off surplus water; admits air to the soil. Increases the value. Acres of swampy land reclaimed and made fertile. Jackson's Round Drain Tile meets every requirement. We also make Sewer Pipe, Red and Fire Brick, Chimney Tops, Encaustic Side Walk Tile, etc. Write for what you want and prices. JOHN H. JACKSON, 50 Third Ave., Albany, N.Y.

Mastica is elastic and tenacious, admits of expansion and contraction. Putty becomes hard and brittle. Broken glass more easily removed without breaking of other glass as occurs with hard putty. Lasts longer than putty. Easy to apply.

THE LOGICAL HOUSE FOR THE LOGICAL GROWER

Logical because it perfectly meets the requirements for a house of greatest productivity and greatest safety.

Its complete Sectional Iron Frame with the essential number of columns for its support, makes it unnecessary to obstruct the light by a net work of trussings. No part is heavier than necessary for safety, and still it is lighter than any other house built any other way.

It is only logical that columns relieve the ridge and eaves from bearing the strain of

the tremendous weight of the roof, besides safely fortifying it against wind and snow pressure.

In all its history of a quarter of a century, it has a record of no blow-downs or cave-ins. And so we say again it is the logical house for the logical grower. This one is Alban Harvey & Sons, at Brandywine Summit, Pa. and is 43 feet wide and 250 feet long.

When you think of building, think of us as the builders.

King Iron Frame Greenhouses

Rose House, 54 Feet Wide, 561 Feet Long—Erected for John Young Co., Bedford, N. Y.

THE King Iron Frame Greenhouses are the best commercial houses built. They are strong, stiff in the wind, cast the minimum amount of shade and are reasonable in price. These houses have been adopted by many of the leading growers in the United States and by growers in England, France and Germany. With these houses there has never been a cave in, blow down or blow up.

New Double Lobelia

"KATHLEEN MALLARD"

We can furnish excellent plants of this splendid novelty in 2½-inch pots, at \$6.00 per 100, or \$50.00 per 1000.

RAWSON'S LEADING ASTERS

QUEEN OF THE MARKET ASTER

This is the best early out-of-door Aster. In colors as follows: Dark Blue, Light Blue, White, Rose, Peach Blossom, Crimson, per ¼ oz., 20c.; per oz., 60c. All colors mixed, per ¼ oz., 15c.; per oz., 50c.

RAWSON'S NEW MIDSUMMER ASTER

This is one of the best Asters for Midsummer or late crop and we recommend it highly. Flowers are large and are borne on erect long stems, often 2 feet in length. We offer the following colors: Pure White, Delicate Shell-Pink, Royal Purple, True Lavender, and Bright Rose, per ¼ oz., 60c.; per oz., \$2.00. All colors mixed, per ¼ oz., 50c.; per oz., \$1.50.

RAWSON'S LATE BRANCHING ASTER

This is the best American Branching Aster grown to-day. It is a late cropper and a money-maker. Flowers grown from our seed invariably bring from ½ to 1c. a flower more in the wholesale market than other similar strains. We can furnish the following separate colors: Crimson, Dark Blue, Light Blue, Rose Pink, Shell-Pink, Scarlet, and White, per ¼ oz., 30c.; per oz., \$1.00. All colors mixed, per ¼ oz., 25c.; per oz., 75c.

We have many other good strains of Asters and specialties for Florists all described in our special catalogue to florists (mailed free).

Special Gladiolus Offer

AMERICA

A few points of merit—Color: A beautiful soft flesh-pink, very light and much like 'Enchantress' Carnation, except slightly tinged with lavender. Size: growth very strong and healthy, producing beautiful dark green foliage and strong, erect spikes of the largest flowers. Purposes: For florists' use its color makes it everything to be desired; delicate, attractive and absolutely new. It is most desirable for planting in beds in parks, private estates, etc.

AMERICA. The best commercial pink in existence. 1st size bulbs, 100, \$4; 1000, \$30; 5000, \$125.

ATTRACTION. Deep, dark, rich crimson with a very conspicuous large pure white center and throat. At once a most beautiful and attractive sort. 100, \$4.00; 1000, \$25.00.

AUGUSTA. Lovely pure white with blue anthers. 1½ to 2½ inches. 100, \$2.25; 1000, \$20; 5000, \$90.

BLUE JAY (Baron Hulot). The finest blue Gladiolus yet seen. It is a rich deep color of indigo shade. The only real blue Gladiolus on the market. 100, \$9.00; 1000, \$75.00.

BRENCHLEYENSIS. Extra fine red variety. 1½ to 2½ inches. 100, \$1.50; 1000, \$12.00; 5000 \$55.00.

COLEMBIA. Light orange scarlet, freely blotched and pencilled with bluish-purple. Throat freely mottled. 100, \$2.00; 1000, \$15.00; 5000, \$70.

CELES. Pure white, spotted with purplish rose. 100, \$1.50; 1000, \$12.00; 5000, \$56.00.

MAY. A lovely pure white flower, finely flaked, bright rosy crimson. 100, \$2.00; 1000, \$15.00; 5000, \$70.00.

NEZINSCOTT. Bright blood scarlet, with deep velvety crimson black blotches, and white mottlings in throat. 100, \$4.00; 1000, \$30.00; 6000, \$145.00.

PRINCEPS. Rich crimson with very deep shadings in the throat and broad blotches on lower petals. 100, \$10.00.

SALEM. Fine salmon-pink, maroon blotches. 100, \$6.00; 1000, \$40.00.

Gladiolus America

SULPHUR KING. The finest yellow Gladiolus. 100, \$15.00; 1000, \$140.00.

Shell pink	.20	.30	1.00
Rose	.20	.30	1.00
Carmine	.20	.30	1.00
Mixed	.10	.20	.75

ASTER. Hohenzollern. Excellent robust new class, with enormous flowers, superb for cutting and exhibiting; flowers often measuring 6 to 8 inches in diameter.

	Tr. pkt.	¼ oz.	Oz.
White	\$0.25	\$0.75	\$2.00
Rose	.25	.75	2.00
Dark blue	.25	.75	2.00
Crown Prince	.25	.90	3.00
Syringa blue	.50	1.50	5.00
Mixed	.25	.75	2.00

ASTER. Purity. One of the finest white Asters grown, either for pots or cutting. Trade pkt. 25c., ¼ oz. 75c., oz. \$2.50.

ASTER. Daybreak. Counterpart to Purity, with a fine rose color similar to Daybreak Carnation; very fine. Trade pkt. 25c., ¼ oz. 75c., oz. \$2.50.

ASTER. Giant Comet.

	Tr. pkt.	¼ oz.	Oz.
Pure white	\$0.25	\$0.75	\$2.00
Dark blue	.25	.75	2.00
Light rose	.25	.75	2.00
Mixed	.20	.60	1.75

ASTER. Hercules. White. Remarkable new introduction, semi-dwarf, huge pure white flowers of most refined shape; the best white flowering Aster we have ever seen. Pkt. 25c., ¼ oz. \$1.00, ½ oz. \$3.50, oz. \$7.00.

ASTER. Splendor. Upright flesh pink. In this variety we have one of great value. It has many qualities which commend it highly, not only in the habit of growth, but in size, form of flower, and in color, which is one of the most desirable in an Aster, being of a beautiful light flesh pink, a shade which can be used in nearly all floral work. The plant has the ideal habit of an upright growing sort. Pkt. 25c., ¼ oz. \$1.75, oz. \$5.00.

ASTER. Vick's Violet King. The peer of the grandest Chrysanthemum. The habit is similar to the popular Vick's Branching, vigorous in growth, long, stiff stems; petals somewhat resemble the quilled varieties but much larger and broader, completely covering the crown. In shape and size the bloom is round, full and large, many of the flowers 4 to 6 inches. Its color is a soft violet-lilac. Trade pkt. 25c., oz. \$1.50.

Downing & Co., 2 boxes Lily buds; Wells, Fargo & Co., 91 boxes Lily buds; Hucca & Co., 1 case plants; Norton & Son, 1 case plants; H. Pollock, 3 barrels seed; Tice & Lynch, 25 packages seed.

European Notes

King Sol having warmed us up to 92° Fahr. wept for joy the next day and hasn't been able to dry his eyes since, so that we are enjoying a spell of very reasonable weather and the rampant vegetation has received a very welcome check.

As a general remark the season in western and southern Europe is fully three weeks ahead of last year. Along the Mediterranean littoral the florists are unable to rush the flowers to the markets in time, while from the Scilly Isles, further north, fifty tons of Paeonid blooms per week are helping to glut the markets, and an equal quantity is allowed to perish in the fields, as it does not pay to cut them.

We are advised by the southern growers that they will be able to supply new crop Primula seed in a very few weeks, while the British growers of florists' strains of this article expect their new crop will be ready a full month ahead

"NOT HOW CHEAP— BUT HOW GOOD"

Melancholy is derived from two Greek words meaning "black bile." It was formerly supposed that a man who was always dejected in spirits had an excess of bile in his liver, or, in other words, had a "black liver." Such a man usually wears a face like a chicken with the pip. McHutchison calls them "Pisterines"—they make up the Chronic kicker class. Some are dead-beats. We are thankful to say that the great majority of florists are the best hearted people in the world—they go about their business with a smile and take the world à la Sunny Jim. Those are the kind we like to trade with. They are the successful kind too—they buy the best bulbs and grow them well. If you are not a Pisterine and want good bulbs, write us.

of last year. The outlook for our indoor cultures is very rosy but when we examine our outdoor cultures there is a very different story to tell.

The worst crop of all appears to be Cabbage. A careful survey, which has been possible since the fine weather started in, shows us that the forcing temperature has hastened the destruction instead of the development of the plants. Stem rot is badly in evidence and for this there is not any known remedy. Very short crops are an absolute certainty, and this in spite of the fact that very large acreages were arranged for. On the lighter lands we are now able to sow our stock seeds for next year, but growers fight shy of this culture which has not paid so much as the mature bill for the past three years. Higher prices are being paid in every case, but even this does not help us to the much needed reserve stock, while the extraordinary demand for this article is clearing out every pound we possess. Trade in general is at its very best just now and it is practically impossible to keep pace with the orders. In the writer's early days letters were costly and telegrams were unknown, but now the one cent postal cards are despatched every hour of the day and if the goods are not promptly received the telegraph, and that monster of iniquity the telephone, disturb the seedsmen's peace.

Shortages are keenly felt, especially in Radish, Peas, some varieties of Onion and Broad Beans. So many of the latter were unsalable on account of being badly stained by the rains, that there has not at any time been more than half the supply needed for an average demand, and this year it appears that an additional 20 per cent. is included in every order. It is doubtful if so much as a sack of the green Windsor Beans could be obtained from the wholesale houses in London.

The boom in the seed trade in England is causing a great advertising campaign, the two extremes of which are to be found in the handsome publication of Sutton and Sons "In a Garden Payre" and the full-page advt. in the principal London daily papers of one of the pioneer dealers in penny packet seeds. It is stated that the penny packet seedsmen visited your country in 1908, and he has evidently imbibed some American ideas.

It is officially notified in the Gazette that Watkins & Simpson, Ltd., London, have filed, under date of Feb. 19, notification of raising £20,000 debenture bonds, the amount of the present issue being £10,000, general charge.

Messrs. Cutbush, and their traveler, Holdea, have been committed for trial on one count of the proceedings taken against them under the Corrupt Practices Act. Their counsel states that he has a complete answer to both charges. In the meantime the order for the "Scotch Insecticides" has not been produced.

American Notes

The Seed Trade Reaches Its Height

From all sections come reports that the great rush of the season in all lines of seed selling is well started, and from now on the amount of seeds to be put out each day will practically depend only upon the capacities of the various seed firms. Easter week is always especially busy, for the reason that so many seedsmen add flowering plants and Easter novelties to their stocks. Outside of the larger cities, the sales of Easter plants have, during the past few years, wonderfully increased with those seedsmen who have made a specialty of this line; Lilies, both cut and in pots, Azaleas and bulb stock of all kinds, both in pots and as cut flowers, seem to be the best sellers. Of course, Roses, Carnations, Violets, Lily of the Valley and other seasonable cut flowers when added enjoy good sales, but, as a rule, good potted plants and some decorative stock, such as Palms, Araucarias, etc., make up the Easter sales; so, taken all together, Easter is always one of the busiest times of the entire season with the seedsmen. In some sections of the country the persistent cold weather has had a tendency to keep counter retail trade at a point somewhat lower than it will be

the moment it becomes warmer, but as great has been the rash in all directions that this hold-back-trade-weather, so to speak, has been more of a help than a hindrance.

Vegetable Plants

It is none too early to arrange for an ample supply of vegetable plants, as the moment the warm weather sets in the sale of these by every seed house should commence. Of course, Lettuce, Cabbage and plants of the other hardy vegetables can be sold very early, but it is not policy to push the sales of Tomato, Egg and kindred plants until the weather becomes warm and settled. It is the same in selling vegetable plants as in selling seeds; the customer appreciates being candidly told not to put out the delicate plants too soon. This branch will be found a very profitable side line in conjunction with the regular seed business.

New York Seed Trade

The weather is warmer and trade in every line with the seedsmen has assumed still larger proportions. In such volumes are the orders coming that every firm seems to be very short-handed. Of course, as is always the case, the warm days make customers impatient of any delay. Spring bulbs, as well as seeds, are selling remarkably well.

Vaughan's Seed Store has arranged a most attractive window of Easter plants and, as usual, are doing a large business along this line.

The Stumpp & Walter Co. is particularly pleased with its large sales of all kinds of Spring bulbs, and its special strains of Asters are also in large demand.

Henry Nungesser, president of Henry Nungesser & Co., sailed last Tuesday on the Kronprinzessin Cecilie of the North German Lloyd line. Mr. Nungesser is feeling a great deal better from his recent indisposition and will be gone several months, combining business and pleasure.

Mr. Frank Hubert of the Hubert Bulb Co., Portsmouth, Va., arrived in New York, per S. S. Oceanic, last week, and after a hasty visit to Boston, New York and Philadelphia, proceeded South in order that he might be on the company's grounds at the time when the bulbs were being cut for Easter sales, to personally judge their appearance and quality. Mr. Hubert reports an encouraging and steadily increasing demand for American-grown stock and is much interested in this development.

Rickards Bros. are very busy, particularly so in the line of lawn Grass seeds and Clovers.

Arthur T. Boddington says that the sales of Sweet Peas are much greater than in any previous season.

W. E. Marshall & Co., as usual, are offering an assortment of flowering plants and shrubs.

Burnett Bros. also report an unusual number of orders for nursery stock this Spring.

C. McTaggart reports a very busy week. Among other orders recently booked was one for a carload of hardy Rhododendrons. He seems to be certainly getting his share of business.

The demand for extra counter hands by the seedsmen still continues, but it would seem almost impossible to obtain the required number of skilled people.

Boston Seed Trade

W. W. Rawson's seed firm state that they have disposed of all fancy kinds of Gladioli, and the trade in these fine bulbs was much better than they had anticipated.

Thomas Gray Co.'s seed-house report an exceptional busy March and working overtime right along now.

R. & J. Farquhar & Co. report a large increase in business over last year at this date. The fine weather is making all the seed houses exceptionally busy for this early date.

Philadelphia Seed Trade

Considerable activity has been manifested the past few days in all departments of the seed stores. Counter trade has advanced fully 50 per cent., while the mail and shipping business is evidently trying to make up for the sluggish conditions of the past few weeks. A stronger demand than last season is apparent for Sweet Peas, and this is no doubt due to the extensive advertising features in this particular line by all the prominent dealers. Summer-flowering bulbs, such as

Grower of the Finest Pansies

Please mention the Exchange when writing.

Dahlias, Gladioli, Tuberous Begonias, etc. are all being prominently displayed, and the call for the same is fully up to expectations. Reports are to the effect that Asparagus plumosus nanus seed is very short in supply, and much difficulty is being experienced in filling orders already booked.

Poultry supplies of all kinds are becoming more and more a feature of the Johnson Seed Co.'s business. This house is being pushed to the limit to fill its orders for Aster seed.

The Stokes Seed Store is displaying a fine line of garden and farm seeds, as well as garden implements outside its store on Market st. Mr. Stokes is also sending to the retail stores of Philadelphia some very well-grown specimens of Hydrangea Otaksa from his greenhouses in Moorestown, N. J.

Henry A. Dreer is featuring Dreer's Special Mixture Lawn Grass Seed in the Chestnut st. store windows. This seed is of the same brand for which the company secured the gold medal in Seattle, Wash. last season, from the Exposition authorities. Seed Potatoes of such well-known brands as Early Rose, Early Ohio, Irish Cobbler, Bovee, State of Maine, etc. are prominently displayed to customers, and the demand for them is steadily increasing.

The Moore Seed Co. is offering, in a liberal manner, bulbs of Tuberous Begonias, in mixed as well as named varieties.

The Henry F. Michell Co. has on display in its window, 1018 Market st., several pots of Hyacinths and Tulips which were prize winners at the recent show held in Horticultural Hall. These were grown by John McCleary, gardener to Mrs. Penfield, Germantown, Pa. I. Rosnosky, of this house, well known to the trade in Washington, Baltimore and other southern points, will start next week on quite an extended trip to visit these points. Outside the store of this house are baskets containing many kinds of Dahlias, Gladioli, Begonias, Amaryllis and other bulbs, which are doing much to awaken the Spring fever or gardening habit in the home lover. An extensive exhibit was made by this concern at the recent show in Philadelphia, results of which show the wise policy and forethought of the head of the house.

Direct Importations

AT FOREIGN GROWERS' PRICES

From BELGIUM
From HOLLAND
ing, etc., etc.

Palms, Arancarias, Bay Trees, Azalea Indica, etc.
Boxwood, Rhododendrons, pot grown Shrubs for forcing.

March 26, 1910

W. Atlee Burpee & Co. are so beset with orders that they have been compelled to mail out notices requesting indulgence for a three day's delay in filling same. Ordinarily, orders are shipped one day after receipt, but owing to the great increase of business this year the delay is unavoidable during the present rush. There are 244 employees in the building, all it can accommodate. For the season of 1911, when the new buildings will be fitted up, they expect to be equal to every emergency, even to handling a corresponding increase.

DAHLIAS

Charles Clayton is my best introduction; for brilliancy, form and stem, this new Cactus leads them all. Other superb Novelties are: Mrs. W. K. Jewett, Maillot, Princess Yellive, Coronas, Olive Tracy. These with other fine varieties were awarded a Bronze Medal at the Alaskan-Yukon Exposition, last season. Select list of Standard Dahlias: and Field-Grown Hollyhocks, both Double and Allegheny. Catalogue on application.

LINCOLN, NEBR.—The Griswold Seed Co. report their mail order trade is opening up wonderfully well for thus early in the season, with orders about 20% heavier than a year ago up to the same date. The demand for Alfalfa seed is not as heavy as for the corresponding period a year ago. They believe this will come later as more Alfalfa is being sown in the Fall each season. March has been an ideal Spring month here. Counter trade has been as good as we could ask for, in fact way ahead of a year ago. Prospects for bumper crops in Nebraska were never better than right now.

Rochester, N. Y.

James Vick's Sons are spelling the seed business in large capital letters this Spring. They report a big increase in trade all along the line, retail mail order, wholesale and store. Trade and weather conditions seem to have conspired to make a favorable season and the orders are coming in so rapidly as to keep the entire force working at top notch speed. Fortunately for all concerned the house was prepared for the rush and orders are being filled nearly as fast as they arrive.

In the wholesale department W. H. Dildine, superintendent, reports that there is an increase of over 32 per cent. in the number of orders received for the first three weeks of March, over any similar period in the history of the house. Those who realize the meaning of this immense increase in the volume of business, especially in a month which is always busy, will not be surprised that the packing force gradually fell several days behind in filling orders. This state of affairs necessitated putting on a double force of workers. Then by working overtime the accumulation of orders gradually disappeared. Now Mr. Dildine reports that nearly all orders are filled the day they arrive.

Government Seeds

How dear to his heart is the little farm garden

My congressman pictures with laudable skill!

The Lettuce, the Cabbage (with heads that won't harden)

And each tiny pea pod (intent not to fill)!

The gaudy Tomatoes and Peppers he mails me!

The Carrots and Turnips (which prove to be weeds)!

The tempting description, the picture that hails me

On each little packet of government seeds!

The wee little packet, the partly filled packet.

The elderly packet of government seeds!

That duly franked parcel I hail as a treasure

For often in Spring when returning from field

I find it (a source of most dubious pleasure,

The poorest and cheapest that Congress can yield).

How ardent I seize it (!) with heart overflowing (?)

I fancy our congressman silently pleads:

"For me, next election, your vote please be stowing

In the big ballot box—for these government seeds—

This wee little packet, this partly filled packet.

This elderly packet of government seeds!"

How sweet from the capitol mill to receive it

(A present superb for a farmer like me)

Not a full packet purchased from seedsmen (believe it!)

Can equal these seeds in their antiquity.

But now I've abandoned my rural vocation

A fear of remembrance its furrowed course leads,

For the Aprils I fed to my poultry a ration

Of useless inanimate government seeds—

A wee little packet, a partly filled packet.

An elderly packet of government seeds.

—M. G. KAINS in American Agriculturist.

New Rose American Pillar

NO Climbing Rose is attracting the attention that "American Pillar" does, and most deservedly so. It is by far the best single-flowered climbing rose for outside purposes; and on account of the great durability of its flowers, it is the best single-flowered forcing rose.

Gentlemen: July 12, 1909.

Let me tell you, too, that the American Pillar is a better Rose than you know, perhaps. The plant I had from you, which was planted this Spring under unfavorable conditions, is now giving us a succession of most exquisite bloom.

Yours truly,
J. HORACE McFARLAND,
Pres. of American Civic Association, Harrisburg, Penna.

COMMENT FROM THE LONDON GARDEN

"A most notable feature in this glorious display (Temple Flower Show in London) was the New 'American Pillar' Rose. The large and attractive rich rose pink blooms are produced in immense clusters, the white centers of the blooms adding to their attractiveness. —Florists' Exchange.

2½-inch pot plants, \$1.50 per dozen, \$8.00 per 100, \$75.00 per 1000.

4-inch pot plants, \$3.50 per dozen, \$25.00 per 100.

Trade list now ready

F. & F. NURSERIES, Springfield, New Jersey

AMERICAN ASSOCIATION OF NURSEYMEN

F. H. Stannard, Ottawa, Kan., President; N. P. Stark, Louisiana, Mo., Vice-president; John Hall, Rochester, N. Y., Secretary; C. L. Yates, Rochester, N. Y., treasurer.

IOLA, KAN.—A nursery will be opened here this Spring. Mr. Willis, who already has a large nursery at Ottawa, will own a controlling interest in the one to be started here, in which J. M. Jackson is also financially interested. The business will be called the Iola Nurseries.

ATHENS, GA.—T. W. Dennington, of 198 Prince ave., has secured land on the Jefferson road and is establishing a nursery.

KELSO, WASH.—An extensive nursery plant is to be established on the Adam Catlin farm, by James Stevens & Son, formerly of Barton, Ore. A quantity of stock has already arrived, and it is expected shipping will commence next Fall.

Pinus strobus nanus The many dwarf varieties of tall growing trees are very useful to planters when laying out a new place; there are so many situations where they fit in to great advantage. The dwarf White Pine, *Pinus strobus nanus*, which our picture represents, is a case in point. It occupies the front of a plot of ground entirely devoted to evergreens, and is just inside the lawn from a carriage drive which winds by it. Occupying appropriate positions along the driveway are other dwarfs such as *Arborvitae* and *Retinopsis*.

This pretty form of the White Pine never gets very tall, but maintains the bush shape it has acquired for years, growing slowly, but always keeping to its shape.

Many forms of dwarf trees are true seedlings, not sports from some other one. The dwarf White Pine in all probability originated in a seed bed. The Hemlock Spruce frequently does the same. It is not uncommon to find two or three dwarfs growing in a batch of a thousand seedlings, and these dwarfs are always dense as can be, just as though they had been sheared for several years.

All these dwarfs have to be increased by grafting, not a difficult matter. Stocks of the common White Pine should be used for the dwarf of this. If potted and established a year in advance, grafting can be done in the Winter season, to better advantage than outdoors.

Protect the Roots When Transplanting Evergreens

It is becoming well understood by planters that much of the success in transplanting trees comes from care in keeping the roots moist. This is particularly true of evergreens. Deciduous trees will endure drying out to a much greater extent than will the evergreens. In fact, to let the roots of evergreens become dry means that there is little use proceeding further with them if the intention was to plant them. The sap of evergreens cannot be stirred into circulation again if once halted by dryness. That nurserymen recognize this is shown by the care now given to the wrapping of the roots in burlap as soon as they are exposed—a care so different from what was displayed a few years back. Beside this wrapping a ball of soil now goes with the roots, and where the roots will not hold a ball it is not uncommon to place a spadeful of soil inside the burlap, to assist in maintaining the desired moisture. The great change for the better in the case of planted evergreens is largely due to this extra care in protecting the roots in the way described. After this care in keeping the roots moist, there is still another thing to do to help along the good work. This is to see that, when planting the tree, the soil thrown in effectually covers the roots. Nothing is so good as fine sandy soil, or sand alone, for the first covering. It finds its way around the roots better than anything else that could be used and especially so when a bucketful or two of water is poured in, as the water carries it to all the hollows, ensuring the close fitting of the sand to the roots. Even in Spring this watering is beneficial. It is not for the purpose of giving water to the roots, but to solidify the soil about them. But the water does no harm in adding to the moisture; on the contrary, it is often very desirable. When planting in the Fall, instead of Spring, the water aids in two ways—to settle the soil close to the roots and to supply the moisture demanded. Writers say that flooding the transplanted tree with water is common in California, where the dryness of the soil in Summer makes planting without it of but little avail. There, the soil is so dry that it can be pulverized to dust, so that sand is not necessary for first filling in around the roots, the pulverized soil being even better than it for the purpose beside containing more food than the sand.

Deutzia Lemoinei

Deutzia Lemoinei, which advertisers are offering now, is a good variety to have. While florists say it is not as good for their use, in cut flower arrangements, as the old *D. gracilis*, it is of great value as a decorative shrub on a lawn, being intermediate in growth and, in its season of flowering, between *gracilis* and the taller growers represented by *D. scabra*. It grows faster, and to a larger size, than *D. gracilis*, flowering, too, a little later in Spring. Buses of it on a lawn are greatly admired when in flower.

Setting Vines to Living Trees

When vines are set to run up old living trees it is often a difficult matter to get them to thrive, for the reason that there is but little soil near the trees, and what there is the roots of the trees demand. It is an old plan, yet new to many, to select vines with long tops, and then to plant them at some distance from the trunk of the tree, burying the shoots of the vine underground until they reach the trunk of the tree. In this way the roots of the plants are far enough away from the tree and more soil is available for them; and as the shoots are carried under ground to the tree they are out of harm's way. When the vines are of a nature that root readily from the shoots, the buried portions soon take root, which is all in favor of the well doing of the vines. The several *Ampelopsis*, *Honeysuckles*, *Clematis* and *Trumpet Vines* all make root from such buried shoots, so that the plan is a good one in every way.

When trees are dead the vines can be planted close to their trunks, as there is then no competition for the food in the soil.

Hardiness of Chamærops excelsa

It is interesting to know of the hardiness of *Chamærops excelsa* under a temperature of 7° above zero, as related by your California correspondent, Abe Clemo. News of a species of any Palm standing more cold than any other one is always welcome, extending as it does its culture where other species cannot be used. This Palm, *Chamærops excelsa*, has been known to endure as low a temperature in the south of England, or nearly as low, but then the sunless Winters there, and the moist air, are a great aid to plants deemed not thoroughly hardy. Can Abe Clemo tell us how low a temperature the several species of the *Brahea* Palms withstand?

Budding Lilacs

The suggestion of E. Y. Teas that where the California Privet is not hardy Lilacs could be grafted on them at the collar is a good one, as then the whole of the California Privet would be underground, where it would not be winter killed, as he says. Again, as he says, the *Ibota*, *Regelianum* and *Amurense* are harder than the other; these could be used for stocks for budding instead of the Californian.

Where it is desired to use the Californian for budding, the stocks could be lifted in Autumn soon after being budded, stored for the Winter and set out in Spring in rows in the nursery. When setting them, set them low enough to allow of the soil being drawn around them an inch or two above the union of the bud and the stock, so that all portions of the Privet are below ground.

Pinus Strobus Nanus. Dwarf White Pine

Catalog Descriptions

When advertising stock it certainly pays to so describe it that those interested may fairly understand what kind of stock is intended. Sometime ago a party advertised *Periwinkle*, *Vinea minor*, 6 in., at a certain price per 100. A reader of the advertisement sent for a hundred or two of them. The plants received were 6 in. as advertised, but were only rooted cuttings, with the one stem to them, much to the dissatisfaction of the customer—a little batch that could be held between the thumb and finger. The plants were as described, 6 in., but the purchaser was greatly displeased, and the seller lost the confidence of the customer. The price was not much, perhaps no more than the plants were worth, and had the buyer been a nurseryman he would have surmised that they were probably small; but he was an amateur and ordered expecting some fair-sized plants to set along a bank. What should have been said in such an advertisement was *rooted cuttings*, then all would have been clear.

There is a good deal of art in describing stock in such a way that, while brief, the description makes clear what the stock is like. Description of stock is much more specific than it used to be, all catalogs, as a rule, aiming to so describe stock as to give a good idea of what it is like. It is very different from what it was in old-time nursery practice. The writer remembers when such firms as the late Robert Buist's used to simply give the name of a tree or shrub and the price; no size or description was given, so that what was to be forthcoming for the money no one knew but the seller. Nowadays we have name, height, caliper and some description of the tree, as to bushiness, etc., and a fair statement of the character of all that is offered; and this is the only way to build up a permanent business.

Then there will be no winter killing of it; beside this, the Lilac portion will make its own roots in time, as Mr. Teas says.

Pruning Judas Trees

The name Judas Tree, applied long ago to our native species, *Cercis Canadensis*, embraces, in horticultural lists, the Japanese one as well, *C. Japonica*, though this one is never seen here in tree shape. The common one, *C. Canadensis*, does become a small tree, hence needs different treatment from the *C. Japonica*. The latter comes within the shrub section, and in company with all shrubs is improved by annual pruning. Allowed to grow at will this one reaches 8 to 10 ft., as seen in our shrubberies, and when in this condition it is the upper part of it, mainly, that is clothed with blossoms. To alter this, bringing the flowers nearer the ground, a good pruning should be given it as soon as its flowering is over, in Spring, forcing out new shoots from the part below where cut, which shoots will set buds for the next season's blooming. It is true that all species of Judas Tree flower to some extent from old wood, often giving a unique appearance to the specimens, but it is only an occasional cluster that appears, and not the well filled shoot of flowers that the younger growths display.

THAT subscription to F. E. you have been thinking of taking out for a brother florist! Why not send it in now?

Prices published in The Florists' Exchange are for the Trade only

New Seedling Rose Radiance

A seedling from Cardinal, a brilliant rosy carmine with opaline tints in the open flower. The form is fine, large, with cupped petals, bud long, brilliant, radiant, with extra long stems, a constant bloomer, fragrant, foliage abundant and of splendid substance.

'Frisco Ladies to Market Flowers

Orchids \$1.50 Each in Land of Sunshine, So They Incorporate to Cut Prices.

SAN FRANCISCO, March 22.—Orchids at \$1.50 apiece and Roses at from \$2 to \$5 a doz., in a land of sunshine, where they can be grown at small expense the year round, have aroused the ire of the women of San Francisco's "Four Hundred," and they are going into the business of raising these flowers and putting them on the market at a reasonable price.

Seventy prominent women, headed by Mrs. California Newton and Mrs. William C. Ralston, and representing the California Club and the Outdoor Art League, have signed the article of incorporation of the California Ladies' Plant and Flower Company; capital stock, \$100,000.

Mrs. Ralston said today: "Orchids cost \$1.50 apiece. Just think of that in California! The Pearl of the Garden and our beautiful La France Roses, do you ever see them now? No, they are not in the market. And the Rainbow Rose or the Bennett? They are not being produced. But we will soon have the fine old varieties again."—Exchange.

[Here is more competition—and from a most unexpected quarter! Needless to say that the outcome of the experiment will be watched as closely by the florists of the land as it will be by those most directly concerned.]

Worcester, Mass.

Easter rush had not commenced at this date, March 21, but the indications are bright for an unusual trade. Lilies are in the lead, with Azaleas, Hyacinths, Daffodils and Tulips following. Stock is very plentiful and of high quality. Prices will run about as last year.

H. F. Littlefield threw open his greenhouses to the public, March 20, and hundreds availed themselves of the privilege. There were Lilies in abundance, and such Lilies! Mr. Littlefield has made many a handsome showing but nothing compared to this year. Baby Ramblers, in perfect condition, attracted much attention. There was one very fine lot of Daffodil Queen Victoria. But the crowning beauty of all was in the Azalea house. Oscar Soderholm, the foreman, had arranged the plants in such a manner that the effect was one large variegated mass. The leading Azaleas grown here are Prof. Wolters, Ernst Eckhardt, Niobe and Van der Crayssen.

That a large business is expected by the florists is shown by the heavy advertising in the local papers. C. D. MacKie always leads in the amount of space taken; he has learned from past experience that it pays to advertise.

The estate of H. F. A. Lange has its usual large stock and, like the others, in splendid condition. By Easter, 1911, this firm will be in its new and larger quarters, and will make a showing never seen before in Worcester. CAROLUS.

Residence of H. W. Field of Northampton, Mass.

Showing Office to Left; Rose Houses on the Right.

SPECIAL OFFER

We will give one copy Plant Culture and The Florist's Exchange two years, all for \$3.00.

Plant Culture

NEW, THOROUGHLY REVISED EDITION. JUST PUBLISHED

By Geo. W. Oliver, Propagator to the Bureau of Plant Industry, U. S. Department of Agriculture

Printed on enamelled paper and illustrated with one hundred plates and engravings. Strongly bound, 12 mo., cloth. By mail postpaid, \$1.50

A WORKING handbook of every day practice for the Florist and Gardener, and those who intend to grow plants and flowers, in the greenhouse or garden, as a means of obtaining a livelihood. Each and every article is written in concise, simple language, and embodies wholly and solely the experience of the writer.

The plants dealt with comprise those which are commercially handled by Florists, Gardeners and Nurserymen, and include Florists' Flowers, Stove and Greenhouse Plants, Hardy Herbaceous Plants, Annuals, Shrubs, Hardy and Tender Vines and a chapter of General Directions, covering Propagation, Seeds, Grafting, Hybridization, etc.

This reliable cultural work has been gotten up for use, not ornament; therefore the price has been fixed at a figure within the reach of all. It contains more real practical information for those for whom it is intended than is found in much more pretentious works.

Send for sample pages, free.

QUIDNICK GREENHOUSES

J. H. Cushing, Prop., Quidnick, Anthony P. O. R. I.
Please mention the Exchange when writing.

Cincinnati

Once again we are upon the eve of battle, and if Old Sol continues to shine brightly we will be enabled to supply our customers with plenty of Roses at least. It looks now as though Carnations and Lilies would be sufficient to fill orders. Business during the past week has not been very rushing, neither has stock been equal to the demand.

A week ago Carnations were selling for \$7.50 per 1000, but the latter part of the week they were selling at \$3 per 100 and are still holding their price. The growers in the flower market are getting their stock into fine shape and it will certainly be a sight to see that market on the 26th, when thousands of dollars worth of flowers and plants will be sold, especially if it prove a nice day.

The regular monthly meeting of the Cincinnati Florists' Society has been changed to the second Monday of each month instead of the second Saturday as heretofore.

The howlers are still practicing and are making some very good scores.

James Allan of George & Allan now has a position with the park department, having charge of the nursery.

J. T. Cogger of Hartwell is fitting up a very handsome office and display room; he has added several thousand feet of glass to his plant, and his business has increased wonderfully within the past few years; he grows principally Carnations and bedding plants, buying the greater portion of his cut flowers; treating people well and handling only first-class stock has built up a fine business.

The suit brought by George & Allan against the city of Cincinnati, was won by the parties of the first part but like all cases against the municipal corporation, it will be taken to the higher courts, and it will be several years before they get any money out of it; the verdict they received will not half cover their loss.

The wire department of E. G. Gillett is very busy turning out hanging baskets. Joseph Mahalick, who has charge of this department, is one of the best wire workers in the trade, and his baskets are made substantial, using only the best of material; the same can be said of everything he manufactures.

Chas. Dudley of Parkersburg, W. Va., was a caller in the city on the 18th, coming in the interests of his establishment and selling plants for Easter; he is very much interested in automobiles and, like many others, has the fever.

Edith Kyrk, E. Mack, George & Allan, Wm. Speck and Ed. Fries are all sporting new wagons, showing that business is prospering with these florists.

E. G. GILLETT.

CINCINNATI, O.—While a number of children were playing in the ruins of a partially dismantled greenhouse at the head of Baker Pass in Eden Park, Sunday afternoon, March 13, during a high wind, the walls of the greenhouse collapsed, burying those within in the debris. Two were seriously injured and several were painfully hurt. The children had taken refuge behind the walls from the wind and a number of adults joined them and were watching them at play when the accident occurred.

BELOIT, WIS.—The contract for the \$6000 greenhouses for John Rindfleisch has been let to the John C. Moninger Co. of Chicago.

Just Because
APHINE

Is not listed in your seeds-men's 1910 catalogues, it does not necessarily indicate that they do not yet handle our new insecticide.

In many instances the 1910 catalogues were on the press before the merits of Aphine became generally known.

Ask your dealer for APHINE.

Then, if you find he cannot supply you with it, write us for names of our nearest selling agents.

\$2.50 per gallon.

\$1.00 per quart.

CLUBS and SOCIETIES

Elberon (N. J.) Hort. Society

This Society held a regular meeting on March 21, President Peter Murray in the chair. This was Rose night and quite a few Roses were staged, but not as many as the Society would have liked to see. C. Duncan and P. Murray were the principal winners. Mr. Duncan was awarded a cultural certificate for a collection of Roses. He gave a short talk on how he grows his Roses, which was very interesting. Mr. Murray was awarded a cultural certificate for three very fine plants of Calceolarias, and he also gave a few pointers on their culture. D. Kelley was awarded a cultural certificate for a collection of Sweet Peas. Wm. Seymour gained a cultural certificate for a vase of Callas. ALEX. FLEMING, Rec. Sec.

Newport (R. I.) Horticultural Society

The regular meeting of this Society took place on Tuesday evening, March 22. Work on the program list for the June show was completed by the addition of the children's classes, also a class for Sweet Peas. On the exhibition table was a display of Antirrhinum majus, magnificent spikes of various colors; also a plant of Lilium longiflorum, Formosa grown stock, a 7" to 9" bulb grown in a 5" pot, having two spikes which bore 17 buds and blossoms. These were grown by John Urquhart, gdr. for R. Livingston Beekman, and upon recommendation of the

committee on awards they were given a first-class certificate of merit for superior culture. When questioned regarding the culture of the Lily Mr. Urquhart said that the Formosa stock has given the greatest satisfaction and has never shown the least symptom of disease. It can be forced into flower in less time than the Harrisii, but is not as durable, although in every other way very satisfactory. At the next meeting it is hinted that Orchids will be the subject under discussion. The competitions for Calceolarias and Streptocarpus take place at the next meeting; that is, for the special prizes offered by Mrs. T. Kane Gibbs; but as far as we know, very few of these plants are being grown. ALEXANDER MACLELLAN.

PEORIA, ILL.—James C. Murray, florist, has opened another store at 302 Fulton st.

CANTON, ILL.—C. E. and W. H. Savill have leased the Barnhart greenhouses.

OSHKOSH, WIS.—The Oshkosh Floral Co. has incorporated with a capital stock of \$3000.

PITTSFIELD, ILL.—The greenhouse of Mrs. George Hansen was seriously damaged by fire on March 14.

PITTSFIELD, MASS.—Arthur N. Cooley is about to add to his establishment some plant, Orchid, Rose and Palm houses, at a cost of about \$2000.

PROVIDENCE, R. I.—The board of park commissioners has reported to the board of aldermen the imperative need of greenhouses for Roger Williams Park.

Books Every Florist
Should Have

We wish to impress upon our readers that all questions intended for this department must bear the name of the sender, not necessarily for publication but as a guarantee of good faith. We will endeavor to answer all questions submitted to us by subscribers, but we cannot recognize anonymous communications.

IDENTIFICATION OF PLANTS

When sending specimens for names correspondents should send some lower leaves of herbaceous plants as well as upper ones, and of all plants, flowers and seed vessels, if possible. In addition to this, it is stated whether it be shrub, tree, herbaceous, wild or cultivated, location where growing, it would often enable identification of specimens difficult to determine otherwise.

(77) Fruit of *Morus rubra* for Canning.—Will you kindly advise me as to whether the fruit of *Morus rubra* is practical for canning?—I. P., Penna.

—The fruits of *Morus rubra* are not popular when canned, owing to the sickly sweetish taste. It is merely a matter for personal judgment as to whether a person likes the fruit well enough to go to the trouble to preserve it. It is not very popular on the market, and seldom used for culinary purposes.

(78) Lilies for Easter.—Will you please tell me through your journal

what to do to get giganteum Lilies in flower for Easter, as I don't see any buds yet and am keeping them with 70° at night and 80° to 90° during the day, giving them water every day; they are from 8 to 18 inches high now?—A. K., New York.

—To have Lilies in bloom for Easter, the buds should be well in sight now. Your plants are backward, and we doubt our ability to advise you how to get them in bloom in time. Would sooner suggest the sorting of the most forward plants, keeping them in a warm house, watering with tepid water, and a light application of nitrate of soda once a week. The backward plants should be taken in a cool greenhouse and brought along gradually. Care must be exercised in the watering of these, as too much water will ruin them.

(79) Evergreens for Names.—From "Hudson River," N. J.

—So many Evergreens are nearly alike in foliage that it is more difficult to name them from sprigs than any other class of trees. *Retinisporas* and *Thujas* are very much alike in foliage, so are *Junipers* and *Abies*. It can only be suggested that the following names fit the numbers, but it is necessary to see the trees growing to be sure of the proper names: No. 1, *Retinispora*; 2, *R. pisifera aurea*; 3, *R. obtusa*; 4, *Retinispora*; 5, *Biota Orientalis aurea*; 6, *Juniperus Sabina*; 7, *Retinispora plumosa aurea*; 8, *Abies concolor*; 9, *Abies Pichta*. J. M.

(80) Growing Dahlias for Show.—Could some of your readers give me the proper way for growing Dahlias for show? Should the ground be manured heavily or lightly, or depend on feeding with liquid manure? Is it better to plant the old stock without breaking it up, or just one tuber and let one stem come up, and keep all the others pinched out? Any information will be much appreciated.—Hudson River, N. Y.

—Soil that will grow good Corn should produce fine Dahlias. Put a good coat of well rotted manure on soil and plough or spade it in, pulverizing well. Ordinary field grown clumps give good results where show flowers are wanted. Plant these about April 25, pinching the weak shoots out and leaving the strongest one.

This in turn should be topped, to cause low breaks. Cultivation should be strictly followed throughout the season, until the time of buds commencing to show, taking care not to disturb the top feeding roots. Staking and tying to prevent the stalk splitting and from being broken by the wind, should be taken care of. In cases of long drought water well, once or twice a week, keeping the crust of the soil pulverized. Weak applications of manure water, bone meal or other fertilizer, applied when flowers are showing, should improve the quality.

(81) Canaries, Goldfish, etc.—Can you tell me where I can get German Canaries and other cage birds wholesale, also gold fish, fish globes, etc?—W. A. L., Canada.

—From Hy. Bishop, Baltimore, Md.; Wm. Bartels, 160 Greenwich St., New York.

(82) Cuttings of *Begonia Gloire de Lorraine*.—I am receiving your valuable paper the Florist Exchange every week and think a whole lot of it. Having a greenhouse in my care I find some valuable suggestions among its copies. Have been wanting some rooted *Lorraine Begonia* plants but fail to find any advertised. Do you know where I can get them? Also, could you tell me the best method to put lime on greenhouse glass later on, to protect from the hot sun? Have used the whitewash brush but it doesn't make a neat job of it.—H. F. R., Penna.

—Rooted cuttings of *Begonia Gloire de Lorraine* are seldom advertised. Established plants in 2½" pots are much more satisfactory to buyers and growers. Advertisements of such stock will be found in our columns. We know of no better method than that of using the whitewash brush for applying shading to greenhouses, and if care is exercised a neat job can be accomplished. Many growers spray the lime on greenhouse roofs with a spraying apparatus, to do which the liquid is first strained.

(83) Express Company's Overcharges.—The Adams' Express agent in this city refuses to give me a discount of 20 per cent. on plants shipped to me, or shipped by me, no matter how well they are packed. I want to know if this agent is justified in this, and, if not, I would like to know where and how I can get restitution for overpaid expressage.—F. J. L., Conn.

—Would suggest that you lay your grievance before the Legislative Committee of the Society of American Florists.

(84) Disposition of Unplanted Bulbs.—What is the best disposition which can be made with Tulip bulbs single, double and Parrot, which are in good condition but which have not been planted? They were intended to be set in open ground late in Fall after the trade was past, but the ground froze up so early and there have been no break-ups so there has been no chance.—L. J. B., New York.

—Would suggest that the bulbs be planted in the open ground as soon as possible, as many of them will give blooms later. Or, the bulbs may be planted in flats and put under a bench in a cool house, where roots will form rapidly and flowers will come later in the season. Water well after planting, to settle soil and to help along root formation.

Rose Mrs. John Laing

I wish to ask, through your columns, if there is a Rose in commerce, in red or crimson shades, that is as hardy, free-blooming, full, and fragrant as the Mrs. John Laing.—L. R. C., N. J.

[Will readers please give their opinions?—Ed.]

New Orleans

With the approach of Easter the store windows of the florists begin to look especially attractive. Mrs. Rehm, at St. Charles and Napoleon aves. has a fine display of Azaleas, Hyacinths, Begonias, etc. C. W. Eichling, nice Lilac, Lilies and Azaleas. Mrs. Gruaz has an attractive display of Lilies, Narcissus and other flowering plants. P. Chopin shows Lilies, Azaleas, etc. James A. Newsham will have a fine lot of Lilies and Azaleas and a showy lot of miniature Hyacinths. A. Alost of Rose Villa has been bringing magnificent Lilies to town for some weeks past.

Spring weather is generally set in and the gardens are beginning to look gay with flowering vines and shrubs. CRESCENT CITY.

Syracuse, N. Y.

Bard & Davis have just erected another house, 150 x 20 ft., and have it stocked for the Easter trade with Azaleas, Roses and bulbs.

C. Phillips is erecting a new house at his place on Helen st.; it is 100 x 17 ft. He intends to remodel his whole plant and will start on another house as soon as possible. He has a good crop of Carnations for Easter.

Burt, the florist, has taken a large vacant store in Warren st. as an annex for Easter trade.

The weather is mild; the glass registering 50°, so all are taking advantage thereof to get their plants to the stores.

A car sent out by the Great Northern R. R., containing specimens of the products of Washington and Montana, was here for two days, and attracted much attention. The specimens of fruit were marvelous; I never saw anything to equal them in size, in fact they were too large, to my way of thinking, for ideal desert fruit, still, there is no doubt many would pay a fancy price for it just as a novelty. The exhibit was tastefully arranged, and the attendants were very attentive and painstaking in answering the many questions put to them.

II. Y.

Indianapolis

The supply of Lilies, in which there was predicted a shortage some weeks ago has, as is customary, increased in a wonderful manner. Every one will have an opportunity of disposing of all the Lilies possible in this vicinity, if he wants to purchase them, at \$12.50 to \$15 per 100.

The Roepke-Rieman Co. is offering unusual *Crimson Rambler* for Easter.

A. Wiegand & Son were busy last week with plant decorations.

Quite a few autos are to be decorated for the flower parade next week. The date (March 30) is an unfortunate one for the florists, and there is little competition for the business involved. A prominent department store is advertising artificial flowers extensively, and is making a specialty of decorating for this event.

The Smith & Young Co. is preparing to erect another house as soon as the weather permits.

August Roelker, of New York, was a recent visitor.

Word has been received from Thomas Knipe of Kokomo that he has a partner in the flower business; the wedding occurred in Detroit last week.

Bertermann Bros. Co. permitted the public to visit their East Washington st. establishment and view the flowers intended for the Easter trade. The stock there is in fine condition and many hundreds witnessed the display on Sunday. No stock was sold and no orders taken so that the stocks remain complete for their downtown trade. B. F. Hensley of Knightstown, Ind., is well prepared for his large shipping trade this Easter.

Martin Brandeish is cutting select *Mignonette*.

Benson, the florist, supplied a large order of Carnations for a department store opening last week.

Many of the hedges in this locality were severely injured by the cold weather this Winter. The outcome is not entirely to be predicted at this time, but it is thought that most of the Privet will start anew. I. B.

BATAVIA, N. Y.—W. W. Stroh, of the establishment of W. J. Palmer & Son, Buffalo, with his brother Albert L. Stroh, also a florist, will build some greenhouses 70 by 150 ft., at the junction of South Main and River sts. and operate them under the firm name of C. L. Stroh & Sons.

DREER SPECIALS IN HARDY PERENNIALS

Japanese Anemone.

ANEMONE JAPONICA. Many thousands of well-established pot plants.

Japonica Alba. Large snowy white. Doz. 85c., 100 \$8.00.

Japonica Rubra. Beautiful rosy red. Doz. 85c., 100 \$8.00.

Elegantissima. Semi-double satiny-rose. Doz. \$1.25, 100 \$8.00.

Prince Henry. Large double, deep pink. Doz. \$1.25, 100 \$8.00.

Queen Charlotte. Very large silvery pink. Doz. 85c., 100 \$8.00.

Rosea Superba. Delicate silvery rose. Doz. 85c., 100 \$8.00.

Whirlwind. Large semi-double, pure white. Doz. 85c., 100 \$8.00.

ACHILLEA, BOULE DE NEIGE. A decided improvement over "The Pearl," with flowers one-half larger; a valuable cut flower. Doz. 2.00, 100 \$15.00.

ANCHUSA ITALICA, DROP-MORE VARIETY. (Improved Italian Alkaner). One of the showiest and most useful plants for the mixed border or for planting between shrubbery that we know of; the plant grows from 5 to 6 feet high, producing throughout the season large but graceful spikes of beautiful blue flowers. Doz. \$1.50, 100 \$10.00.

AQUILEGIA. A splendid stock of the popular Columbine. All the leading varieties in strong plants. Doz. 85c., 100 \$6.00.

ARTEMISIA LACTIFLORA. A new plant, an introduction from China, grows 3 to 4 ft. high, with elegant dark green cut foliage and large spikes of creamy, creamy white, Spiraea-like, light and graceful flowers. Strong plants 30c. each, doz. \$3.

HARDY ASTER GRANDIFLORUS. The latest of all to bloom, frequently being in good condition as late as Thanksgiving Day; flowers large, of a dark bluish violet; always attracts attention in our grounds, being the last plant in flower. Strong plants \$2.00 per doz., 100 \$15.00.

ASTILBE ARENDSI, CERES AND SILVER WHITE. These are the result of crossings between Astilbe Davidii, Japonica compacta, Astilboides and Thunbergii. They are of strong, robust habit, growing from 2½ to 3 ft. high, in much branched panicles; the former with light rose colored flowers, the latter with silvery white flowers. Excellent subject for a semi-shaded moist position. Each 50c., doz. \$5.00.

ASTILBE GRANDIS. An introduction from China, growing from 5 to 6 ft. high; the panicles of white flowers range from 2 to 2½ ft. in length. Each 25c., doz. \$3.50.

DELPHINIUM BELLADONNA. The freest flowering of all the Delphiniums and the most valuable of any variety for cutting. Its beautiful turquoise-blue flowers appeal to all who see it. Plant these early and you will have a continuing display of bloom from June until freezing weather. We offer an exceptionally fine lot of extra heavy one-year-old plants. Doz. \$2.00, 100 \$15.00, 1000 \$125.00.

DELPHINIUM, DREER'S GOLD MEDAL HYBRIDS. Undoubtedly the finest strain of mixed hybrids ever offered, being seedlings of one of the best named collections and containing some wonderful varieties. Strong one-year-old plants. Doz. \$1.25, 100 \$8.00, 1000 \$75.00.

DELPHINIUM FORMOSUM. A splendid strain of this favorite and popular dark blue variety. Doz. 85c., 100 \$6.00, 1000 \$50.00.

GYSOPHILA PANICULATA FLORE ELENA. We consider this one of the most valuable Summer cut flowers we have, a plant which is destined to become a most important subject for cutting. Strong plants, doz. \$2.00, 100 \$15.00.

HELENIUM RIVERTON GEM AND RIVERTON BEAUTY. Two splendid perennials of our own originating, the former having flowers of old gold color suffused with terra cotta, changing as they mature to a wail flower red; the latter a pure lemon color with a large disc of purplish black. Doz. \$1.50, 100 \$10.00.

HEMEROCALIS AURANTIACA, AURANTIACA MAJOR AND FLORHAM. These are the three handsomest forms of the Day Lily, with very large trumpet-shaped yellow flowers. Doz. \$1.50, 100 \$10.00.

HEUCHERA, FIVE NEW VARIETIES.

Fantasia. Sulphur yellow, tinted green; tips of petals bronzy red.

Greendee. Bright red, tinted carmine; very vigorous.

Phile de Foa. Bright raspberry-red; very free.

Profusion. Ivory white.

Virginal. Large creamy white.

Each 35c., doz. \$3.50.

NEW IRIS GERMANICA.

King of Iris. A striking novelty, with flowers of perfect form; the standards clear lemon yellow, while the falls, which are very large, are a deep satiny brown, with a broad border of golden yellow. Ea. 50c.

Lohengrin. One of the strongest growers yet introduced, both foliage and flowers being of gigantic size, the flowers being nearly 5 in. deep with petals 2 in. wide, and of that beautiful pink color peculiar to the Cattleya. Each 75 cents.

Nihelungen. Flowers as large as the preceding; standards olive green suffused with sulphur yellow; falls deep violet purple suffused with creamy white on the edges. Each 75c.

Princess Victoria Louise. Standards pure sulphur yellow; falls rich plum color with cream colored edges. An entirely new and distinct combination of colors. Each 75 cents.

Rhein Nixe. Standards pure white, falls deep violet blue with white margin; will attain a height of 3 ft., with many branched stems. Very free flowering. Each 50 cents.

The collection of 5 varieties for \$2.25.

IRIS INTERREGNA.

(Introductions of Goos & Koenemann)

An interesting new type of Iris, the result of crossing Iris Germanica with I. Pumila Hybrida, and for which there promises to be a great future. They flower earlier in the season than the German Iris, and while the flowers are of the most approved and perfect form, they also combine large size with the most beautiful and decided clear colors. The foliage is dwarf and healthy, holding its freshness throughout the season; the flower stems which are about 18 inches high, hold the flowers well above the foliage.

Halfdan. The entire flower is of a pure creamy yellow, of absolutely perfect form.

Helge. Light citron yellow with pearl colored center, a beautiful soft color.

Ingeborg. Both standards and falls are pure white; the flowers are 5 in. deep and have petals 2 in. wide; a grand perfect flower.

Wallballa. Standards rosy lavender, falls claret red; a most distinct and beautifully formed flower.

Price: Each 50c., doz. \$5.00; the set of 4 varieties for \$1.75.

Wallballa. Standards rosy lavender, falls claret red; a most distinct and beautifully formed flower.

Price: Each 50c., doz. \$5.00; the set of 4 varieties for \$1.75.

Wallballa. Standards rosy lavender, falls claret red; a most distinct and beautifully formed flower.

Price: Each 50c., doz. \$5.00; the set of 4 varieties for \$1.75.

Wallballa. Standards rosy lavender, falls claret red; a most distinct and beautifully formed flower.

Price: Each 50c., doz. \$5.00; the set of 4 varieties for \$1.75.

Wallballa. Standards rosy lavender, falls claret red; a most distinct and beautifully formed flower.

Price: Each 50c., doz. \$5.00; the set of 4 varieties for \$1.75.

Wallballa. Standards rosy lavender, falls claret red; a most distinct and beautifully formed flower.

Price: Each 50c., doz. \$5.00; the set of 4 varieties for \$1.75.

Wallballa. Standards rosy lavender, falls claret red; a most distinct and beautifully formed flower.

Price: Each 50c., doz. \$5.00; the set of 4 varieties for \$1.75.

Wallballa. Standards rosy lavender, falls claret red; a most distinct and beautifully formed flower.

Price: Each 50c., doz. \$5.00; the set of 4 varieties for \$1.75.

Wallballa. Standards rosy lavender, falls claret red; a most distinct and beautifully formed flower.

Price: Each 50c., doz. \$5.00; the set of 4 varieties for \$1.75.

Wallballa. Standards rosy lavender, falls claret red; a most distinct and beautifully formed flower.

Price: Each 50c., doz. \$5.00; the set of 4 varieties for \$1.75.

Wallballa. Standards rosy lavender, falls claret red; a most distinct and beautifully formed flower.

Price: Each 50c., doz. \$5.00; the set of 4 varieties for \$1.75.

Wallballa. Standards rosy lavender, falls claret red; a most distinct and beautifully formed flower.

Price: Each 50c., doz. \$5.00; the set of 4 varieties for \$1.75.

Wallballa. Standards rosy lavender, falls claret red; a most distinct and beautifully formed flower.

Price: Each 50c., doz. \$5.00; the set of 4 varieties for \$1.75.

Wallballa. Standards rosy lavender, falls claret red; a most distinct and beautifully formed flower.

Price: Each 50c., doz. \$5.00; the set of 4 varieties for \$1.75.

IRIS PUMILA HYBRIDA, THE BRIDE.

This is without question the prettiest dwarf white Iris yet introduced. The flowers which are of ideal form, on first opening are of a creamy white color, changing to pure white as they mature. They are produced on stems from 10 to 12 in. high, which appear in great profusion early in May. Each 25c., doz. \$2.50, 100 \$15.00.

TWO HANDSOME NEW LUPINUS

Polypylus Moerhelmi. The most beautiful variety yet introduced; a combination of light and dark shades of pink difficult to describe and without a trace of magenta. Each 35c., doz. \$3.50, 100 \$25.00.

Polypylus Rosea. A decided improvement on the old variety, immense spikes of showy rosy pink flowers; a desirable acquisition. Each 20c., doz. \$2.00, 100 \$15.00.

PHLOX DIVARICATA LAPHAM (Perry's Variety). A wonderfully improved form of the popular Phlox Divaricata, of more robust habit, larger flowers and of a more intense color. Doz. \$1.50, 100 \$10.00.

Phlox de Foa. Bright raspberry-red; very free.

Profusion. Ivory white.

Virginal. Large creamy white.

Each 35c., doz. \$3.50.

NEW IRIS GERMANICA.

King of Iris. A striking novelty, with flowers of perfect form; the standards clear lemon yellow, while the falls, which are very large, are a deep satiny brown, with a broad border of golden yellow. Ea. 50c.

FOUNDED IN 1888

A Weekly Medium of Interchange for Florists, Nurserymen, Seedsmen and the Trade in General.

Exclusively a Trade Paper.

Entered at New York Post Office as Second Class Matter.

Published every Saturday by the A. T. DeLaMare Ptg. and Pub. Co. Ltd., Proprietors, 2, 4, 6 and 8 Duane Street, New York. A. T. DeLaMare, president and managing editor; Jas. H. Griffith, secretary; David Touzeau, treasurer. The address of the officers is the address of this paper. Short address: P. O. Box 1697, New York. Telephone 3765-6 Beekman

PRINCIPAL OFFICES

Chicago: Margaret T. Flint, room 614, No. 60 Wabash Avenue; tel. Randolph 2000. Office hours: 9.30 to 12.
Boston: Robert Cameron, Cambridge, Mass.
Philadelphia: A. H. Secker, 306 Wood Building, No. 34 So. 16th St.

Yearly Subscriptions.—United States and Mexico, \$1.00. Canada, \$2.00. Foreign countries in postal union, \$2.50. Payable in advance. Remit by Draft on New York, Post Office or Express Money Orders; if paid in cash please register letter.

The address label indicates the date when subscription expires and is our only receipt therefor.

Registered Cable Address: Florex, New York.

Telegrams.—Telegrams received in this office up to 3 p.m. Wednesday, containing changes in advertising, will receive attention for the issue of the Saturday following; likewise, telegrams having informative matter intended for our news columns will be received up to Thursday 9 a.m. News telegrams should be forwarded after 5 p.m. Wednesday and marked "Night Press Message, Collect." These will be forwarded by the Telegraph companies at their newspaper rate, providing the material so forwarded contains news for the paper.

S. A. F. and O. H.

Department of Registration.

As no objections have been filed, public notice is hereby given that the registration of the Rose Wm. R. Smith, by The Conard & Jones Company of West Grove, Pa., becomes complete.

H. B. DORNER, Secretary.

Stray Notes from Abroad

BY T. A. WESTON

Staging Vegetable Displays Effectively

Up to Date" and "Prize Supplement" and, as might be expected, all are unique, representing as they do the thoroughness in which this firm deals with all things. The Prize Supplement is an item that's worthy of note for, although many of our firms make a point of giving prizes at shows, none, to my knowledge, compile the year's results as do Burpees who, in effect, say to their customers, "We want to know how our seeds do, and we will pay for the information." Referring to the supplement in question I am curious to know just why exhibitors at American Fairs jumble their stuff up in motley heaps, and decorate them so freely with the Star Spangled Banner? Do they fear that the visitors will imagine they have got outside their country unless flags predominate. Some of these good people ought to get down Lenox way and pick up a few points as regards staging vegetables. It's up to seedsmen to give a few lessons in this particular line. The cut flower men and plant growers are doing their best to educate the masses in artistic arrangements. Why not tackle the humble vegetable, which can be made to look beautiful without the aid of hunting?

Traveling Greenhouses

The photograph of traveling greenhouses recently published reminded me of some years back when I used to visit a big Hampshire nursery where a number of these houses were in use. These, if I remember rightly, possessed pipes the full length, and these were fixed so that half could be emptied when not in use. The houses were put down to Tomatoes in early Spring, the ground between the extension walls being planted to Chrysanthemums. When the Tomatoes were finished, the ends of the houses were taken out, and the men then pushed the houses over the "Mums" which, of course, were undisturbed. These houses were about 100 ft. long and four or five men could easily set them running; as a lad I delighted in giving a shove on the plea that every little helped.

Providing the houses could be made to withstand cyclones, I should imagine these traveling houses would be useful to your Carnation growers.

The Florists' Exchange Novelty Number

Let me, if I may, offer a word of congratulation on your splendid novelty number. It is a magnificent production and surpasses anything of the kind issued over here. Several of our gardening journals make a point of having a Spring issue, but The Florists' Exchange special is worth the lot of them. The illustrations are particularly fine, and the Astors cause me to wonder whether the Chrysanthemum will be outclassed in the near future!

The New York Retail Stores at Easter

In visiting the many prominent retail stores of New York this week, we cannot but admire the various ideas and displays of plants as shown in the windows. It is conceded that the call will be for plants in larger numbers than heretofore, and that the Easter demand for them is increasing each year.

No new plants are on exhibition, but the old favorites have been grown so well that new ones are hardly looked for. Lilies and Azaleas are seen in quantity, and appear to be as popular as ever.

Azaleas Mme. Van der Cruyssen, Vervaneana, Prof. Wolters, Chas. Encke, and Niobe are the varieties most frequently seen. Hydrangea Otaksa, in standard and bush form, show the growers' skill, while the immense display of the various Rambler and Hybrid Roses gives the customer a wide range of plants to select from. Dorothy Perkins, Crimson Rambler and Lady Gay are as popular as ever, and these have, with few exceptions, been grown to a perfect finish. The color of foliage and flowers is all that could be desired.

Bougainvillea glabra is a popular plant, in sizes from 4" to 6" pots, as the colored bracts are so entirely different from the flowers of other plants and, if handled right, prove good plants for the house. White and purple Lilacs are strongly in evidence, while Spiraea Gladstone and Queen Alexandra the new pink variety, are seen in large numbers; this last named variety will prove more popular when the average grower can handle it satisfactorily.

Genistas in all sizes are in every store, the half standard form appearing to be as prolific as ever. One grower had Genistas grown on a basket shape wire frame, the yellow flowers forming a complete mass on top of the basket and all around the handle, while the body of the basket formed a receptacle for the roots.

Acacias, Ericas, Laburnums, Wistarias and many other old friends are displayed to advantage. The use of ribbon and chiffon on plants and made-up baskets forms quite a feature this year, every prominent retailer showing many plants decorated with ribbon to match the flowers, while artfully hidden in the foliage and other places are storks, chicks, eggs, rabbits, etc., all of which give an Easter effect and make for greater sales.

Made-up baskets are quite numerous, and these can be seen in any size, from the immense gilt basket containing Ramblers, Spiraeas, Hydrangeas, etc., to the small Birch bark box of Pansies; the liberal use of Pussy Willows in plants and baskets give a Spring-time effect.

The use of Laurel sprays to cover the tall naked stems of Rhododendrons and standard Roses is a feature often seen, giving a more finished appearance to the plant. Where plants are offered for sale singly the pots are decorated with crepe paper and tied with ribbon to match.

The outlook for a big plant trade is good, and, if the weather man sends a suitable brand for the last days of the week, we feel that retailers and others will report satisfactory business.

Cut flower conditions are peculiar; in this line everything depends on the weather and, while there is apparently plenty of stock to be secured, the demand at present is such that the retailer gives all his attention to plants, leaving his cut flower orders till the last moment.

In the wholesale market, many shipments of held-over stock were seen the forepart of this week, this fact disgusting buyers who, when such conditions confront them, rely more and more upon customers taking plants in preference to cut flowers. In fact with many retailers this has been the rule, and it is steadily increasing, to the detriment of the cut flower grower.

Stock of all kinds is generally in good condition. The past few days, which have been very warm, have increased the output so that American Beauty and other Roses have developed rapidly, and no one need fear any shortage in this respect. The Lily problem is not a very serious one, and while the stems may not be as long as desired, from present outlook there will be enough good flowers to go round at a fair price.

Carnations are now in fine form and it will be a surprise if the call for these does not clean up all in sight, even at moderate prices. Violets are of poor quality, small and off color, and the low price quoted on hundred thousand lots does not augur well for the top price reaching the \$1 mark. They will be plentiful and street men have already booked heavy orders.

Callas, bulbous stock generally, and all other flowers are in good supply, and a general increase of prices is looked for.

English Horticultural Notes

Prologue After an interval of several weeks, I once again am prompted to write and tell you how we in "Merrie England" are progressing. To go into details might make a lengthy, but not an altogether interesting story. One of the great outstanding features of interest was the presentation of his portrait in oils to Mr. Harry J. Veitch, whose name is a household word in every land where horticulturists are found. The presentation was recorded fittingly in 'The Florists' Exchange' on the occasion of the presentation. A very large sum of money was subscribed by many friends, so that two paintings were commissioned, and every subscriber had a huge photogravure in addition, beyond all of which there was a dinner to each subscriber of over one guinea (about \$5). * * * The weather for many months past has been dull and more or less wet, and we are anxiously looking forward to sunshine and brightness. But the seed trade, notwithstanding all drawbacks, has had a very good time. Houses like those of Suttons, Webb and Clibrans, as I have been told, have had an exceptionally good season; and the hardy plant nurserymen have also had nothing to complain of. Quite a number say that stocks, especially of Roses, have been sold down; for the almost total absence of severe or prolonged frost has allowed planting to proceed all the Winter.

The Florists' Exchange Novelty Number I have been looking with envious eyes on your own Spring effort. Certainly you bring the past year's introductions prominently and compactly before your readers; but I am not sure that such a plethora can be "taken in" at one, or even two sittings. Of course, the man interested in vegetables will scan his particular pages, and leave the others, and so on; but the question arises, are these reputed novelties really an advance on existing things, and where is the evidence? Because fancy prices for doubtful newcomers make men very cautious. The whole thing rests upon the integrity of the seedsmen; yet, as one of our own growers confessed just recently, "We must live by the way," and the introduction of novelties at higher prices than can be got for older varieties helps the exchequer materially. The question of the introduction and buying of novelties opens up a wide field for discussion, and I shall not attempt the task now. The keenness of business makes it necessary for the seedsmen to keep ahead, and at least to appear always "on the move" in the matter of bringing forward new flowers or vegetables; and, on the other hand, the grower for market finds it equally imperative to lay hold, at the earliest moment, of anything which is even half a point in advance of his present stock. And when all is said and done, it pays a grower to buy and test a good many dollar's worth of new things every year, if, out of that, he finds one sterling acquisition that will bring him in the gold. Looked at from the point of view of a useful, compendious, compact guide to all the leading novelties of good-class seed houses, I cannot but think the "Novelty Number" one of the best of the year, especially as growers must now comprehend that it is an annual edition which they can trustfully wait for and rely upon.

Roses and Carnations

Two new Carnations have appeared, or rather many have appeared, for raisers are now busy, but only two may be mentioned. One is Mr. Burnett's Mrs. Tatton, a large flower, rich cerise with white edges. The other is R. F. Felton, a very full rich satin pink, also by Mr. Burnett (of Guernsey). We shall hear more of them. The first named has been certificated. A new and handsome long-stemmed Tea Rose named Lady Hillingdon obtained the coveted award of merit, on March 8, from the R. H. S., London, when shown by Geo. Mount & Sons, Ltd., Canterbury. It is a handsome golden salmon flower, beautifully smooth and solid in the petal, and of long, pointed shape. The award was given to it "as a forcing variety." It is worthy of attention.

A Dahlia Conference

Our National Dahlia Society has taken a new lease of life; and as conferences have been fashionable over here, this Society convened a meeting last week, March 4, at which about 50 attended, and papers were read on the history, cultivation, selection of varieties, and exhibiting of the Dahlia. I shall summarize the points of the papers in a succeeding letter to you. The secretary of the Society is E. F. Hawes, Royal Botanic Garden, Regents' Park, London.

A New Rehmannia

Nothing of first-rate importance on this side fails, I think, to be chronicled in The Florists' Exchange. Some time last year I mentioned the new dwarf white-flowered Rehmannia Henryi. Messrs. Veitch got this from Kew and at once crossed it on to R. angulata. The result has been to greatly dwarf the offspring, which takes after angulata in the color and shape of the flowers, and after Henryi in the habit of the growth and the foliage. It ought to be worthy a place alongside R. angulata, because of its dwarf and branching style of growth. Its name is Rehmannia J. W. Briscoe—after the man who made the cross.

March 26, 1910

London Exhibitions London is to be the gayest metropolis in the world during the Summer that lies in front. The colonial premiers and other delegates are to be here in conference, and there is to be a great London pageant, a military pageant, an international horse show (at Olympia), the Japan-British Exhibition, and half a dozen other events of only slightly less importance. All this means the outflowing of money, and we do hope for a bright warm Summer. Horticulture and flowers play a very large part in all these exhibitions, and the press is being liberally supplied with puffing paragraphs about the Japanese gardening and gardens; presently we shall also be hearing of the floral decorations at Olympia (of which I gave an extended account in the EXCHANGE last year). Yes, the florist and the gardener play a great part in these days, and they must make sure they get their due profits out of it all.

Alleged Corrupt Practices A case of the very gravest importance to the whole horticultural world in this country, is now before the law courts. A long-established general nursery firm is standing trial against charges of having accepted an order from a gardener for a case of their own insecticide, a material they do not possess, and which, of course, they could not send, but at once (so the charge runs), the firm sent a case of whiskey for the gardener's own use, making the invoice out to his employer as "300 Tulips=30s. (\$7.20)". This is the bald outline of the charge of which, if it is of interest or value on your side, I shall send a fuller account when further developments have been made. All eyes are upon it here.

The King Construction Co. In the course of a visit to some of the great market gardening establishments of Middlesex recently, I saw a King Construction Co.'s house, built of American material on the true American plan. It is 200 ft. long and 30 ft. wide, and though absolutely the first in England, it will not be the only one for very long. The owner, a keen and cautious grower, as well as all who have seen it, like its lightness, elegance, soundness, and general suitability. Mr. Page, the largest grower of Liliums for market in this country, thinks that 2½ per cent. might be allowed for the depreciation in annual value of this house, as compared to 5 per cent. with the ordinary British type of house. I shall carry over my notes about Mr. Page's nursery till next I write.

J. HARRISON DICK.

Working Another Man's Thunder

Editor The Florists' Exchange:

In the line of what appeared in last week's issue of the EXCHANGE under the above head is a little experience of my own in something of the same nature. In preparing a catalog, a great deal of care had been given to advise prospective customers on matters that might aid them to have success with my stock. It was quite lengthy, and was contained in many paragraphs, as the subjects seemed to require.

On receiving the catalog of a firm engaged in the same line, I was astonished to find the whole of the matter copied, word for word, paragraphs, headings and all. To say I was angry is putting it mild. In answer to a letter calling the party's attention to this abstraction he wrote back that he had not taken them all from mine, that others had the same as I had, and that he was in no ways dependent on my catalog for ideas. I replied that, nevertheless, he had copied all mine, and that as I had no time to write a preface to his lists he would be without mine in future. A year later he wrote for my catalog, to which I made no reply. Recently, he wrote again when I replied that I would send him one on his promise not to copy from it "as you did before." He replied that he would promise and I have sent him a catalog.

PENNA.

Preserving Wood from Rotting in the Ground

A method for preserving boards and posts from rotting in the ground is recommended by a correspondent in Der Handels-gaertner, a German florists' trade paper, as follows: The lumber to be treated is placed into good-sized receptacles and impregnated for 8 to 10 days

with a 2 to 3% solution of chemically pure sublimate of mercury. Thereby the albuminoids in the wood, which are the sole food of the bacteria which causes the rotting, are rendered insoluble, thus the bacteria can no longer attack the wood. Boards and posts thus treated are said to last almost indefinitely, as is proved by grapevine posts which have been in the ground for 25 years and over. Wood so impregnated is not in any way injurious to plant growth. This method is called Kyani-zation, after its inventor, the Englishman Kyan. The Kyani-zation Institute of George Reichardt, Jr., of Nierstein-on-the-Rhine, Germany, will send circulars free on request.

Joseph W. Moulton

Joseph W. Moulton, for many years engaged in the nursery business and the raising of small fruits, died at his home in Hampton Falls, N. H., March 12, aged 84. He leaves a widow and two sons.

John Booth,

John Booth died at his residence on Rosemeath ave., Newport, R. I., on Saturday last. He was one of the old school of English gardeners who knew his business, and was noted as a fruit grower; his Grapes, Peaches and Nectarines were always of the highest quality. He was for many years in charge of the gardens and grounds of the late Governor William Beach Lawrence on Ochre Point, and was continued on after the estate had passed into the hands of its present owner, James J. Van Alen. Leaving there, he took up the cultivation of hothouse Grapes for the market and this occupied his time until his death; he was in his 73d year.

He was an estimable man. He leaves, besides a widow, four daughters and three sons, also nine grandchildren.

The funeral services at his late residence, on Monday last, were conducted by Rev. Emory H. Porter, D. D., rector of Emanuel Episcopal Church, and many members of the craft were present to show their last mark of respect.

ALEXANDER MACLELLAN.

New York Florists' Club Banquet at Fifth Avenue Restaurant, March 17, 1910, with Members of the American Rose Society as Guests

Rose Dorothy Perkins
White Variety

As grown by Thos. Roland, Nahant, Mass., for Easter. Mr. Roland thinks this is the best white Rose there is for forcing for Easter.

Dinner of the New York Florists' Club

The twenty-third annual dinner of the New York Florists' Club took place at the Fifth Avenue Restaurant, 24th st. and Broadway, New York, on Thursday evening, March 17.

The Club had as its guests the visiting members of the American Rose Society and these with the Club's own members and their guests made the attendance quite large. A feature of the gathering was the presence of ladies, and it would be hard to say which sex took the greatest pleasure out of the occasion. The company met in the foyer of the big restaurant half an hour or more previous to the commencement of the dinner, where the dinner and reception committees performed their good offices, and President A. L. Miller held an informal reception. The tables were located throughout the big dining hall without any particular regard to arrangement. There were round, square and oblong tables, seating from eight to twenty persons, and at each was a merry party. The table decorations were fine, Roses, of course, predominating. The sight from the entrance was a magnificent one—a big crowd of well-dressed men and handsomely gowned women, all more or less acquainted with one another, the beautiful dining hall, practically new and embodying the latest ideas in architecture and decorations, the busy waiters all under the command of sectional heads and working in unison by a well-arranged system. The orchestra, in the music loft over the main entrance, played many fine selections during the dinner. The menu was an excellent one, and a neatly printed menu card ornamented with a small dinner favor in the shape of a bow of ribbon, one end of which was a miniature United States flag, the other an Irish emblem in honor of St. Patrick's Day, was at the plate of each guest. As a souvenir each lady received a pretty little silver wall calendar, with the compliments of the restaurant management.

After coffee and cigars had been passed Toastmaster Patrick O'Mara called the gathering to order and made a short address. He referred to the occasion when the Club entertained the American Carnation Society and there was only one lady present, and contrasted that occasion with the present one, when so many ladies were in attendance, a fact which showed that the Club had not only grown in membership but in respectability. In the old days, he said, a man had to go home to his wife and apologize for having been present at the annual dinner—now that man brought his wife with him to look after him, and was pleased with the innovation. He then introduced President A. L. Miller, who responded to the toast "Our Guests."

Mr. Miller said:

"If I could express my feelings, I would say a good many kind words of praise to you. Little did I think several months ago that I should have the honor to welcome the American Rose Society and to make its members feel at home. It is needless for me to say that the New York Florists' Club extends a hearty welcome to all. Gentlemen, you are always welcome and the more often we meet our brother florists from other sections of the

country and talk matters over, let it be the Rose, Carnation, Sweet Pea or any other society connected with our business the better. Let us be neighborly and friendly and our work will be a great deal lighter. Of course we must not forget the S. A. F., the foundation of all our societies, and I hope that we shall all meet at Rochester in August next. I told President Frank Pierston that one of the largest locomotives in New York City would not be strong enough to carry the members of the New York Florists' Club to the Convention City. Now, ladies and gentlemen, when I was elected president of the Club I promised to do all the work that was piled upon me, but stipulated that I should be excused on the talking end. As I look over the lengthy program and see the names of such distinguished orators, who certainly can talk and whose talks I know you will enjoy, I feel I must give way to those gentlemen. I trust that we shall have, in the near future, the pleasure of entertaining you again, and with a rising toast we drink to the health, prosperity and long life of the American Rose Society."

The Toastmaster then called for the Club's ex-president, Harry Turner, to whom was presented a beautiful diamond pin, the gift of his friends in the Club, as a recognition of his services during his term of office. Mr. Turner in accepting the gift made a short address expressive of his loyalty to the Club, and his readiness at all times to help to advance its work.

Mr. O'Mara next introduced Professor John Craig of Cornell University with the remark that one way in which the florist could receive much benefit was through a closer connection with the experiment station.

Prof. Craig then spoke to the toast "Floriculture from the Standpoint of the Experiment Station."

He drew attention to the significant fact that the Empire State led all others in the extent and variety of horticultural products. She stood first in the annual output of deciduous fruits; first in the value of nursery products; first in the output of vegetable crops; first in the extent of land covered by glass for the forcing of vegetable and flower crops, and first in the value of her floricultural products. She occupied a proud and enviable position in the horticultural world. He then commented upon the peculiar fact that while most of the agricultural industries were well cared for by the State through its experiment station activities, floriculture was but weakly represented. In looking for the reason it appeared that the responsibility of this condition rested primarily upon the florist himself, for the manner in which the other industries was represented was due in large measures to the aggressiveness of the men in the field. That the glass house equipment for the experiment station research was painfully inadequate at the New York State College of Agriculture in the State which claimed floriculture supremacy was a reflection upon the progressiveness of the men in the field. The speaker cited the conditions existing in Illinois where the State Florists' Association not only secured a fine range of commercial houses for the agricultural experiment station but secured also a grant of \$10,000 to be used in conducting experiments in floriculture. This illustrated a splendid type of co-operation between florists and research officers. The germ of a similar movement had been started in New York by the action of the Florists' Club of Buffalo, which had resulted in the introduction of a bill in the New York Legislature providing for an appropriation to cover the cost of erecting greenhouses to be used in solving problems in commercial floriculture. These houses, he said, are to be located at the New York State College of Agriculture at Ithaca where the glass structures already in use are devoted to laboratory and education work. The movement had already received the endorsement of the Rochester Florists' Club and the support of the executive committee of the National Society. He raised the question as to the position and attitude of the New York florists in promot-

ing such a movement. The work was theirs and should be promoted or discouraged according to their own views and desires. He had no doubt that all would see a closer co-operation between the experiment station and practical florists in the future than had existed in the past.

The toast "Horticulture as an Educative Force" was the next on the list. Secretary Geo. V. Nash of the Hort. Soc. of New York was to have responded to this toast, but was called from the gathering. His address, however, was left with the toastmaster and was as follows:

"Mr. James Wood, in his address before the American Rose Society this afternoon, defined horticulture as the cultivation of a small enclosed area, thus distinguishing it from agriculture, which is the cultivation of the field or large area. It seems to me that the term 'horticulturist' may also be applied to those who cultivate plants in greenhouses, though this is sometimes referred to by the more restricted term of 'floriculture.' I know of no art or science which brings one more in touch with Nature than does horticulture. Here one is brought into direct contact with mother earth and with the forces of Nature—those forces acting from within the plant, which make it what it is, and those acting from without and with which the plant has to contend to maintain its existence. The art and science of the horticulturist is here brought into play to establish an equilibrium between these opposing forces. To do this intelligently necessitates on the part of the horticulturist a careful study of the nature and habits of each plant, its strength and constitution, and the peculiar surroundings which it demands to develop the best that is in it. Because a Cactus plant thrives in the desert is not a sufficient reason for baking it when bringing it into the artificial conditions of a greenhouse. In the desert the plant can send its roots as far as necessary to secure sustenance, but in the greenhouse it is enclosed in a 6-in. pot, perhaps, and its sole supply of nutriment is confined to the small quantity of soil contained therein. In this case the equilibrium must be established by furnishing the plant with water whenever the soil becomes dry, although in the desert it may not get rain for months. Other instances of this nature might be cited. But what is a horticulturist? Any one who supplies the needs of a growing plant, be he rich or poor, great or small. It matters not whether he be the man of large affairs who operates upon a large scale; or the man or woman who tills a small garden, be it ever so small, perhaps only a corner in the back-yard in the city; or the little child who has only a few plants in pots or in a window box, some tiny resident, perhaps, of the lower East Side, whose window box is his only idea of the green world; each is a horticulturist, differing only in degree, not in kind. This brings me to the topic upon which I am expected to address you this evening. 'Horticulture as an educative force.' So wide is the scope of horticulture along this line that it would be impossible for me to attempt to cover the subject within the limits of a short address. I will therefore confine myself to one small corner of it, its application to the children. It is, indeed, a small corner, but one of vast importance, for the child is the future man, and it is here that we should begin to make our future horticulturists. Let the child imbibe a love of horticulture and of plants with his early experiences, and for this reason the school garden seems of so much importance. As you are aware this movement has attained considerable force in this city. Not only school gardens have been established, but private parties have taken up the idea of the child's garden. It is only necessary to refer to the work along this line done by Mrs. Parsons, who has ably conducted gardens of this nature. The movement is wide-spread and its importance apparently recognized. I am informed that one of our neighboring suburbs, Tarrytown, is also working along this line and is desirous of establishing school

Exhibition of the American Rose Society, New York, March 16-18, 1910. A. Farenwald's Prize Winning Vase of Richmond at Left. Entries for Moore, Hentz & Nash's Cup at Right

gardens; and now that an active horticulturist of that place, a man who *does* things, has been elected president of the Council of that town, we can expect things to move somewhat in this direction. Work of a similar nature has also been done at the New York Botanical Garden. Some years ago the director of that institution, Dr. N. L. Britton, was approached and a request made to give the children of grades 4B and 5B, of the Borough of the Bronx, a series of lectures on Nature study as applied to plants. One of these was on the cultivation of plants, and this naturally fell to my share. This lecture has now been given to over 2000 children every Spring and Fall for several years. The children range in age from 10 to 12 years. The lecture deals with only the mere rudiments of horticulture: how to sow seeds and make cuttings; the uses of the various organs to the plant; and simple instructions as to how to supply the needs of growing plants and their care. It is purposely made simple and is profusely illustrated with colored lantern slides. After a lecture the children are dismissed in groups and each group is shown the actual objects of which they have heard during the course of the lecture. Thousands of children have been reached in this way, and how far-reaching may be the results none can tell. If you wish to make horticulture a great educational factor begin with the children, for they are the future men and women, and the future of horticulture rests with them.

F. R. Pierson, president of the S. A. F. & O. H., was the next speaker, and his appearance was the signal for great applause. Mr. Pierson's subject was "National Horticulture," one which he handled briefly but to the point. Naturally his topic led him to the work of the S. A. F., some of which he detailed in demonstration of the fact that his Society was fully alive to the interests of national horticulture.

August F. Poehlmann, president of the American Rose Society ably responded to the toast honoring his society. He spoke of its work and its great field, of its usefulness in guarding the interests of Rose growers and of the support it was receiving from other societies. He asked the support of all for his successor in office, and predicted the combination of exhibitions in Boston next year would be the grandest exposition of horticultural products this country had ever seen.

W. A. Manda responded very happily to the toast "Our Night," and at the conclusion of his address was loudly applauded.

The next call of the toastmaster was for Richard Connel, of the Dutchess County Hort. Soc. who made a lengthy but most witty response to the toast "The Ladies—God Bless 'Em."

The musical program was much enjoyed. Miss Sabery Dorsell sang "The Pearl of Brazil" and "Come Back to Erin" most charmingly, and received for both well deserved encores. Russel Kelly gave an admirable cello solo. Miss Barnett gave one of her delightful recitations, and Master K. J. Casey simply "brought down the house" with his character songs. Other soloists were Emory B. Brante, Miss Daisy Pollock, Maurice J. Hayes, and Edmond A. Jahu.

The dinner was a huge success, and it was long after the "wee'est sma' hour" before the last of the guests departed.

and it is hoped the course may be more largely attended next year. The registration for this course included: Albert C. Bradstreet, Topsfield; Lydia A. Bowser, Colasset; George A. Gray, Beverly; Edward L. McCarrall, Waban; John L. Killam, Buxford; Willard M. Pease, Monson; L. E. Torrey, Southbridge; William Seace, Pittsfield, all of Mass.; Albert Lewis, Rockaway, Long Island, N. Y.; Edwin G. Scott, Garfield, Washington; Edwin R. Selkregg, North East, Pa.

While it is difficult to arrange a course which will meet the needs of all classes of students, the aim is to give the beginner as much elementary information as possible without neglecting those who are more advanced, and at the same time to make the work sufficiently scientific to satisfy the needs of those who have been longer in the business.

The talks by the various practical men who have generously assisted in the course have again proved most valuable. Aside from the general lectures of the course the following spoke on some special feature of glasshouse work: F. J. Elder, heating expert, Lord & Burnham Co., Irvington-on-Hudson, N. Y., on heating; Eber Holmes, Montrose, on Rose Culture; W. H. Elliott of Brighton on the same subject; Peter Fisher, Ellis, Mass., on the development of the Carnation; M. A. Patten, Tewksbury, Mass., on cultural methods for the Carnation. E. O. Orpet of South Lancaster, Mass., gave a very fine talk on Orchid growing and exhibited a large number of varieties in bloom; E. J. Canning of Northampton, Mass., spoke on the work of the private gardener. Aside from these speakers, C. H. Totty of Madison, N. J., gave a very excellent talk on Chrysanthemums. J. K. Shaw of the horticultural division of the Experiment Station spoke on the principles of plant breeding, and H. D. Haskins of the chemical division of the Experiment Station gave an instructive talk on fertilizers for the greenhouse crops. Edward MacMulk of Boston was scheduled to speak on the retail trade, but was prevented from doing so because of sickness.

All the young men had positions when the course was completed and several more might have been placed. The demand for men was greater than the supply.

Some important changes are planned for the course

next year. The morning will be occupied in class-room work and lectures will be given on such subjects as the management of greenhouses, greenhouse crops, fertilizers, insects, diseases, and the like. In the afternoon the class will be divided in two sections; one section is to consist of those students who have little knowledge of floricultural work, and the time will be spent in practical work in the greenhouses; the other section will consist of men of considerable practical training, and the afternoon will be spent on assigned reading or some special branch of research. It is hoped in this way to meet the needs of all taking the course.

The Saturday observation trips proved especially profitable. The following are among the ranges visited: H. W. Field's, Northampton; A. N. Pierson's, Cromwell, Conn.; The Montgomery Co.'s, Hadley; Smith College Conservatories, Northampton; Mt. Holyoke College Conservatories, South Hadley; Waban Rose Conservatories, Natick; Wm. Nicholson's and S. J. Goddard's, Framingham; Butterworth's, South Framington; Peter Fisher's, Ellis; Geo. Sinclair's, Holyoke, and Wm. Sim's, Cliftondale. Full notes on each of these trips were required.

The Massachusetts Agricultural College stands ready to assist the State florists in every way possible; the mission of the floricultural department is to be of service to the practical growers and retail men. This can be accomplished only through the most cordial cooperation. The support the college is receiving from these practical men is very gratifying.

Echoes of the American Rose Soc. Exhibition

The better showing made in the classes for pot Roses was a feature of the 1910 show. H. C. Steinhoff of West Hoboken, N. J., was a particularly strong competitor, carrying off most of the honors.

The Julius Roehrs Co. of Rutherford, N. J., exhibited a magnificent specimen plant of the Wichuraiana Rose Hiauwatha, for which a first prize was awarded. The company also took a prize in the class for six climbing Roses. In the latter exhibit was seen, probably for the first time in a New York exhibition, the Polyantha Rose Mrs. F. W. Flight, a 1905 European introduction. It is a very bright, strong pink with white center, semi-double, flowers carried in large trusses. Tausendschon, which stood next to it was quite eclipsed in contrast.

The closing hour of the last night of the exhibition was enlivened by the counting of the ballot for Miss Hammond's prize, for the handsomest staging among the Rose exhibits. The votes were confined to lady visitors, and the number cast was quite large, covering about everything in the hall from a pot of Marguerites to a choice Orchid. After the rejected ballots had been determined the count resulted in favor of the exhibit of Richmond Roses of Adolph Farenwald, Hillside, Pa.

The many and fine exhibits of the Rose My Maryland showed that this variety could be staged in excellent form for exhibition. Nearly all the vases of it were in splendid shape on Saturday morning and doubtless remained in good condition for a day or two longer. The same may be said of the condition of many of the other exhibits.

The poor showing in the American Beauty section was a great disappointment. While the reason advanced for the paucity of exhibits was that the variety was at present "off crop," there were many at the show who declared that the New York wholesale market was all week receiving better blooms for disposal through the usual channels. Was it a case of want of nerve?

Much interest was taken in the competition for the Moore, Hentz & Nash cup, for the best six Roses, American Beauty excepted, two of which must be white and four red, pink or yellow. There were 13 entries, rather a small showing when it is considered that it was a class to fit almost any Rose grower, however small. The U. S. Cut Flower Co. of Elmira, N. Y. carried off the cup with two flowers of Ivory and four Chatenay, all on stems about 4 ft. long. We present a picture in this

Short Course Students in Agricultural and Horticultural Subjects at the Massachusetts Horticultural College, Winter Session, 1910

The Massachusetts Agricultural College

The short course in floriculture closed March 11. It is regretted by the faculty that so few took advantage of the excellent opportunities to avail themselves of practical and theoretical information along floricultural lines,

There is to be noticed on this page a reproduction of a cartoon which appeared in the New York World of March 20, and which was made at the dinner of the New York Florists' Club, whose guests were the visiting members of the American Rose Society. In the

Among the Growers

We publish herewith a first-class picture of the Blue Rose from a photograph sent us by the growers, Messrs. Ellwanger & Barry, the product of one of their green-houses. This Rose has been repeatedly mentioned in these columns, but this is the first opportunity we have had to illustrate it. As grown in the E. & B. establishment, these plants average about 4 ft. in height when in bloom, and are covered with conspicuous clusters of violet blue flowers. The buds as they open might be described as violet red, but when fully expanded they assume a violet blue color. The plants were grafted on Manetti stocks in Jan., 1909, and have made good growth since then. The massed effect of the color is unique and striking and, as it is a Climbing Rambler its effect on a pergola or trellis, at a short distance, will be pleasing. A remunerative demand for this Rose is expected.

a mean temperature in a series of years for the five months between October and May of about 46°. In the Summer months, from May to October, the average temperature, during a like period, has been about 63°. These temperatures you will note are averages for a series of years. "Cold snaps," which seldom record lower than from 10° to 15° of frost, occasionally occur in Winter and the "hot spells" of Summer, which range from 85° to 90°, and sometimes a few degrees higher, have been, of course, included in arriving at the averages I have quoted.

Rainfall

Western Oregon and Washington are frequently credited with an excessive rainfall; in fact, I have heard strangers claim that "in Oregon it rains thirteen months in the year." As a matter of fact, the precipitation at Portland does not exceed 46 inches per annum, and in a series of years it has not reached this average. Perhaps, to people who visit us in Winter, it may appear to rain excessively, because the bulk of our rainfall takes place during the six months from October to March. I have noticed that when we have an unusually long rainy Winter generous crops of grain, fruit, and all the products of the ground result, and, while I have never seen an analysis of our Oregon Winter rain-water, I believe it is one of the best natural fertilizers, and laden with plant food by a beneficent Nature.

About Roses

With such a climate as I have briefly outlined, with soil unexcelled, and with a people who are enthusiastic lovers of the Rose, is it surprising that our country should have become celebrated for its Roses? The following motto of the American Rose Society is with us "a condition and not a theory."

"A Rose for every home,
A bush for every garden."

This sentiment is good, but in my opinion far too modest, and I hereby beg to make a motion to amend and substitute:

"Roses for every home,
Roses for every garden."

The motto of the Portland Rose Festival Association is:

"Roses fragrant, Roses rare,
Roses, Roses, everywhere."

and this is consistent with the feelings, opinions and practice of our people.

Wild Roses

Wild Roses of many species are indigenous and flourish in luxuriant foliage and wealth of bloom. The fragrant Sweet Brier, vigorous and strong, in many places lines our country roads. In some districts of deep alluvial soil the Swamp Brier attains a height of 20 ft. or more. High up some mountain slope we find wild Roses rioting amid the Huckleberry, Sallal and other native shrubs.

The late Rev. Dean Hole, a great rosarian and one of the originators of the National Rose Society of England, in his invaluable "Book about Roses," says in effect that wherever wild Roses grow, Rose culture may successfully be practiced. Without a doubt there are in our soil, climate, and surroundings qualities peculiarly conducive to Rose growing. Eastern people are often surprised at the size, perfection and beauty of Roses in this country. To emphasize this assertion I will quote the opinion of an expert, well known to many of you, who visited Oregon in 1903.

Portland:—An Expert's Opinion

"Portland is the only place I have struck since leaving home that I would like to remain in." This was the remark of E. G. Hill of Richmond, Ind., a horticulturist well known to most Rose growers of this city, who arrived here a few days ago on a tour of the Coast. He had heard of the beauty of Portland Roses and the first thing he did after getting here was to look about town and visit some of the principal growers. He was fortunate in arriving just after the rain, and so found the Roses in good condition. He was taken out by James Farbes to visit Riverview cemetery and other places, and so had an opportunity to see the best Roses to be found in Oregon. He was delighted, and said he had never seen such beautiful Roses before, though he had traveled through England and France when the Roses were at their best, and had come through southern California on his way here. Of one gentleman's flowers, he said: "I have never seen such a hedge of La France Roses, even in France, and as for the Caroline Testouts, the man who originated that variety never had any such on his place." The foliage on the trees and shrubs in the cemetery and the vivid green of the grass Mr. Hill considered perfectly wonderful.

Size of Roses

I think it was Oregon, and perhaps Portland, that first realized all the good characteristics of that fine variety "Mme. Caroline Testout," which is now, probably, one of the five most popular Roses in existence. It fairly revels in the warm moist days of early Summer and responds to intelligent and generous treatment, with almost continuous bloom from June until the frost of Winter. When I was an amateur, or, as we say here, "a Rose Crank," and before joining your professional ranks, I had the time and inclination to develop the

best I could get out of my Rose garden. You know the "Paul Neyron" was up to a few years ago, and perhaps is yet, the largest Rose in cultivation. I have seen it credited in your Eastern catalog with this characteristic, and further described as "sometimes attaining 5½ to 6 in. in diameter." In Portland, in my own garden, I have cut this Rose, not once, but often, measuring 11¼ in. in diameter. Perhaps you will think this is a Rose story. It reminds me of a Portland friend of mine, Judge W. —, now passed across to the happy hunting grounds, beloved of all good sportsmen and Rose lovers.

Some years ago the judge and I were fly fishing on one of Oregon's lovely streams. A little distance ahead I saw him scientifically play, and shortly land, a fine trout, calling out excitedly "Sibson! a 3-lb. beauty." While saying this he had taken from his pocket his scale and hooked it in his "beauty's gill," but lo! it registered only 1¼ lbs. Throwing his scale far into the stream, he cried, "Darn this scale it never is right." I beg, however, to assure you that the foot rule that measured the Roses above referred to was correct. While the size attained as mentioned was exceptional, and was the result of constant and intensive cultivation, it indicates, relatively, the size of flowers that can be realized in our climate and soil.

Evolution

Ever since I have known Portland, when her population was only about 9000, her people have been devoted to Roses, and I believe the same applies to every town in western Oregon and Washington.

Nearly 20 years ago excellent Rose shows were held in Portland. In those days the ladies of the city took hold, and by united effort and a good executive, exhibitions were held that would have been a credit to much larger places. The love of Roses thus encouraged rapidly increased and every new home builder became a lover of the Rose.

In 1901 the Hon. F. V. Holman, a leading attorney and noted amateur rosarian, suggested that Portland be christened and henceforth called "The Rose City." The suggestion quickly "took" and today not only in this country but throughout the civilized world Portland, Oregon, is identified with fine Roses.

In 1905 the Lewis and Clark Exposition attracted, I think, some two million people to this city, and stories of the reputation and beauty of her Roses were disseminated far and wide. About two years later the Portland Rose Festival Association was organized, and annually in June there is held a "week of Roses," including the great Rose show under the auspices of the Portland Rose Society. At this Rose show last year it was estimated three million Rose blooms were used in the decoration of the building in which the show was held. Perhaps I am saying too much of Portland, but in this connection it is almost unavoidable, because I live here, and have been and am in close touch with these matters. Other towns, however, in western Oregon and Washington are developing the same success in their cultivation. It is invidious to mention names where all are interested, but it would surprise many of you gentlemen to see the beauty and quality of flowers that are exhibited at the Rose shows throughout this section. At many of them the latest introductions of Europe are exhibited. Our rosarians are also discriminating and well posted about their favorites, and we bet the dealer who is not careful to keep everything true to name.

Shakespeare says: "What's in a name? That which we call a Rose by any other name would smell as sweet." But here we must have the true Rose by its true name,

that was given to it by its introducer at its birth. I could say more about this, but it does not come within the province of this paper.

Commercial Aspects

So far, Mr. President and gentlemen, what I have written may not have been of interest to you, as professionals wishing to know something about the conditions from a commercial point of view. I regret to say that for commercial growing in a large way many unsurmountable drawbacks exist. The mildness and beauty of the climate, so favorable for the amateur, is absolutely impossible for the professional.

About five years out of seven the plants will not ripen until too late for distant shipment. I have often cut good outside Roses at Christmas. Then our Spring usually opens too early. Frequently when the East is blocked with ice and snow our Roses are budding out and getting ready to bloom. I have more than once seen outside Roses in Portland begin to bloom by or about the 5th of April. On the other hand, several times no Roses have been in bloom on Decoration Day, May 30.

In the former cases the shipping season is ruinously curtailed. At other times there are killing frosts late in January or February, and in my own experience I have seen the young Wheat plants frozen out in the middle of March, necessitating re-seeding of practically the whole northern part of western Oregon. In such seasons the plants suffer such serious injuries that a year is practically lost before they can again be ready for market.

I am afraid that some of our push clubs might object to these plain facts, but for all general purposes the climate and conditions which exist in Oregon and Washington are so good that the truth will not hurt either us or them.

Field Day of the Boston G. and F. Club

The first field day of the year for the Club was on Saturday, March 19. Some time ago the members and their friends were kindly invited by Mrs. Wm. Edgar of the William W. Edgar Co., Waverley, to inspect the greenhouses and their contents just before Easter. Quite a good-sized crowd of florists, gardeners, seedsmen, salesmen and others met at Park St. subway at 1 p.m. on Saturday and journeyed together. On arrival they were met by Herman H. Bartsch, the manager and escorted through the range.

The Club has visited this establishment annually for several years past and we must confess that our members never saw the place in better condition than it is at the present time, and much credit is due Mr. Bartsch for the superb condition of things. The houses of Easter Lilies were especially good as will be seen from the accompanying photograph; in fact, they are as good as any Lilies we have seen so far this year. They have 15,000 plants in pots in readiness for Easter, all to be shipped this week.

These are a few of the things the boys saw in the best possible condition and all to be shipped out this week: Genistas, 1800 in pots of various sizes; 1000 Azaleas, 500 Hybrid Roses in pots, 500 Rambler Roses in pots, 200 pots of Lilacs, 500 Astilbe, 500 Hydrangeas, 100 splendid specimens of Callistemon speciosus (Austrian Bottlebrush), and a fine lot of Gardenias and other miscellaneous stock.

Since our last visit there have been many improvements, one of the most noticeable being the neat concrete benches which have been built throughout all the greenhouses. The neatness and cleanliness of all was commented upon by many of the members and the excel-

The Buffalo Florists' Bowling Club

Home of Easter Lilies

As grown by Wm. W. Edgar, Waverley, Mass.

lent condition of the stock was apparent in every one of the houses.

After the inspection the visitors were invited into the large shipping shed, and a substantial luncheon was served by Mrs. Edgar and her young lady assistants.

As the president and vice-president of the Club were both absent, William N. Craig, the secretary, made a few suitable remarks, thanking Mrs. Edgar for her hospitality and speaking very highly of the thriving appearance of stock throughout the establishment. Michael Norton, one of the "Old Guard," was with us and he also spoke.

From hence most of the members went to Edgar Brothers, which is close by, where they saw two fine houses of Sweet Peas just coming into crop. The houses are practically new and measure, the one, 200x40 ft., the other, 200x30 ft.

The members then stepped into Peirce Brothers' large establishment. The best thing we saw there was a large batch of *Lilium speciosum*.

From Peirce Brothers we went to A. M. Davenport's place at Watertown, and were escorted through the various houses by the manager, A. P. Peterson. Everything here was in tiptop shape. The Easter Lilies were in fine condition and there were 8000 of them in shipping condition for this week. Nicely grown and well flowered Baby Ramblers were much admired; of these there are 1500 plants. Three thousand Hydrangeas were seen, of which 500 are in bloom for Easter. Other stocks in quantity noted were Genistas, Bougainvilleas, English Primroses, Rhododendrons, Azaleas and Deutzias. An immense lot of Ferns from spores are grown. We noticed under one bench 1000 small pots in which were seeds of *Cocos Weddelliana*.

It was getting dark by the time we finished the inspection of these houses and the party broke up, each one was well pleased with the day's outing. Field Days are stimulating and interesting and of great benefit and instruction to those who can attend them.

ROBERT CAMERON.

PLEASE NOTICE THAT

Items of interest to the Retail trade are not confined to these pages, but will be found throughout the entire paper.

'Mum Georg Arends

This sport of *La Triomphaute*, a variety noted for its sporting tendencies, was discovered in 1906 in the *Triomphante* greenhouses of R. Koenemann of Remscheid, Germany. At first it was designated as of a salmon color, and this is the impression one gets in glancing at the flower when it is opening. But, on closer examination, it is found that the color is a mixture of light shades of yellow, pink and salmon, a combination that is new and very pleasing. The peculiar salmon-like sheen is probably due to the yellow stripes on the individual petals.—*Moeller's*.

Influence of Light on the Development of Plants

The French National Society of Agriculture has recently bestowed a high reward upon Mr. Raoul Combes for his researches relative to the influence exercised by varying degrees of light on the development of plants. In order to study this influence, Mr. Combes selected a large piece of ground over which he stretched coverings of cloth, whose meshes were graded as to size, and under these he cultivated different vegetables, as Radishes, Peas, Grain, etc., under the same conditions of soil. He found out that the intensity of light most favorable to any given species varies according to the stage of its development. Radishes, for instance, on first coming out, develop better under a subdued light, but as they reach the stage of maturity they want an increasingly strong light.

Plants do not behave alike as regards their demands on natural light. While the Potato yields its maximum of fruit under the most intense light, Wheat develops better under a slightly subdued light. Varying degrees of luminosity also have different effects upon the germination or the flowering, that is, the part of the plant above ground, or that below ground.

The conclusion reached by Mr. Combes is in general as follows: Under the most intense light plants accumulate the largest amount of reserve nutrition, while under a somewhat subdued light they draw upon their reserves in order to form new organs.—*Revue Horticole*.

Azalea Prof. Wolters

The Retailer as an Advertiser

In a business experience extending over thirty years we do not recall a single instance where judicious advertising has failed to benefit. The problem of advertising to catch the trade of the public is a harder task than that of advertising in a trade paper where you know your customers know you and your goods by reputation. Therefore, in this latter case, a simple announcement may do the trick.

In the matter of interesting the public the endeavor must be on quite different lines, and to catch attention with your literature, and give it the snap and point that will urge the reader to drop in at your store calls for study of what you have to offer as the attraction and the wording of your printed matter so as to gain the desired result. And, equally important, and perhaps most important of all, is the form the announcement shall take, whether by circular or through the newspapers.

The circular should be presentable, even if inexpensive, never gaudy, and should be worded as a personal

Dentzias in Mission Basket

invitation to the recipient to visit your store or showroom. The use of a form of this character is never offensive and, sent to regular customers as well as to a list of select names, constitutes the most recommendable method of solicitation of patronage; it can be used to advantage by retailers everywhere and everywhere.

Newspaper advertising, especially in the larger towns and cities, should be availed of whenever the circumstances warrant. Naturally this would not be remunerative unless the advertiser carried a goodly quantity of stock. As this advertising is transient and inserted in the papers but once or twice a fair amount of display should be bought, otherwise your effort will be swamped by larger advertisements obscuring yours. If given timely notice most daily papers are only too glad to have their artist assist in designing the framework or pictorial part of the advertisement.

F. H. Kramer, a retail florist of Washington, D. C., is a firm believer in the efficacy of newspaper advertising. He liberally patronizes these publications at every possible opportunity and for this Easter used half and full pages in the Sunday papers of his city of March 20. Our reproduction is of a full page advt. he had on that day in the Washington Times.

All advertisers in this column are provided with Arnold's Florists' Telegraph Code No. 16.

The Dear Little Shamrock

Editor The Florists' Exchange:

I enclose sample of tag we used upon a large number of Shamrocks we presented to the office force and employees of our Traction Co. We also did likewise to the Railway Co. It proved to be one of the most fetching and best advertising schemes we have yet tried. The effect was almost electrical upon the communities touched by the various lines. The daily papers took it up and gave notices of our Shamrock trade.

Shiremanstown, Pa.

JOHN F. RUFF.

The tag reads as follows:

MARCH 17, 1910

THE DEAR LITTLE, SWEET LITTLE
SHAMROCK OF IRELAND

THE INDIAN WITH HIS PIPE OF PEACE
IS PASSING FAST AWAY, BUT
"PADDIE" WITH HIS PIECE OF PIPE
WILL BE WITH US MANY A DAY

Some day, not far off, either, all Retail florists will appreciate the advantages of this Department. But why wait? Break the ice now, on what may interest you, and write us freely. Correspondents solicited. Good photos wanted.

CLASSIFIED ADVERTISEMENTS

Cash with Order.

The columns under this heading are reserved for advertisements of Stock for Sale, Stock Wanted, Help Wanted, Situations Wanted, or other Wants, also of Greenhouse, Land, Second-Hand Materials, etc., For Sale or Rent.

Our charge is 10 cts. per line (7 words to the line), set solid, without display. No advt. accepted for less than thirty cents.

Display advertisements, in these columns, 15 cts. per line; count 12 lines agate to the inch, 6 words to the line.

[In replies to Help Wanted, Situation Wanted, or other advertisements are to be addressed care of this office, advertisers add 10 cts. to cover expense of forwarding.]

Copy must reach New York office 12 o'clock Wednesday to secure insertion in issue of following Saturday.

Advertisers in the Western States desiring to advertise under initials may save time by having their answers directed care our Chicago office, Room 614, No. 60 Wabash avenue.

SITUATIONS WANTED

SITUATION WANTED—As head gardener on private estate, no small place. Single, American, 10 years' experience. G. Donovan, Sterlington, Buckland Co., N. Y.

SITUATION WANTED—By single working foreman, competent grower of Roses and Carnations; life experience. Best of references. Address "Florist," 203 East 19th st., New York City.

SITUATION WANTED—By expert gardener, many years' experience in England and America. Can fill any position. Very best of references. Capt. Bratherton, 326 West 34th St., New York.

SITUATION WANTED—By experienced grower of Roses, Carnations, Mums, Easter and Christmas stock. Good propagator; take charge; single; abstainer; state wages. Address, G. D., care The Florists' Exchange.

SITUATION WANTED—By life experienced man, grower of Roses, Carnations, Chrysanthemums and bedding plants; section of good references. Middle aged, single, sober; state wages. Address, F. G., care The Florists' Exchange.

SITUATION WANTED—By practical architect, landscape foreman, good designer, also works by plan; only where a good head-man necessary. Address, R. T., care M. Witmann, 411 Greenwood ave., Brooklyn, N. Y.

Firms Who are Building

MOLINE, ILL.—Julius Staaack will build two 400 ft. greenhouses this Spring.

LANSING, MICH.—Mrs. S. J. Woodbury will make additions to her greenhouse plant shortly.

OTTUMWA, IA.—C. Kranz is about to build a new greenhouse plant consisting of four 300 ft. houses.

LEWISTON, ME.—Ernest Saunders will erect another greenhouse, 200 ft. long, on Main st., this Spring.

VINCENNES, IND.—Paul Schultz is to build an addition, 130x26 ft., to his greenhouses at First and Shelby sts.

EUGENE, ORE.—H. A. Newton is erecting two large greenhouses on South Willamette st., and also a Violet house.

KLAMATH FALLS, ORE.—Brittan & Krause are to erect a greenhouse plant on the Enterprise tract adjoining the Mills Addition, utilizing natural hot water from the springs on the Mills Addition.

LAFAYETTE, IND.—The board of trustees of the Indiana State Soldiers' Home will receive bids, up to April 7, for the construction of a greenhouse. Address all bids to A. C. McCorkle, president, board of trustees, Soldiers' Home, Lafayette, Ind.

Fires

KNOXVILLE, TENN.—The warehouse of the Knoxville Nursery Co. was destroyed by fire March 8.

COLUMBUS, O.—The greenhouse at the east entrance of Green Lawn Cemetery was slightly damaged by fire on March 14.

WASHINGTON, D. C.—Fire on March 14 destroyed the heating plant and burned away the ends of three greenhouses at the establishment of Michael J. McCabe, Walker road. The loss estimated at between \$2000 and \$3000, with no insurance. A quantity of Easter stock was destroyed.

Greenhouses in Limited Space

Give number of feet greenhouses can be built apart, which every foot counts, without shading each other, houses 20 ft. wide, 5 feet to plate, 9 to ridge, from ground to ridge 9 feet, even span, 32 degrees running east to west.—H. S. Penna.

—The houses you describe would have a very flat pitch and if the sides are to be boarded solid there would of course, be no advantage in having them farther apart than would permit of the sun striking the plate. If, however, there is the usual two ft. of glass on the sides, the houses would have to be farther apart, as the shade line would then be taken at the bottom of the glass. In the event of the sides being solid, if the houses be three ft. apart it would be sufficient to prevent the shade from the ridge. In the event of there being glass on the sides the houses should be six ft. apart.

CLUBS and SOCIETIES

Yonkers (N. Y.) Hort. Society

A very interesting meeting of the Society was held in Guinzberg's Hall on March 16, with H. Scott in the chair, as Pres. Benne was very much under the weather with an attack of grippe and malaria, also a light touch of pneumonia, but we are glad to say he is now improving. We trust to see him out again in a few days in his usual good health.

The prizes offered at our last meeting by Messrs. Waite and Woodrow for the most meritorious exhibit were very closely contested for and were won by the following: 1. R. Cochrane, String Beans; 2. H. Nichols, single Violets; 3. H. Scott, Roses. The judges were Peter Macdonald, Louis Melliot and Joseph Mooney.

As the room we have been using was found to be too small, we have procured a larger hall, and our next meeting will be held in Wiggins' Hall, on Friday, April 1.

Vice-president Cochrane read a very instructive paper on "Mushrooms and how to grow them," after which a very lively discussion took place. Secretary Waite explained how the spawn was procured, and J. Mooney told how he grew them all the year; Mr. Nichols exhibited some very fine mushrooms.

Mr. G. Stanton will read a paper on "Water Gardens and how to make them," at our next meeting. Mr. Cochrane and L. Melliot offered prizes for the most meritorious exhibit at that time.

An invitation was extended by Mr. Melliot to the members of the Society to visit his greenhouses on Sawmill River Road, March 18, and many took advantage of the offer and enjoyed a pleasant afternoon.

After looking over the superb stock in the houses we were invited to partake of refreshments and must say that Mr. Melliot is a pastmaster at the art of satisfying the inner man. Afterward cigars were passed around and a general discussion of Mr. Melliot's stock was indulged in. A hearty vote of thanks was then extended our host and the party broke up about five-thirty, promising to call again.

LEE WHITMAN, Cor. Sec.

Washington, D.C.

The balmy Spring weather with an abundance of sunshine seems to have come to stay and the warm days have advanced the Easter stock quite rapidly. Violets and Anemones are appearing on the streets in profusion. Bulbous stock has moved pretty well during the last week and at several openings among the business houses baskets of flowers for decorating have been used, all of which has helped local trade.

What was called "car fare day" in Washington was celebrated during the week. The movement was in connection with the Junior Republic, to defray expenses at the home at Annapolis. On this occasion young ladies took prominent places in the large department stores and hotels with armfuls of pink Carnation, pinning one on all who passed for a toll of 5c. or more.

The Department of Agriculture has been meeting with great success rooting Crotons in cocanut fiber. These and other tropical plants take kindly to this mode of culture and throw an abundance of good strong roots.

JAS. L. CARBERY.

Some Doubt

A customer, very much under a load of fire water, called on a local florist and ordered a design saying he wanted the best that could be made. After the bargain had been struck he offered an additional bonus providing the florist would inscribe on the design, "We shall meet by and by." The piece was to be made for his business partner who was noted for his good qualities and as a church member.

Firms Incorporated

SEDALIA, MO.—Articles of incorporation of Archias Floral Co. have been filed. The capital stock is \$5,000. The shareholders, who also constitute the directors, are: L. H. Archias, M. T. Stane, H. J. Potomkin and L. A. Kipping, all of Sedalia. The company is incorporated for the purpose of establishing a greenhouse and nursery, and to handle bulbs, plants, flowers and trees. The Company's plant will be on West Second St. north of Liberty Park, and will be in charge of Mr. Potomkin, who is a practical florist and orchardist.

NEW CANAAN, CONN.—W. E. Brush of Park ave. and H. J. Lewis of Stamford have formed a partnership as landscape gardeners.

Retail Notes

WORCESTER, MASS.—Walter E. Draper of Rochdale is planning to open a florist store here.

SHENANDOAH, PA.—Miss Annie Hillan has opened a retail florist store at 33 West Oak st.

CLEVELAND, O.—The J. M. Gasser Co. has leased a store in the Ball building, on Euclid ave., opposite E. 12th st., and will move there in a few days.

PAINESVILLE, O.—Mrs. Clara Werner, mother of William C. and Charles J. Werner, florists, died on March 8, at the advanced age of 93.

An Anchor, Not a Pick

In one of my campaigns for the House of Representatives, an old Irishman, who had always been with me in all my fights, died. I went to a friend in the florist's business and instructed him to send the handsomest piece of flowers he could design. Next day one of my lieutenants came to me and whispered that one of my opponents was circulating a story that I had insulted the dead man's family by sending a piece of flowers made up to represent a pick. I hastened to the house of mourning. The widow refused to speak to me. Neighbors told me that my political rival had pointed out the floral insult to her. I hurried to the room where the corpse lay. It was one on me, all right. The florist had intended the design for an anchor, and it looked like an anchor to me. I explained to the satisfaction of everyone. But I have stopped sending anchor designs to funerals.

JOHN F. MEEHAN,
Mayor of Lowell.

W. J. Palmer and a Few of the Store Employees Visiting the Greenhouses of W. J. Palmer & Son at Lancaster, N. Y., on Sunday, March 13

THE third edition of our Design Book is now ready to be mailed out to purchasers. The Rose and Its History

A lecture, illustrated by lantern slides, delivered before the convention of the American Rose Society, New York, March 17, 1910, by George V. Nash.

When the secretary of the American Rose Society invited me to give a lecture before the Society, it was with considerable hesitation that I consented to do so. I did not know what phase of the subject to take up, what subject I could present to a body whose chief aim and theme has been the study of the Rose and what pertained to it. I finally decided to take the title announced for today, as one which was sufficiently broad to enable me to touch upon points, perhaps, which were not commonly presented to you. With this idea in view, I decided to confine my remarks mainly to the botanical side of the subject, including the distribution of the genus *Rosa* and the historic evolution of the various types of garden Roses. The matters of culture I shall leave to those much better fitted than myself to speak upon them.

Rose Distribution

First then, as to the distribution of the Rose. We must not forget that the Rose flourished upon the earth many years ago—shall I surprise you by saying millions of years? For such is the truth, well defined remains having been found in the tertiary age which, though geologically speaking is very recent, from the point of view of every day life must be considered very antiquated indeed. The rocks tell their tales, and the story of the Rose and its history begin there.

It is a long step from those fossil remains to which we have just been alluding, but we must cross the chasm and take up the distribution of our favorite flower as it is known at the present time, in the living world. We of the north temperate zone can claim this delightful flower for our own, for it is not known outside of that area. Confined between the 20th and 70th degrees of north latitude, it is our flower. But in this belt it is widely distributed the world around. Starting with Asia, where one-half of the known species are native, it extends through Europe and northern Africa, to the central and northern parts of North America. From Asia we have such well-known species as *Rosa moschata*, the Musk Rose, which is also found in northern Africa and Persia; *Rosa bracteata*, the Macartney Rose, native of China, Formosa, and northern India; *Rosa multiflora*, found wild from China and Japan to Formosa and the Philippines; *Rosa rugosa*, the Ramanas Rose; *Rosa macrophylla*; *Rosa lutea*, the parent of the Austrian Briers, extending from western Asia to Italy and Austria; *Rosa Wichuraiana*, from China and Japan; and *Rosa Banksia*, a native of China. In Europe there are such favorite forms as *Rosa spinosissima*, the Burnett or single Scotch Rose; *Rosa rubiginosa*, the Sweet Brier; *Rosa canina*, the Dog Rose; and *Rosa arvensis*. In North America there are, among others, *Rosa Carolina*, our charming Swamp Rose; *Rosa blanda*; *Rosa setigera*, the Prairie Rose, the parent of some of our recent productions.

The genus *Rosa* is variously estimated as containing from 30 to 250 species, depending upon whether the botanists take a conservative, a moderate or a radical view of the species question. When one considers the ease and readiness with which the various species cross with each other, as demonstrated in the evolution of the garden Rose, perhaps an explanation may be found for the larger number of species referred to. Probably about 125 species would be a fair estimate, with one-half the number in Asia, two-fifths of the remainder in Europe and northern Africa, and the remainder in North America.

The Rose in Literature

Finding the Rose as widely distributed as we do in all north temperate lands, we should expect to find it in the literature of all the countries in that zone. And such is the case, for the Rose has been the subject of song and story from the days long before the Christian era down to the present time. In each language it has a word of its own, which arouses, perhaps, in the breasts of each people the same tender recollections and happy memories that the word "Rose" does in our own. In a great many of these the resemblance is very striking; for instance, in Greek it is *Rhodon*; in Celtic *Rhos*; in Latin, Italian, Spanish, Portuguese, Hungarian and Polish it is *Rosa*; in French, Saxon and English, *Rose*; in German, *Rose*, spelled the same way but pronounced

differently; in Dutch, *Roose*; in Slavonic, *Rhosha*; in Russian, *Ros*; in Bohemia, *Ruoze*; in Arabic, *Quasrath*; in Turkish, *Nisrin*; in Hebrew, *Chabhatzeleth*; and in Persian, *Gul*.

Let us now turn to the history of the Rose. How old is the Rose? It is of great antiquity. There is reason to believe that it flourished in the famous gardens of Babylon, which existed about 1200 years B. C. It was certainly cultivated by the Jews during the reign of Solomon, about 950 B. C. Homer, the great poet of ancient days, whose period was about 850 B. C., paid homage to the Rose in the *Iliad* and *Odyssey*. Herodotus, who lived about 400 B. C., says that in the gardens in Macedonia there was a Rose which flourished without culture, which had sixty petals and which emitted a most delightful perfume.

In those olden times a mystical origin was ascribed to most things, and to this the Rose was no exception. The creation of the Rose was credited to the goddess *Flora*. The fable goes on to say that *Flora*, finding one day the dead body of one of her favorite nymphs, whose beauty was only equaled by her virtue, implored all the Olympian deities to aid her in transforming this nymph into a flower. The gods granted her request. *Apollo* is said to have given the vivifying power of his rays; *Bacchus* contributed the nectar; *Vertumnus* added the perfume; *Pomona* supplied the fruit; and *Flora* herself crowned all with a diadem of flowers. Thus, according

those days complied with the demand and furnished them. They too had their greenhouses, it is said, warmed by means of pipes filled with hot water, by which means they succeeded in keeping the Roses in bloom until the end of the year. So Roses under glass, you see, are by no means a modern innovation.

Passing from these early days of the Rose to the middle ages, we find Chaucer, who wrote in the early part of the 13th century, referring to the Rose. In the beginning of the 15th century our flower is said to have been cultivated for commercial purposes. Roses in those days were apparently scarce and only for the rich, for small quantities of them were considered of sufficient value to offset rent of house and land. Would that we could pay our rent in these days with a few Roses.

In 1452, as you all know, the Rose became emblematic of war and bloodshed, losing for the time its significance of peace. It was perhaps the thorns and not the flowers that were the real emblems of the war. It was in this year that the rival factions of the white and the red Rose sprang up in England, the former the emblem of the house of York, while the red Rose stood for the house of Lancaster. You all know of the furious wars which followed, and how Henry VII, in 1486, re-united the two houses by marrying Elizabeth, the heiress of the house of York.

Shakespeare's appreciation of the Rose was evident in his numerous references to it in his works.

The Uplift of the Rose

It was not, however, until the early part of the 19th century that Rose culture, as we now know it, existed. From that time on the Rose has been pre-eminent. Certain wild forms were, of course, first introduced, and these, perhaps at first by accidental crossings, resulted in hybrids. Man soon took the cue thus accidentally shown and began to experiment for himself, first crossing the natural species at his hand, then hybrids with species, and later hybrids with hybrids, and the progeny thus produced again crossed with species. You can well understand that soon all traces and resemblances to the original forms were lost. This crossing and recrossing have caused such confusion that it is all but impossible to classify garden Roses. Take any book you will and look up the subject of classification, and you will find no two of them agreeing; forms which in one book are referred to one class, in another are referred to quite different groups. In what follows I shall call to your attention some of the more prominent types which have existed in the history of the development of the Rose, not designing by any means to include all of them, taking up first the native or wild species, and later considering the commoner types of the garden Roses.

Some Prominent Types of Roses

The first of these we will consider is *Rosa arvensis*, a native of Europe. This is one of the parents of the Ayrshire strain and of the Dundee Rambler. It is one of the most common Roses of Great Britain. Belonging to the same type is the Musk Rose, *Rosa moschata*, which is found wild in northern Africa, Persia, and Madeira. This is said to be one of the species from which the Attar of Roses is obtained. It is also stated that the original Noisette was an accidental cross between this and *Rosa indica*.

Rosa multiflora, the Blackberry Rose, so called from the great resemblance of its clusters of flowers to those of the Blackberry, is another of this type. It is a native of China, Japan, Corea, etc. It is one of the parents of several Summer-flowering hybrids, as *Crimson Rambler*. Crossed with *Rosa indica*, it has produced the class of perpetual flowering dwarf miniature Roses known as *Polyantha*. *Rosa sempervirens* is known as the evergreen Rose, not because it is strictly evergreen, but because it holds its leaves longer than most Roses do. It is a native of middle Europe, Greece, and the Balearic Islands. It is not as hardy in this latitude as some of its relatives. *Rosa Wichuraiana* is a native of China and Japan. It was introduced into cultivation about 1887. It is especially useful for covering masses of rocks, and is perfectly hardy. One must not forget *Jersey Beauty* when thinking of this Rose. *Rosa Banksia*, a native of southern China, was named in honor of Lady Banks. Unfortunately, this requires the protection of a greenhouse in northern latitudes. There is a yellow and a white form.

Passing to the *Canina* group, we have *Rosa canina* itself, the Dog Rose, a native of Europe and temperate Asia. It is sometimes found growing as an introduction in the eastern parts of the United States. *Rosa rubiginosa* is another species of this same group, a native of Europe. This is familiar to you all as the Sweet-Brier, receiving this name from the pleasant odor exhaled by the foliage, especially when crushed.

Among the *Cinnamom* group we have *Rosa cinnamomea* itself, the Cinnamon Rose, found wild in Europe and Asia. *Rosa blanda*, at home in the eastern United States, is one of our charming little Roses; and *Rosa humilis*, of the same region, is especially happy growing among rocks. *Rosa rugosa*, of Asia, is a sturdy representative, and one perhaps destined to play an important part in the future in hybrid work.

(To be concluded next week)

Basket of Mixed Plants, Tied with Yellow Ribbon, Including
Anny (Zennchen) Muller, Palm, Pussy Willow,
Deutzias and Azaleas

to the tradition, was the Rose created. The poetic instinct was keenly alive in those olden days, and we find the people appreciative of the beautiful and blended colors of the Rose, expressing this appreciation in the consecration of this flower to *Aurora*, the goddess of the Dawn. They also consecrated it to *Harpocrates*, the patron of silence, and so with them the Rose was symbolic of silence. Thus arose the expression, "sub rosa," meaning under the Rose, indicating that all should be kept secret or silent; and this expression persists to the present day.

The Rose was greatly prized in the days of Rome, being used in enormous quantities for decorative purposes, and it was freely employed on all festive occasions. To the rich and great the term, "a bed of Roses," was a reality, for their couches were frequently covered with a mantle of Rose petals. It is also related that the tyrant *Nero*, in one of his feasts, expended about \$100,000 on Roses alone. Even in these days of advanced Rose culture, with ample facilities for their production, the market would be put to the test to supply such a demand. I presume there are men, however, in the country, who would like to take such a contract.

Ancient Rome, too, had its 400, and these insisted upon having Roses out of season. The gardeners of

NEW YORK, March 23.—There seems at this time to be a lull in the cut flower market, but the ante-Easter feeling of anticipation, expectation, and hope is everywhere apparent. American Beauty Roses are arriving in sufficient supply to meet all demands with general sales at 40c. each, while a few specials have brought 50c. Richmond Roses are in good demand, top grade flowers realizing 15c. to 20c. each. Other Tea Roses are plentiful except White Killarney and Bride, which clean up better. Many shipments are arriving in very bad condition, making sales impossible. The general run of prices is from 2c. to 12c. for all varieties.

Carnations are in good supply and are selling at \$2.50 to \$4 per 100; a few fancy grades have sold at \$5. Violets are coming in showing the effects of the recent hot weather. Prices range from 25c. to 50c. per 100.

Good Cattleyas are scarce and selling at 75c. each. Sales to buyers for ordinary stock are made at from 40c. to 50c.

Lilies are plentiful, and are moving at prices ranging from 6c. to 10c. each. Callas are also plentiful with the demand fair; prices range from 10c. to 15c. each. Gardenias are in small demand, offerings of the same on the streets being quite frequent.

The supply of Sweet Peas has shortened a trifle, but the demand is such that there are plenty to go around. Top grade flowers bring \$1.25 per dozen bunches.

Lily of the Valley is abundant and the best grade sells for \$3 per 100, other grades at any price.

Daffodils are plentiful, with a good demand, making clearances possible. Tulips move slowly, and sales are made at prices ranging from 75c. to \$2 per 100. Some extra good stock is selling for \$3 per 100.

There is a good demand for Asparagus plumosus at 40c. per bunch for the very best. Smilax is scarce and realizes from \$1.50 to \$2 per dozen strings.

Lilac moves slowly, top grade sprays bringing 75c. per bunch. There is a fair demand for small stock such as Pansies, Alyssum, Mignonette, Stocks, and Freesias. Marguerite Daisies are very plentiful.

PHILADELPHIA, March 21.—Since our last report cut flower conditions have improved perceptibly, and stock of all kinds cleans up much better than for the past few weeks, so that an easier feeling prevails. American Beauty Roses are more in demand but the supply is very short, consequently good Richmond is being used in preference. Top grade Am. Beauty realize 75c. each, while first-class Richmond is offered at 25c. each, with barely enough to go round. Tea Roses of all varieties are moving well and shorter grades clean up quickly. The best stock move more slowly, but none goes to waste, as at present the supply is not overdone. Prices for all grades range from \$3 to \$15.

Carnations have been good property since last Thursday, and the price for fine standard flowers stays at \$3 per 100, with a good prospect for a further increase later in the week. Orchids remain about as last week, with the demand slightly on the increase. Lilies have made a slight advance in price, good grade flowers realizing \$15 per 100. Considerable short stemmed stock is on hand, and when good brings \$10 to \$12.50 per 100 flowers. Lily of the Valley moves very well, and the demand has been such that shipments are sold as soon as received, at prices ranging from \$2 to \$4.

Violets hold their own, and while the flowers are not up to the standard in quality prices have advanced a trifle, with a good outlook for a week end heavy sale. Top grade flowers bring 75c. to \$1 per 100. Gardenias are plentiful, and are consequently very cheap.

Bulbous stock of all kinds was not so much in evidence last week, and although the demand is not very great the stock on hand cleaned up well. Southern Daffodils are arriving frequently, and sell at about \$7.50 per 1000. Home grown stock realizes figures a trifle in advance of these quotations. Callas are good property and the call has been ex-

ceptionally good, with prices remaining about 8c. to 15c. each.

Pansies, Stocks, Mignonette and other miscellaneous flowers move well, and for the past few days have sold at moderate figures. Asparagus is still in short supply, good clean bunches realizing 50c. each. The Smilax supply has shortened, and the price is now 15c. to 20c. per string.

BOSTON, March 22.—Crops are plentiful and the very best condition. If the weather holds on just as it is at present there will be an immense business done this week. Pot plants are greater in evidence this year for Easter, and without any exaggeration, never before were such fine goods offered. Easter Lilies are probably the weakest, the stems are far too short with some growers and without enough flowers. The bulbs were potted up late and when they showed the flower buds a higher temperature was given and many buds dropped with the excessive temperature. All other plants such as Roses, Hydrangeas, Boronias, Heaths and Genistas are in great abundance, and the prices obtained are good.

Prices for all goods this week are on the upward move and by Saturday they should be much higher. Roses are more plentiful with the exception of American Beauty which is not overplentiful and commands high prices. Killarneys are more plentiful and owing to an increased demand prices hold firm. Bride and Bridesmaid are not in great demand. Safrano, Bon Silene and Mrs. Aaron Ward are picked up quickly by the best stores. Pot Roses for Easter business are now in great demand, and those mostly called for are Lady Gay, Tausendschon, Hiawatha, Wedding Bells and Crimson Rambler.

Prices have advanced on Carnations of all kinds. Good whites run as high as 4c. to 5c. each.

Bulbous stock is quite plentiful. Double Von Sions are getting scarce, and prices are better on those than they were a week ago. Sweet Peas are quite abundant and prices are lower, excepting for flowers of extra good quality. Violets are going higher this week, and are bringing 50c. to 75c., and will go probably to \$1 by the end of the week.

There is a good supply of Lilies, and prices run from 10c. to 12½c. per flower, and plants with flowers about 12½c. each flower.

The supply of miscellaneous stock is quite abundant, such as Marguerites, Mignonette, English Primroses, Wall flowers, Anemones and Lupines. Asparagus Sprengeri and plumosus is slightly more plentiful and prices hold good. Adiantum Cuneatum and Crowneum are scarce and good prices are obtained. Lily of the Valley sells quite well. The demand for Orchids is not as heavy as a few weeks ago. Green goods of all kinds are in demand and prices are satisfactory. R. C.

CHICAGO, March 22.—Easter prices are prevailing and the market is activity, with a demand for stock in all lines manifest. It is the opinion of all that if the present weather continues this will be the busiest Easter for many years. The reports from all quarters indicate that the shipping trade is exceedingly strong and the orders booked far exceed the number of last year. There is a little uneasiness felt regarding stock, as some lines at this time look as if there will not be nearly enough to supply the demand. With the Roses, however, there will be nothing to worry over, unless it be as regards red ones, as Killarney seems to be in full crop with all growers.

Carnations, with the exception of red and white sorts, are promising in quantity. Never has the scarcity of white been so evident for this occasion. That many are holding back this particular color is not doubted, but as the price at this time has soared to 5c. and 6c. for good quality flowers it seems foolhardiness not to bring them forward. Fancy reds are also commanding 5c. each. Other varieties have advanced to 3 and 4c. Lilies, good fancy stock, are not to be had in any great quantity. Of course, there will be lots of short and second class flowers, but real fancy Lilies are remarkably scarce. From \$12 to \$15 per 100 is about the range of prices obtained, although in some instances a little higher figure is possible. Callas

look fine and undoubtedly there will be a sufficient supply; from \$10 to \$12 the prices range, while extra fancy will command as high as \$15. Lily of the Valley has advanced a little, but the quality is extra fine for this season.

The new crop of Easter bulb stock is extraordinarily fine, and is just right. Tulips are remarkably good. Hyacinths and some of the greenhouse grown Daffodils are extra fine. Prices are not exorbitant in these lines, but before Easter Sunday they will be higher. Some Gaillardias are very conspicuous, but the quantity does not permit stating prices. Good Stocks in both pink and white varieties are to be seen everywhere, and there is an accumulation of miscellaneous stock, Mignonette, Forget-me-nots, Pansies, Snapdragons, Candy-tuft and Daisies.

Orchids, it is feared, will not be quite as plentiful as could be wished. The report is that the crops in the East will not be as great as anticipated. The price for Cattleyas is \$5 and \$6 per dozen. Gardenias still arrive in quantities, enough for the demand, and the quality as good as at any previous writing. Violets are in great abundance, and prices far below those of other seasons. This condition will be taken advantage of.

Green stock in all lines is in active demand, and there is not any too much on hand to fill orders. Ferns have advanced from \$2 per 1000 to \$2.50, and the quality is somewhat improved over that of a few weeks back.

Entire satisfaction is expressed by all over the outlook for a heavy business.

INDIANAPOLIS, March 21.—The general view of the flower shops last week indicate more prosperity than the actual receipts. All kinds of flowers and plants, extra fine in quality most of them, were on every hand, but there was little unusual to cause a demand for them. Counter trade moved along nicely and maintained an opening for the highest grade of flowers, but funeral work, which was heavy for some weeks preceding, was much lighter. Social occasions were almost entirely off the list and little decorating was done by anyone. The growers are offering an unusual quantity of cut flowers, but with Easter so close at hand they refuse to break the prices. Bulbous stock is being brought on rapidly by the bright weather, and thousands of Jon-

quils, Daffodils, Hyacinths and Tulips are already on the market at \$3 to \$4 per 100.

The Carnation cut is off crop, but there is a sufficient supply at \$2.50 to \$4, as the demand is correspondingly light; \$1 per doz. is the prevailing retail figure at present. Easter prices are in effect at \$1.50 to \$2 per doz.

Roses are really deserving of better prices when the select quality and color of them is considered. Bride and Bridesmaid of good quality bring \$6 to \$8; the various kinds of seconds bring \$4 to \$6, while shorts bring \$2 to \$3 a hundred. The demand for American Beauty is light at \$5 to \$50 per 100.

Several more growers are marketing Sweet Peas; this year has certainly been an unusual one for these flowers; 60c. to 75c. per 100 is asked for them.

Home grown single Violets at 50c. to 60c. per 100 are outselling Hudson River product at 75c. and \$1 per 100. No trouble will be had in securing a sufficient supply for the coming Sunday. It is impossible for your correspondent to describe the beautiful selection of plants now offered the public. This year, seemingly, has been propitious in every way toward the production of fine plants.

Lilies, Roses, Rhododendrons, Amaryllis, Lilies, Primroses, Daisies, Pansies and many other varieties help to present a beautiful mass of coloring in the conservatories.

There is very little in the larger flower centers which cannot be seen at some of the Hoosier establishments at the present time. I. B.

ST. LOUIS, March 21.—The market here has been well supplied with almost everything in season and the commission men say it moved nicely all of last week, especially the latter part thereof when stock cleaned up at good prices. If there is anything the market is long on it is in Roses; these are just about coming in in full crop and a sufficient supply is now looked for. Bride, White Killarney and Ivory sold well, but colored stock suffered somewhat in demand. American Beauty sold well in the medium grades and shorts, but fancy long dragged somewhat.

Carnations will be somewhat short for Easter as the glut of about ten days ago put them off crop for a while. Violets are coming to an end fast, the warm days caused them to suffer greatly. Sweet Peas will be in plenty also all

J. K. ALLEN

 CUT FLOWERS AT WHOLESALE

bulb stock, especially Lillies, thanks to the fine warm weather for the past ten days, which all said would be scarce. Prices for Easter will run about as follows:

Roses, from \$6 to \$10, first class fancy; other grades, from \$3 to \$5. American Beauty, fancy, \$6; next \$3 to \$4, and shorts from 50c. to \$1 per doz. Carnations, fancy, \$5 to \$6 per 100; firsts, \$3 to \$4, and splits \$2. Callas and L. Harriell, \$12.50 to \$15 per 100. Sweet Peas, from 50c. to \$1 per 100. Single, 35c. to 50c.; doubles, 50c. to \$1 per 100. Lily of the Valley, \$3 to \$1 per 100; Tulips, \$3 to \$4; Dutch Hyacinths, \$4; Roman Hyacinths, \$3; Paper-white Narcissus, \$3; Freesias, \$2; Von Sions \$2 to \$3 per 100.

Everybody in the trade is looking for a great Easter business, and, if the weather conditions hold out, a record breaker is expected. ST. PATRICK.

New York

Several of the prominent wholesalers have recently been in conversation with a city official, who makes the suggestion that the wholesale commission men get together and consider an offer from the city to build a set of stores, with heat, light and other necessities for the business, under the new bridge at 59th st. This project sounds good to many, and it is hoped that the wholesalers will consider the proposition in all its phases.

The Growers' Cut Flower Co. will occupy, as additional space during Easter week, the vacant store which will soon occupy permanently or at least during the razing of the building in which its present quarters are situated.

The regular monthly meeting of the directors of the Cut Flower Exchange will be held the first Saturday in April.

Myer the florist of Madison ave. has secured the store at No. 613, on the same street, to enable him to properly serve his patrons this week. Mr. Myer has recently renewed his lease for seven years, and this should prove that business conditions are satisfactory with him. When in Chicago some time ago, he made arrangements with a supply house for the exclusive use of a Lily design, on baskets, very appropriate for the season. The decorations for the G. Hearn golden wedding anniversary were recently executed by Myer, in which over 4000 Daffodils were used.

Thorley's annex is at 581 Fifth ave. His House of Flowers is replete with the best plants obtainable, in the windows being an immense pyramidal display of purple Lilac in pots, and Hydrangea Otaka grown in various forms and tied with large bows of ribbon to match.

Friends of John Reimels of Woodhaven will regret to learn that he is again confined to his bed, with a bad attack of pneumonia, and doubts are entertained of his being able to be about his business for some time.

P. McKenney furnished the decorations at the dinner tendered to Judge Gaynor at Delmonico's on March 17. Beside the regular decorations 70 baskets of flowers were used.

The Lenox Hill Florist, 1177 Third ave., has secured the commodious store No. 1175 for his Easter annex.

On Tuesday and Wednesday of this week many shipments of held-over Roses were received. These were such that buyers refused to look at them, and the chances are that many box lots were thrown away. It is the general opinion on the street that growers make a sad mistake by picking their stock, especially as it must be poor when shipped in; why then pay express on it?

Orders for Violets in hundred thousand lots were received early in the week, and the outlook is for good business if quality of stock is right. Violets received the fore part of the week were generally poor and off color.

E. Howard Smith of Hazleton, Pa., was in the city on Tuesday, making purchases for his holiday trade. He has not been seen in the market for quite a long period, but looks well and hearty. He reports prospects for a good Easter trade in his town as very bright.

August F. Poehlmann of Chicago found time after his duties as president of the A. R. S. were completed to visit some of the establishments in this section, among them those of the Julius Roehrs Co., Rutherford, N. J., and A. N. Pierson, Cromwell, Conn.

The contract for the topographical survey and measure of the ground for the botanical garden and arboretum of the Brooklyn Institute has been awarded to D. Barta, of 456 Manhattan ave., Manhattan. The garden will be situated between Washington and Flatbush ayes., adjacent to the site of the Central Museum.

Philadelphia

Considerable regret is expressed that the judges' decision was reversed in the matter of the award given to the sport of My Maryland, exhibited at the New York show last week by Myers & Samtman, but the firm feels that under the conditions, the judges' action was justified.

The following gentlemen were entertained by A. Farnwald in New York City last week at a dinner given while the American Rose Society show was in progress: D. Sullivan of the New York Cut Flower Co.; Stephen Mortensen of Southampton; Edw. Towill; Wm. Geiger, grower for Wm. Stephenson, Oak Lane, Philadelphia; Fred Towill of Hillside, Pa.; John Andre of Doylestown, Pa.; Clarence Upton of Roslyn Heights, Pa.; Frank P. Myer and Martin Samtman of Chestnut Hill, Pa. Many of the gentlemen were, in part, responsible for the success of that show, and Philadelphians in general are pleased at the fact that so good a display of stock was made. Surely the Richmonds staged by Mr. Farnwald were in a class by themselves.

Wm. Geiger, who attends to the growing of Mrs. Jardine Rose in the establishment of Wm. Stephenson, at Oak Lane, created considerable enthusiasm through the staging of such a superb, prize winning vase of his Rose, and the many inquiries showed that his stock would command high prices in any city.

Crawford has added an attractive electrical sign to the front of his store at 5210 Market st., which brings his stock more prominently to the public notice.

Robt. Craig Co. are experiencing such a rush of business that all efforts to keep ahead of orders seem to be unavailing. The excellence of the company's stock has proved that stock well grown can be disposed of easily to any retailer desirous of handling only the best. Day and night work is in order at the establishment, and with an extra amount of help the packing system in vogue works well. The extended packing shed is, at this season a boon to all hands.

Berger Bros. are handling some well-grown plants of Hydrangea Otaksa from the greenhouses of Walter P. Stokes, Moorestown, N. J.

Wm. J. Baker says that Smilax, Pansies, Daffodils, Daisies and other retailers' stock is of the best quality, and that if business would stay for two months as it was in the past few days he would have no kick coming.

Edw. Reid will this week have an exceptional supply of Hudson River Violets for his out of town orders.

John McIntyre says that Daisies, single Violets and Lilac are the best things to have on hand these days.

S. S. Pennock-Meehan Co. is receiving some extra well-grown Kaiserin and Duchess of Wellington Roses from Robt. Scott & Sons of Sharon Hill, Pa.

J. L. Pennock of Lansdowne, Pa., is taking lots of comfort these days in a Winif auto.

Alf. M. Campbell has sold his residence at Swarthmore, Pa., and will build again shortly.

The next meeting of the Florists' Club will be held April 5, at which time a paper will be read by Henry Faust, a well-known local grower. Mr. Faust had exceptional success with his bulbs this season, so that an interesting paper will be looked for. The discussion which may follow should bring out plenty of good thoughts, and should be profitable to all present.

The Leo Niessen Co. is handling southern Daffodils in large quantities, and they are selling well. Richmond Roses are a special feature with the firm at this time.

S. S. Pennock is of the opinion that larger prizes should be offered to exhibitors of American Beauty Roses at the various shows. Incidentally, it might be as well to mention that this gentleman's services as a judge at the American Rose Society's Show last week were well appreciated, and his decisions, in co-operation with the other judges, ably rendered.

Macaw Bros. of Norwood, Pa., are doing well with the propagation of the white sport of Carnation Winsor. Duncan Macaw says the flowers of this white Carnation are superior in every way to the pink variety.

Geo. Faulkner of S. 15th st., is making quite a feature of rustic and white birch boxes containing Pansy and English Daisy plants.

WILMINGTON, O.—H. E. Mitting, who for the past two years, has conducted the greenhouses of the Clinton Floral Co., has surrendered his lease and George Moores is now in charge.

Notes on Easter Stock

Eber Holmes of Montrose is shipping some excellent Killarney Roses, both pink and white, and his Richmond are of the very best quality. They are handled at 1 Park St. market by E. A. Stickley.

Charles T. Stevens of Plymouth was in town and reports a good thriving business. Until this year he was employed on the railway, but his business has increased so much that it demands all of his time now. He employs three men and they are kept busy all the time. He has 10,000 sq. ft. of glass and grows Lilies, Carnations, and a general assortment of plants.

In addition to high grade bulbous material, Mann Bros. are shipping some well grown and beautifully flowered plants to 1 Park St. market, of Lilies, Rhododendrons, Kalmias, and forced Japanese Maples, which latter are valuable for their highly colored foliage. Their cut Wallflowers are also of good quality.

Becker & Co. have had an immense quantity of bulbous material this Winter, and they are now shipping excellent double Daffodils and N. poeticus with extra long flower stems. Their Cinerarias and Primula obconica in pots are of good quality and bring satisfactory prices. William F. Aylward is their salesman at 1 Park St. market and he reports good prices for this week.

Carnation May Day from W. D. Howard, Milford, Mass., is of very fine quality and is handled by George H. Noyes at 1 Park St.

A. Leuthy & Co. report they were never better prepared to meet their Easter trade than this year. Everything is in the very best of condition. They grow for Easter 2000 Lilies in pots which are just in right condition for shipping.

Their Rhododendrons are good large specimens and well flowered; 200 of these are ready for market. Acacia paradoxa and A. longifolia are grown in large quantities and 200 large specimen plants are in full bloom now. They grow a considerable number of Gardenias in pots and have about 200 ready for shipping this week. Other things which are prominent at this establishment are Azaleas, Prunus triloba, Deutzia gracilis and Lemnol. Genistas are in perfect bloom now; they handle 1500 of these handsome plants.

N. F. Gray has 12,000 ft. of glass which is located at the corner of Capen and Elliott sts., Dorchester, where he has been for 13 years. His specialties are Lilies, Rhododendrons, and bulbous material. He imports direct from Europe.

Thomas Stock, 251 Minot st., Dorchester, has 10,000 ft. of glass and makes a specialty of Bachelor's Buttons (Centauria cyanus); the variety he likes the best is Double Emperor William; it is of especially good color and comes of an even shade right through the whole house. He also grows Spanish Irises, Jacq. Roses and Sweet Peas. His crops are in fine condition at the present time and he is doing a fine business.

William Hammond & Son of 417 Codman st., Dorchester, have 25,000 sq. ft. of glass. They do a wholesale and retail business and have been located at the above place for the last 25 years, and carry on a prosperous business. Mr. H. has been confined to his home for some time with rheumatism. He contemplates building a propagating house in the near future. His principal crops are Roses, Carnations, and a mixed lot of plants which his business demands.

G. L. Park, 807 Washington st., Dorchester, has 20,000 sq. ft. of glass; his first house was built in 1872 and it is in fairly good condition now. He grows an assortment of plants and conducts a wholesale and retail business.

T. A. Cox of 73 Olney st., Dorchester, has 8000 sq. ft. of glass and has been located at the above place for 30 years; he grows for wholesale only.

Edward Rokean at 1 Park st. is handling some extra good Forget-me-nots, which are grown and shipped to him by Mrs. Ward of Montvale.

This week Wm. Sim of Cliftondale is shipping an immense quantity of Violets from his cold frames. He is fortunate in getting them in the right condition for Easter. His houses of Sweet Peas are in full bloom and they are the finest in the Boston market.

H. M. Robinson Co. are well equipped with flowers for their Easter trade; they carry all the best grades of Roses, American Beauty, Richmond and Killarney; Carnations of high quality and all sorts of bulbous goods; Asparagus Sprenger

BOSTON—Continued

opened recently and are doing a good business.

John J. O'Brien has been at 82 Beacon st. for the past two years, coming to the above place from Boylston st., where he was located for several years previously. The store is a little below the level of the street, and a little way back, which gives a splendid chance to display plants. He makes a specialty of twig baskets, which sell well. He uses a large shipping tag and is a firm believer in advertising himself as much as possible in this way.

James Delay has just returned from a business trip. He has been to Long Island, N. Y. and N. J.

John N. Delay has been located at the South Station for the past 11 years; he reports a good transient business.

S. Kozminsky of 8 School st., reports the best trade in 16 years. He made some large handsome pieces recently for the mayor's inauguration exercises.

W. H. Spring at 443 Tremont st., had his window handsomely decorated in honor of Saint Patrick. He reports good business and does a lot of funeral work.

General News Notes

George Page, gdr. to Mrs. Frederick Ayer of Newton, exhibited at Hort. Hall on Saturday last four fine specimens of Acacias; the pair of Acacia armata were finely grown plants and well flowered; the pair of A. Drummondii, with their light yellow flowers, were well done and much admired. He received a well-deserved gratuity.

The last meeting of the Winter course at Hort. Hall was on March 19, and the lecturer was Prof. Wm. R. Lazenby of the State University, Columbus, Ohio. His subject was "The Dietetic Value of Fruit." The lecture was very interesting and there was quite a good attendance. The attendance during the course has been satisfactory and each year these lectures are becoming more interesting to the general public. Everything in this way helps to stimulate business, and there is no doubt but that seedsmen, florists, nurserymen and others benefit by the education that the people gain from these instructive lectures.

On March 19, the Market Gardeners' Association held a meeting at Hort. Hall. There was a large attendance and L. C. Corbett, of the Dept. of Agri., Washington, D. C., gave an instructive illustrated lecture. His illustrations were very good indeed, more especially those showing how crops are produced in the South by farmers and market gardeners. The yield of the crops was an eye-opener to the market gardeners of this vicinity.

W. D. Nickerson, who has been assistant gardener at Joseph White's, Brookline, for these past four years, is to succeed James Wheeler as head gardener. Mr. Wheeler leaves on April 1 to begin work on his new range of commercial greenhouses at Natick, Mass.

Lord & Burnham Co. are going to erect a range of eight greenhouses for E. S. Webster, Esq., Chestnut Hill; Wm. Downs, ex-president of the G. and F. Club, will be head gardener. This range will be up-to-date in every respect, and we wish Mr. Downs the greatest success in his new place. He is a capital gardener and we expect to see many good things emanate from these new houses.

March weather has been exceptionally fine, and at General Weld's estate, Ded-

ham, the following Irises are in bloom out of doors: Iris Vartoni, I. histroides and I. Danfordae.

William N. Craig, Longwater gardens, North Easton, reports that Peas sown on March 11 are just coming through to the ground, and we have seen in the garden today (March 22), in a warm sunny position, the following Narcissus: Henry Irving, Golden Spur, spurius and princeps.

E. H. Wilson, the famous plant collector, is going to China again in the interests of the Arnold Arboretum of Harvard University, and expects to be away for a year this time. He leaves on April 2. Mr. Wilson has made many friends in the Hub since he came among us early in the Winter.

William Fulton of the Henry & Lee Co., New York, was in town yesterday on his way back from Japan. Other visitors this week were Mr. Knickman of McHutchison Co., N. Y.; Mr. Squires of Harrison Nursery Co., Maryland; Prof. L. C. Corbett of Dept. of Agri., Washington, D. C.; Mr. Coe of D. M. Ferry Co., Detroit.

Chicago

The retailers' windows are one blaze of combinations of flowers and plants of all colors, one dealer vying with the other to produce the most attractive Easter window display. There are very few new designs in the basket line to be seen. One new basket displayed is made of raffia, in several styles, the shapes differing very little from the straw and wicker ones that have been in evidence for many seasons. Some of the retailers are showing baskets, boxes and jardinières of terra-cotta that are very attractive, in many shapes and brilliant colorings. This ware is very desirable, as it does away with any possible chance of water being spilled on the carpets. The usual line of flowering plants always obtainable for this occasion are to be had, Cyclamens, Primroses, Cinerarias, Hyacinths, Tulips, Daffodils, Spireas, Azaleas, Genistas, Lilies, Baby Rambler Roses, Begonias and Hydrangeas. It is an established fact that the demand for plants at Easter far exceeds that of Christmas.

Hydrangeas are particularly scarce in

HOERBER BROTHERS

Please mention the Exchange when writing.

this locality, the growers being unable to force them along in time, and most of the stock obtainable is shipped from the East, the eastern growers seemingly being more successful in getting them in season. There is a decided shortage of tall Lily plants, but as this was prophesied several weeks ago there will be no disappointment felt, and the shorter plants will all be utilized. But few of the potted Lilies reach expectations, either in sizes or number of blooms.

Somewhat novel are the gold boxes, in various sizes, that filled with bulb stock make a very attractive and appreciative Easter floral offering.

A gilded basket, bowl shaped, with a tall handle, containing a Baby Rambler Rose with a large bow of Beauty ribbon is very conspicuous in its line. A half closed hamper filled with Pansies of all shades with bow of several different shades of lavender ribbon is not to be overlooked.

There is the usual display of crosses in various styles and shapes, executed with skill of Lilies, Roses, Violets and Ivy with flowers intermixed, all with the elaboration of ribbons and chiffon.

The Easter floral exhibit at the Garfield Park conservatory was opened Sunday morning to the public, and will continue until April 1, under the supervision of John Sell, head gardener for the West Park system.

Lincoln Park is also having the usual Easter display, and many visitors were seen at the conservatories last Sunday. The arrangements were in the hands of Rudolph Schiele and by the size of the many Easter Lily plants it does not seem that here there has been any trouble with these flowers.

Washington Park conservatories are also in gala attire, although, owing to the tearing down of many of the greenhouses late last Fall, to make room for the new headquarters in course of erection for the South Park commissioners, many plants were disturbed, putting them back. Mr. Kanst says that the display is not quite as elaborate as usual in consequence.

A notice to the trade in Chicago from Smith & Fettes, Cleveland, O., is to the effect that on March 21 this firm will be known as Smith & Fettes Co., Mr. Smith having formed a stock company, taking in only employees of the firm of Smith & Fettes. F. M. Smith will be the president and treasurer, the other members being Wm. Krusen, F. A. Kraus Jr., Timothy Smith and Clarence Meyers.

Michael Stauch, formerly of the firm of Joy & Co., Nashville, Tenn., is visiting in Chicago this week, on his return from Germany where he has spent the last six months visiting relatives. Mr. Stauch, who was for a long time associated with several growers of Chicago, was welcomed by all. He expects to return to Nashville shortly, although undecided what he will do on his arrival.

P. M. Brodbeck of Evanston, Ill., had a most unfortunate experience a few weeks ago, owing to one of the illuminating gas pipes breaking, which for the time destroyed his entire Rose crop. The plants are now recovering from the effects, however, and the Roses are just coming into crop.

Rohjan, the West Side florist, is rushing along a new greenhouse, offices, and men's quarters, to be ready for the Spring rush.

George Asmus says that while he had a pleasant visit to Rochester, New York the past week, to attend the executive meeting of the S. A. F., it was a case of work for four days and nights.

Damm Brothers of 2440 N. Irving ave., have their Lilies in just right. The force from Zech & Mann spent last Sunday at their place, packing Lilies for their shipping orders that were sent direct from the greenhouses to customers.

Frank Oechlin is among the fortunate growers this season, getting all his Lilies flowered in time for Easter.

Albert T. Hey of Maywood is another fortunate who has landed his crop. E. A. Kanst and wife were summoned by telegraph to Minneapolis, Minn., last Friday, March 18, through the illness of Mrs. Kanst's mother, who is in a critical condition.

The preliminary premium list for the exhibition of the Chicago Horticultural Society for the Fall of 1910 has been

Plant Names, Pronunciation of

This handy little book furnishes a key
of the pronunciation of some 4,350 names
of cultivated plants, genera and species,
and will be found valuable as furnishing a
standard to which to refer by all who de-
sire to be correct when they speak of plants.
Sent postpaid, on receipt of Fifty cents.
Address, The Florists' Exchange, P. O. Box
1607, New York.

F. E.—Best Advertising Medium

issued by J. H. Bardett, secretary. The
list is changed but little from those of
former years, except that the premiums
for cut 'Mums are increased considerably.
The list carries a total of \$4950 in pre-
miums. Copies can be had by applying
to the secretary, J. H. Bardett, 1620
W. 140th ave.

Chester A. Strail, well known in the
florist trade, is the republican candidate
for alderman of the 24th ward. The
election takes place April 5. Mr. Strail
was at one time associated with his
brother Fred Strail in the florist busi-
ness. All wish him success.

Letters from Riverside, California,
state that Ned Washburn's health is
greatly improved since his arrival there
three weeks ago.

The A. L. Randall Co.'s force have
been so busy with their Easter work
that they were compelled to work all
day last Sunday.

Bassett & Washburn say that they
will have a larger supply of both pink
and white Killarney Roses, at Easter
than ever before. They have come in
crop just right. They also have a mag-
nificent stock of American Beauty Roses;
Mr. Washburn says that he is cutting
the largest supply on the market.

J. B. Deamud Co. are flooded with
advance orders for Easter, and have book-
ed orders for 80,000 Lilies. This house
is receiving shipments of Sweet Peas
from New York that are far superior to
Western stock.

Winterson's Seed Store handled a car-
load of Ferns and decorative plants last
week. Ed. Winterson, it is pleasing to
state, is almost fully recovered from his
recent illness, although he says he might
feel stronger.

At Peter Reinberg's it is said that
their standby in the Rose line, Uncle
John, is in fine form and color for the
Easter demand. This Rose never fails
them when there is a scarcity of flow-
ers for special occasions; they can al-
ways bank on its being on the spot.

C. W. McKellar says that even though
he is receiving from 50,000 to 100,000
Daffodils from the South in a day they
are moving off nicely, owing to the high
prices of most stock.

Hoerber Brothers say that the outlook
for a big supply of stock from their
houses at Des Plaines for Easter is very
promising. Both Roses and Carnations
are in prime condition.

Vaughan & Sperry are also up to their
necks with work for their Easter trade,
and excellent stock in all lines is always
to be found in their busy store.

E. H. Hunt's supply department had
a very busy appearance on Monday
morning, indicating that their Easter or-
ders are immense in quantity.

W. J. Smyth is displaying a new fea-
ture in basket novelties for this Easter
—baskets filled with small plants and
flowers, among which are conspicuous
small chicks and ducklings. They cer-
tainly are attracting the attention of the
public.

Samuelson is also showing many beau-
tiful baskets of flowering plants, along
with magnificent specimen plants in sea-
son.

Muir of Michigan ave. has just the
windows for a display of all sorts of flow-
ers for Easter, and many novelties in
baskets, boxes and pans filled with bulb
stock and flowering plants have most
prominent positions.

J. F. Kidwell & Bro. also have a good
showing of Ferns and decorative plants,
but one can find these at this place at
all seasons.

Geo. Peiser who was until the past
two weeks with Hoerber Brothers is now
in the employ of Zech & Mann.

Mrs. Ella Kaber of Laporte, Ind.,
spent a short time in Chicago, purchas-
ing plants and supplies for Easter trade.

Visitors: J. Litzall, Geneva, Ill.;
J. H. Shelton, Rochester, Ind.; W. F.
Dittmann, Bensenville, Ill.; R. A.
Latham, Minneapolis; Geo. Vatter,
Marquette, Wis.; W. Anderson, Ken-
osha, Wis.

The many friends of Edward Ladikas
were surprised Monday morning to hear
of his death, which occurred Saturday
evening, through pneumonia, at the
Mercy Hospital. Mr. Ladikas, who has
been in the employ of J. Mangel as de-
signer for some time, severed his con-
nection a few weeks ago to accept the man-
agement of Thomas J. McNally's store,
477 Wabash ave. That he was an artist
of no mean ability in designing in all
lines of work is acknowledged. Mr. La-
dikas took first prize for bridal bouquets
at the National Flower Show in 1908.

He was also associated with Thorley of
New York for ten years. Deceased was
born at Closter, N. J., where the body
was taken for burial. Mr. Ladikas was
unmarried.

That Spring planting has begun to be
looked after is evident this week at
Vaughan's Seed Store, the entire force
being kept on the jump waiting and cater-
ing to the trade, both in the mail order
department and over the counter.

The Chicago South Side Club held the
last of its series of meetings on Thursday
evening, March 24. Forestry was the
subject for discussion. Mrs. John O'Con-
nor talked on "Trees and Birds"; Jacob
H. Frost on "Tree Planting on Our Resi-
dence Streets"; Mrs. Aletta W. Goss on
"Our National Parks"; and F. L. Brown
on "Forestry—Commercial."

It was only by a lucky chance that the
Flower Growers' Market was in operation
Tuesday morning, or that the growers
had any place to display their stock. Be-
tween the hours of 10 and 12 o'clock
Monday night a fire started in the build-
ing, on the fifth floor. The alarm was
responded to quickly, and the blaze soon
controlled. The fire was confined to the
fifth and sixth floors, the lower floors suf-
fering nothing more than a flooding. The
origin of the fire is unknown.

Bowling

A tournament for the different
leagues took place at Bensingers' Alleys
on Saturday evening, March 19. Ernest
Farley on the Carnation team in the
Florists' League took second honors, mak-
ing the second highest score in five
games single, his highest score in one
game being 267. Incidentally, this is
the highest score made by anyone in the
florists' teams since the establishment of
the league. Al. Fisher was also in the
money, taking third place. The Florists'
League howled as usual on Thursday,
March 17, with the following results:

Roses	725	716	823
Violets	676	801	717
Orchids	732	718	715
Carnations	732	768	763

The Mastin Automatic White-Wash and Spraying Machine is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass. The pump is of brass throughout, simple and powerful. The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for fifteen minutes.

All parts are made to gauge, and may be had for repairs.

Ask your dealer about our Extension Hose, Extension Rods, and the Mastin White-wash Nozzle for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

New Bedford, Mass.

Trade the past week has been somewhat better than for the preceding week. Flowers are a little scarce just now. Funeral work has been good. Carnations are a little off crop with some of the varieties; they retail at 50c. and 60c. per dozen. Roses sell at \$1.50 and \$2 per dozen. Violets are about gone; this has been a fairly good season for them; they retailed at \$1 per 100 blooms.

Plant trade has been very good the past winter, so far. Thursday the 17th we had quite a heavy snowstorm here, with the mercury dropping away down to 10° above zero. This made heavy firing necessary. The snow did not last very long, however. The weather since has been quite mild.

St. Patrick's Day here does not increase business to any great extent. Wm. Y. Peirce had quite a lot of uice Shamrocks in small pots, which sold at 10c. each. I did not notice any green Carnations anywhere.

There have been a few Spring openings here, which have helped out somewhat.

By the time this is in print, Easter will be almost over. Prospects for a good business look good, as all the industries here are running on full time, and this, coupled with a good supply of flowers, will fulfill expectations.

R. H. Woodhouse will have a big supply of bulbous stock for Easter.

Tulips the past week sold for 50c. retail per dozen, 75c. for double sorts; Narcissus, Single and double, 35c. and 50c. per dozen, and Paper Whites at 50c. per dozen.

Our street fakir was with us again last Saturday, selling Carnations and Violets at very low prices. Some method is to be tried to boost him out.

E. H. Chamberlain is now back again at the store after a week's sickness with the gripe.

Through the local Horticultural Society prizes have been offered for the best kept gardens and lawns the coming

season. The local paper, the Evening and Sunday Standard is helping considerably by publishing lists and pictures of plants, flowers and gardens. It is hoped that the people will be greatly interested in this project.

Pansies and Daisies are now blooming here. They are good Spring sellers in this section.

We hope all will have a good and joyous Easter.

HORTICO.

St. Louis

Several of the Belleville florists were here last week looking over Easter stock, and they all anticipate a big Easter trade. Foster Floral Co. had the big decorations at the Schruag's department store which, Fred says, was a big job.

The decorations at Barry's last week were furnished by the C. Young & Sons Co. This firm is surely making great Easter stock displays at their retail store.

Several of the leading retailers are contemplating buying automobiles this Summer; the first to come out with a fine touring car is Fred C. Weber.

Mrs. Wm. Ellison, in company with her son Harry, visited Chicago recently to place their orders for Easter.

The A. Brix Floral Co. is again in possession of the Mead ave. greenhouses, having sold them only a month ago; the man who bought them went back on his bargain.

Along Grand ave. the florists are making great Easter displays this week. Among them are Walbart, Ayers, Bentzen, Windler and Bergesterman. In the West End, Weber, Kalish, Ellison, Windt and Miller have their show houses filled with extra fine quality of blooming plants for the Easter rush. Sanders, in the extreme western end, has extra fine Lily plants, also other blooming plants, from which the trade bought heavily.

The Retail Florists' Association held its second meeting at Washington Hotel, Wednesday, March 16, and perfected an organization by electing the following officers: C. C. Sanders, president; Theo. Miller, vice-president; F. C. Weber, secretary; R. J. Windler, treasurer; Max Herzog, sergeant-at-arms. The only business before the meeting was the consideration of the answers from all four of the wholesalers who responded to a letter sent them, saying that they have never sold at retail and assuring the retailers they would not do that kind of business. It is said that the crape pullers would next get a hearing. After the meeting the thirteen who attended sat down to a nice lunch; the next meeting will be called in two weeks.

The Executive Board of the Horticultural Society held a meeting on Tuesday, March 15, at the M. A. Club rooms to talk over plans for a Fall flower show; the board will meet once a month.

The Lady Florists' Home Circle met on Monday, March 14, at Trimp's Hall for their regular monthly meeting. Miss T. Meinhardt entertained the members with a reading from De Koning's history of 1635 on the Tulip trade. After the meeting adjourned a few games were bowled by the ladies, and a lunch was served. The next meeting will take place April 11, when a full attendance is expected. Miss Birdie Meinhardt was elected to entertain.

Secretary L. P. Jensen of the Engelmann Botanical Club has issued notices for a meeting of the Club to be held on Monday night, March 14, in the Botanical Laboratory of the Central

ST. PATRICK.

Detroit

By the time these lines appear in print the reason for the prevailing good cheer among local florists will have become a fact.

Lent is almost passed and, having produced a substantial increase in business which, with some, amounts to over 50% of last year's Lenten business, it is only natural that we all feel good.

The outlook for Easter is excellent. With the ideal weather conditions now prevailing it will be more a matter of preparation to handle the increased volume of business and having sufficient stock to do it with.

The general watchword will be all hands "push hard." FRANK DANZER.

Probably no other field of undeveloped natural resources in all the domain of diversified production offers richer and happier results than does nut culture.

The advent of the huddled and grafted Pecan has removed the greatest uncertainty in the Pecan industry. One may now not only be sure that his trees will bear, but that they will do so at a reasonable early age. And further he may know that the quality of the product he will have something that is worth while.

**Begin Fighting Caterpillars Now
Band Your Trees With Strokum**

DO it before the caterpillars or tussock moths begin to crawl up the trunks. Keep the first ones from attacking the tender leaves. Every crawler killed now means hundreds less later on.

Strokum is a perfectly harmless vegetable product that is the most effectual banding substance known.

It's easy to apply, does not stick to the tree when removed, will last an entire season. The caterpillars can't crawl under it because it fills the chinks of the bark. They won't crawl over it. Birds will not carry it away as they do cotton. Fly paper does not fill bark chinks and dries up in a few days. Smeared-on tar preparations dry up and disfigure trees indefinitely.

Strokum, besides being effectual, is not unsightly.

Send \$3.00 at once for a sample package of fifteen pounds, which is enough to band fifteen trees three feet around. Delivered free anywhere East of the Mississippi; 50c. extra West of it. Send for our illustrated booklet.

The Week's Work

BY
FRITZ BAHR

After Easter

Reminders for March 28

The man who has nothing outside of a store to demand his attention will have a breathing spell after Easter. Not so with the retail grower—he will be busier than ever on Monday, March 28. Every day counts. We have had Geraniums in 2½'s on the side benches awaiting a shift for several weeks. The propagating bench is filled with rooted cuttings, Heliotrope, Coleus, Cupheas, Ageratum and dozens of other varieties. These have all been ready, for some time, for pots, but the Easter stock has had the stage up to now. There is just one course to follow now, in order to get the best possible results, and that is to let every hand pitch in to get things in shape. Hire sufficient help to complete the work; it isn't necessary that every man should be experienced, any handy young fellow can carry pots and soil, and two or three good plantmen can keep quite a few helpers busy. A good many plants can be shifted in a day. Nothing is gained by having two men trying to accomplish what would be considered work enough for four; make an effort to get sufficient help and push the work through as quickly as possible. A good part of the secret of success with the grower lies in doing the right thing at the right time; a few days too long in the cutting bench may stunt the young plants to such an extent that it will take weeks to get them into shape again.

Carnations

The Late Propagated Stock

It is still in order to propagate Carnations, especially for the grower who has a light sandy soil in the field. We have a stiff clay and find that only the early propagated stock, such as comes out of 2½" and 3" pots and which have been pinched back, will make suitable plants for housing in July and August. Growing the stock indoors entirely is all right for the specialist or the man who has plenty of bench space. With the average retail grower, whose room is limited and who has to rely on a bedding plant trade during the Spring months, which demands a great deal of bench space, field culture will be practiced for a long time yet to come; and, after all, it would seem that the change into the open, for the roots to get into deep cool sweet soil, ought to be of benefit to the plants—it is hard to convince me differently. I have seen growers take rooted cuttings and plant them right into the field, into a sandy, light soil, and get splendid bushy plants by August 1. In a heavy clay soil you cannot do this, but the plants you do lift, which were planted out about May 1 from 2½'s, while rather small are stocky and will make the best of stock for planting into the benches; in fact, they are away ahead of plants which have made a soft rank growth, such as have to be nursed for weeks before they get re-established again.

Geraniums

The Final Shift of the Spring Stock

We don't believe in giving the 2" or 2½" Geraniums a shift into 4's, as a rule, and yet at this time of the year it seems like a waste of time and money to do otherwise. If you have strong 2½" stock it would be folly to shift it into 3½'s only to give another shift in about three weeks from now. No! by all means use the 4's, only don't put anything in a 4 that doesn't belong to that size. It shouldn't be the principal idea just how many 4's a certain bench contains, but rather how many good ones—that's what counts, no matter what we grow, what salable stock we carry. If a 2½" Geranium is not fit to go into a 4" pot why make it? Don't! Wait until it is, or use a 3½". Now, about repotting the plants. A good deal has been and will be written on this subject. Most every one of us has a way of his own, slightly differing from each other's; however, on certain principles we all agree, and with a Geranium the three main things to observe are a rather heavy soil, firm potting and good drainage. The heavy soil and the firm potting make the drainage a necessity. A Geranium in a light soil will grow more rank than in heavy soil, and at the same time will bloom later and not as well. Many of us have learned that by experience. It is getting rather late, if you expect to grow good stock, to pinch back any of the young stock in order to get more

cuttings. Use the old stock plants for this purpose, cuttings taken now will still make nice 2½" stock, if they are not too soft. Pot them right up into 2½" in a sandy soil—they will root in 12 to 15 days.

Late Struck Cuttings.

While it would be too late to propagate Geraniums now and expect good sized plants by the middle or end of May, if there are any cuttings suitable for that purpose on hand they should certainly be made use of. If propagated now, they will make excellent 2½" stock in six weeks. Such as are in bloom by that time can be made use of, often, in baskets or small vases where a 3½" or 4" pot plant would, perhaps, be too large. We have had seasons where a batch of such stock helped out considerably. Again, such plants make the very best material for stock to be planted out in the field, in fact, I would just as soon have it as the larger plants. It hurts just a little bit to have to set aside good salable 4" pot plants for stock, especially when a good price is offered, and yet if we want cuttings for another year it has to be done. If, however, a good number of the different varieties wanted are propagated now, the little plants will not take up much room and may be planted out early, and if at all attended to during the summer they will furnish any amount of cuttings for September and October propagating. I am sure that almost every retail florist who grows even a few thousand Geraniums will have stock at this time of the year which will furnish good cuttings, without in any way hurting the plants, any 3½" or 4" plant from which a cutting is taken now will have plenty of time to grow, in fact, many will be benefited by being pinched back.

The Cannas

Starting the Main Batch

The starting of the Cannas is usually well under way with us before April 1, so that they may come along under the benches ready to be potted up by about April 20, at a time when all the Geranium and Salvia plants have had their final shifts. Use a little care when bringing the field grown clumps to the potting bench. It needs only the very least careless handling to break off a number of the young shoots, they snap off almost by looking at them, and this is costly. Carefully remove the soil and with a sharp and large enough knife cut the roots into pieces with one or two good live eyes each. As they are being cut we put the pieces into three different piles, according to their sizes. It is as well to shorten some of the roots, for the old ones don't amount to anything, new ones have to form. We use flats about 3 inches in depth, the bottoms covered with one-half an inch of sandy soil, on which we place the roots closely, afterward they are covered with the same material and the flats are placed on the hot water returns. I don't know but what this method is about as good as any for the average retail grower who has his own field grown stock. I prefer it, certainly, to the method of some growers, who pot up their stock at once and wait for weeks before they get any growth started, the pots at the same time occupying valuable bench room.

Propagating

Keep on with the Bedding Stock

It is a good time now to fill up, once more, every inch of space in the propagating bench with cuttings of bedding stock. Heliotropes struck now will make the very best plants for 4" pots

by the middle of May, so will Ageratum. It is just the right time for Verbenas, if they are to be grown from cuttings. Cupheas, Petunias, Lobellias, Salvias and many other plants we use for our Spring sales can be propagated now and will make good stock in a few weeks after being rooted. Many of these, like the 2½" Geraniums, might come very handy before the season is over. Frequently we have early shipping orders, which call for stock out of 4" pots, in early May; this will afford a splendid opportunity to give some of the late propagated stock, which by this time is in 2½" s, a shift into 4" s, to take the place of the stock sent out, where in three to four weeks, long before the close of the season, they will have had a chance to grow into good plants. For that reason the retail grower should keep right on using the propagating bench, as well as sow seeds of such plants as Salvia, Verbena and others. If the resulting plants are not all disposed of not much harm is done, but should there be a demand for them it will certainly more than pay for all the trouble taken; so keep on, you can only sell bedding stock during Spring; be prepared for a good season.

Kalamazoo, Mich.

St. Patrick's Day with its attendant banquets, green Carnations, and evening dances, used up quite a quantity of flowers and all the downtown florists report a good week of business. The weather still continues favorable for transient trade though perhaps a little too warm for those whose stock is well advanced for Easter.

Business for this week promises well and already many good orders are booked. Mr. Fisher says his orders exceed those of previous years and he has already engaged big shipments of Lilies in pots and Easter plants of all kinds.

The cut flower trade, both here and at Battle Creek, he reports as being in very promising condition and the firm looks for a record breaking Easter.

Van Bochove's will, as usual, have an immense stock to dispose of and are making elegant displays at the store. I am told the Central Nursery Co. have engaged a big store on South Burdick st., well located.

Stock for Easter is, generally, in good shape and prices quoted are reasonable. Lilies, 12½¢ to 15¢; Roses, Teas, \$6 to \$10 per 100; Carnations, \$3 to \$5 per 100; Violets, 75¢ to \$1; Sweet Peas, 75¢ to \$1. Bulbous stock, \$3 to \$4 per 100.

Retail prices will not advance much; good Lilies will fetch 20¢ per bud and bloom; Roses, \$1 to \$2 per doz.; Carnations, 50¢ to 75¢ per doz.; Violets, 25¢ per bunch; Sweet Peas, 15¢ per doz.; Bulb stock, 50¢ to 60¢ per doz.

Pot plants are in ample supply and no advances will be made on these. Fine weather is needed for a few days longer in order to make Easter of 1910 a hummer.

Remedy for Snails

In further answer to Question 74, asking for a remedy for snails infesting greenhouse benches, I have to suggest putting small dishes filled with beer, lager or ale, it makes no difference which; place these dishes at night between the plants suffering from snails, and the next morning you will find the snails dead. W. V. NIEUWERK, N. J.

The Burnham

Why buy half a boiler and then get a mason to build the other half? When you buy a Burnham you buy a base too. No bricking in expense.

A Better Water Supply

is what you will need when the dry, hot summer follows this long winter, and the best obtainable is a **Standard Pumping Engine** because it takes the water from the source of supply and puts it into the pipe line by direct pressure.

This is the simplest, most reliable and cheapest way of doing your watering. Catalogue and more about it sent on request.

STANDARD PUMP & ENGINE CO.,
15 Michigan Street, CLEVELAND, OHIO

Please mention the Exchange when writing.

Mastica is elastic and tenacious, admits of expansion and contraction. Putty becomes hard and brittle. Broken glass more easily removed without breaking of other glass as occurs with hard putty. Lasts longer than putty. Easy to apply.

REMEMBER! FLORISTS, REMEMBER!

That we manufacture Steam and Hot Water Boilers.
That we contract for and erect Heating Apparatus.
That we make a specialty of curing defective apparatus.
That our staff of Heating Engineers is reliable and competent
That our Mechanics—pipe fitters—boiler makers, etc., are all first-class.
That it will pay you to get our suggestions and estimates.

THE EASE OF ERECTION OF OUR PIPE-FRAME HOUSE (OR "SEMI-IRON")

Getting started is always the hard part, but it is simple enough with this construction. Set your Wrought Iron Posts in concrete, and then bolt on the Galvanized Angle Iron Eave Plate. When once you get the plate lined up, the rest comes along easy enough. With the Giant Arch next up, you have a complete scaffolding for the putting up of bars and ridge. The bars are fastened to the Eave Plate by the Bar Clamps, making their spacing absolutely accurate, so you will have no trouble about that. The Wrought Iron Ridge Brackets are bolted to the ridge, and each bar screwed to the Bracket, and that does the trick there. With the Gable Rafters bolted to the iron posts, which extend to the height of the eaves all around, the gable framing is greatly simplified. Now practically all that remains to be done are the sides and glazing. So you see it is a construction with its strongest structural points so worked out that it is the easiest possible house to erect. Next to our Sectional Iron Frame Construction, it is certainly the best house to buy and the easiest to build. Send for circular showing the new Robert Craig range at Norwood, Pa.

Payne Dripless Center Gutter

THIS gutter is constructed to take care of the water of condensation from the under side of the glass, and also the sweat from the gutter proper. All of which is connected by the drip plate and carried by the condensation gutters to the pipe supporting the gutter, through which it is carried down along with the roof water to the drain. It casts the least amount of shadow, and is an absolutely strong gutter made of steel in 16 foot lengths and supported by malleable iron brackets.

These gutters are used in connection with

PAYNE "T"-BAR

Iron Frame Greenhouses the lightest and strongest structures on the market today; constructed with Iron Ridge, Iron Purins, Iron Eaves, Iron Sill, Iron Base.

New Double Lobelia

"KATHLEEN MALLARD"

We can furnish excellent plants of this splendid novelty in 2½-inch pots, at \$6.00 per 100, or \$50.00 per 1000.

RAWSON'S LEADING ASTERS

QUEEN OF THE MARKET ASTER

This is the best early out-of-door Aster. In colors as follows: Dark Blue, Light Blue, White, Rose, Peach Blossom, Crimson, per ¼ oz., 20c.; per oz., 60c. All colors mixed, per ¼ oz., 15c.; per oz., 50c.

RAWSON'S NEW MIDSUMMER ASTER

This is one of the best Asters for Midsummer or late crop and we recommend it highly. Flowers are large and are borne on erect long stems, often 2 feet in length. We offer the following colors: Pure White, Delicate Shell-Pink, Royal Purple, True Lavender, and Bright Rose, per ¼ oz., 60c.; per oz., \$2.00. All colors mixed, per ¼ oz., 50c.; per oz., \$1.50.

RAWSON'S LATE BRANCHING ASTER

This is the best American Branching Aster grown to-day. It is a late cropper and a money-maker. Flowers grown from our seed invariably bring from ½ to 1c. a flower more in the wholesale market than other similar strains. We can furnish the following separate colors: Crimson, Dark Blue, Light Blue, Rose Pink, Shell-Pink, Scarlet, and White, per ¼ oz., 30c.; per oz., \$1.00. All colors mixed, per ¼ oz., 25c.; per oz., 75c.

We have many other good strains of Asters and specialties for Florists all described in our special catalogue to florists (mailed free).

Special Gladiolus Offer

AMERICA

A few points of merit—Color: A beautiful soft flesh pink, very light and much like "Enchantress" Carnation, except slightly tinged with lavender. Size: growth very strong and healthy, producing beautiful dark green foliage, and strong, erect spikes of the largest flowers. Purposes: For florists' use its color makes it everything to be desired; delicate, attractive and absolutely new. It is most desirable for planting in beds in parks, private estates, etc.

AMERICA. The best commercial pink in existence. 1st size bulbs, 100, \$4; 1000, \$30; 5000, \$125.

ATTRACTION. Deep, dark, rich crimson with a very conspicuous large pure white center and throat. At once a most beautiful and attractive sort. 100, \$4.00; 1000, \$25.00.

AUGUSTA. Lovely pure white with blue anthers. 1½ to 2½ inches. 100, \$2.25; 1000, \$20; 5000, \$30.

BLUE JAY (Baron Hulot). The finest blue Gladiolus yet seen. It is a rich deep color of indigo shade. The only real blue Gladiolus on the market. 100, \$3.00; 1000, \$25.00.

BREXCHLEYENSIS. Extra fine red variety. 1½ to 2½ inches. 100, \$1.60; 1000, \$12.00; 5000 \$55.00.

COLUMBIA. Light orange scarlet, finely blotched and pencilled with bluish-purple. Throat freely mottled. 100, \$2.00; 1000, \$15.00; 5000, \$70.

CERES. Pure white, spotted with purple rose. 100, \$1.50; 1000, \$12.00; 5000, \$55.00.

MAY. A lovely pure white flower, finely flaked, bright rosy crimson. 100, \$2.00; 1000, \$16.00; 5000, \$70.00.

NEZINSCOTT. Bright blood scarlet, with deep velvety crimson black blotches, and white markings in throat. 100, \$4.00; 1000, \$30.00; 5000, \$146.00.

PRINCEPS. Rich crimson with very deep shadings in the throat and broad blotches on lower petals. 100, \$10.00.

SALEM. Fine salmon-pink, maroon blotches. 100, \$6.00; 1000, \$40.00.

Gladiolus America

SULPHUR KING. The finest yellow Gladiolus. 100, \$15.00; 1000, \$140.00.

Shell pink	.20	.30	1.00
Rose	.20	.30	1.00
Caroline	.20	.30	1.00
Mixed	.10	.20	.75

ASTER. Hohenzollern. Excellent robust new class, with enormous flowers, superb for cutting and exhibiting; flowers often measuring 6 to 8 inches in diameter.

	Tr. pkt.	¼ oz.	Oz.
White	\$0.26	\$0.75	\$2.00
Rose	.25	.75	2.00
Dark blue	.25	.75	2.00
Crown Prince	.25	.75	2.00
Syringa blue	.50	1.50	5.00
Mixed	.25	.75	2.00

ASTER. Purity. One of the finest white Asters grown either for pots or cutting. Trade pkt. 25c., ¼ oz. 75c., oz. \$2.50.

ASTER. Daybreak. Counterpart to Purity, with a fine rose color similar to Daybreak Carnation; very fine. Trade pkt. 25c., ¼ oz. 75c., oz. \$2.50.

ASTER. Giant Comet.

	Tr. pkt.	¼ oz.	Oz.
Pure white	\$0.25	\$0.75	\$2.00
Dark blue	.25	.75	2.00
Light rose	.25	.75	2.00
Mixed	.20	.60	1.75

ASTER. Hercules. White. Remarkable new introduction, semi-dwarf, huge pure white flowers of most refined shape; the best white flowering Aster we have ever seen. Pkt. 25c., ¼ oz. \$1.00, ½ oz. \$2.50, oz. \$7.00.

ASTER. Splendor. Upright flesh pink. In this variety we have one of great value. It has many qualities which commend it highly, not only in the habit of growth, but in size, form of flower, and in color, which is one of the most desirable in an Aster, being of a beautiful light flesh pink, shade which can be used in nearly all floral work. The plant has the ideal habit of an upright growing sort. Pkt. 25c., ¼ oz. \$1.75, oz. \$5.00.

ASTER. Vick's Violet King. The peer of the grandest Chrysanthemum. The habit is similar to the popular Vick's Branching, vigorous in growth, long, stiff stems; petals somewhat resemble the quilled varieties but much larger and broader, completely covering the crown. In shape and size the bloom is round, full and large, many of the flowers 4 to 6 inches. Its color is a soft violet-lilac. Trade pkt. 25c., oz. \$1.60.

European Notes

Two days ago we were summering in the brightest and most beautiful weather we have enjoyed since the few fine days at the beginning of last September. Today we are dodging heavy snowstorms and icy winds that fairly nip us up, and can hardly be beneficial to the newly opened buds and tender seedlings.

In the meantime the work of sowing both annuals for 1910 and biennials for 1911—Cabbages—goes on apace and, except where the land is still buried under water, we are considerably ahead of last year.

As the water-logged land contains many of our most valuable plants, we are still very anxious as to the final outcome, but as the rivers are now subsiding very rapidly we hope that there will not be an entire loss.

EUROPEAN SEEDS.

American Notes

A Splendid March Trade

Without exception, the entire seed trade would seem to be agreed that not in years, if ever, has a more satisfactory March business been experienced. Ex-

"Horseshoe Brand" Products

"NOT HOW CHEAP—
BUT HOW GOOD"

Do you invest in Lily Bulbs, or do you speculate? In buying Lily Bulbs at random you are merely speculating, and speculation has never been known to pay in the long run. The success of your business may be ruined by speculation. You must have good Lilies or you had better have none. They must be good every season and not just once. If you want to make a conservative investment in Lily Bulbs for Easter, 1911, buy Horseshoe Brand Lilium Giganteum—the best the market can afford.

Now For Those Rush Orders!

FLORISTS who want their orders filled accurately and quickly will make no mistake in sending to us. We are prepared to fill orders the day they arrive. We have just doubled our packing force—a change made necessary by the largest number of orders ever received. Here are some of the things you should not overlook in planning your Spring planting:

ASTER SEED, ASTER SEED, ASTER SEED, Sweet Peas, Dahlias, Gladioli, Lilies, Market Garden Strains of Vegetable and Flower Seeds, Hardy and Tender Plants, Potatoes, Small Fruits, Lawn Grass, Fertilizers, Insecticides and Sprayers

Five minutes' study of our wholesale catalogue will convince you that it is to your interest to send us your rush order. To insure its reaching the right department the minute it arrives, mark both your order and envelope, "Wholesale Department—Rush." Mention this paper.

JAMES VICK'S SONS, Rochester, N. Y.

PANSIES

Brown's Prize Pansies, Fall transplanted, large stocky plants, in bud and bloom. Mixed Colors, in any quantity. 15,000 Giant Yellow with dark eye, \$1.25 per 100, \$10.00 per 1000. Cash with order.

PETER BROWN, 124 RUBY STREET Lancaster, Pa.
Please mention the Exchange when writing.

and is particularly pleased with some very large nursery stock orders his firm has secured.

Wm. Elliott & Sons are very busy and report that sales are especially large in Grass seeds and Clovers. They are making a specialty of lawn Grass seeds in pint and quart cartons for the wholesale trade.

Julian H. Walter, president of the Stump & Walter Co., has just returned from a four weeks' trip in Europe. Mr. Walter was only away some four weeks, but in even that short time visited England, Holland, Germany and Belgium.

J. M. Thorburn & Co. report sales of flower seeds as unusually good. As always, Spring bulbs with them are a feature.

Burnett Bros. have been booking some very satisfactory orders from the private trade, not only for seeds but for large quantities of plants and nursery stock as well.

Rickards Bros. say that the retail counter trade has commenced fully two weeks ahead of a year ago, which will lengthen out their seed-selling season by just that much. They are greatly pleased with the volume of business done during March.

Peter Henderson & Co. are, on all sides, receiving congratulations on the fact that the extensive improvements and alterations to their Cortlandt st. store are entirely finished. They now have one of the best equipped and handsomest seed stores in the East, a splendid wide entrance, modern show windows, elevators and interior fixtures and fittings, all most modern and complete.

At Boddington's, the last few days have increased sales materially. This house is this season handling exceptionally large quantities of hardy Roses for Decoration Day forcing. Lawn Grass seed, Sweet Peas and flower seeds are

the leaders at the retail counters. Mr. Boddington reports that Easter being so early they are at least ten days ahead of a year ago in the volume of sales this year.

Weeher & Don have been making a specialty this season of Sweet Peas, and report much increased sales over even the large output of a year ago.

C. McTaggart finds his new location at 123 Warren st. particularly suited to retail business, the many persons passing to and from the trains and boats, purchasing most freely.

Chicago Seed Trade

Trade is unusually urgent on account of weather being so good.

Onion sets being well cleaned up the market is stiffening, and the end up likely to bring high prices.

Corn, both in garden and field varieties is in strong demand; germinating quality on the average poor, consequently prices quite high for good stock. Fill in trade with the jobbers is excellent and some trouble experienced to supply many of the standards in seeds, but good substitutes are taken where the kind wanted is out of supply.

Philadelphia Seed Trade

The continued warm and pleasant weather has increased the already active condition of business in all the seed stores. Every employee who can sell has been put behind the counter; the stores are crowded with buyers and our seedsmen are kept busy day and night.

The seedsmen already fear a shortage later on in Peas, Sugar Corn, and certain varieties of Beans. All kinds of vegetable roots, flower roots and bulbs are selling briskly.

The Johnson Seed Co. reports that its business now is as large as it usually is in mid-April. The demand for Rhubarb and Asparagus roots, and Tuberoses, is very heavy, and the call for Aster seeds is undiminished. The Stokes Seed Co. makes a full display of Red Clover, Swedish Oats, Japan Buckwheat and Spring Rye Seeds. Mr. Stokes reports a very heavy sale of Hydrangea Otaksa, of which he makes a specialty, of Easter Lilies, and of Lily of the Valley, blooms of which latter to the number of 70,000

were cut from his greenhouses at Moorestown, N. J., last week.

The Moore Seed Co. is making heavy sales of Field Corn, of which a specially good supply has been secured. Mr. Moore says sales in all lines of seeds were never so heavy as this season.

The house of Henry A. Dreer continues its large sales of Grass seeds and Potatoes, and garden seeds, of which latter there is a most complete collection in one of the store windows. Mr. Thilow says the sale of perennial plants has already begun. These are one of the Dreer specialties.

At Henry F. Michell Co.'s it was difficult to make a way through the crowd of buyers to the offices. Blooming plants from Michell's Giant exhibition strain of Pansy seed are now on sale at the store, and for stockiness of plant, and size and beauty of bloom they can hardly be surpassed.

Boston Seed Trade

Owing to the very fine weather we have had for the last month the seed stores are kept hustling. They report that March has broken all records in the way of increased orders. They say there is very little call now for the grandiflora types of Sweet Peas and that almost every person buys the Spencers.

Maurice Fuld, manager of W. W. Rawson & Co., says that two years ago they sent a collection of Dahlias to Japan. The Japs have now a Dahlia Society and gave their first exhibition in Yokohama. This firm has been asked by the Japanese Dahlia Society to send them 1000 copies of their Dahlia catalog for distribution; they have been sent.

R. C. STURGEON BAY, WIS.—The Northern Wisconsin Seed Co. is to be incorporated with a capital of \$25,000.

Bermuda

Under the Produce Inspection Act of the island, which has been in force for some time, importers of Potatoes and Onions from that source should feel securely protected as to quality and condition of stock when received, the Bermuda regulations as to inspection of stock before shipment being extremely stringent.

Congressional Seed Distribution

Representative Graham, of Pennsylvania, chairman of the House Committee on Expenditures, on March 17 queried Agricultural Department experts as to criticisms of the vegetable and flower seeds furnished by the department for Congressional distribution. Acting Chief Powell, of the Bureau of Plant Industry, said a laboratory was maintained for the purpose of determining by tests whether seeds were adulterated or lacking in vitality. He declared the results of the tests, with the names of the firms supplying the seeds, were published whenever the seeds were found to be below the standard.

Doctor Powell said the seeds in the Congressional distribution were of as high a standard as any furnished by anyone, and that private establishments were protesting because of the effect on their own goods.

Seed Trade Advtg. in England

Our correspondent, "European Seeds," in a recent note, made a remark on the great advertising campaign in the seed trade which was at that time being conducted in England.

Ryder & Sons, styling themselves the "Penny Packet Pioneers—Seed Specialists," have been using full-page advertisements in the principal London daily papers, and we have before us their advertisement as it appeared in the Daily News of Friday, March 11. The advertising is written up in the most approved American style, showing portraits of the principal men in the firm, photographs of their offices, of medals received as successful exhibitors, etc. They sell direct from their own establishment and not through agents, and must certainly transact a wonderful amount of business in order to be able to pay for the expense of the advertising they are doing. Here-with are some of their advertising catch phrases: "The History of a Celebrated Business Built up Solely on Pennies." "Ryder & Sons' Penny Packet Seeds Will Grow in Every Garden." "The Most Remarkable Seed Business in the World." "All Seeds, from Orchids to Mustard and Cress, for One Penny." "Buy Ryder's Seeds This Year and Test the Power of a Penny."

Another advertising proposition, on widely divergent lines from the foregoing, is that issued by Sutton & Sons of Reading, England—a handsomely illustrated work in magazine form entitled "The Garden Fayre," with cover in colors illustrating a garden scene. Attractively written and illustrated with appropriate pictures, the advertising feature is neatly carried out, and so inconspicuously as not to affect the magazine idea. Advertisements from outside houses materially assist in reducing the cost of the enterprise to the originators thereof. These instances are cited for the information of our readers and to show that all the world is awake to the benefits to be derived from "Judicious Advertising" in the seed business.

Cultural Direction Leaflets

Prepared especially for seedsmen to give away to customers. Written by experts with a view to the wants of the amateur. Seedsmen are requested to send for a free sample. Address,

DREER SPECIALS IN HARDY PERENNIALS

Japanese Anemone.

ANEMONE JAPONICA. Many thousands of well-established pot plants.
Japonica Alba. Large snowy white. Doz. 85c., 100 \$6.00.
Japonica Rubra. Beautiful rosy red. Doz. 85c., 100 \$6.00.

Elegantissima. Semi-double satiny-rose. Doz. \$1.25, 100 \$8.00.
Princes Henry. Large double, deep pink. Doz. \$1.25, 100 \$8.00.
Queen Charlotte. Very large silvery pink. Doz. 85c., 100 \$6.00.

Rosea Superba. Delicate silvery rose. Doz. 85c., 100 \$6.00.
Whirlwind. Large semi-double, pure white. Doz. 85c., 100 \$6.00.

ACHILLEA, BOULE DE NEIGE. A decided improvement over "The Pearl," with flowers one-half larger; a valuable cut flower. Doz. 2.00, 100 \$15.00.

ANCHUSA ITALICA, DROPMORE VARIETY. (Improved Italian Alkaner). One of the showiest and most useful plants for the mixed border or for planting between shrubbery that we know of; the plant grows from 5 to 6 feet high, producing throughout the season large but graceful spikes of beautiful blue flowers. Doz. \$1.50, 100 \$10.00.

AQUILEGIAS. A splendid stock of the popular Columbine. All the leading varieties in strong plants. Doz. 85c., 100 \$6.00.

ARTEMISIA LACTIFLORA. A new plant, an introduction from China, grows 3 to 4 ft. high, with elegant dark green cut foliage and large spikes of graceful, creamy white, Spirea-like light and graceful flowers. Strong plants 30c. each, doz. \$3.

HARDY ASTER GRANDIFLORUS. The latest of all to bloom, frequently being in good condition as late as Thanksgiving Day; flowers large, of a dark bluish violet; always attracts attention in our grounds, being the last plant in flower. Strong plants \$2.00 per doz., 100 \$15.00.

ASTILBE ARENDSI, CERES AND SILVER WHITE. These are the result of crossings between Astilbe Davidi, Japonica compacta, Astilboides and Thunbergii. They are of strong, robust habit, growing from 2 1/2 to 3 ft. high, in much branched panicles; the former with light rose colored flowers, the latter with silvery white flowers. Excellent subject for a semi-shaded moist position. Each 50c., doz. \$5.00.

ASTILBE GRANUIS. An introduction from China, growing from 5 to 6 ft. high; the panicles of white flowers range from 2 to 2 1/2 ft. in length. Each 35c., doz. \$3.50.

DELPHINIUM BELLADONNA. The freest flowering of all the Delphiniums and the most valuable of any variety for cutting. Its beautiful turquoise-blue flowers appeal to all who see it. Plant these early and you will have a continuous display of bloom from June from freezing weather. We offer an exceptionally fine lot of extra heavy one-year-old plants. Doz. \$2.00, 100 \$15.00, 1000 \$125.00.

DELPHINIUM, DREER'S GOLD MEDAL HYBRIDS. Unquestionably the finest strain of mixed hybrids ever offered, being seedlings of one of the best named collections and containing some wonderful varieties. Strong one-year-old plants. Doz. \$1.25, 100 \$8.00, 1000 \$75.00.

DELPHINIUM FORMOSUM. A splendid strain of this favorite and popular dark blue variety. Doz. 85c., 100 \$6.00, 1000 \$50.00.

GYPSOPHILA PANICULATA FLORE PLENA. We consider this one of the most valuable Summer cut flowers we have, a plant which is destined to become a most important subject for cutting. Strong plants, doz. \$2.00, 100 \$15.00.

HELENIUM, RIVERTON GEM AND RIVERTON BEAUTY. Two splendid perennials of our own originating; the former having flowers of old gold color suffused with terra cotta, changing as they mature to a wall flower red; the latter a pure lemon color with a large disc of purplish black. Doz. \$1.50, 100 \$10.00.

HEUCHOCALIS AURANTIACA, AURANTIACA MAJOR AND FLORIAM. These are the three handsomest forms of the Day Lily, with very large trumpet-shaped yellow flowers. Doz. \$1.50, 100 \$10.00.

HEUCHERA, FIVE NEW VARIETIES. Fantastic. Sulphur yellow, tinted green; tips of petals bronzy red.
Grenade. Bright red, tinted carmine; very vigorous.
Pluie de Feu. Bright raspberry-red; very free.

Profusion. Ivory white.
Virginal. Large creamy white. Each 35c., doz. \$3.50.

NEW IRIS GERMANICA.

Klog of Iris. A striking novelty, with flowers of perfect form; the standards clear lemon yellow, while the falls, which are very large, are a deep satiny brown, with a broad border of golden yellow. Ea. 50c.

Lobengrin. One of the strongest growers yet introduced, both foliage and flowers being of gigantic size, the flowers being nearly 6 in. deep, with petals 2 in. wide, and of that beautiful pink color peculiar to the Cattleya. Each 75 cents.

Nibelungen. Flowers as large as the preceding; standards olive green suffused with sulphur yellow; falls deep violet purple suffused with creamy white on the edges. Each 75c.

Princess Victoria Louise. Standards pure sulphur yellow; falls rich plum color with cream colored edges. An entirely new and distinct combination of colors. Each 75 cents.

Rhein Nixe. Standards pure white, falls deep violet blue with white margin; will attain a height of 3 ft., with many branched stems. Very free flowering. Each 50 cents.

The collection of 5 varieties for \$2.25.

IRIS INTERREGNA.

(Introductions of Goos & Koenemann)
 An interesting new type of Iris, the result of crossing Iris Germanica with I. Pumila Hybrida, and for which there promises to be a great future. They flower earlier in the season than the German Iris, and while the flowers are of the most approved and perfect form, they also combine large size with the most beautiful and decided clear colors. The foliage is dwarf and healthy, holding its freshness throughout the season; the flower stems which are about 18 inches high, hold the flowers well above the foliage.

Halfdao. The entire flower is of a pure creamy yellow, of absolutely perfect form.

Heige. Light citron yellow with pearl colored center, a beautiful soft color.

Ingeborg. Both standards and falls are pure white; the flowers are 5 in. deep and have petals 2 in. wide; a grand perfect flower.

Wallhalla. Standards rosy lavender, falls claret red; a most distinct and beautifully formed flower.

Price: Each 50c., doz. \$5.00; the set of 4 varieties for \$17.50.

Gypsophila paniculata fl. pl.

IRIS PUMILA HYBRIDA, THE BRIDE. This is without question the prettiest dwarf white Iris yet introduced. The flowers which are of ideal form, on first opening are of a creamy white color, changing to pure white as they mature. They are produced on stems from 10 to 12 in. high, which appear in great profusion early in May. Each 25c., doz. \$2.50, 100 \$18.00.

TWO HANDSOME NEW LUPINUS

Polypylus Moerheimi. The most beautiful variety yet introduced; a combination of light and dark shades of pink difficult to describe and without a trace of magenta. Each 35c., doz. \$3.50, 100 \$25.00.
Polypylus Rosens. A decided improvement on the old variety, immense spikes of showy rosy pink flowers; a desirable acquisition. Each 20c., doz. \$2.00, 100 \$15.00.

PHLOX DIVARICATA LAPHAM (Perry's Variety). A wonderfully improved form of the popular Phlox Divaricata, of more robust habit, larger flowers and of a more intense color. Doz. \$1.50, 100 \$10.00.

Lupinus Moerheimi.

THREE FINE NEW HARDY PHLOX

Selected from a collection of over fifty new varieties of the past two seasons; distinct from all other sorts.

Elizabeth Campbell. Bright salmon-pink with lighter shading and dark crimson eye; an entirely new and much wanted shade in Phlox.

Frau Antea Buchner. The finest white yet introduced, largest truss as well as individual flower; of dwarf habit.

Roseberg. Bright reddish violet with blood-red eye; individual flower as large as a silver dollar.

Each 35c., doz. \$4.00; one each of the 3 varieties for \$1.00.

PRIMULA CORTUSOIDES

SIEBOLDI. This Japanese Primrose is not so well known as it deserves; it is not only valuable for the hardy border but will also find ready sale as a pot plant for the window. We offer six distinct varieties, varying from the purest white to deepest rose. Doz. \$1.50, 100 \$10.00.

RUDBECKIA, RAYS OF GOLD. An improved form of the popular Golden Glow with which it is identical, excepting that it has narrower petals and a fuller center, it is really a re-dyed form of the old variety. Doz. \$1.00, 100 \$7.00.

Anchusa Italica, Dropmore Variety.

PYRETHRUM HYBRIDUM FLORE PLENA. A fine lot of strong plants in 5-in. pots. Double white, pink and crimson. Doz. \$2.50, 100 \$18.00. Choice mixed seedlings, 3-in. pots, doz. \$1.00, 100 \$7.00.

SEDUM SPECTABILIS, BRILLIANT. Originated with us as a sport from the variety atropurpurea, and is by far the richest colored variety yet introduced, being a bright shade of amaranth-red or dark crimson. Strong plants, doz. \$1.50, 100 \$10.00.

STOKESIA CYANEA, BLUE AND WHITE. Strong pot grown plants, 4-in. pots. Doz. 85c., 100 \$5.00.

SWEET WILLIAM, SUTTON'S GIANT WHITE. Immense trusses of large pure white flowers; splendid for cutting; strong 4-in. pots. Doz. 85c., 100 \$6.00.

TRITOMA PFITZERI. A splendid lot of strong plants. Doz. \$1.25, 100 \$8.00, 1000 \$75.00.

SIX CHOICE NEW TROLIUS. Goldquelle. Large globular golden yellow. Goldteranke. Large, open orange yellow flowers.

Heilos. Very free flowering, pure yellow, on strong-branched stems.

Leuchtkugel. One of the finest deep orange reds.

Lichtball. Large, globular orange-yellow flowers on stiff stems.

Salamander. Soft orange colored flowers of globular form. Ea. 25c., doz. \$2.50; the set of six for \$1.25.

New Rose American Pillar

NO Climbing Rose is attracting the attention that "American Pillar" does, and most deservedly so. It is by far the best single-flowered climbing rose for outside purposes; and on account of the great durability of its flowers, it is the best single-flowered forcing rose.

July 12, 1909.

Gentlemen:
Let me tell you, too, that the American Pillar is a better Rose than you know, perhaps. The plant I had from you, which was planted this Spring under unfavorable conditions, is now giving us a succession of most exquisite bloom.

Yours truly,
J. HORACE McFARLAND,
Pres. of American Civic Association, Harrisburg, Penna.

COMMENT FROM THE LONDON GARDEN

"A most notable feature in this glorious display (Temple Flower Show in London) was the New 'American Pillar' Rose. The large and attractive rich rose pink blooms are produced in immense clusters, the white centers of the blooms adding to their attractiveness."
—Florists' Exchange.

2½-inch pot plants, \$1.50 per dozen, \$8.00 per 100, \$75.00 per 1000.

4-inch pot plants, \$3.50 per dozen, \$25.00 per 100.

Pink Climbing Rose—Dorothy Perkins

Without doubt the most valuable of all the new Climbing Roses of comparatively recent introduction. The beauty of the double pink flowers is admirably set off by the rich green foliage, which is free from the attacks of insects.

In addition to this charming kind, we have all the popular varieties in climbing and bush Roses. Our General Catalogue, which will be mailed on request, contains descriptions of all the best Roses—also

Fruit and Ornamental Trees, Shrubs and Hardy Plants.

ELLWANGER & BARRY,

NURSERY DEPARTMENT

CONDUCTED BY
JOSEPH MEEHAN

AMERICAN ASSOCIATION OF NURSERYMEN

F. H. Stannard, Ottawa, Kan., President; N. P. Stark, Louisiana, Mo., Vice-president; John Hall, Rochester, N. Y., Secretary; C. L. Yates, Rochester, N. Y., treasurer.

FREMONT, NEB.—G. L. Welch & Co. have purchased 17 acres of the Dockstader land for an expansion of their nursery business.

MARYSVILLE, CAL.—The Marysville Flower & Seed Co. has purchased 20 acres of land in Sunset Colony No. 5, Sutter Co., where a nursery will be conducted and a greenhouse established.

Quercus coccinea Nurserymen find the Scarlet Oak, *Quercus coccinea*, one of the best selling of all the tribe, only one other leading it, the Pin Oak, *Quercus palustris*. The reason for this popularity is, mainly, that it has such magnificent looking foliage in the last days of Autumn, beside that the foliage is at all times perhaps the most attractive of all the Oaks, the leaves are so finely divided and of such a lively green. The scarlet color, for which it is so famed, is not possessed by the foliage until very late in Autumn; and in this it differs from all other Oaks. When a few of them are scattered through a large woods which may contain as well some of the *Quercus rubra*, *Q. tinctoria*, and *Q. alba*, the Scarlet Oak will be seen full of foliage after that of the other species has fallen, and even sometimes before its own leaves have taken on their deep scarlet color.

Our photograph is of a thrifty young tree of it planted in a row along a sidewalk, and how beautiful its foliage is—the whole tree, in fact, is well displayed.

The Scarlet Oak is not transplanted as readily as the *palustris*, which is the easiest of all Oaks to move; but let no one believe that it cannot be safely transplanted. All Oaks can be if done properly. Take the tree displayed for example; if it was dug carefully, the roots kept damp until covered again with earth, and the branches all shortened back to within three feet of the trunk, there would be no reason why it should not live.

Oaks of our native species are so easily raised from seeds that there should never be a lack of seedlings to fill all wants. They require to be either sown in Autumn, or kept moist through the Winter and then sown in Spring.

According to where grown the acorns of the *Quercus coccinea* vary a good deal, sometimes appearing like the Black Oak, *Q. tinctoria*, in shape, at other times like the Red Oak, *Q. rubra*. But the foliage of all is very different from the others, and the flesh of the *coccinea* is always white, while that of the *tinctoria* is yellow. The apex of the *tinctoria* is also somewhat flattened; that of *coccinea* never is.

Passiflora edulis *Passiflora edulis* is sometimes seen in collections in conservatories, where it pleases by its beautiful flowers, white in color, with a violet base. It interests as well because of its egg-like fruit, which is good eating when ripe, though rarely tasting as good when greenhouse grown as it does when growing in the warmth of a Florida Summer. It is then that its fruit is sought for; and many visitors to that State come home with tales of the Granadilla fruit, which is its common name in the markets of the South, as it also is in southern California. This Passion Flower, as it is called—as are all species of *Passiflora*—is deemed one of the most ornamental of the species, and it is one of the best of several that bear edible fruit. The fruit is quite large, as large as a goose egg, on vigorous vines, and when ripe it is of a purplish color, and of a taste agreeable to most persons. Being a Brazilian vine it will not endure freezing at all, delighting instead in heat and moisture all the time.

The Camphor Tree A great deal of interest is displayed just now in the cultivation of the Camphor tree as a commercial undertaking in Florida. The tree is hardy anywhere in that State, and large plantings of it have been made, looking to the use of the trees in the production of Camphor, all parts of the tree being used for the purpose; and, as the tree flourishes in the poorer soils of that State as well as on the richer ones it has stimulated many to set out acres of them.

The berries of this tree ripen in January in Florida, and hang on the trees for a month or two, unless crows take them, which they are apt to do. These berries will keep in good condition only a few weeks, unless cleaned of pulp and placed in slightly moist soil until sown. The Camphor tree will not survive a temperature lower than say 10° of frost. When the mercury falls below 20° it is a trying time for the Camphor trees. But as all parts of the tree emit a camphor odor when bruised many persons like a plant in their greenhouse collections, often surprising a friend by giving them a bruised leaf or berry from which to get a camphor odor.

Gaultheria Shallon A correspondent in Oregon sent us some shoots of an evergreen he called "Salal." The species and its name being unknown to us we sent them to C. Roeding, of the Fancher Creek Nurseries, California, asking him if he could tell us what it was. We have his reply, in which he says it is the well-known Wintergreen of the Pacific Coast, *Gaultheria Shallon*, the name "Salal" being the one under which the Indians knew it. Mr. Roeding gives us also

Quercus Coccinea. Scarlet Oak

the following description of it, which he takes, he says, from the book "Wild Flowers of California." "The floor of the Redwood forest in our northern coast counties is often carpeted with this little undershrub, while in other places one can wade waist deep in it. Upon Vancouver Island it forms dense, impenetrable thickets. Its dark purple berries have a very agreeable flavor, and form an important article of diet among the Oregon Indians, who call them 'Salal.'"

As many of our readers know, we have a *Gaultheria* native here, the *G. procumbens*, the well-known Tea Berry, or Wintergreen; but *G. Shallon* is a much larger species, making shoots 2 to 3 ft. in length. It ought to thrive here in sheltered places as other Oregon plants do.

Magnolia Soulangeana nigra

There has appeared in collections within a few years past a dark pink flowered *Magnolia* called *Soulangeana nigra*, a really good variety, because of its being somewhat of the *Soulangeana* type, always a favorite one, and having very dark purplish pink flow-

ers. It is said to be a cross between *Soulangeana* and *purpurea*, or *obovata*, as it is now called, and it certainly partakes of the character of the two. There is the *Soulangeana* evidence in the flowers, and the *purpurea* in its habit of growth, more bushy and slender twigged than it. *Purpurea*, unless when growing in a rather high or a well-drained position, is apt to have unripened twigs in late Fall, which Winter frosts will injure, when plants are young. When older and with hard wood, and less vigorous shoots in Summer, cold has not the same effect on it. The new one, *Soulangeana nigra*, will probably not carry with it any of the less hardy character of *purpurea*, in which case, planted where *Soulangeana* now is, it will be a welcome addition to the number of these handsome flowering shrubs and trees already embraced under the name of *Magnolia*.

Preparing Stock for Layering As it is the strong young shoots of shrubs and trees that are used for layering, this is the time to prepare to get them, by cutting back closely all stock desired for layering. As these shoots must be as close to the ground as possible, the plants should be cut down to as near the base as practicable, as this both increases the number of shoots and insures their being strong and near the ground. When it concerns plants that root readily from layers, a number of a kind could be set in a row to form a permanent stock to layer from every Summer. It does not weaken the stool plants much—it does to some extent, as some foliage is lost in placing the layers—as the layers are not cut off until the plants are dormant. *Hydrangea paniculata grandiflora*, Japanese Snowball, *Magnolias* and many shrubs and other plants are easily and cheaply raised from layers and now is the time to cut down the old plants for the purpose. Though rooting more freely for it, it does not follow that every plant needs its shoots cut where roots are wanted. Many sorts root when buried just as they are; experience will soon show which need not be cut before burying.

Cementing Holes in Trees The repairing of trees having holes in them, caused by rot, by closing up the holes with cement has been made a business of by some. Of its efficacy when well done there can be no doubt. Whatever it may have been that started the decay in the first place, it is air and moisture that continues it. The cementing up of the cavities is to obviate further decay by preventing moisture from finding its way in. In some instances cracks have been observed in the cement after a year or two have passed since its use in a tree. When this occurs it is from the cement having been extended too far toward the face of the hole. It must not extend to the very outer edges of the wound, but to the inner edges only. If it extends to the outer edge of the live bark it will become cracked by the pressure of the new bark cells as they form. What is required is only that the cement should cover all that is dead, extending to the front until it meets the new bark, not to overlap it. This ensures the cement against any pressure from the new bark as it forms, and, therefore, it will not crack.

Before cementing a tree, every bit of decayed bark should be carefully scraped out, that the cement may make a solid mass. The presence of a body of cement in a hollow of a tree renders the tree more solid and better able to weather gales, besides preventing further decay.

Getting Peach Seed to Sprout A correspondent enquires if Peach stones purchased from stores now and sown at once would grow this Spring. They would not, if they had been kept dry over Winter. The same correspondent suggests that cracking the stones and sowing the kernels would surely bring on seedlings. Those who have tried this plan say though some will grow a full crop cannot be relied on. It seems that artificial aid of this kind is resented by Nature, to the extent of permitting only of partial success following its practice. Because the dry stones will not grow when sown in Spring, it is not saying they are not good. Practically every seed will grow if still kept dry until early Autumn and then sown outdoors. With the commencement of the growing season in Spring growth starts, hardly a stone missing.

In cases where it is difficult to procure Peach stones early in Autumn, for sowing before Winter sets in, it is the practice of some Peach growers to take matters easy, securing the seeds any time during Winter, looking to sowing them in Autumn.

A Correction

Our good friend, E. Y. Teas, calls attention to an error in our pages lately. He is named as recommending for hedging the *Spiraea Reevesii* and *Thunbergii*, which he says he never did recommend nor would do. We really much regret the mistake. The writer had been reading in some paper, he forgets which, of the beauty of a line of *Spiraea Reevesii*, and in some way later got it in his mind it was Mr. Teas who wrote the article, whereas what he wrote concerned varieties of Privets and made no reference to *Spiraea* at all.

In calling our attention to this Mr. Teas remarks, incidentally, that *Spiraea Reevesii* is not hardy in his locality, Centerville, Ind.

THE BEST WAY

to collect an account is to place it with the National Florists' Board of Trade

56 Pine St., NEW YORK

WHY? Because many debtors will pay the Board feeling otherwise a bad rating in our Credit List. Full information as to methods and rates given on application.

Please mention the Exchange when writing.

Charleston, S. C.

This year, for the first time, Middleton Place Gardens, on the Ashley River, are to be opened for inspection by excursionists by boat. Beginning next week, one of the fastest and most commodious yachts on the harbor will begin making daily trips to the Gardens, and it is expected that many will avail themselves of the opportunity thus afforded of seeing one of the most beautiful spots in all the low-country.

Middleton Place Gardens were laid out by Henry Middleton, president of the Continental Congress, and the houses were built before 1765. The houses were burned by a detachment of Sherman's army during the Civil War. The Gardens were enlarged by Henry M. Middleton, United States minister to Prussia and Governor of South Carolina. Four Camellia trees, the first planted in this State, were set out at the Gardens about 1802 and two of these still survive. They were purchased from the famous French botanist, Michaux. Another owner of the place was William Middleton, who signed the Ordinance of Secession, and was on that account hunted by the Northern troops, who were anxious to hang him.

Middleton Place was raided by the British troops during the Revolution, by the Federal troops during the Civil War, and was finally nearly shattered by the earthquake of 1886. It has therefore passed through two wars and one great convulsion of nature, and has much of historical interest as well as natural beauty to commend it to the attention of lovers of the quaint and the beautiful.

St. Louis

Mrs. Dietschy of Alton, Ill., and Henry Emmans of Belleville, were callers the past week; both had a good word to say as to Easter business. Mrs. Dietschy is in charge of Fred Ammann's Alton store and says they have been exceptionally busy with big funeral orders of late.

J. Krug & Son at Alton, Ill., opened a branch store in the Pike Building last week; they celebrated their 49th year in business and both stores were crowded all day receiving congratulations from old time friends. They distributed more than 5000 flowers to the callers during the day.

Walter Pilcher made a trip to Chicago last week to initiate arrangements for the building of a range of new houses at his place in Kirkwood. Mr. Pilcher's new Violet, which sold above all others and at a higher price, gave him confidence that more will be needed next Fall and Winter, so the new houses are being built for them.

E. W. Guy of Belleville, Ill., had the sympathy of his many friends in the trade here when they heard that his place was partly destroyed by fire on Thursday morning, March 24. The loss was quite heavy and, coming right before Easter, was a great blow to him and his trade. The loss is estimated at \$1500 to \$2000.

W. C. Smith reports that Woerner Bros., who consign to his establishment, are erecting two new houses, 32x165, to be used for growing Roses; they will grow Killarae, both colors, and Richmond to start with. Heretofore, they only grew Violets and Carnations of which they made a great success.

Our nurserymen have had to hustle the planting of their orders as the weather has been more like July than March and everything is out in leaf. All report an early Spring trade. After the rush Frank A. Weber says he will take up the matter of inviting the American Association of Nurserymen to hold its annual meeting next year in St. Louis. He is chairman of the committee appointed by the Florists' Club to look after this matter. Messrs. Sanders and Halsted are also members of this committee.

The Engleman Botanical Club held an important meeting March 28 in the Central High School Building, to decide on a field meeting and other Summer attractions for the members.

In our residential district many who boasted of their fine Privet hedges of last year are carrying long faces these warm Spring days as the hedges fail to awaken; they have dried out from the hard Winter. The hedges at Shaw's Garden represent several varieties and most of them escaped the onslaught of the zero weather. Our nurserymen say that trade in Privet was the best in years. ST. PATRICK.

DECORATION DAY ROSES

Rose Frau Karl Druschki

Hardy Hybrid Roses

We offer extra-strong forcing two-year-old dormant, low-budded stock, in the following varieties, true to name:

Persian Yellow. Yellow.
Prince Camille de Rohan. Dark crimson.
Ulrich Brunner. Cherry-red.

For prices see above

Baby Rambler Roses

BABY DOROTHY. The same in habit as Baby Rambler, but the color of the flowers is similar to Dorothy Perkins. It makes an excellent pot plant for forcing. Price for strong, field-grown plants, 85c. for 5, \$16.00 per 100.

CATHERINE SEIMETH. A White Baby Rambler Rose, larger and better flowers than the type. White with yellowish center. 85c. for 5, \$15.00 per 100.

MRS. WM. H. CUTBUSH. Color intense crimson and exceptionally free-flowering. 85c. for 5, \$15.00 per 100.

MME. NORBERT LEVAVASSEUR (Baby Rambler). Strong, field-grown plants. 85c. for 5, \$15.00 per 100.

THE TREE BABY RAMBLER. (Grown as a Standard.) The popularity of the Baby Rambler has suggested the growing of it as a tree or standard. 40c. each, \$3.75 for 10, \$35.00 per 100.

BABY DOROTHY. (Grown as a Standard.) For description, see above. 75c. each, \$6.25 for 10, \$60.00 per 100.

Something New in Roses for Florists Half Standard Baby Ramblers

These are Baby Ramblers, grown on stems or standards about one and half feet high, and will be a novelty for your trade you cannot profitably overlook. They are offered for the first time in this country in the following varieties:

BABY DOROTHY (Half standard). Deep pink. 60c. each, \$6.00 per doz., \$45.00 per 100.

BABY RAMBLER (Half standard). Crimson. 45c. each, \$4.50 per doz., \$35.00 per 100.

BABY CATHERINE SEIMETH (Half standard). White. 45c. each, \$4.50 per doz., \$35.00 per 100.

BABY "STARS AND STRIPES" (Half standard). White and red grafted on the same plant; most attractive. 50c. each, \$5.00 per doz., \$40.00 per 100.

Ramblers and Other Climbing Roses

PAUL'S CARMINÉ PILLAR. Flowers large and free; color rosy carmine. Two-year-old, field grown. 85c. for 5, \$15.00 per 100.

CRIMSON RAMBLER. American Grown. The only stock for forcing. Large heavy plants, two years old, mossed and packed in bundles of 10, 3 to 4 feet, \$1.25 for 10, \$12.00 per 100; 4 to 5 feet, \$1.75 for 10, \$15.00 per 100; 5 to 6 feet, extra heavy, \$2.25 for 10, \$20.00 per 100.

DOROTHY PERKINS. Lovely shell-pink color. \$1.25 for 10, \$12.00 per 100.

TAUSENSCHON. The new Rambler Rose. The name translated means a "thousand beauties." Color beautiful rose, shading to pink. \$2.25 for 10, \$20.00 per 100.

LADY GAY. A seedling from the popular Crimson Rambler, which it resembles in habit and general effect. The flowers are of a delicate cherry-pink color, which fades to soft white. Strong plants, field-grown, 4 to 5 feet. \$1.75 for 10, \$15.00 per 100.

Flower of Fairfield The Everblooming Crimson Rambler

This variety is a sport from the beautiful Crimson Rambler, is similar in color, more brilliant and lasting than the old favorite. It also possesses the further advantage over the Crimson Rambler in the fact that it flowers profusely on the young wood the first year. Flower of Fairfield is a vigorous grower and free bloomer. It starts to bloom early in the Spring and continues until late in the Autumn. It is rightly termed "perpetual blooming." 40c. each, \$3.50 for 10, \$30.00 per 100.

Veilchenblau (Violet-Blue)

It has long been the desire of rosarians to secure a blue Rose. In Veilchenblau we have practically approached this color. The steel-blue flowers of this medium size and keep in bloom a long time. The showy yellow stamens contrasting with the blue flower, give the whole a striking appearance. 60c. each, \$5.75 for 10, \$55.00 per 100.

A. T. DE LA MARE PTG. & PUB. CO., LTD. 2-8 Duane Street, NEW YORK

Baltimore

J. J. Morgan, 866 N. Baltimore st., reports he handled \$2000 worth of cut flowers for Easter. He displayed one of the most artistic stalls, showing thousands of Carnations, Roses, Violets, Sweet Peas in various colors, Lily of the Valley and Jonquils; in fact, almost any cut flower in season could be secured. He is only a street flower merchant with nerve.

The Florists' Exchange did a rattling good business, handling thousands of flowers at very satisfactory prices. The amount of business exceeded last year's, and is due to the management of J. J. Perry. Narcissus and Tulips seemed to be the only drawback the Exchange had to contend with.

The two stores operated by Robert L. Graham did an exceptionally rushing business, selling out and disposing of a large number of orders.

Samuel Feast & Sons' show windows at their two stores were beautifully arranged and business was excellent. Their orders were extremely heavy.

E. A. Seidewitz handled a large amount of business. He offered handsome packages and baskets of the choicest cut flowers.

Halliday Bros. did a rushing business and handled a considerable quantity of bulbous stock. They did an especially large business in Easter Lilies.

Frederick Reitz handled over 40,000 bulbous flowers, and sold out with the exception of a few plants, which he disposed of the next day for \$10. His greenhouses look as though he were moving out. This year is a record-breaker for him.

Stoll Bros. report a heavy call for bulbous stock and funeral designs.

G. T. Ekas has rented a stall under the eaves of the Lexington market, and has spent a good deal of money to make it up-to-date, erecting a large showy glass case with electric lights inside and the

top filled with choice pot plants. He handled a fine line of cut flowers and plants, and the trade has kept him moving.

John Eberhardt's store was thronged with buyers all day and until a late hour at night. He kept open until 1 o'clock to do the charging and attend to the cash sales. He rented a store next door to show stock. His market trade was satisfactory, completely selling out.

Harry Quick showed a tastefully arranged stall in the market, filled with bulbous stock. His Spireas he is holding back for a local seed house. His business was extra good, everything cleaned up.

Charles Cook sold out at an early hour; his stock brought very fine prices.

James Hamilton displayed a stall of bulbous stock. It seemed to move rather slowly; at 10.30 p.m. he still had a large number of plants on hand.

Lurren's Flower Garden, 834-836 W. Baltimore st., reports the Easter trade as a record-breaker, business exceeding last year's. Mr. Lurren was completely sold out; however, he was able to take care of a vast amount of orders.

Otto Guerth had an abundance of orders, and it was necessary to turn his kitchen into a supply room. The help was compelled to work all night to dispose of the orders. At night the store was almost bare; everything sold out. Business was very satisfactory.

Conrad Hess, Waverly, Md., had a very attractive stall. Feras, Azaleas and Genistas sold well.

Frederick Michael had a heavy call for pot Tulips and Narcissus, which brought 25c.

E. Van Ruth sold an abundance of pot Pansies and double Daisies at 10c.

H. Walters did a rushing business in cut flowers; Heliotropes and Geraniums sold for 25c. a pot.

Harry Ekas had in his stall some fine specimens of Paris Daisies that sold for

F.E.—Best Advertising Medium

\$3 and \$5 each. His bulb trade was excellent; he sold nearly every plant at high prices.

George Cook disposed of many first-class Hyacinths at 12c. to the trade. He was unable to get a stall in the market and at once set to work to wholesale and sold out very early in the day. He will not grow Hyacinths next year.

Walter Gray sold out completely and kept many hands on the go in town and at his range of houses.

C. B. Montgomery had a stall of choice Hyacinths, Spiraes and Easter Lilies that were disposed of at satisfactory prices.

August Eberhardt had a number of stalls in the market; he was unable to sell out completely; quite a few wagon-loads were sent back to his home and offered again for sale later. However, business in the end was satisfactory.

The stall of James Glass was almost a dream of beauty, showing all the up-to-date Easter flowers. Business flourished. His Harrisii Lilies were excellent and met with a ready sale.

The Market

Easter week came in with good, clear, warm weather. Never in the history of the local weather bureau was the weather so favorable. It set the plants blooming and considerable inferior stock was offered that it was impossible to hold back. We certainly had a glut of stock on the market, but somehow it all moved and at fair prices. The retail stores were stocked to their full capacity, and nearly everything was disposed of. The Lexington market was a veritable garden of flowers nearly all week. The market opened with nominal prices, but they gradually rose as the demand increased, and Saturday night prices for the pick of flowers continued to increase until some of the trade saw that if they did not use precaution they would be stuck—and then came a decided slump. The babble of voices of the flower vendors could be heard squares away from the market. Taking it altogether, our florists made a magnificent display for Eastertide. Carnations were in good demand and sold at 75c. to \$1 per doz. Roses, the early part of the week, went at \$1 per doz. and up; Saturday night they sold for 50c. for good stock, and were plentiful. Jonquills were a perfect glut and went at any price; no sales were lost. Azaleas sold for 75c. up; Hyacinths, 10c. and up; Tulips, 10c. and up; Narcissus, 5c. and up; Sweet Peas, \$1 to \$2 per 100; Lily of the Valley as low as \$1.50 for bunches of 25. Cinerarias were plentiful and sold cheaply; some of the stock was poor. Violets went at \$1 per 100; the singles were plentiful. Fancies and double Daisies sold at 10c. per pot. There was also a large quantity of other plants of various kinds which sold well. Greens are still scarce. Laurel is coming in a little more regularly.

The writer is extremely glad to inform the trade that everybody is satisfied with the business done this Easter. J. L. T.

Fulton, N. Y.

Trade has been remarkably good all through the Winter, and the florists are very much pleased. The Easter trade was the largest they have ever had.

G. W. Perkins used the store next to his salesroom as an annex, and filled it with a very good assortment of Azaleas, Lilies, Tulips, Hyacinths, Daffodils, Roses, Lilacs, Palms, etc., all well grown stock.

C. R. Wetherby's place was filled to overflowing with a very fine assortment of plants. He had some very nice pans of Pansies, and quite novelties were a good lot of Calceolarias hybrida tigrina, with very large beautifully spotted flowers; they were the best I have seen for a long time.

There was a larger call for pot plants than cut flowers, as prices had to be advanced for them. Each year there is a noticeable increase in the number of churches making Easter displays of flowers. II. Y.

The Pecan ranks first as a table nut; it ranks first in quality of fat oil; it ranks first in food value per pound over all nuts. It is acknowledged by confectioners as the richest and most valuable. In the production of oil it gives the greatest quantity of the richest nut oil.

Nature has so arranged it that some kind of nuts will thrive in almost every locality. The Hickory nut does well in the North, the Chestnut in the central States, and the Pecan in the South. Walnuts thrive well everywhere. All of these are profitable for nuts and timber and are ornamental for shade.—Nut Notes.

THE PRICES ADVERTISED IN THESE COLUMNS
 ARE FOR THE TRADE ONLY

The Easter Trade

With a view to ascertaining, exactly, trade conditions at Easter in different sections of the country, the following questions were submitted by the publishers of The Florists' Exchange:

A—Compared with last Easter, was business better or worse?

B—What plants were most in demand?

C—What cut flowers were most in demand?

D—What was the retail price on Roses, per dozen? American Beauty, other Reds, Pink, White, Yellow.

E—What was the retail price on Carnations, per dozen? White, Red, Pink, Variegated.

F—Also, what were the prevailing prices for: Gardenias, each; Cattleyas, each; Lilies, each; Violets, Wallflowers, Sweet Peas?

G—What is your opinion of the Easter trade in general this year compared with that of last year? Was it better or poorer?

The answers received are embodied in the following reports:

AURORA, ILL.—A—Much better. B—Lilies outsold all others, but Azaleas, Roses, bulb pans also sold well. C—Carnations, Roses, Sweet Peas, Violets, in order named. D—White, \$2 down; pink, \$1.50 and \$1. E—Some brought \$1. others sold at 50c. to 75c. F—Lilies, 25c. bud; Violets, short supply, 20c. per doz.; Sweet Peas, \$2 per 100 for best stock; G—The largest sales we ever had, even with lower prices and the largest receipts. The weather was good, too warm for the grower, and the crops were so large that lower prices were made. There was no scarcity of anything, but on Sunday evening all good stock was sold in every place. **JOS. M. SMELEY.**

BETHLEHEM, PA.—A—Better. B—Pot plants. C—Violets, Sweet Peas, Roses and Carnations. D—White \$2 to \$3; pink \$2 to \$3; Richmond \$2 to \$5. E—75c. to \$1.50. John E. Haines and Imperials. F—Lilies, 20c. per bud; Violets, \$1.50 to \$2; Sweet Peas, \$1 to \$1.50. G—Quiet but something better than I expected with our big strike on here for nearly two months. **JOHN E. HAINES.**

BEVERLY, MASS.—A—Very much better. B—Easter Lilies and pans of Jonquils. C—Carnations, Violets and Jonquils. D—White, \$1.50; pink, \$1.50 per doz., red \$2. E—60c. for Fair Maid, 75c. for W. Perfection, Lawson, Enchantress, Variegated, Scarlet, etc. F—Lilies, each 20c.; Violets, \$2; Sweet Peas, \$2. G—Hard for us to compare, as we had no store last year. Opened store Nov. 15 last, and Easter trade better than we expected. Should say that the Easter trade in general was the best for years. **BENJ. LARCOM & CO.**

BUFFALO, N. Y.—A—Better. B—Azaleas, Lilies, Dorothy Perkins, Roses, and all good plants sold well. C—Violets, Killarney Roses, Valley, Sweet Peas. D—American Beauty, \$9 to \$12; white, \$3 to \$5; pink, \$2 to \$5; other Roses, \$1 to \$3. E—\$1.50; Enchantress, White Perfection, Beacon, F—Lilies, each 25c.; Violets, \$3; Sweet Peas, 75c. per bunch of 25; Cattleyas, each \$1; Gardenias, 75c. to \$1. G—The weather was ideal, Thursday, Friday, Saturday and Sunday, which gave all the people a chance to get out and buy. **W. H. GREYER.**

CANASTOTA, N. Y.—A—Decidedly better. B—Hyacinths, Tulips, Narcissus and Easter Lilies. C—Carnations, Roses and Violets. D—American Beauty, \$3 to \$6; white, \$1 to \$2; pink, \$1 to \$2. E—\$1; Enchantress, White Perfection, Lawson, pink and white. F—Lilies, each 25c.; Violets, \$2 per 100. G—Owing to the fine weather the trade was good during the week, and it made the handling of plants much easier. **FRED TAYLOR.**

CHICAGO, ILL.—A—Business better, but prices lower than last Easter. B—Lilies, Hyacinths, Tulips and Azaleas. C—Lilies, Carnations, Sweet Peas, Tulips, and Spring flowers. D—American Beauty, \$3 to \$10; white, \$2 to \$4; pink, \$2 to \$5; Richmond, \$3 to \$5. E—\$1; Enchantress, White Perfection, Victory, 50c. to \$1; Sweet Peas, 50c. to 75c. per 100; Cattleyas, each 50c. to 75c.; Gardenias, 25c.; Spanish Iris, \$2 per 100. G—Summing up the general reports, business was heavier, but prices falling on Saturday about balanced the receipts of last season. The crush of stock on Friday and Saturday almost glutted the market, prices consequently dropping to move off the quantities on hand. Bulbous stock, being of excellent quality, was in as great demand as Roses and Carnations. Everyone had a little surplus on hand after business closed on Sunday night. The extremely fine weather was responsible for the advanced stock, and was also responsible for the disposal of it. **MRS. M. T. FLINT.**

CINCINNATI, O.—A—About the same. B—Azaleas and Roses. C—Easter Lilies, American Beauty, Bride and Killarney Roses. D—American Beauty, \$4 to \$8; white, \$2 to \$3; pink, \$2 to \$3. E—\$1 to \$1.50 for pink and white. F—

Lilies, each 25c.; Violets \$2; Sweet Peas \$1.50. G—About the same. **E. G. GILLET.**

CLEVELAND, O.—A—Better altogether, although it was fine weather for pot plants. B—In Easter Lilies demand exceeded supply; good run on other plants. C—Carnations and Violets, but Roses, Tulips, Daffodils, Valley and Mignonette found good sale; no demand for American Beauty Roses. D—American Beauty, \$8; white, \$1.50 to \$2.50; pink, \$1.50 to \$2.50; other Roses, \$2.50 to \$3. E—75c. to \$1; Beacon, Rose Pink and White Enchantress, \$1.50; Violets, 20c. to 25c.; Violets, \$1.50 to \$2 per 100; Sweet Peas, \$1.50 to \$2 per 100; Cattleyas, each, 75c. and \$1. G—Trade in general was much better. Potter plants had a big run. Mignonette, Pansies, Myosotis and Daisies sold well. Peter Nichols, Arcade Florist, reports a splendid business. Harry Piggett, Taylor Arcade, says he cannot remember when he has been as busy. Knoble Bros. had fine business. Smith & Fetters had a fine window display, and report fine business. The Exchange had some beautiful Lilies. The Cleveland Cut Flower Co. had fine Mignonette, Daisies, Pansies and Carnations. **OPIE.**

DETROIT, MICH.—A—Great increase in number and value of sales. B—Lilies leading. Plant trade in general much larger. C—Spring flowers, Violets, Carnations. D—American Beauty, \$3 to \$10; white, \$2 to \$6; pink, \$2 to \$3; other Roses, \$2 to \$8. E—\$1; Beacon, \$1.50. F—Lilies, \$3 to \$4 per doz.; Violets, \$2; Sweet Peas, \$2; Cattleyas, each \$1.25; Gardenias, 50c. G—Decidedly better, with prices same as last year. Ideal weather conditions helped materially to increase the number of sales made. While no florist had any trouble to get full value for goods offered, and sales were made quite easily, still an attempt to boost prices above the real value was not possible. The wholesale market was more than filled with goods, the warning sent out by your correspondent some months ago to keep up a rotation of bulbous stock was apparently not heeded. The result was that an enormous amount of this product had to meet with a supply of Carnations magnified by ten days of ideal Spring weather. Although shipping trade was very heavy it was not sufficient to cope with such a condition, and consequently wholesale prices were comparatively low. **FRANK DANZER.**

FREDERICKSBURG, VA.—A—Very much better. B—Lilies, Azaleas, Cineraria, Hyacinths. C—White, \$1.50; pink, \$1.50 to \$2; red, \$1.50 to \$2. D—Carnations, Sweet Peas, Violets and Roses. E—50c. to \$1; Winsor, Enchantress, white and rose pink. F—Lilies, \$2.50; Violets, \$1; Sweet Peas, \$1; Tulips, 35c. and 50c. G—We think it much better. We have opened a store on Main st., next to the post office, and our opening day Mar. 5 was equal to our Christmas business. Our sales for Easter are three times as much as last year. **COVEY'S.**

FULTON, N. Y.—A—Much better. B—Azaleas, Lilies, Rambler Roses, Hybrid Roses, Tulips, Daffodils and Hyacinths. C—Carnations, Roses, Violets and Sweet Peas. D—White, \$1.50 and \$2; pink, \$1.50 and \$2. E—75c. and \$1; Enchantress, white. F—Lilies, 25c. per bud; Violets, 75c. and \$1; Sweet Peas, \$1 per 100. G—Better by a third or more. **C. B. WETTERBY.**

INDIANAPOLIS, IND.—A—Somewhat better than last year. B—Lilies, azaleas, Jonquils and specimen plants of any kind. C—Sweet Peas, Roses, Lilies and bulbous stock. D—American Beauty, \$3 to \$12; white, \$1 to \$4; pink, \$1 to \$4; other Roses, \$1 to \$3. E—\$1 and \$1.50 per doz.; White Perfection, Enchantress, Beacon, Victory and Aristocrat. F—Lilies, each 35c.; Gardenias, 75c.; Violets, \$2 to \$3 per 100; Sweet Peas, \$1.50 to \$2 per 100; Cattleyas, each \$1. G—Somewhat better. Easter business was exceedingly late in starting this year and it seemed that the florists had a difficult time, as the weather this month included over twenty bright days. It kept the growers guess-

ing, and not a small quantity of flowers went to waste because of the inability to realize weather futures. Reports from all sources indicate that plants were particular favorites. All quarters in this vicinity were unusually well supplied with them, and they sold at the last moment was astonishing. Large orders were the exception, and it was evident that it was the masses who were helping the florist with his Easter trade. Deliveries were readily handled, as all conditions were favorable. A noticeable fact this year was that many people called in automobiles and carried the flowers away with them. At least three-fourths of the plant deliveries were made Saturday, an unusual condition in Indianapolis. Small Pearl Hyacinths proved themselves a novelty, as the sales indicated. Arrangements, such as fancy baskets and dishes, did not sell so well as they do during the holidays, or as did fine specimen plants. Inquiries from the retailers indicate that no one was left with an unprofitable surplus on his hands, and the florists have been satisfied. Tomlinson Hall market was filled with plants for Saturday, but not over a good sized wagon load remained with the twenty odd growers by closing time. The automobile show in this city will take lots of stock during the present week and all the foliage plants have been engaged at the foliage openings. Indianapolis being a great manufacturing auto center, the show will no doubt result in much financial gain for the florists opening week. **I. B.**

KALAMAZOO, MICH.—A—Better. B—Lilies, Azaleas, Tulips, Hyacinths, Rambler Roses, Spiraea. C—Carnations, Roses and Lilies. D—American Beauty, \$3 to \$5; white, \$1 to \$2.50; pink, \$1 to \$2.50. E—Light colors led at 50c. to 75c. F—Lilies, each 20c.; Violets, 15c. to 20c. bunch; Sweet Peas, 15c. per doz.; Cattleyas, supplied on order at \$1 each. G—Every condition favored for a much better business than before. **SAMUEL BATSON.**

LYNN, MASS.—A—About the same. B—Lilies and Azaleas, pans of Tulips, Daffodils and Hyacinths. C—Carnations and Narcissus. D—White, \$2 to \$3; pink, \$1 to \$3; other Roses, \$1 to \$3. E—75c. to \$1.25; White Perfection, Enchantress and Beacon. F—Lilies, 20c.; Violets, \$1.50; Sweet Peas, \$1 to \$2. G—Better than anything. Lilies as a rule were inferior to last year's. Cut flowers were rather soft on account of very hot weather the Friday before Easter. **J. L. MILLER.**

LYONS, N. Y.—A—Better. B—Lilies, Azaleas, Spiraea, Hyacinths, Daffodils and Cinerarias. C—Carnations. D—American Beauty, \$10; white, \$2; pink, \$2; other Roses, \$1.50. E—\$1, Lawson and White Enchantress. F—Lilies, 25c.; Violets, \$2. G—Better, with more call for plants in bloom. **JAMES P. BOYLE.**

MILWAUKEE.—The business was considerably ahead of last year, especially in the line of plants. There was an extremely heavy demand for Lilies and some well grown Baby Ramblers and Hydrangeas. These were the best sellers. There were quite a number of Azaleas in the market also, but the quality of plants was not as good as in former years. In cut flowers, the demand likewise was heaviest for cut Lilies, although there was a heavy call for small flowers such as Sweet Peas, Violets, Lily of the Valley and other Spring flowers. Fancy Carnations sold better than Roses, although there was quite a heavy demand for both. American Beauty, especially long stemmed, were very scarce although there were plenty of shorts on the market. Lilies were selling at retail at \$3 per doz.; Carnations, the fancy grades at about \$1 per doz.; Roses at \$1.50 to \$3 per doz.; Violets, \$2 per 100; Sweet Peas, \$1 to \$1.50 per 100. Easter trade in general was considerably ahead of last year and this was a great deal due to the especially fine weather we have had the past week and up to Easter. There was very little difficulty in making deliveries on plants. There was a very heavy cut coming in in all lines, and all good stock was sold out clean. **C. C. POLLWORTH CO.**

MONTREAL, CAN.—A—Better. B—Lilies, Rhododendrons, Hybrid Roses, Rambler, Azaleas, Lilies, Spiraea and Hydrangeas did not sell. C—Violets, D—\$1.50 to \$4; pink, \$1 to \$4; other Roses, 75c. to \$3. E—\$1; W. Perfection, Lady Bountiful, Winsor, W. & P. Enchantress. F—Lilies, 25c. bloom; Gardenias, 75c.; Violets, \$2 per 100 for singles; Sweet Peas, \$2 per 100; Cattleyas, each 50c. to 75c. G—Business was a good deal better, but all agree that the holiday came too early. The ordinary plant buyer was missed. The weather was lovely and we are all truly thankful that Easter is over. **W. C. HALL.**

NEWPORT, R. I.—A—Very much better, especially in plants in pot. B—Azaleas, Lilies, Genistas, Pink Rambler Roses and bulbous stock in general, such as Hyacinths, Daffodils and Tulips. C—Violets, Carnations, Daffodils, Lily of the Valley, Sweet Peas. Only a limited demand for Roses and Gardenias. D—\$2 to \$3. E—Enchantress sold best, but all colors sold well. Prices varied from 75c. to \$1.50 per 100. F—Lilies, each 25c. per bud; Violets, \$1 to \$2; Sweet Peas, \$1.50; Gardenias, 60c. each.

G—Very much better in all cases except cut Roses. The demand for bulbous stock was much greater. Not much call for Spiraea or Crimson Rambler Roses in pots. Lilies were the finest lot that we have ever seen, with plenty on hand yet practically all sold. Made up baskets sold well at good prices. The demand for large sized Genistas was phenomenal. **ALEX. MACLELLAN.**

ORANGE, N. J.—A—Much better. B—Lilies and Azaleas. C—Violets and Roses. D—American Beauty, \$9 to \$12; white, \$2.50 to \$4; pink, \$2.50 to \$4. E—\$1 to \$1.50; Enchantress, Winsor, Lawson, F—Lilies, 25c. per bloom; Violets, \$2.50 to \$3; Sweet Peas, 25c. per bunch; Cattleyas, each \$1.50; Gardenias, 75c. and \$1. G—Much better. Plants an increase. The warm, bright Easter influenced this largely. Church decorations on the increase. **J. B. DAVIS.**

PITTSBURGH, PA.—A—Better than last year. B—Azaleas, Lilies in pots, Roses, and particularly potted Hyacinths, Tulips and Narcissus. C—Lilies, Roses, Carnations, Violets, Tulips and Narcissus. D—American Beauty, \$6 to \$12; white, \$5; pink, \$5 and better. E—From \$1 to \$1.50 and a few at better prices to \$2; pink and white sorts were in most demand. F—Lilies, 25c.; Violets, from \$1 to \$1.50. G—Considerably better; both cut flowers and plants sold well. The weather for Easter was ideal, a nice warm day brought out many people which helped trade very much. The stock of cut flowers was not overabundant. Plants were much in evidence and sold well, particularly potted bulb stock. Dutch Hyacinths sold remarkably well; the market was entirely cleaned up; 4-in. pots brought from 15c. to 25c. each. Daffodils in pots were also good sellers. In cut flowers, Carnations and bulb stock were the leaders, being more reasonable in price. Lilies sold very well, averaging about 12 to 15c. per plant. Violets were poor, very much off color; good ones were scarce. Lily of the Valley sold somewhat better than usual. Weather conditions helped the cemetery trade; not in many years were so many flowers to be seen in the cemeteries. The commission houses all did a good trade, and the stock handled was of a good grade, very little evidence of kept back stock. **E. C. REINEMAN.**

PITTSFIELD, MASS.—A—Azaleas and potted bulbs. C—Roses, Carnations and Violets. D—American Beauty, \$5 to \$6; white, \$1.50 to \$3; pink, \$1.50 to \$3. E—From 75c. to \$1.50. We were very much pleased with our Easter trade. Our first one here made it rather difficult to understand just what to purchase, but we were all right on everything. **S. G. BARNES.**

PROVIDENCE, R. I.—A—Better. B—Azaleas, Lilies, pan bulbs, all kinds, sold well. C—Carnations and Violets; little shy on Roses from former years. D—American Beauty, \$1.50 to \$4. E—First class, \$1; Beacon, white and pink. Enchantress, F—Lilies, each 20c.; Violets, \$1.50 to \$2; Sweet Peas, \$1.50. G—Better. Weather perfect. Good stock moved quickly. On the whole trade was satisfactory, and stock was never better. **WM. E. CHAPPELL.**

ROCHESTER, N. Y.—A—Volume better. B—Azaleas, Hyacinths, Daffodils, Tulips. C—Pink, Killarney and Richmond Roses. D—American Beauty \$2 to \$10; white, \$1.50 to \$2.50; pink, \$1.50 to \$2.50. E—60c. to \$1. F—Lilies, 20c. per bloom; Violets, \$1 bunch of 60; Sweet Peas, 50c. bunch; Cattleyas, each \$1. G—The volume as far as can be judged was better than last year. Prices on cut flowers, however, were not up to last year. Easter business would undoubtedly have been far in advance of previous years but for the fact of an overabundance of material. Carnations were a little on the market; Lilies also suffered there being practically no demand whatever for cut Lilies. The ideal weather no doubt accounts for the oversupply; coupled with the fact that the custom of holding back for high prices was resorted to with disastrous results to all concerned. It is estimated that in the three days previous to Easter 70,000 Carnations came on to the market. **H. B. S.**

ST. LOUIS, MO.—A—From reports it was much better. D—Lilies had best demand; Dutch Hyacinths, Tulips and Azaleas, in fact all blooming plants sold well. C—Lilies, Sweet Peas, Roses, Jonquils, Sweet Peas, Roses and Carnations. D—American Beauty, \$10; white, \$1.50 to \$3; pink, \$1.50 to \$3; other Roses, from \$1 to \$2. E—\$1 to \$1.50; Enchantress, Pink Enchantress and any red. F—Lilies, \$3 to \$4 doz.; Violets, \$5 to 75c. per bunch; Sweet Peas, 25 to 75c. per bunch of 25. G—From reports of the retailers, wholesalers and growers they say it was the best in years, thanks to the most beautiful March weather. **ST. PATRICK.**

SYRACUSE, N. Y.—A—Easter this year will go down as a record breaker in two respects, first in the volume of business done, and second, for the extreme warm weather prevailing at such an early date. B—Hyacinths, with Daffodils a close second; Azaleas were in good demand and sold well, as also Hybrid Roses and Baby Ramblers. Lilies also sold well, and there were plenty of them. C—Carnations, Roses, and bulbous flowers. D—American Beauty, \$4 to \$18; Richmond, \$4; Chatsenay, Killarney,

Bride and Bridesmaid, \$1.50 to \$4. E-\$1 to \$1.50. F-Lilies, \$3; Violets, \$3; Cattleyas, \$1 each; Lilac, \$4 doz. G-Better; about 20 per cent. larger than previous years. There was a very noticeable increase in the number of growers and fruit stands handling pot plants, mainly owing to the mild weather. There were no novelties to speak of and prices were not advanced on pot plants.

TOLEDO, O.-A-About 50 per cent. better. B-Bulbous stock. C-Carnations. E-\$1. F-Lilies, 25c. G-My honest opinion is that our florists here do not yet realize the possibilities of the Easter business. If they had the goods they would all go off. We have here not enough variety; our retailers get scared to invest a single dollar unless they are dead sure it will be an investment to turn out to

J. L. SCHILLER.

WASHINGTON, D. C.-A-Compared favorably. Unusually good in plant line. B-Easter Lilies led. Azaleas and Rhododendrons. C-Roses. Violets. (owing to great scarcity), cheap goods. Jonquills, Narcissus. D-American Beauty, \$3 to \$4; white, \$2 to \$2.50; pink, \$1.50 to \$2; other Roses, \$1. E-\$1; Enchantress. F-Lilies, \$3.50 to \$4 doz. Gardenas. 75c. Violets, \$1 to \$1.50 bunch; Sweet Peas, 50c. to 75c. bunch; Cattleyas, each \$1 to \$1.50. G-Rather better than last year; plant trade particularly good.

J. L. CARBERRY.

WESTFIELD, N. J.-A-About the same. B-Lilies, Spiraea, Deutzias, Cinerarias, Primulas. C-Bulb stock. White, \$1.75; pink, \$1.50. D-\$1.00; Enchantress. F-Lilies, 25c. bud; Violets, \$1.50 per 100. G-About same as last year.

C. DORRER.

WORCESTER, MASS.-A-Far ahead of last year. B-Lilies, Azaleas and Baby Rambler Roses. C-Violets, Roses, Carnations and Daffodils. D-\$1 to \$2. E-50c. to \$1. F-Lilies, each 25c.

C. R. RUSSELL.

EVANSVILLE, IND.-A-Better. B-Lilies, Cinerarias, Azaleas, Tulips, Hyacinths. C-Carnations, Roses, Sweet Peas, Valley, Am. Beauty Roses. D-American Beauty, \$3; white, \$2; pink, \$2; other Roses, \$2. E-\$1; Enchantress family. Beacon. F-Lilies, each, 25c. Violets, \$2; Sweet Peas, \$1.50 per 100.

BLACKMAN FLORIST CO.

KNOXVILLE, TENN.-A-Much better. B-Easter Lilies, Azaleas, Rhododendrons, and Hyacinths. Spiraea dragged very much. C-Carnations and Roses. D-White, \$1 to \$2; pink, \$1 to \$2; other Roses, \$1 to \$3. E-\$1.50 to \$3; the Enchantress family, Lawson, Beacon and Winsor. F-Lilies, pot, 75c. C-Violets, \$2.50. Sweet Peas, \$1.50 to \$2. G-It was much better and we are going to move within 60 days, so will be able to handle still more business.

CHAS. L. BAUM.

OTTAWA, CAN.-A-15 to 20 per cent. better than former years. B-Roses in variety. Hydrangeas, Lilies and Azaleas. C-Violets, Carnations, Roses and Valleys as named. D-American Beauty, \$3 to \$12; white, \$2 to \$3; pink, \$2 to \$2.50. E-\$1 to \$1.50; Enchantress, Winsor, White Lawson and Beacon. F-Lilies, 20c.; Violets, \$2 per 100; Sweet Peas, \$2 per 100; Freesia, \$1 per doz. G-Business was much better than other years; good prices were paid and buyers were free and cheerful. Black stemmed Lilies were away ahead of other varieties. Roses can't be overdone. Small Azaleas,

\$1.50 to \$2 a great favorite, also Rhododendrons. Demand for Lilies greatly increased. Hyacinths and Tulips in pans were not favorites, although they used to be. Valley in pots always sells well. Pots of Freesia in good condition were quite a hit at \$1.50 to \$2. Violets for corsages, owing to the fine weather, were in great demand; from 30,000 to 40,000 were sold. Killarney Roses sold on sight. Carnations, all around, were very fine. Churches decorated about as of yore. Plant baskets at Easter are not in much demand. Boston Ferns still kept in favor. All the florists satisfied.

E. I. MEPTSTED.

PEKIN, ILL.-A-Better. B-Lilies, Rose plants, Hydrangeas, C-Carnations and bulb stock. D-White, \$1 to \$1.50; pink, \$1 to \$1.50; other Roses, \$1 to \$1.50. E-\$1. F-Lilies, each, 25c.; Sweet Peas, \$1. G-Better.

GEO. A. KUHLE.

TAUNTON, MASS.-A-The largest Easter trade on record. B-Lilies and Azaleas. C-Carnations, Violets, Roses and Lilies. D-White, \$1 to \$2; pink, \$1 to \$2; red, \$2 to \$3. F-75c. on good stock and large demand. F-Lilies, 20c. Violets, \$1.50. Sweet Peas, \$1. G-Sold entirely out of all plants in bloom. The former custom of the growers in holding out for high prices was not observed, only a fair price being asked. The result was our cut flower trade was three times that of other years. We had first class stock at a third less price of previous years and the benefit was mutual between grower and retailer.

WILLARD & WILLIAMS.

TORONTO, CAN.-A-Better. Weather very fine. B-Bulbous stock. Cinerarias, Primulas, Azaleas, etc., were plen-

tiful and generally sold well. C-Lilies, Roses, Carnations and Violets. D-White, 75c. to \$4; pink, 75c. to \$4. E-50c. to \$2; Winsor and Lady Bountiful. F-Lilies, each 15c. to 25c.; Violets, \$1 to \$5 per 100; Sweet Peas, \$3 to \$6 per 100; Cattleyas, each 75c. and \$1. G-Conditions were peculiar. Growers who a few weeks ago thought their stock would be just right had trouble to keep it back; and others who were not on time caught up and were just right. Thousands of Tulips and Lilies were too forward and were thrown away. Azaleas were over plentiful and the dealer that sold out was lucky; but with it all a record business is reported.

T. MANTON.

TEN POINTS OF EXCELLENCE OF THE NEW SEEDLING BEGONIA "Glory of Cincinnati"

- 1.—It lasts longer in the dwelling than any other Begonia.
- 2.—It is a most beautiful shade of soft satiny-pink.
- 3.—The individual flowers are much larger than those of Gloire de Lorraine.
- 4.—Easily propagated.
- 5.—Easy of cultivation.
- 6.—Strong, robust grower.
- 7.—It can be grown in a 4-inch pot to look like a plant.
- 8.—It flowers from October to April.
- 9.—Not surpassed by any other Begonia.
- 10.—The best plant for the Christmas Trade.

\$1.00 each, \$9.00 per dozen, \$50.00 per 100. July delivery.
You cannot invest your money to better advantage.

The book of WATER GARDENING

By PETER BISSET. Price, postpaid, \$2.50.

A. T. DeLaMare, Ptg. & Pub. Co. 2 to 8 Duane St. New York

grand; it could not be beaten for cut flowers and blooming plants and the shipping and delivering thereof. March 25 the thermometer went up to 78° in the shade. It was the hottest ever known about here at this date. Sunday, also, was an exceptionally warm day. The storekeepers worked late into night the last part of the week and on Saturday all night. Employer and employees were very glad when closing time came Sunday, as all were very much tired out, horses included.

Outdoor bulbs are all up and a day like last Sunday set them fairly leaping out of the ground from yellow nubs to green blades. A week's weather like this would see the bulb gardens ablaze with blooms. In sheltered places Narcissus and Jonquills are several inches up already.

O'Rielly, Leach & Sons, and Hoffman, Pawtucket (R. I.), retailers, report the best business they ever experienced at Easter.

M. J. Leach & Sons are to build two more houses, 200x50 ft., on their extensive plant at Pawtucket. This firm grows a general line of such stock as Carnations, Mums, Violets, Roses and bulbous, with immense quantities of bedding and vegetable plants, which they dispose of at their store in Pawtucket.

The firm of T. J. Johnston & Co. has added another new delivery wagon to their list of deliveries; it is artistically decorated and has a fine blood bay gelding to draw it that Mr. Brooke, the manager, was fortunate in securing for this turn-out.

The greenhouses of John Macrea, F. Macrea & Sons, Geo. Kelley, T. O'Con-

Providence, R. I.

Business for the month of March was most satisfactory; funeral work and cut flower trade being in abundance. Owing to the weather, landscape and nursery work has opened up with a rush and help is in great demand.

The plant and flower church decorations for Easter Sunday were more elaborate than ever. Immense quantities of decorative plants, made-up designs and cut flowers were used.

Weather conditions for Easter could not have been better; it seemed to suit all kinds of Easter cut flowers and flowering plants; and there certainly was a great influx which was thoroughly cleaned out at good prices. In fact, it

A Fine Lot of My Maryland Roses

As grown by the Dept. of Agriculture, Washington, D. C.

was the most satisfactory Easter trade the grower and retailer ever experienced; this is the universal expression of all connected with the business.

Wholesale prices: Am. Beauty, \$4 to \$12 per doz.; White and Pink Killarney, Richmond, Mrs. Taft, My Maryland, \$12 to \$15 per 100; Brides and Bridesmaid, \$6 to \$10 per 100. Gardenias \$50 per 100. Lily of the Valley, \$3 to \$4 per 100. Violets, \$1 per 100. Bulbous stock, \$3 to \$4 per 100. L. Harrisii, longiflorum, giganteum and Callas, \$10 to \$12.50 per 100. Sweet Peas, \$1 per 100. Pansies, 50c. per 100. Mignonette, \$2 to \$4 per 100. Forget-me-not, \$1 to \$2 per 100. Carnations sold the best of all flowers and Enchantress took the lead by a long ways. Other good selling varieties were Beacon, Winsor, White Perfection, Winona, these kinds brought from \$4 to \$5 per 100. English Primroses, 25c. per bunch.

There is always great quantities of green stock used at this time; Asparagus, Adiantum, Smilax, hardy and fancy Ferns, all brought the regular market price.

The best selling varieties of Azaleas were Van der Cruysen, Vervaneana, Emp. of India, Emp. of Brazil, Niobe, Bernard Andrea alba and Prof. Wolters; these sold from \$1 to \$12 each, according to size.

Rambler Roses in pots of the various varieties and shapes, sold remarkably well. Rhododendrons, Hydrangeas, Hybrid Roses, Spiraea Gladstone, Bougainvilleas, Double Daisies, Marguerites, Wistarias, Ferns, and Palms all sold well and brought good prices.

In Easter plants L. Harrisii and Azaleas had the lead while hardy Roses, especially the Crimson and Baby Ramblers in pots, were in great demand.

The weather during Easter week was

nor, E. J. Johnston, J. B. Canning, E. McCarron, Wm. Appleton, M. Sweeney, O. Williams, T. Curley, F. Hoffman and M. Leach were fairly ablaze with blooms of the various Easter plants and, as bedding stock is about in its prime, it added considerably to the grand show.

J. B. Canning reports the best Easter and Spring trade he has had since he first started in business, almost 30 years ago. Mr. Canning grows immense quantities of bedding stock and has two teams out selling this stock; he reports very satisfactory returns.

Eugene McCarron had a good Easter trade and is now busy with outside work. He does a great business in landscape work as he is in one of the best residential sections of this city.

A. Holchner picked over 50,000 Violets for Easter trade, La France and Princess varieties. He also had some excellent Sweet Peas and Pansies.

N. D. Pierce of Norwood (R. I.) reports an excellent nursery trade; he has one order which will go far beyond the four figure mark for trees, shrubs, etc., at the Pomham Club grounds. He has just received a large importation of nursery stock, twenty-six cases in all, principally Boxwood. Mr. Pierce also said he had a great demand for his new unnamed yellow Carnation at Easter.

O. Taft of Oak Swamp (R. I.) had an excellent crop of Violets for Easter; he grows principally bedding plants.

Miss Edith Sims has succeeded Miss Emily Sellow as head bookkeeper at T. J. Johnston & Co. There has been a great change in the staff of help of this firm. Ambrose Morrison has resigned to become a jewelry salesman and Jerome Powers has taken his place. Doc Brooke of Albany, N. Y., and Al. Hamby of Newport have positions in this store.

G. A. J.

National Flower Exhibition at Haarlem

This exhibition for which preparations have occupied more than a year, was opened on March 23, in the presence of its patron, H. R. H. the Prince of the Netherlands, by his excellency the Minister of the Home Department, and will last until the end of May. It far surpasses the great horticultural exhibition held at Zeist last year, and is without doubt, of much more importance. The following letter details the arrangements made for the show: "This open air show will not only consist of exhibition stock sent in by bulb growers, but the famous cultures of Boskoop and Aalsmeer—shrubs and pot flowers—will be represented by the best things that are grown there, and will make a fine complement. One of the most remarkable phenomena of this undertaking is certainly the circumstance that so many local sections of the General Society for Bulb Culture will come out with collective exhibits. It seems that all bulb growers, Holland over, have come to the conviction that in an exhibition like this one the attention in the first place ought to be drawn to the superior quality of the articles in general. So the section Lisse sent in

all bulbs that must be planted on the lawn before the pavilion. First will be planted 47,000 Crocus; after them 30,500 Hyacinths; and, finally, 30,500 early and 3000 Darwin Tulips. The Crocus were planted last Autumn; the beds have a surface of about 600 square yards, laid on a spot of about one acre, constructed in the French style. The Hyacinths and early Tulips are planted at Lisse in boxes and in pots and very carefully brought into flower. As soon as the flowering of Crocus is over, the bulbs will be taken away and the Hyacinths will be planted. After these it is the turn for the Tulips. In that way we get a succession of flowers and colors, quite fresh; but it is a gigantic work, as there are needed for these changes 3000 boxes, each measuring 16x16x6 inches, filled with sand and bulbs to a weight of about 90 tons, not including the 8000 pots with Hyacinths and Tulips. For transport of the lot are wanted 30 wagons of the North and South Holland Steam Tram Co., cutting its way through the villages between Leiden and Haarlem.

"The execution of these arrangements is entrusted to the exhibition committee of the section Lisse. This committee consists of G. van der Mey, of the firm of G. v. d. Mey & Son, A. Guldendaal, of the firm of Guldendaal & Son, Jac. van Zanten, of the firm of M. Velthuis van

Zanten & Sons, all exporters at Lisse, J. W. Lefeber, G. van der Horst and N. Dames, bulb growers at that place; the latter two gentlemen are still old acquaintances of many readers of your paper.

"Though Lisse sends in a large lot, its local seedling will quite disappear among the great mass of other exhibits of local sections or private growers. The section of Lissecom will come out with an iris-shaped bed of soft-colored Hyacinths. The section of Rensselaer plans an arrangement in the style of a natural landscape. Bovencarspel planted Tulips in regular beds. Overvun will try to give a survey of all kinds of Hyacinths and Tulips grown there. Noidwijk will arrange some beds of Tulips in Roman style. Humsted, Sassenheim and other sections have done their best, and numerous exhibits of private persons will decorate the whole.

Beside these collections and collective exhibits a great number of firms from the Boskoop and Aalsmeer nurseries will send their best and finest shrubs. Although the city of Haarlem gave a surface of some 15 acres for this exhibition, the general committee was obliged to limit the exhibits because the space it had to dispose of was more than filled before the fixed time. J. BEUMER."

Portland, Me.

The attractive windows of A. W. Dyer are exciting much interest this week by his unique collection of very youthful and energetic rabbits and guinea pigs displayed in one window and a choice collection of Spring flowers in the other. Mr. Dyer's success is due to originality of ideas, combined with perfect and most refined taste. At the Goddard Greenhouse Company's store some particularly fine things are noticeable, among them quantities of splendid Azaleas, for which Mr. Goddard is noted, finely grown Lilies and Dutch bulbous flowers, so popular this season in the larger cities.

The Portland Flower Store is most successfully managed by Miss Lougee. Her Easter showing of Roses, Carnations, potted plants and seasonable flowers is, as usual, arranged in a manner which appeals to all lovers of the beautiful.

The J. W. Minott Company's store this Easter is filled with the choicest and the best, as usual. Minott's Roses are famous for their beauty, and their Lilies are particularly fine and large this season.

The windows of Dennett the Florist always claim their share of admiration and a generation of satisfied and loyal customers has made this store one of Portland's most prosperous.

In the western section of Portland, "Sunnyhank" is located. Mr. Wallace's reputation for flower culture is well known by Portland representative families many of whose hothouses have been in his charge. His own greenhouses are ideally located on Emery st. and here he raises Violets of immense size, and beautiful Carnations. His facilities for design work are unsurpassed.

The Hiawatha Flower Store on Preble st. is Portland's recent addition to the number and here is displayed a collection of cut flowers and potted plants which is securing for Mr. Hannaford a flattering share of the flower business. His stock is always fresh and well displayed.

The magnificent shop of E. J. Harmon & Co., New Baxter Block, is a revelation of beauty which is duplicated by few flower stores in the larger cities. Up-to-date in the arrangement of display refrigerators and window trims the store is the Mecca of the flower loving public.

Portland is headquarters for flowers and plants. Her florists are up to the minute and thoroughly reliable and Easter 1910 adds to her renown by the best display in her history.

Jamesville, N. Y.

T. M. Miller is a very happy man, as his wife presented him with a beautiful baby girl on Palm Sunday; it is earnestly trusted she may grow up to be a blessing to her parents. Business with him has been remarkably good all through the Winter, funeral work being very large. The whole place is in fine shape. His show house was very tastefully arranged with fine Azaleas, Spireas, Callas, bulb stock, Ferns, Palms, Primulas, etc. A well-arranged show house, even if small, pays. The stock of bedding plants is very large and in fine condition. This Easter trade was the largest he has ever had, the Hyacinths, Tulips, Daffodils, Narcissus, Cinerarias and Primulas were a fine lot of well-grown stock. H. Y.

House Showing Solid Beds at the Dept. of Agriculture, Washington, D. C., Which are Proving so Satisfactory for Carnations. But One Raised Bench Remains in Entire Range

By Geo. W. Oliver, Propagator to the Bureau of Plant Industry, U. S. Department of Agriculture

Printed on enamelled paper and illustrated with one hundred plates and engravings. Strongly bound, 12 mo., cloth. By mail postpaid, \$1.50

A WORKING handbook of every day practice for the Florist and Gardener, and those who intend to grow plants and flowers, in the greenhouse or garden, as a means of obtaining a livelihood. Each and every article is written in concise, simple language, and embodies wholly and solely the experience of the writer.

The plants dealt with comprise those which are commercially handled by Florists, Gardeners and Nurserymen, and include Florists' Flowers, Stove and Greenhouse Plants, Hardy Herbaceous Plants, Annuals, Shrubs, Hardy and Tender Vines and a chapter of General Directions, covering Propagation, Seeds, Grafting, Hybridization, etc.

This reliable cultural work has been gotten up for use, not ornament; therefore the price has been fixed at a figure within the reach of all. It contains more real practical information for those for whom it is intended than is found in much more pretentious works.

Violet Culture

The Florists' Exchange, 2 to 8 Duane St., N. Y.

FOUNDED IN 1888

A Weekly Medium of Interchange for Florists, Nurserymen, Seedmen and the Trade in General.

Exclusively a Trade Paper.

Entered at New York Post Office as Second Class Matter.

Published every Saturday by the A. T. De La Mare Ptg. and Pub. Co., Ltd., Proprietors, 2, 4, 6 and 8 Duane Street, New York. A. T. De La Mare, president and managing editor; Jas. H. Griffith, secretary; David Touzeau, treasurer. The address of the officers is the address of this paper. Short address: P. O. Box 1697, New York. Telephone 3765-6 Beekman

PRINCIPAL OFFICES

Chicago: Margaret T. Flint, room 614, No. 60 Wabash Avenue; tel. Randolph 2000. Office hours: 9.30 to 12.

Boston: Robert Cameron, Cambridge, Mass.

Yearly Subscriptions.—United States and Mexico, \$1.00. Canada, \$2.00. Foreign countries in postal union, \$2.50. Payable in advance. Remit by Draft on New York, Post Office or Express Money Orders; if paid in cash please register letter.

The address label indicates the date when subscription expires and is our only receipt therefor.

Registered Cable Address: Florex, New York.

Telegrams.—Telegrams received in this office up to 3 p.m. Wednesday, containing changes in advertising, will receive attention for the issue of the Saturday following; likewise, telegrams having informative matter intended for our news columns will be received up to Thursday 9 a.m. News telegrams should be forwarded after 3 p.m. Wednesday and marked "Night Press Message, Collect." These will be forwarded by the Telegraph companies at their newspaper rate, providing the material so forwarded contains news for the paper.

Greenhouse Construction and Heating

With this issue we commence publication of a series of articles under the above caption which should prove timely and interesting. The series will comprise nine separate articles under headings as follows: 1, Plan for Future; 2, General Arrangement; 3, Form and Size of House; 4, Material; 5, Ventilation; 6, Benches; 7, Potting Shed; 8, Heating; 9, Boiler Room.

The writer, Mr. John A. Payne of Jersey City, N. J., whom we consider an expert on the subject, will present the standard constructions of today of the various manufacturers and, through the liberal use of diagrams and halftones, set forth details and descriptions, bringing out the various points of excellence in each. Naturally, this series of articles will also include in its scope the descriptions and uses of the many practical devices now on the market, all of which tend to improve the construction or heating service, as well as to lighten the labor of the florist.

This publication is timely and should prove of great value to the florist, especially the younger men in the business, and our friends could do us no better service than to draw the attention of their friends who may be non-subscribers of The Florists' Exchange to these articles, and have them subscribe for the paper now, so as to have the benefit of every issue in which this series will appear. To complete the series it will take some ten issues—perhaps more.

Native Azaleas

In your item about native Azaleas you do not mention *Azalea canadensis*. I think this is classed as a form of *A. nudiflora*, but it differs greatly. *A. nudiflora* is shorter and stouter in growth and its flowers are generally a little less in size and grow more compactly in the clusters; the color varies from nearly pure white to a purplish rose and there is little or no fragrance to it. *A. canadensis* grows taller and often more open in growth, and the flowers are not so crowded, which gives it a more free and graceful style; the flowers, too, are from light to deep pink and are exquisitely fragrant. The two have been offered indiscriminately under the name *Azalea nudiflora*, but in buying under that name there is no certainty which one will get. I have been growing *A. arborescens* for quite a number of years and out of a dozen that I obtained first I had two that were pink in color, the others varying but little in color from *A. viscosa*, but the flowers were considerably larger and opened several weeks later than *A. nudiflora*. This is an important point, because it extends the season. The pink form of *A. arborescens* was offered for sale some years ago, but a little later I could not obtain it, and I think it is not now offered at all.

Wm. F. BASSETT,
Hammon, N. J.

Mr. Bassett always writes interestingly of plants. The point he makes of the later flowering of *Azalea arborescens* than the *A. nudiflora* is a good one to remember. It is in the line of recommendations of *A. viscosa* which have appeared in this department, because of its late flowering character.

J. M.

Boston Orchid Exhibition

Postponement of Date for Entries

The date for entries for the Orchid Exhibition has been changed from April 1 to April 30. This extension of time will enable exhibitors to tell more easily just what plants will be in the right condition for the exhibition. Five orchid specialists have been selected to act as judges and a great effort is being exerted by the Mass. Hort. Society to make this the largest and most successful exhibition that it has ever given.—R. C.

New York Easter Trade

Weather conditions at Easter, in New York, were such as to almost entirely demoralize the cut flower business. Several days of warm weather preceding Saturday resulted in an influx of stock greater in magnitude than has ever been seen before at any season. Every wholesale establishment in the city was crowded to the utmost with arrivals covering everything seasonable in the way of cut flowers.

On Friday night Violets from "up river" came in avalanches, most of them in a condition which prevented their retention for any length of time. Consequently, the bulk of them went out through the street men, whose opportunities this year seemed unlimited. Saturday's arrivals of Violets were also heavy, but owing to the enormous clearances made by the street men the market absorbed them without any great difficulty and much better prices were obtained. Particularly was this the case with the evening arrivals, which reached and retained the dollar mark.

Roses, naturally, were in abnormal supply. Many hundreds of boxes came in all through the day on Saturday and on Sunday morning. All of the shipments arrived in a soft condition and all hands were kept busy selecting the best grades, in order to effect a speedy clearance. American Beauty was in good supply but seemed to move slowly; the quality was all that could be desired, but buyers showed no enthusiasm for the flowers, and stock which on Tuesday before Easter had brought as much as 60c. was closed out at as low as 40c. for the best grades. On the other hand, Richmond, which appeared to be more than usually a favorite this season, held strongly to the figures obtained earlier in the week, 15c. to 20c. being the range of prices for the best stock. Pink Killarney was in tremendous supply, but much of the stock was considerably off in quality. Selected blooms were taken freely, and these about satisfied the trade demand. There were no fancy prices, 10c. to 12c. being the best obtainable, and the surplus was jobbed off at bargain prices. My Maryland was also in good supply but moved somewhat slowly with the Killarney so strongly in evidence and procurable at such low figures.

Carnations, although in heavy supply, were not in such large supply as Roses. On Thursday and Friday there was a movement among the wholesalers to hold prices up to \$4 and \$5; the heavy influx on Saturday morning made this impossible, and those who were fortunate enough to close out at \$3 for the best stock have considered themselves as abreast of the market, as later in the day prices tumbled to \$2 for the best, and in many cases bargain transactions cleaned up the flowers at much lower figures. Much of the stock which arrived was in soft condition and showed signs of sleepiness before changing hands.

There was no scarcity in the supply of Lilies; in fact, the supply was such that Easter quotations were considerably modified soon after the business began. From 10c. to 15c. were the prices prevailing at the outset. Much excellent stock went off at 12½c. The quality of the flowers was all that could be desired, but short stems governed values and this made minimum prices the rule rather than the exception. Long-stemmed stock was quickly snapped up at maximum prices; the lower grades, however, continued to arrive in such quantities that before Saturday evening 8c. to 10c., and even lower figures, would purchase almost anything in the Lily line. There was a good supply of Callas and the quality of the flowers was excellent. The prices of the Lilies, though, affected the Callas, and while they held firm in prices asked, the expected figures were not realized.

Bulbous stock was over-abundant. Enormous quantities came in from every direction and inside grown stock was heavily handicapped by the competition presented by outdoor southern stock, which fairly flowed in. This condition made it impossible to obtain anything like reasonable prices for Daffodils. Tulips, well-grown stock, were in great quantity but, owing to the weather conditions, most of the arrivals were in bad shape, the flowers being wide open and practically useless for any purpose.

Lily of the Valley was in good supply and moved fairly well, yet fancy prices were out of the question. About \$3 was the top price for the best of the stock. Sweet Peas were quite abundant but, as far as clearances were concerned, were one of the best things in the market. The retail trade absorbed the best of the stock and the balance went out to the street men without any trouble. This clearance was probably due to the fact that prospects for a fine, warm day on Easter Sunday

were so marked that dealers anticipated a great demand for flowers suitable for corsage bouquets.

Stocks, Snapdragons, Forget-me-nots and Mignonette, were all to be had in excellent quality and condition, and on the whole brought good prices.

Easter 1910 holds the record for plant sales. The business done in this line is almost beyond description. Plants approaching any degree of perfection were disposed of with little effort, and every grower reports, practically, a clean-out. Reports from retailers are to the effect that never before were sales so heavy. Plants with simple decorations were taken in preference to the usual offerings in basket, hamper and box combinations; indeed, the latter were conspicuous chiefly by their absence in many of the displays. This was probably due, to some extent, to the very fine appearance of Easter plants this year. Genistas, for instance, were presented in trained forms, which were decided novelties. Hydrangeas were also shown in forms different from the ordinary bush plant, and many fine specimens were seen grown to standard form. Wichuraiana Roses were more than ever in evidence, and some of the newer varieties were seen in specimens which might be considered absolutely perfect. Lady Gay, Dorothy Perkins, Tausendschön, Hiawatha, Apple Blossom, Mrs. Flight and others were remarkable for their fine finish and prolific flowering. The Rambler types, too, were of unusually fine quality, and were as popular as ever.

Orchids, particularly Dendrobiums, were quite prominent as plant offerings, and a made-up plant, tastefully arranged with ribbons needed very little in the way of basket decoration to make it attractive. Pots and pans of bulbous stock were greatly in evidence and enjoyed a remarkable sale. Flowering shrubs also caught the popular fancy.

Taking all in all, the Easter business amounted in the aggregate of value to fully that of last year, although with an over-supply of cut flowers a greater volume of sales had to be effected.

S. A. F. and O. H.

Mid-Lent Meeting of the Executive Board

The regular mid-lent meeting of the executive board was held at the Seneca Hotel, Rochester, N. Y., March 12, 14 and 15. The entire executive board, consisting of President Pierson, Messrs. Asmus, Yonng, Vesey, Dailedouze, Rudd, Craig, Valentine, Vick, Kasting and Dörner, were present during the entire session. The usual routine business was transacted.

The report of the treasurer and the financial report of the secretary for 1909, and also the supplementary reports for January and February, 1910, were received. These reports were referred to a committee consisting of Messrs. Valentine and Dailedouze and were reported by them to be correct. They were then accepted by the board.

The treasurer was instructed to deposit all interest received from the funds of the Society to the credit of the reserve or permanent fund.

Several changes in rules relating to the management of the annual trade exhibition were adopted. For floor space the rates are to be as follows:

Minimum charges.....	\$5.00
100 ft. or less.....	20c. sq. ft.
Excess over 100 ft., up to 200 ft.....	15c. sq. ft.
Excess over 200 ft.....	15c. sq. ft.

All signs, in any exhibit, whether on wall or elsewhere, shall not extend higher than 6 ft. 6 in. above the floor. The charges for sign space outside exhibition space shall be at the same rate as floor space. For wall space for exhibition purposes, and not for signs, the rates shall be one-half that for floor space. All signs used in the exhibition shall be black letters on a white ground. No other color shall be allowed to be used either for lettering or for ornament.

A resolution was adopted providing that the public should be admitted to the exhibition every evening at 7 p.m., and on Thursday from 2 p.m., until closing time; and at all other times the exhibition is to be closed to the public. An admission fee of 25 cents will be charged. All arrangements attendant upon the admission of the public are to be under the control of a committee consisting of F. W. Vick, Wm. Kasting and G. B. Hart.

Chas. H. Wick, on the recommendation of Vice-president Vick and the Rochester Florists' Association, was unanimously elected superintendent of the trade exhibition.

In connection with the committee of the local club the board visited the large Convention Hall offered for the trade exhibition and meetings and accepted it. This building contains about 48,000 sq. ft. of floor space and was considered by the members of the board to be the best hall ever offered for a trade exhibit.

President Pierson appointed John Westcott of Philadelphia as chairman of the committee on convention sports, with A. F. Vick, R. G. Salter and J. M. Keller as the other members.

The usual appropriations were made for the year. Mr. Valentine submitted to the board an outline for the organization of a retailers' section of the Society. The plan in general provides that all members of this section must first become members of the Society. It contemplates a trade arrangement by which business in

distant towns may be exchanged on a safe basis as to quality of stock and credit. It was the unanimous opinion of the board that the idea is an excellent one for the Society and will prove valuable to the retailers.

It was the unanimous opinion of the board that a special meeting of the Society should be held during the time of the National Flower Show. A recommendation to that effect was made to the Society.

The following resolution was adopted:

"Resolved, That if five or more members write to the secretary expressing an especial interest in any given floricultural topic and request the organization of a section devoted to that subject, the secretary shall assign a place on the program to that topic and shall designate it by a suitable name as a separate section." The object of this arrangement is to provide sections so that members interested in these various subjects may get together and discuss them.

A tentative program for the coming meeting was adopted.

The board further indorsed the work of the experiment stations by passing resolutions commending the proposition for the State of New York to appropriate money for the erection of glass houses at Cornell University for experimental and teaching work in floriculture. A bill was recently introduced in the Legislature at Albany embodying an appropriation of \$50,000 for this purpose.

The tariff and legislative committee was directed to fully investigate the cause of the present high price of glass and to take whatever steps are necessary to relieve the situation. It was also requested to recommend such tariff legislation as will prevent a recurrence or continuation of the present conditions.

The following amendments to the constitution and by-laws were presented, ordered placed on record and printed in the program for action at the next annual meeting: To amend Article V, Section 1 to read "The first annual meeting of the Society shall be held at Buffalo, New York on the first Tuesday of August, 1901. Subsequent meetings shall be held annually at such time and place as may be fixed by ballot at the morning session of the second day of each annual meeting and shall continue for at least three days."

To amend Article IV, Section 2 by striking out the figures \$25 and inserting instead thereof \$50, meaning to increase the life membership fee from \$25 to \$50.

On Monday night the members of the board were guests of the Rochester Florists' Association at their second annual banquet. The entertainment by the Association was much appreciated.

The following final resolutions were adopted: "The executive board of the Society of American Florists and Ornamental Horticulturists desires to place upon record their appreciation of all the courtesies which have been shown them by the Florists' Association of Rochester and to recognize the spirit of hearty co-operation shown by the members thereof. We can confidently look forward to an unusually successful convention next August. We recognize the liberality of the Chamber of Commerce in placing at the disposal of the Society the finest hall we have ever had for our meetings and exhibition, entirely free of charge. We have enjoyed a most pleasant time at the banquet and are more than delighted with the cordial expression of the various local speakers. We leave for our homes with the conviction that the earnest workers of Rochester will do their full share in making the convention of 1910 a complete success."

H. B. DORNER, Secretary.

Experimental Greenhouses for N. Y. State Florists

Prof. John Craig of Ithaca, N. Y., in his talk before the members of the New York Florists' Club and their guests, the visiting members of the American Rose Society at the twenty-third annual dinner of the Club last week, drew attention to the fact that the Empire State led all others in the extent and variety of its horticultural products, standing first in the annual output of deciduous fruits, first in the value of nursery products, first in the output of vegetable crops, first in the extent of land covered by glass for the forcing of vegetable and flower crops and first in the value of her floricultural products. This position has been attained by the growers with very light assistance from the State, the professor said, and to a great extent the fault rests upon the florist industry for the reason that it has not shown the aggressiveness of other interests.

Through the efforts of the State Florists' Association of Illinois there is now located at Urbana, in full running systemized operation, a fine range of greenhouses, amply endowed, all to be used for the purpose of conducting experiments in floriculture. The Florists' Club of Buffalo has started the germ of a similar movement, and a bill has been introduced in the New York Legislature providing for an appropriation to cover the cost of erecting greenhouses to be used in solving problems in commercial floriculture. The movement has received the endorsement of the Commercial Florists' Association of Rochester, and as well, has the support of the Executive Committee of the S. A. F.

We draw the attention of our New York State readers to this very highly important matter, and would suggest that each individual florist at once write a strong

letter to the assemblyman as well as the senator representing his district, urging that the present bill be taken out of the Committee on Ways and Means, in whose hands it is now resting, and be pressed forward and made into law before the close of the present session. The State of New York is doing considerable work for agricultural interests, and it is reasonable to believe that our legislators would do as much for the florists if they but show themselves sufficiently interested in the matter.

The following is a copy of the bill, which was introduced by Assemblyman Lafay C. Wilkie, and has had one reading:

AN ACT—To build and equip a range of glass houses and service building for teaching floriculture at the New York State College of Agriculture at Cornell University and making an appropriation therefor.

The people of the State of New York, represented in Senate and Assembly, do enact as follows:

Sec. 1.—The sum of \$50,000, or so much thereof as may be necessary, is hereby appropriated for the purpose of building and equipping, at Cornell University, a range of glass houses and service building, suitable for experimental and teaching work in floriculture. Such buildings shall be a part of the New York State College of Agriculture at Cornell University, and shall be located on such portion of the land of the university as may be designated by the trustees of such university. Plans and specifications for such glass houses, service building and equipment shall be approved by the department of horticulture of such college of agriculture. Such buildings shall be built and equipped by such University and such appropriation shall be paid by the state treasurer on the warrant of the comptroller on the order of the treasurer of Cornell University, but no part of such appropriation shall be available, except for advertising and for plans, until such University has entered into a contract with a responsible party for the completion of such work within the amount appropriated.

We trust also that the New York Florists' Club, at its next meeting, and the other organized floricultural bodies of this State as they hold their meetings, will place on record their desire to see this bill passed, and that copies of these resolutions be presented to the proper parties at Albany.

A courteous letter to your assemblyman or senator, showing your interest in the proposed bill, urging its immediate enactment and making your statement plain that horticulture is one of the leading interests of this State, and deserves the assistance called for by this bill, would be extremely effective at this time.

Proposed N. Y. Wholesale Market

A joint committee consisting of a committee of five each from the New York and New Jersey Association of Plant Growers, the New York and New Jersey Market Florists' Association, and the New York Florists' Club met at the office of J. B. Nugent Jr., 42 West 28th st., New York City, on Wednesday, March 30. A. L. Miller presided.

Sidney H. Goodacre, deputy superintendent of markets of New York City addressed the meeting. He offered the space under the Queensboro Bridge at 59th st. and First ave. for the use of the Associations as a city market. The space under the bridge is 170 by 275 ft., varying from 40 to 60 ft. in height. The floor is already cemented, and the columns and ceiling tiled. One side and one end is already enclosed, and the other side and end arched between columns. These spaces the city will glass in, and will also put floors down for offices. A space outside, of about the same area as that under the bridge, will be available for wagons, and a sidewalk 70 ft. wide can be used for displays at Easter and other holidays.

The joint committee took taxicabs and visited the proposed location, and were much pleased therewith. The situation is central, as regards wholesalers and retailers, and is a favorable one for the Long Island, New Jersey, and Hudson River growers. It is also easily accessible from all parts of the city.

Mr. Goodacre said application for this space had already been made by the Market Gardeners' Association and it had been refused, and that he was now offering it to the plant growers and florists.

Wm. H. Siebrecht Jr., secretary, was instructed to see the comptroller and superintendent of markets and obtain the city's proposal as to terms and nature of lease, and to report at a subsequent meeting.

There is no trade medium published that begins to equal the EXCHANGE in giving returns to all of its advertisers. Test it for yourself.

Israel Kinney

Israel Kinney of Bellefontaine, O., died at 1.30 o'clock Saturday morning, March 26, after an illness extending over a period of several months. Mr. Kinney was born June 19, 1831, in Belmont County and came to his present location in 1880. He was one of the most widely known nurserymen in Logan Co. He is survived by a wife and three children.

Arthur Boyle

Arthur Boyle, an old resident of Santa Fe, N. M., died there March 24. Mr. Boyle was born in Newcastle, Eng., Feb. 22, 1840 and after years abroad that were partly spent in the service of the Rajah of Sarawak, Borneo, Sir Brookes, he settled in Santa Fe. He was an enthusiastic gardener and horticulturist and carried on for many years a greenhouse and florist business in the Clarendon gardens on the south side. Mr. Boyle was a septuagenarian but was robust and active until his final illness seized him. He is survived by a wife, one son and one daughter.

John Shedden

The death of John Shedden, a well-known florist and landscape gardener, occurred Saturday evening, March 19, at his residence, 227 Carnation st., Pawtucket, R. I. Mr. Shedden was born in Scotland, 53 years ago, but had been a resident of Pawtucket for 23 years and his sudden death came as a shock to a large circle of acquaintances. Mr. Shedden has been for many years superintendent of Walnut Hill Cemetery at Pawtucket. He leaves a widow but no children. His funeral was held Tuesday, March 22, from his late residence. He was a member of the R. I. F. and G. Club. G. A. J.

Irving Z. Dodge

Irving Z. Dodge, years ago one of the most successful growers about here died at his late home, 95 Wilson at., Providence, R. I., on Sunday, March 20. Mr. Dodge's health has been on the decline for several years and he was totally blind. He had not been engaged in any business for the past ten years.

Mr. Dodge, twenty years ago, was the first man here to force the Jacqueminot Rose for cut flowers successfully, and he was an expert, particularly with plants on their own roots, which he forced from year to year; for ten years or more he was also a very successful grower of the most popular Tea Roses and Carnations as well as dealing in a general line of bedding plants. Mr. Dodge was a charter member of the R. I. F. and G. Club, and an Oddfellow. G. A. J.

Perennial Delphinium

A Special Strain Developed by Howard & Smith, Los Angeles, Cal.

Perennial Delphinium

The illustration herewith is of a strain of perennial Delphinium originating on the trial grounds of Howard & Smith of Los Angeles. The size and branched character of the inflorescence, also the size of the flowers are shown; the colors are of every conceivable shade of blue. In this climate it is a perpetual bloomer. To be sure, during the first half of the year it is more profuse than during the latter part, but always, Summer and Winter, with enough flowers to show their size and color. When the low relative humidity of our atmosphere is taken into consideration the behavior of these plants is very remarkable.—P. D. B.

Greenhouse Construction and Heating

Copyright, 1910, by
A. T. De La Mare Ptg. & Pub. Co. Ltd.

By JOHN A. PAYNE

[Readers desirous of further information on any subject mentioned in this series will have their questions freely answered. Address your envelopes Construction Dept., care of this paper.]

Introduction

The suggestions contained in these articles are not intended for those who have been engaged for many years as the owners and operators of greenhouses, as such owners have already learned by hard experience, much of the expense of which experience would have been saved them had they received and profited by suggestions such as are now offered. It is to growers who have just started or are about to start out for themselves that these articles are presented, in the hope that they will be of assistance in the consideration of the various phases of greenhouse construction and heating.

The first suggestion to be offered is:

Plan for the Future

Planning for the future is all important. Own your own property if at all possible; this does not necessarily mean that a large amount of ready cash should be locked up in real estate, but it is advisable to have a sufficient equity in the property to make it possible to secure a first mortgage for the balance from some reliable source at a fair rate of interest.

Where such a plan has not been feasible, many florists, who are well-to-do today, have started by leasing a desirable piece of property with the option of purchasing same, at the termination of the lease, at a fixed price. In this way a lessee can put his best energies into the development of the property and feel warranted in putting up a better class of houses, feeling assured that others are not going to reap the benefit of such care and outlay.

A range of greenhouses is generally the result of years of development, beginning quite frequently with a single unit or house, and in the succeeding years, as business progresses, other units are added. Generally, in the past, greenhouses have been erected at haphazard, that is, a grower would decide to branch out on his own account and would secure a piece of property and erect upon it a greenhouse without giving proper consideration to anticipated development of his business, the result being that when he had extended his range by the addition of two or three houses he would find that, to get the best results, it would be necessary to undo all the preceding work; but as this would be impossible, without incurring too much expense, he would erect a succeeding unit and sink the separate boiler pit needed to accommodate the heating plant. Consequently there are some old ranges throughout the country having several small separate boiler pits, necessitating a great waste of fuel and time in the operation of the entire plant. All this could have been avoided by a little forethought in anticipating the development of the business.

In the erection of the first commercial house it is well to make a plan of the total available property and decide, as far as possible, when locating the first unit, how and where succeeding houses may be erected. In this connection some of the most important features which should be considered are as follows: Light, levels, soil renewal, water supply, drainage, shipping and receiving; and in the last items mentioned are included the matter of receiving of the fuel for boilers. All of these items must be considered together, as one is very largely dependent upon the other, but they are mentioned in the order of their importance when under consideration. Of course, any of them may be governed by fixed conditions over which the owner may have no control, such as buildings, or trees on other bounding property.

Light

The question how to obtain the greatest amount of light as many hours as possible during the day cannot be considered as a whole unless there is an unlimited amount of room at one's disposal for general growing purposes. The house should be located, if possible, so as to get the full advantage of the morning and afternoon sun. Where large glass is used, a greenhouse running north and south has been found by many growers of general stock to give excellent results; but where small glass is used there is considerable shadow when the rays of the sun strike the house lengthwise in the depth of the Winter, owing to the roof bars being so close together, a disadvantage overcome by the use of the larger glass. Of course, the crop to be grown will in a large measure regulate the direction in which it is most desirable to run the greenhouse.

Levels

If the property on which the range of greenhouses is to be located is absolutely level, or very nearly so, the question of levels is easily disposed of, but in some instances the ground is irregular, and to avoid the great expense of grading and filling it is necessary to consider the construction of the range at various levels. Such

a condition is an unfortunate one, as, necessarily, a greater expense is entailed in the operation of a range of greenhouses on different levels than if the entire range was on one level; therefore, if at all possible, a level site should be chosen, but where such is impossible, the matter of heating the range from one central point should be given close consideration. It is most important, in order to secure economical results in both fuel and attention, to concentrate the heating plant. Where it is desired to operate the heating plant under a gravity system, the boilers, for either steam or water, must be located at the lowest point of the plant. It will be necessary to make provision at this point for a boiler pit which can be extended to the maximum size required for the full size of the range, as far as can be anticipated; and, for the sake of economy, at the start it would be advisable to place the first house at the lowest point and close to the boiler pit.

Where hot water is to be used, it will be necessary to observe great care in the connection of future houses which will be located higher than the first, so as to prevent their robbing the lower houses; and in case steam is used, circulated under gravity, it will be absolutely necessary to take measures to prevent the short circuit of the steam through the return pipes in the upper houses. However, these are matters which will be considered under the head of heating.

Establishment of Isaac H. Moss, at Govanstown, Md.

Some very successful greenhouse ranges have been built on a quite steep gradient, the houses being specially constructed for this purpose; but, undoubtedly, the best and most economical results can be attained by, as far as possible, keeping all houses on the same level. The next consideration is the matter of convenience for

Soil Renewal

This is a matter which is quite frequently overlooked, not alone in the erection of a grower's first house, but also in the arrangements for future houses. Facilities for soil renewal should receive careful attention, as by proper arrangements at the beginning considerable expense in the matter of handling soil in future years may be avoided.

If it can be planned to take the soil into the houses from both ends, so as to have as short travel as possible in the houses themselves, it is advisable to do so, and if it should be decided to erect the range with the work-room building cutting the houses in two, there should be allowance made for free access to both ends of the work-room. This will be considered more fully under the head of workroom building.

The Water Supply

The source of supply is, generally, either from wells sunk on the property or from a water service system. The latter, of course, is the better for the grower who is erecting his first house, but it is necessary to see that the main which supplies the house is of sufficient size to give the proper flow and pressure required. Water supply is a matter over which the grower, at first, may have very little control, but it should be taken into consideration in locating the property, as also the facilities for increased water supply for the future, and the cost

of making necessary connections. It is also advisable to look into the matter of the possibility of sinking a good artesian well on the property, as it is very desirable not to depend on one source of water supply only.

Drainage

Cases have been known where growers starting in business have erected a first greenhouse after careful consideration of many of the features in connection with the building of a future business, but overlooked the important matter of drainage until brought face to face with the problem in the course of the construction work, and the oversight has been the cause of considerable expense, all of which could have been obviated had the condition been given proper consideration and some changes made in the location of the first house in the range. Drainage is a very important matter, and where a drainage system already exists the levels of the drains should be obtained, and a method of connecting the boiler pit and other parts with such drains should be carefully mapped out.

A boiler pit constructed without proper drainage may mean in some cases the loss of an entire crop, through the flooding of the pit, and the putting out of the fires when heat is most needed. Again, by having a properly drained boiler pit it is possible to keep it dry, which adds considerably to the life of the boilers. If there is no drainage system near the proposed location of the greenhouse, provision should be made for a cesspool, of ample proportions, properly located and constructed.

Shipping and Receiving Facilities

The matter of shipping facilities is one which the grower will have to consider in connection with the character of his product, the method of reaching his trade. The question of receiving embraces chiefly the matter of getting in fuel supply for the boilers, and as, quite frequently, the expense of handling the fuel for the boilers has been materially increased by failure to consider this question, it is presented as one to be carefully

considered. While it does not present itself as a very important factor to the grower who is just building one house, yet when planning for the future it is a serious problem. It is not a very difficult matter to handle forty or fifty tons of coal a year, but with future development the supply may run to ten or twenty times this amount, proportions which make proper consideration of the matter at the outset imperative.

Much of the foregoing may seem very foreign to the matter of greenhouse construction and heating, but it is all of the greatest importance, and spells either success or failure for the best possible greenhouse construction.

(To be continued)

Begonia Semperflorens Berna

This Swiss origination, while not a novelty is considered by the gardening authorities of that country as the best Begonia for outdoor bedding now to be had. It is described as follows in Moeller's Deutsche Gaertner-Zeitung: The plant comes very true from seed and grows to a height of nearly 12 in. The leaves are dark green; the brilliant carmine red flowers rise well above their foliage and their coloring is so unique and pronounced that it at once takes the eye; while the blooms are not unusual as to size they appear in extraordinary profusion and are very lasting. Under the proverbially inconstant Swiss skies Berna always preserves its brightness. With these many good qualities the plant should find its way more generally beyond the Swiss frontier.

Readers are requested to write us on any subject bearing on trade conditions. If the subject interests them it will, in all probability, interest many others.

Sixty Years of Retrospect With Notes by the Way

By Stephen Taplin, Nurseryman and Florist

WHEN I was about seventeen years of age I commenced my apprenticeship to the gardening profession. I p to that time I attended a day school when I could be spared from home. My father was a farmer and worked a brickyard and limekiln, all of which furnished lots of calls on a boy's time besides the regulation chores; from three a. m. to school time, and again from four p.m. until dark there was no let up. Through the busy season it often happened there would be a man short, then I must cut out school and take a man's place; the work did not hurt me and my appetite never failed.

Schools in those days were not what they are now. I often think the epitaph they placed on the old village schoolman's headstone would have been very appropriate in many other cases—it read as follows: "They paid me little and I taught them less!"

It was eight miles to the nearest market town; our village, Overton, dwindled down to about two thousand

Stephen Taplin

inhabitants when the London coaches were taken off—this happened when the London and Southwestern Railroad was opened.

At this time I learned more about chalk, lime and different clays and the uses they could be put to than could be learned in a lifetime outside of practical experience. It was all farms for miles, with large patches of woods and timber, both of which was a great source of income to the landlord, as everything was handled with system by men who could give many points to those who are now sitting at their desks telling the way to reforest the pine barrens of Michigan.

For miles around extended the greatest sheep raising part of England; it was the home of the Southdown, a breed of sheep I often see named in State Fair and other stock reports in this country. In the Agricultural College of Lansing's display of forage and fodder plants, at the Michigan State Fair, I have noticed plants which I had not seen since leaving my home; some of them were grown there as a catch crop, some for fodder in winter, all of which was of great importance to the English sheep farmer. As a rule, where there were plenty of sheep raised good crops were the rule; if no sheep were raised poor crops prevailed and the farm would soon be to rent. But I am afraid I am getting too far off the road.

It was in the year 1850 that I left my native home to commence serving my time in what was then known in England as gardening, which embraced an education in the art of growing everything required at a private establishment, such as forcing fruit, including Pineapples, Grapes, Peaches, Nectarines, Strawberries, Melons, etc.; forcing vegetables, as Mushrooms, Asparagus, Sea Kale, Bush Beans, Cucumbers, a general assortment of Salad

Greens, besides many kinds of herbs for flavoring, required in a green state the year around. Growing of flowering plants to keep the conservatory going from October until June. Kitchen gardening, including everything in the line of hardy fruit and vegetables. Wall fruit trees, which require much more skill, practice and close attention than any one who has never been through the mill can have idea of. Flower gardening was another important feature at that time; there were no foliage plants for ribbon borders and carpet beds; such plants, if they were known, could not have been grown as the ground did not get warm enough for them. Pansies and Violets in distinct colors, Dwarf Daisies, white and pink. Forget-me-not, hardy Candytoft, and a few other things would make a fine display from early Spring until late Fall. In some cases, Box and Ivy were used to good effect. In winter some of the beds would be filled with dwarf Holly, green and yellow, Yews, Box and other hardy evergreen shrubs; these would be taken up in the Spring and planted in reserve ground for the next Fall, the object being to hide the unsightly spots of bare ground through the winter. Many things were brought into play for that purpose which, in this climate, would be either ruined by frost in the winter or by the sun in February and March.

The place I started in was in a mining and manufacturing county, so, to me, it was like a new world in every respect. I was laughed at for many words I spoke and for names I called many things. I was laughed at for asking why they raised only black sheep as where I came from they were all white. I soon found the reason for the black sheep; the wind from a certain point brought the smoke and soot from the works and, in damp weather, the sheep would get the color from the grass at night.

The garden, in its every department, was the neatest and best kept place that I have ever seen in any part of England. It was one of the many places in that country where the gardener had to sell everything raised over and above what was wanted for the family. He was a first-class gardener, knew what to grow and how to grow it.

The place, pleasure grounds and shrubbery, including the flower garden, was of medium extent, containing many fine and choice things in trees and shrubs, both evergreen and deciduous, also some fine coniferous trees. The drives and walks were kept in perfect condition at all seasons. The walled-in kitchen garden contained four acres, and was surrounded by about two acres, enclosed with a deer fence eight feet high; in addition there was a small nursery where hardy trees, mostly from seed, were raised for planting in different parts of the estate; from observation of this latter I picked up several points which I have never seen in print nor heard at a lecture on the subject, but points which, in later years, I found very useful.

The forcing houses consisted of three lean-to Grape houses where Grapes were cut from about the middle of May to the first of February; two peach houses which gave large crops of perfect fruit, such as would fetch from ten to thirty shillings, (English), per dozen in Covent Garden market. There was one Pineapple house for fruiting, and a pine pit for succession plants; at that time pine growing was in its infancy, it would take about three years from the time the suckers were put in until the fruit was cut, for some of the kinds much longer; others would commence to decay at the bottom before they were ripe at top. While there I learned something about Pines which I could not then understand but was pretty sure the treatment was not right. Pine growing will be treated on later, as I have proved that this gardener was very deficient in his knowledge of that fruit. In all my experience I have never found a gardener who was a success in everything; if he was ever so successful in many things, there would be some he would slip up on.

The staff employed consisted of eight laborers, the foreman and myself. I was at first assistant to the foreman who had charge of the forcing houses, he having had two years' experience in the indoor department under a foreman; he was just about the age where he liked to show his authority over some one who could not defend himself, so plenty of kicks, cuffs and abuse came to my share; so far as being shown or told what to do or how to do it, he did not think that was required. I kept well in mind the treatment I then received, and came to the conclusion in later years, when I saw a youngster trying to get ahead, to show and tell him all I could, then if I found he would not pay attention or thought he knew best he would have to take his dose.

We had two small rooms in the garden; at six p.m. the men went home; we got our supper, then worked till nine p.m. by daylight in Summer and candle light in Winter, making sticks, labels, cleaning seeds, bunching Onions and endless other jobs. We had to cook and clean house and do everything of that sort for ourselves. I was a pretty good plain cook after a time—no fancy dishes.

At the time of my first experience with fruit growing under glass we had about as many pests to fight against as Rose growers have at the present time and, as we had but just one crop in the year to depend on, if that crop failed or damaged, it was much more disastrous than a setback in a house of Roses or Carnations would be today.

With Peaches, the wood each season, while dormant,

had to be dressed over with a small brush with a mixture prepared for it, a pleasant job in cold weather. Brown and white scale on hard wood, green and black aphids, thrip, red spider and mildew were the troubles on new wood. Grape vines were cleaned and dressed before starting; thrip and red spider on the new growth required most careful watching. A few years later mildew was either imported or broke out, like smallpox, on growing Grape vines; this caused losses in England of many thousand pounds sterling until a wash was found to check the mildew before the young growing Grapes were damaged. Pineapples were liable to white scale and mealy bug, both of which caused the fruit to look badly, and was always regarded as a disgrace to the grower, as it was almost impossible to get rid of either without sacrificing the whole stock, and then use the houses for something else for a year or two. At one place I took charge of I found the worst development of scale I ever saw; at another place I found mealy bug so bad that the fruit had to be washed and scrubbed, and was then not worth half price. In both cases I had the entire stock perfectly clean in less than twelve months, without sacrificing a plant, and had as fine a lot of plants as I ever saw. The condition the stock was in at both places, when I took hold, was well known, and the result of my treatment was soon spread around, and I had gardeners from all parts coming to find out how it was accomplished. My early experience with sprays, dressings and dopes of all kinds, and the strength to use them in for various cases and conditions, I have found very useful in later years.

I would like to give a few points on wall trees, pyramids, bells and other ornamental styles of growing fruit trees, but I am afraid it will use up too much time and space for the amount of interest that would be taken in this progressive age, as these must be already fully formed and require no attention after, like Lombardy and Carolina Poplars for shade trees.

Acanthorhiza aculeata

The plant shown in the foreground has seven branches; the plant to the rear has four. These two specimens were discovered by Ed. Howard in the wilds of Southern Mexico and brought to Los Angeles by Mr. Doheney. Each plant weighed a thousand pounds. Prof. Bailey says this species is called the Spineless Palm, but as to *A. aculeata* a more thoroughly spiny Palm I have yet to see. The spines are not long, but so dense and interwoven that the entire body below the petioles has the appearance of a scrub brush which has been in use long enough to break down the bristles and form a solid covering with short, sharp points. Of the thousand plants met with, these two were the only ones with branches.

P. D. BARNHART.

Acanthorhiza aculeata

Establishment of Arthur T. Boddington, New York

The recent extensions and improvements to the business quarters of Arthur T. Boddington at 342 West 14th st., New York, signalize in great measure the remarkable growth of Mr. Boddington's seed, bulb and nursery stock business.

This enterprising gentleman came to this country from the well-known English house of Dickson's, Ltd., Chester, when he was about 17 years old. After his arrival, he joined the staff of Peter Henderson & Co. on Cortlandt st. and remained with them for two years, after which he connected himself with the then prominent firm of Pitcher & Manda, Short Hills, N. J., with whom he remained for seven years.

In 1896, he, with R. W. Clucas, who was also connected with Pitcher & Manda, started business under the firm name of Clucas & Boddington, on 13th st., afterwards moving to the site at 342 West 14th st., a site which Mr. Boddington was again to occupy under his own name in years to come. In 1904, Mr. Boddington withdrew from the firm and eighteen months later its business, which had become a corporation, was discontinued.

After severing his connection with the Clucas & Boddington business, in 1904, he opened a small office on Warren st., but continued there for a few months only. In July of that year he rented the W. 14th st. store from which the Clucas & Boddington business had been removed to Greenwich st., which he now occupies, and where his business grew to such an extent that not only was the store and basement used fully for the requirements of the business, but three cellars and other storage space had to be secured outside. The next year he was able to secure the floor above the store which still left him with quarters inadequate to the growth of the business.

Store of A. T. Boddington, New York. Packing and Shipping Dept.

separate room for fertilizers, which can be kept tightly closed, a convenience which prevents the permeation of bad odors throughout the building.

The stock of Canna roots is enormous, the sales in this line alone being expected to run to 750,000. Growers' contracts for next year made by the house cover a stock of over 900,000 roots. Shipments of Cannas have been made to Holland and to England.

In the seed storage department an immense stock of Sweet Pea seed is to be seen, but the demand experienced for it is diminishing it very rapidly. Four and one-half tons of this seed have been handled this Spring, and several orders from it have been filled for England and other points. Mr. Boddington early recognized the value of the newer strain of Sweet Peas known as the Spencer type and was one of the first to push it in this country.

Vegetable seeds have also become a leading specialty here, and a very large trade has been worked up in them, a trade which has been very largely due to the fine quality of seed carried.

The organization of the business is divided into five departments; vegetable seed, flower seed, bulb, nursery stock, and supplies and implements. Mr. Boddington is also agent for Sutton & Sons of Reading, Eng., for their general line of vegetable and flower seeds; and for Thomas Rivers & Son of Sawbridgeworth, Herts, Eng., for pot-grown fruit trees and Grape vines.

As an importer Mr. Boddington is well known, his imports coming from almost every country under the sun. He has in transit at the present time a quarter million Kentia seeds from Australia, and there has just arrived a quantity of Areca and Cocos seeds from Rio de Janeiro. He also imports seeds from Cuba, Italy and other European countries, California, Hawaii, and Japan, the seeds coming at all seasons of the year when crops are ready. Large shipments of Fall bulbs are also received from Bermuda, Japan, China and other points.

Store of A. T. Boddington, New York. Retail Department

In September, 1908, when the Standard Oil Company vacated the large double store immediately in the rear of the Boddington premises, possession of the same was secured, the acquisition affording about three times as much space as hitherto enjoyed, all in the rear of the store, thus allowing of the concentration of all the stock on the premises occupied by the business. The combined stores and basements are well suited to the business and afford as much or more space than is to be found in many of the larger buildings of the city in use for similar purposes.

About 2500 ft. of floor space, which is practically the whole main floor of the old premises, is devoted to the seed department and office quarters. The fittings in this department have recently been overhauled and the store remodeled, with the consequence that a most up-to-date and thoroughly equipped seed store is now in evidence. Every convenience possible has been installed to facilitate the handling of a large retail and mail order business. The office quarters are quite extensive and include private offices for Mr. Boddington, and H. A. Bunyard, his energetic aide. Passing through the store, a visitor enters the shipping department, which is well lighted and admirably adapted for shipping and stock purposes. A section of this floor, with frontage on the rear street, provides storage space for large quantities of grass and other light seeds, and Cannas, for enormous sales of which latter the house has become justly celebrated.

In the basement, which is practically "T" shaped and extends through the block, as does the floor above, are to be seen about 40,000 Roses, waiting to go out on orders. This stock embraces about everything obtainable in the Rose line, from the Baby Ramblers, to the Hybrid Perpetuals and the Hybrid Teas. Outside of the Roses, climbers, such as Ampelopsis Veitchii, Clematis, etc., are the only nursery stock carried. A large bulb stock is carried at all times. Immense quantities of Gladioli, Dahlias and other bulbs are to be seen, all conveniently located for ready handling, kept in slatted trays to allow free circulation of air. As an idea of the immense business done in this line it may be mentioned that 100,000 bulbs of Gladiolus "America" alone are being handled this year. The arrangements of the basement are very complete, there being plenty of room for the Rose stock and its proper handling, as well as the other stock carried. There is a

Store of A. T. Boddington, New York. Handling Dormant Roses

The staff of the house numbers 27 employees, beside three representatives who are on the road all the time, covering territory in all quarters of the country. Five catalogs are issued during the year, comprising Spring and Fall wholesale editions, and Spring, Midsummer and Fall retail editions.

Harry A. Bunyard, Mr. Boddington's able lieutenant, is very active in the development of the business, prepares all the catalogs, even to the extent of designing the covers, and has charge of all the advertising, duties which, combined with his other work, make him at all times a busy man.

An American Purchases 36,000 "Koster" Spruce

A short time ago (as our readers will remember) we published an account of an extraordinary order for plants to be exported from Boskoop to the United States. This publication, though right in the main, requires some correction, the order being placed as follows:

An English firm bought at Boskoop (Holland) about 36,000 Spruce trees, of the variety *Picea pungens glauca* Koster, for account of a "friend of botany," who wanted this species for his park. It was said at the time that the order was given by John D. Rockefeller, but we are now in a position to say that the Spruces were purchased by another rich American, who made his fortune in cigarettes.

The packing of these plants for export is in full swing now in several nurseries at Boskoop, and is certainly worth noting.

We had the pleasure of an interview with Messrs. H. den Ouden & Son of Boskoop, who have the shipment of the greater part of the order. These gentlemen showed us around their nurseries for a couple of hours in order to give us some idea regarding their manner of exporting these plants.

At a rough guess one can imagine the extent of this order, knowing that the price of the Spruces varies from 40c. to \$6 each, duty, cost of insurance, freight and packing being all additional.

The packing of these trees is one of the principal items of expense, as they have to be packed carefully in order to prevent damage during the voyage. Therefore their roots are protected with moss, covered with jute-bagging, and then packed away in ample, airy cases. The estimated cost of packing amounts to 5 1/4 per cent. of the value of each plant. [We understand the cost of the packing is placed at about \$3000.—Ed. F. E.]

The Boskoop nurserymen do business in a fraternity of interests and to this much of their reliable standing must be attributed; for instance, if one of them is short of certain stock, he borrows from his neighbor and usually from the smaller men who are not exporters. They all take great pride in making their industry grow and in improving their methods of cultivation, seeking better varieties, and they have no secrets one from the other. The fraternity of these people will certainly make them great, and moreover they are protected by a union of which they are all members; information regarding their trade is furnished them without charge.

There is only one drawback they would like to have changed; they possess no railroad connections, and the establishment of such would decidedly be of great importance. One can hardly imagine the very primitive shipping facilities possessed by the city of Boskoop. For instance, from Amsterdam it can be reached only by boat, or half the way by railroad up to Alphen or Gouda and thence per boat.—Translated from *De Standaard*, Amsterdam, Feb. 22, 1910.

Massachusetts Horticultural Society

One of the most worthy features of this Society, while not connected directly with the trade, is sufficiently notable as to call for attention in a trade paper, for the reason that, indirectly, the course pursued cannot but fail to benefit trade interests.

Every year a committee of the Society on "Gardens and Greenhouses," of which several members are growers, visits private grounds and estates in New England, awarding cash prizes and medals for the purpose of encouraging the development and ornamentation of such grounds and the establishment and maintenance of greenhouses for the culture of plants, fruits and vegetables.

For an estate of not less than three acres which shall be laid out with the most taste, planted most judiciously and kept in the best order for three consecutive years, a first prize of \$100 is given and a second prize of \$20. Similarly, for an estate in Massachusetts of not more than three acres nor less than one acre, that shows the best arrangement in planting and is kept in the best order, sums of \$50 and \$25, are awarded, these prizes being the bequest of the late H. H. Hunnewell.

The Society itself awards prizes, consisting of its silver and bronze medals, for garden of Spring-flowering plants, garden of Summer or Fall-flowering plants, garden or collection of Peonies, garden or collection of hardy Roses, garden or collection of Irises, a water garden, a fruit and a vegetable garden, one of which are to be commercial. For a rock garden medals are also given, and the competition appears to be open to the trade.

The Rose and Its History

A lecture, illustrated by lantern slides, delivered before the convention of the American Rose Society, New York, March 17, 1910, by George V. Nash.

(Concluded from page 588)

The Swamp Rose, *Rosa Carolina*, delights the eye when forming groups in its favorite haunts, the shores of lakes and streams or in swamps.

The Barnet or single Scotch Rose, *Rosa spinosissima*, is a European resident. There are many forms of this, one known as the variety *Altaica*.

Rosa lutea, a native of western Asia, Italy, and Austria, is known as the Austrian Brier, and has been in cultivation since as far back as 1586.

Rosa bracteata, the Macartney Rose, wild in southern China and Formosa, unfortunately is not hardy in the North, and from its range this is to be expected. It is just as unfortunate, however, as it is a lovely Rose. It has become naturalized in Florida and Louisiana.

Rosa laevigata, the Cherokee Rose, is a native of China, Formosa and Japan. This is practically the range of *Rosa bracteata*, so, of course, it is not hardy in the North. It is, however, extensively naturalized in the South, and I recall with delight the beauties of this charming Rose as I saw it growing wild on the fences in Florida.

We usually think of the Rose leaf as being made up of three or more divisions or leaflets, but in far off Persia there is a Rose with only one leaflet. This hardly seems like a Rose at all. It is known as *Rosa berberidifolia*, the Barberry-leaved Rose. Some botanists keep it separate from the genus *Rosa*, calling it *Hulthemia berberidifolia*.

I have left for consideration until the last these two Roses, *Rosa indica*, the China Rose, and *Rosa gallica*, the French Rose, for they are the progenitors of the great majority of the Roses in cultivation. Is it not odd that of all the forms which have been shown to you, only two have entered largely into the production of what is known as the garden Rose? But such is the case. What wonders may await us, when combinations which are possible with all the others are tried, only time and experience can tell.

Rosa indica, the China Rose, in which species is usually included by botanists *Rosa semperflorens*, is well known to you all. It is the Autumn-blooming qualities of this Rose which has given us our most valuable Roses, and raised the Rose from a mere Summer visitor to a perpetual delight. The form known as the true *Rosa indica* is the old blush monthly, and was introduced into cultivation in 1718; the other form, known as the old crimson, was not introduced until 1789. As the history of the Rose develops the great importance of this Rose will be evident.

Rosa gallica, the French Rose, is a native of France, Switzerland, Italy and Austria. It is supposed to be the *Rosa Miliotiana* of Pliny. *Rosa damascena*, *R. centifolia*, *R. muscosa*, and *R. alba* are supposed to be derived from this.

The Beginning of Modern Culture

We now come to a time in the history of the Rose, the early part of the 19th century, when Rose culture, as we know it, really began. This was the day of the old Provence or Cabbage Rose, *Rosa centifolia*, or *Rosa provincialis*, as it was often called. This was the Rose which delighted the heart of our grandmothers, and which added the Rose charm to their gardens. It was the queen of the Rose world in those days, and something over 70 varieties are said to have been listed in the Rose catalogs at that time. It is found commonly in the south of France, but its origin is lost in oblivion. It was the popular Rose of ancient Rome, being a prominent feature in feasts and decorations. It is probably the 100-leaved Rose of Pliny. It is the blood of this Rose which has mingled itself with others, infusing its strong habit of growth into the progeny.

The Moss Rose, *Rosa muscosa*, is considered to be a derivative of *Rosa centifolia*. Whatever its derivation, however, it is a lovely Rose and holds a warm place in the hearts of most of us. There are several forms of it, the single, double, and perpetual.

Rosa gallica, the French Rose. I again allude to this, for it played so important a part in the production of the garden Roses.

Rosa damascena, the Damask Rose—the Rose of Damascus—is a native of Syria. It is said to have been known to Europeans first at the time of the crusades. It was reported of Saladin that in 1167, when he recovered Jerusalem from the crusaders, he used Rose water with which to purify the Mosque of Omar after it had been defiled, in his estimation, by the Christians' use of it for a church. It is said that 500 camel loads of Roses were brought from Damascus for this purpose.

The hybrid China Roses made their appearance in the early part of the 19th century, while the Provence Roses were at their prime and in the height of their glory. This hybrid was the result of crossing the China Rose, *Rosa indica*, with varieties of the French and Provence Roses. The Autumn-flowering quality of the China Rose, however, did not impress itself upon these hybrids. It required still another cross to accomplish this.

The hybrid Bourbon was also a product of the early part of this century. It resulted from the crossing of the French and Provence Roses with an Autumn-flowering variety found on the Isle of Bourbon. Then came the Bourbon perpetual, crosses of the hybrid Bourbon with hybrids of *Rosa indica*, the China Rose. These came some 10 years before the advent of the hybrid perpetual.

About this time another race of hybrids was introduced. This was obtained by crossing the Musk Rose, *Rosa moschata*, and the common blush China Rose. This produced the famous Noisette Rose, *Rosa Noisettiana*. The first of this race was raised by M. Philippe Noisette, in this country. He sent it to his brother Louis, in Paris, about 1817, by whom it was propagated. A number of varieties were produced. It was later crossed with the tea-scented Rose, and such forms as Marechal Niel produced, which are very difficult to distinguish from the Tea Roses.

Still the Rose remained, with few sporadic exceptions, a flower of the Summer only. The introduction of the China blood into the old time Roses did not produce progeny with a flowering period extending into the Fall.

The great desire now was to procure Roses which would flower in the Autumn. The China Rose, of course, did this, but it did not come up to the mark in other respects. What was needed was the late-flowering of the China and the form and scent of the other Roses.

Advent of the Hybrid Perpetual Rose

We now come to the day of the hybrid perpetual. This was produced by crossing the Damask Rose, *Rosa damascena*, with the hybrid China. Here we have a mixture indeed: the elements of the hybrid China (varieties of the French and Provence Roses crossed with the China Rose) and the Damask Rose. It took, therefore, two infusions of the China Rose blood to overcome the more sturdy qualities of the other parents and produce a longer flowering period of the Rose. The first fruits in this line were not entirely successful, and before a really hybrid perpetual Rose, such as we know it now, could be produced, it was necessary to cross these so-called perpetuals with the Bourbon and still again with the China Roses. This was done by M. Laffey. The influence of this new race of Roses was first felt about 1840, and it reigned supreme from about 1860 to 1890.

Origin of the Teas

To go back now a little in our history, to the early part of the century. About 1810 a small Rose from China made its appearance in England. It was known as the Blush Tea-scented. In 1824 another, similar Rose appeared in the same country, and this, on account of its color, was known as the Yellow Tea-scented. These two visitors did not seem to take kindly to the bleaker climate of old England, and it was not until they were transported to sunny France that they developed really what was in them. From these two has arisen the group of tea-scented Roses. It was about 1830 that these deliciously scented Roses came into notice. Gloire de Dijon owes its origin here, but probably with an admixture of the Bourbon Rose or some other hardy sort, for this newcomer was unusual among the tea-scented Roses in being hardy.

Next upon the scene was the hybrid tea, whose recognition as a distinct class was made about 1890. These were produced by crossing the hybrid perpetual and the tea-scented. They have been increasing rapidly and now number many among their ranks. The first hybrid tea is said to have been raised by Messrs. Paul & Son, of Cheshunt, in 1873, and sent out as Cheshunt Hybrid. At first the full meaning of these new hybrids was not realized; it was not until some years after their first appearance that it dawned upon the people that here was a new race of Roses destined to make startling changes. La France, at one time one of the most popular Roses, belongs here, although sent out first as a hybrid perpetual.

We have now brought the Rose up to our own times, the history of which is known to you all. Perhaps it is better not to call these present times "history," and so to leave the chronicle of our present Roses for others. We can see the marvels of recent production beautifully represented in the first exhibits made at the exhibition now in progress. Here we have the best examples of the cultivator's art. With My Maryland, Killarney, White Killarney, Richmond, and many others it would seem that the possibilities along the line of hybrid teas must be exhausted, but we thought this ten years ago, and were mistaken. What will the next ten years bring to us?

There are many popular flowers, but what one other than the Rose can awaken that keen delight, can recall those pleasant memories of childhood when we visited grandmother and reveled in her Rose garden? The Rose has its great hold upon us because it touches us nearly at so many points. We can have it indoors or out, Summer or Winter, and it is always just

"A Rose for every home,
A bush for every garden."

Prices published in The Florists' Exchange
are for the Trade only

*Aetheopappus pulcherrimus*

Aetheopappus Pulcherrimus

An addition to the herbaceous border is *Aetheopappus pulcherrimus*. It is perfectly hardy, grows from 2 to 2½ ft. high, and bears flowers not unlike the Royal Sweet Sultan, of a brilliant rose color. As a cut flower it is very durable and prolific, blooming freely during the month of June.

G. Arends of Ronsdorf, Germany, has grown the plant to perfection as shown in the illustration, which we copy from *Bindekunst*.

National Council of Horticulture

The Council has mailed out its first press installment for the Spring of 1910. The subjects treated cover Indoor Planting, Planting in March, and further impart much valuable information for the amateur.

Exchanges are notified that this press service is free, contains no advertising, and is a purely philanthropic effort on the part of several of our national trade organizations to furnish skilled advice to the home gardener in order that his efforts may be rewarded with a good measure of success.

The secretary of the Council is J. H. Burdett, 1620 West 104th Place, Chicago, who will be pleased to answer all questions.

Chemically Dyed Flowers are a Vandalism

The paragraph about a chemically produced black rose again raises the question as to the advisability or honesty of flower faking. Assuming that a black Rose would have a commercial value, it certainly is not worth recording if it is produced only by chemical action. The chemist, can do almost anything nowadays, but the man who works upon inanimate objects is to be placed far above the party who tinkers with Nature's own handiwork.

Over here we usually get red Daffodils in the Spring time, while dyed *Berberis* foliage is common enough at Christmas. Occasionally one may see the green Carnation, and last season the green Sweet Pea made an appearance. This latter monstrosity caused some little discussion, and even now there are people who cherish the notion that such flowers were natural.

T. A. W., Eng.

Suggestion for a Spring Window

Spring is here and florists are thinking of and trying to excel in their Spring displays. A very pretty and at the same time seasonable window setting would be the following, which is intended for a large show window 9 ft. high by 14 ft. wide, which, if filled solidly with cut flowers, would entail considerable and needless waste or expense.

First take two boards 9 in. wide, ¾ in. thick, and of a length the height of the window. Place them at equal distances apart, in an upright position; fasten them top and bottom, cover them with green velveteen—which can be bought, in 27 in. widths, for from 79c. to \$1 per yard—using half a width on each post, or upright board, finishing the front smoothly and covering the back, where the velveteen does not meet, with green cloth—3 yds. would be sufficient.

Next cover two 4 ft. boards, 6 in. wide, in the same manner, using 1½ yds. of velveteen. Fasten these boards to the window side and upright boards, 4 ft. up from the bottom, forming the top part of a railing. Then saw six boards 2 in. wide by ½ in. thick, in lengths so that they can be fastened from the ceiling to the sides and from upright to upright, with the lower ends 2 ft. down at an angle from the ceiling, thus forming three triangular arches, supported by two upright pillars. Cover these also with velveteen—by carefully cutting a yard length into 4½ in. strips there would be enough to

A Standard Hydrangea as Grown for Easter

cover the six 2 in. boards, thus making a total of 5½ yds. of green velveteen for everything. Fasten the 2 in. strips in the manner indicated and shown in the drawing, using a 1½ in. thick strip, painted light green, fastened across the ceiling, to nail the top ends to. Finally, nail a lattice work of 1 in. strips, painted a light green, same shade as ceiling strip, as shown in sketch.

You now have the upper frame of the arch complete. Next fasten two boards 12 in. wide and 4 ft. long, placed on edge on the floor, from each side of the window to the uprights, and cover them with birch bark. Nail, perpendicularly, 4 in. strips from rail to floor board and from sides to uprights, leaving a space of 6 in. between each, painting them a light green.

Make a platform 10 ins. high, running from post to post, and extending a distance of 1 ft. in the foreground from the posts, cover the platform with birch bark, and lay an empty flour barrel, which has been previously painted a light green on the inside and gilded on the outside, on its side on top of the platform. Hang three *Scottii* Ferns, 2½ ft. spread, suspended on a slanting wire pot hanger in the center of each arch, with the top-most fronds reaching just a little bit down from the ceiling. Also hang three Japanese Fern balls well out to the front, in a line with the center arch, one on each side of the *Scottii*, 2½ ft. down, the other exactly in the center 3 ft. down. Hang four more of these, two on each side of the other *Scottii*s, 2½ ft. down. Place two 7 ft. Bay trees, one in each side arch, behind the rail; the trees can be shown either as they naturally grow, or cornucopia glasses can be fastened through the foliage and filled with sprays of Snapdragon. Instead of the Bay trees nice bushes of *Rhododendrons*, or a bank of *Crimson Rambler Roses* or white *Lilacs* could be used.

Now hang four cornucopia glasses on top of the upright posts, two on each and one above the other, using small screw hooks for this purpose, and fill them with cut Jonquils and *Asparagus Sprengeri*. Also hang cornucopia glasses behind the uprights, close to the edge, and along and behind the upper rail, being careful not to show the glasses. In the glasses put sprays of Apple, Pear, or Peach blossoms.

Follow the same scheme on the inner edge of the window casing, using two tall glass vases on the floor, the effect continued up the sides by means of cornucopia glasses fastened to the wall.

Cover the entire floor with green sheet moss and place a good-sized *Hydrangea* plant in the center, directly in front of the rail. Also place one in each corner against the rail, with a nice 5 ft. *Rambler Rose* bush directly in front of the upright pillar and on either side of the platform, filling in the intervening space between the *Hydrangeas* and the *Ramblers* with pans of Dutch *Hyacinths*. Cover the pots by placing pieces of Birch bark against them, with sprays of English Ivy falling over.

Some short vases should now be placed inside the barrel, packed well between damp moss. Fill the vases with cut Tulips and greens, and by placing a number of small vases in a circle on the floor and filling them with Tulips, graduating the height by means of taller vases at the mouth you will have the effect of a barrel falling over and spilling out Tulips on the floor, as shown in the sketch.

Suggestion for a Spring Window Display

April 2, 1910

Florists in good standing throughout the country can avail themselves of the advertisers' offers in this Department and accept, without hesitation, orders from their local customers, transmit same to an advertiser in these columns, and thus avail themselves of the opportunities for extension of trade which are open to all. Let your customers know you fill orders by telegraph to any part of the country.

DIRECTORY OF RELIABLE RETAIL HOUSES

The retail firms advertising under this heading are all considered by the publishers of The Florists' Exchange as being responsible, and will accept and fill orders for Flowers, Plants and Floral Designs for Steamer Orders, departing Trains, or any given point within their reach, forwarded them by mail, telegraph or telephone, in the respective districts to which their trade extends, the usual commission being allowed. While no guarantee is expressed or implied by this paper as to the satisfactory fulfillment of orders sent to parties whose names appear in this Directory, we will state that only concerns of known good standing will be admitted in this Department. The use of Arnold's Telegraph Code No. 16, a copy of which is placed in the hands of every advertiser, will greatly facilitate this interchange of business.

Eyles **ALBANY, N. Y.**
11 North Pearl Street
Cut flowers or floral designs delivered to any part of Albany and vicinity on telegraphic order. Personal attention given and satisfaction guaranteed.

Hatcher **Leading Florist**
AMSTERDAM, N. Y.
ESTAB. 1877 **SCHENECTADY, N. Y.**

Atlanta Floral Co. **ATLANTA, GEORGIA**
41 Peachtree Street
We cover all of Georgia and are within easy reach of New Orleans, Jacksonville, Birmingham, Chattanooga and Charleston. Retail orders placed with us will receive careful attention.

Thos. F. Galvin **BOSTON, MASS.**
124 Tremont Street
We cover all New England points. Retail orders placed with us receive careful attention. The delivery of flowers and plants to Boston sailing steamers a specialty.

J. Newman & Sons **BOSTON, MASS.**
Corporation 24 Tremont Street
Orders by wire receive prompt and careful execution. We can refer to leading florists in all principal cities. Established 1870.

Robt. E. Wilson **BROOKLYN, N. Y.**
Fulton St. and Greene Ave
Deliveries anywhere in Brooklyn, New York, New Jersey and Long Island. Trade orders cared for from all parts of the country and delivered at Theatre, Hotel, Steamer or Residence. Tel.: Prospect 2840 and 4065.

Palmer's Flowers of Quality
BUFFALO, N. Y.
W. J. PALMER & SON. 304 Main St.

Hauswirth **CHICAGO, ILL.**
The Auditorium Florist, 232 Michigan Ave.
The quality of our work is of National repute, and we are prepared to execute commissions in first-class style in Chicago and its environs.

JULIUS BAER,
CINCINNATI, O.
Fourth St.

Frank F. Crump **COLORADO SPRINGS, COLO.**
Retail Florist
Telegraphic orders will be carefully and promptly filled; personal attention given. Usual discounts allowed.

J. N. Champion & Co. **CONNECTICUT**
New Haven
1026 Chapel St., Opposite Yale College
Every facility for prompt deliveries in all parts of Connecticut. Cut Flower and Funeral work solicited.

W. S. Matthews **DAYTON, OHIO**
Florist, 16 West Third Street
Flowers in any arrangement for all occasions for Dayton and vicinity. Personal attention given to all orders. Long distance telephones.

A Trained Form of Genista as Seen at Easter

Arrange a few cut flower boxes, tied with ribbon, with sprays of blossom or some flower inserted between the cover and the ribbon, on each side of the window, in the foreground, having Smilax twined gracefully through them. Bank behind and around the barrel with Hydrangeas, placing a good-sized Kentia Palm behind them. Next place on the floor, behind the rail, a row of vases filled with long sprays of blossoms, allowing them to protrude through the strips and up against the velvet rail—the light and dark green colors will make a striking background for them. Pots of Euonymus variegatus could be introduced here, fastened to the inner side of the rail with wire well out of sight, the sprays falling gracefully over.

You now have the window completed, as far as can be shown in the sketch, but the writer has in mind many little details which could be added, such as short vases of Spring flowers, Pansies, Arbutus, Marguerites, etc., placed in the foreground. Garlands of Asparagus plumosus hung through the ceiling would add to the effect. If it should happen that there is a surplus stock of Rambler Roses and Hydrangeas are not available the former could be substituted for the latter; or Pansies could be used in place of Tulips in the barrel arrangement, although many more flowers would, of course, be required on account of their size. Another pretty detail, where it is possible to procure dried butterflies or stuffed Spring birds, would be to suspend them, apparently flying, through the window by means of black threads.

JAS. MEIKLEJOHN.

The Clark Floral Co. **DENVER, COLORADO**
1706 Broadway
J. A. VALENTINE, Prest. Orders by wire or mail carefully filled; usual discounts allowed. COLORADO, UTAH, WESTERN NEBRASKA and WYOMING points reached by express.

John Brattmeyer's Sons **DETROIT, MICH.**
Broadway and Gratiot Ave.
We cover all MICHIGAN points and large sections of OHIO, INDIANA and CANADA. Retail orders placed with us will receive careful attention.

Bertermann Bros. Co. **INDIANAPOLIS, IND.**
241 Massachusetts Ave.
Prompt and efficient service rendered points in Illinois, Ohio and Indiana. Bertermann's flowers excel.

Jacksonville Floral Co. **JACKSONVILLE, FLA.**
20 Laura St.
We cover all Florida—St. Augustine, Palm Beach, Miami, Tampa, etc.; also lower Georgia. Choice seasonable flowers always on hand.

Samuel Murray **KANSAS CITY, MO.**
1017 Broadway
I will deliver orders for flowers in Kansas City and vicinity promptly. A first-class stock of seasonable varieties of flowers on hand. Wire me your orders.

Jacob Schultz **LOUISVILLE, KY.**
644 Fourth Avenue
Personal attention given to out-of-town orders for Louisville and surrounding territory. Have a choice line of flowers always in stock; delivery facilities perfect.

Hall & Robinson **MONTREAL, CANADA**
855 St. Catherine St., West
We can fill all orders for cut flowers, designs, etc., and can ship to any city as far as Halifax to the East and Windsor, Ont., in the West.

FOR SALE OR RENT

GREENHOUSE PLANTS near Boston, one to 50 acres, \$300.00 to \$50,000.00. Liberal terms. E. Dodge, 8 Grand View Ave., Somerville, Mass.

FOR SALE—In East Williamsburg, L. I., 2 family dwelling with stable and 4 greenhouses with 6000 sq. ft. of glass; 5 lots, 25x100 ft., and piece of land to hire in rear of property. Plant in good condition, convenient to all cars and trains. Estate of Andrew Orrell deceased. Inquire of Jacob Orrell, Florist, 1702 Metropolitan Ave., Middle Village, L. I., at Lutheran Cemetery.

FOR SALE

Greenhouse establishment with four semi-iron frame greenhouses, good barn and out-buildings. Eight room house with hot water heat, 3 acres of level and fertile ground right near good town and handy to New York market. Trolley passes door. This whole place has been built the last 4 years and is in first-class condition, well stocked and beautiful grounds. Price \$12,000. Half cash. Address, H. A., care The Florists' Exchange.

AN UNUSUAL OPPORTUNITY FOR A LIVE FLORIST

The subscriber offers for sale his fully equipped Florist Store and Business, very finely situated in the theatre district of a thriving city in the State of New York; a city with a population of over 75,000. My trade is thoroughly established and the best in the city. This business will net a live man from \$50.00 to \$100.00 per week. I will sell most reasonably, as I have other business needing my whole time. My store is in every way up-to-date and fully equipped, containing two very large ice boxes, safe and cash register (cash register cost \$52.00). The windows are tiled, and everything is finished in white. A good live party can easily get back the price I am asking for this business in a very short time. This is not a run-down place. Address, F. A., care The Florists' Exchange.

"A Call to the Colors"

Under this stirring headline Benjamin Hammond of Fishkill-on-Hudson, N. Y., in a circular, draws attention to the Home Garden Brigade of Union Free School District No. 8, for 1910. Last year 73 boys and girls joined the brigade. This year Mr. Hammond is looking for considerable additional members. A first prize of \$5 each is given to the boy and girl having the best garden and a second prize of a pair of Winter shoes to the boy and girl having the second best garden. Additional prizes are offered for the one raising the best peck of Potatoes, the one making the best showing of Morning Glory or other vines over fence or porch; for the best Rose garden (bronze medal of the Am. Rose Society); for the most handsome front yard on their street. The High School pupils who have taken lessons in botany are requested to give the common and botanical names of the trees grown on the school property; this for the benefit of visitors.

Mr. Hammond and his co-laborers in this particular field are doing a noble work, indeed, in their endeavor to interest the rising generation in floriculture, and their efforts are well worthy of emulation by all those having the opportunity—and really who has not?

Catalogs Received

SCHAUM & VAN TOL, "The Hansa Nurseries," Boskoop, Holland. Sole Agents, McHutchison & Co., New York. Wholesale Trade List of Holland Grown Nursery Stock.

THOS. MEEHAN & SONS, INC., Germantown, Philadelphia, Pa.—Hand-Book of Trees and Hardy Plants, Spring 1910. This is an 80-page catalog of pocket size covering a very complete listing of Deciduous Trees and Shrubs, Roses, Evergreen Trees and Shrubs, English Grown Rhododendrons, Vines and Climbers, Evergreen and Deciduous Hedges, Fruits, Hardy Herbaceous Perennials, Bulbs and Tuberos Rooted Plants. Well illustrated.

THE BAY STATE NURSERIES, North Abington, Mass.—A 12-page and cover catalog covering a general line of Trees, Shrubs, Vines, Roses, Herbaceous Perennials and Evergreens. This publication, though not large, is gotten up with great taste, well illustrated and printed on coated paper. The front page of cover is a view in colors of an evergreen planting with mansion in the background, with stock supplied from these nurseries.

PETER HENDERSON & CO., New York—Henderson's "Everything for the Lawn and Garden Formation and Care." This is the 1910 edition of the firm's annual catalog of Lawn Grass Seed and Grass Seed for Parks, Cemeteries, Golf Courses, etc. The publication contains in addition an extended list of Lawn Essentials, such as Horse Mowers, Rollers, Harrows, Seeders, Barrows, Sprinklers; in fact, everything conceivable for use in connection with Lawns and Grass Plots. This catalog appears within covers bearing on the front page a pretty lawn view and the rear page carrying views of golf links.

WM. C. BOWDITCH, 647 Warren St., Boston, Mass.—Catalog of Rare and Ornamental Trees, Shrubs and Plants, Greenhouse and Decorative Plants, Flower Seeds, Bulbs, Floral Supplies, Cut Flowers and Decorations. This catalog is somewhat unique, in that it is a publication of a florist in every sense of the term. Its value to the addresser's customers is apparent in the selection of lines to catalog and the interesting information to be found in its pages. The publication is well illustrated and appears within covers, the front page of which carries several views of the Bowditch establishment.

POLIX & DYKHUIS, Boskoop, Holland.—Wholesale Trade List, 1910-1911; and Catalog of Nursery Stock. This is a catalog of 90 pages and embraces pot-grown plants for Forcing, Evergreens, Climbing Plants, Roses, Conifers, Hardy Perennials and Herbaceous Plants, Deciduous and Evergreen Trees, Ornamental and Flowering Shrubs, etc. Several illustrations are to be found in the book, among them, as a frontispiece, a representation in colors of Spiraea Peach Blossom, a new pink flowering variety. American correspondence, it is stated in the catalog, should be addressed until June 1 to J. Dykhuis, care Maltus & Ware, 14 Stone St., New York.

ISAAC HICKS & SON, Westbury, L. I., N. Y.—Trees for Long Island. Stock List, March, 1910. This is a 48-page catalog covering a select variety of trees for use particularly on Long Island. The story of the usefulness of the trees is best told in the number of fine half-tone illustrations distributed throughout the book, all of which will be considered as object lessons. Methods of packing and planting trees are graphically portrayed, as well as the firm's methods of transplanting, establishing and fully planting stock for planting where immediate effect is desired. The catalog is well printed, all the illustrations appearing on enamel paper.

From the same firm is received a 104-page catalog published under the same title, but intended for distribution where full descriptions of the different trees handled are desired; in other words, it is a hand book, setting out the values and uses of the different trees and shrubs forming the firm's stock. The catalog is profusely illustrated with fine illustrations, demonstrating the adaptability of the different varieties under certain conditions. Many of these pictures show "before and after" effects of different plantings, and removals and replantings of trees fully grown. The publication is more than ordinarily instructive. It appears in handsome duodecimo covers, the front page bearing an illustration of a residential planting and the back page a perennial setting.

The Boston Retail Stores

The windows of the retail stores were especially attractive during Easter week and most of them carried the very highest grades of goods, which they displayed in the most artistic and fascinating manner.

Galvin's on Tremont st. for the first day or two had one window full of splendidly grown Bougainvilleas; the other showing extra fine quality Easter Lilies; later all this was changed to a yellow display, of Genistas, Acacias, and other plants of that hue.

Edward MacMulkin of Boylston st. had a pretty window. The shades of color used to effect an artistic display were plants with white flowers and other colors that would associate pleasingly with white. In the background he had some tall, light and graceful Palms intermixed with large Rose plants of Dorothy Perkins and Hiawatha. Next to these came good-sized plants of white Lilac, white Azaleas, and large Easter Lilies, and in the middle of these was a fine plant of Boronia elatior. In the front, dwarfier plants were used of a whitish hue intermixed with small plants of Lorraine Begonia and Erica cupressina. These latter plants were used to give it a little pleasing touch of pink. Hanging around in pleasing positions were small baskets of choice fruit and Forget-me-nots. There were also little dainty baskets of flowers pleasingly displayed. It takes an artist to give these fairy touches and to place them just right for effect. MacMulkin can do it when he wants to.

G. A. Seavery & Co. had a display of Lilacs, Crimson Ramblers, small Heaths, bunches of yellow English Primroses and Parrot Tulips.

Doyle's store on Boylston st. had a tastefully arranged window; the material used was of exceptionally high quality. The principal plants were large Bougainvilleas, superb specimen Acacia paradoxa, Ericas, Hiawatha Roses, White Lilacs, Gardenias and Rhododendrons.

Carbone had a delightful window display. He does not use as many, or yet as large plants as the other retailers, but they are so artistically arranged that they catch the spectator's eye at the very first glance. Some of the plants in his display were standard bush Roses of Dorothy Perkins, Genistas, Camellias, small Heaths, and white Hydrangeas. The inside of the store was tastefully arranged and around the balcony were trained splendid specimens of Rambler Roses in full bloom. This arrangement gives new ideas to the customer.

G. H. Davis, retail florist at 438 Mass. ave., Cambridgeport, has been unwell for some time, but was able to be about to see after his Easter trade, since that time he has been quite ill and is now confined to bed with a complication of diseases.

The Howard Flower Store, located at 18 Boylston st., Cambridge, is run by Frank Howard, a young man of energy and ability. For six years Mr. Howard had a prosperous flower stand in Harvard Square, especially for transient business. Owing to the great alterations there caused by the new subway he had to move, six months ago, to present location, near the new post office, one of the most thickly traveled streets in that section of the city. He is doing a good retail business and his customers are some of the best people in the city. He has two-thirds of Harvard University business, and does a great deal of funeral work. Last week he had many large pieces to make for Prof. Morgan's funeral; he also made many large pieces for the funeral of ex-Mayor Sortwell of Cambridge. Mr. Howard reports that his Easter business was by far the best he ever had. R. C.

THE FLORISTS' EXCHANGE

Boston G. and F. Club

The regular monthly meeting of the Gardeners and Florists' Club of Boston took place at Horticultural Hall on Tuesday, March 22. Vice-president Peter M. Miller presided.

Quite a number of the members voiced their sentiments in regard to the great loss the Club had sustained in the loss of its beloved treasurer, Edward Hatch, and many paid beautiful tributes to his worth, kindness and generosity. F. Welch told how the last time he went to see Mr. Hatch at the hospital, and spoke to him of the great exhibition that was to be held in Boston in 1911. Mr. Hatch said at once "put me down for \$200." That's the sort of man our Club has lost, and it is no surprise that we are all afflicted with grief for the great loss we have to bear. A committee was appointed to draw up resolutions on the death of Mr. Hatch, and it was voted not to fill the vacancy of treasurer until the next meeting.

Four new members were elected, and Mrs. E. M. Gill, our oldest member, whose age will reach four score years next June, was elected an honorary member.

After all business was disposed of, Vice-president Miller introduced Arthur E. Thatcher of the Arnold Arboretum, who read an interesting paper on "The Newer Herbaceous Plants."

There was quite a number of exhibits at the meeting. Charles Sander, ed. to Prof. C. S. Sargent of Brookline, exhibited a nicely grown plant of Azalea balsamiflora. Mr. Sander, in his remarks about this plant, said, that if any member could tell him where he could get the white variety of this plant he would be much pleased. The variety exhibited had semi-double flowers of a pleasing pink color. It should make a fine florists' variety, and it is understood that Thos. Roland has a number on trial this year. From E. O. Orpet of South Lancaster came a fine specimen of Lælio-cattleya Frederick Boyle, variety Kerchova. The seed from which this plant was raised was sown Jan. 29, 1900. The plant bore two spikes with five large flowers. The petals of the flowers were quite large, and pure white, and the inside of the labellum was light cream marked with pink. The plant was very much admired and considered to be quite an acquisition. Wm. Sim of Cliftondale exhibited a fine lot of Sweet Peas which were of extra good quality. He staged 18 vases with as many varieties. He also exhibited a new Violet named Cyclops, which came from England. Mr. Sim says we shall hear more about this variety later and thinks it will be a good thing. J. F. Flood Co. of Dedham exhibited three fine vases of Carnations. A vase of Lawson showed remarkably fine stems, as did all the others. Paul de Nave of Fall River exhibited a nice collection of Orchids, consisting principally of Dendrobiums, Cattleyas and Oncidiums. The plants were nicely grown and well flowered. The awards were as follows: Plant Azalea balsamiflora from Charles Sander, vote of thanks; collection of Sweet Peas, 18 varieties, from William Sim, vote of thanks; plant of Lælio-cattleya Frederick Boyle, variety Kerchova, report of superior merit; seedling Carnations from Thos. Roland, vote of thanks; Schizanthus hybridus grandiflora oculatus and Leptosyne maritima from Gerhardt Bleicken, Riverside Farm, Framingham, vote of thanks; collection of Orchids from Paul de Nave, vote of thanks. R. C.

G. and F. Club of Baltimore

The regular meeting of this Club was held last Monday night in its hall, with President George Morrison in the chair. The meeting was poorly attended. Business of importance was discussed. Samples of new varieties of merit were shown to the members, after which more samples were ordered. Considerable interest was taken on the subject of "Parcel Post," James Hamilton telling the members of his experiences. J. J. Blair was elected a member of the Club. George W. Strange, representing Lager & Hurrell, Summit, N. J., was a visitor.

We wish to impress upon our readers that all questions intended for this department must bear the name of the sender, not necessarily for publication but as a guarantee of good faith. We will endeavor to answer all questions submitted to us by subscribers, but we cannot recognize anonymous communications.

IDENTIFICATION OF PLANTS

When sending specimens for names correspondents should send some lower leaves of herbaceous plants as well as upper ones, and of all plants, flowers and seed vessels if possible. In addition to this, it stated whether it be shrub, tree, herbaceous, wild or cultivated, location where growing, it would often enable identification of specimens difficult to determine otherwise.

(85) **Tomato Vines Diseased.**—I enclose specimen of Tomato vines infested with spots or some fungus disease which attacks the lower leaves on plants. I have been picking off the leaves as soon as the spots appear, have also used Bordeaux mixture twice a week, dusting the surface of soil with air slaked lime, but all of no avail to check the disease. Will it damage the fruit in any way? Can you suggest any other remedy as the plants are young, strong and well set with fruit? The soil is heavy and was taken into the greenhouse sometime in January, after being well frozen. The house is run at 56° to 58° during night and all the air it is possible to give during the day.—A. A., N. Y.

—Your plants are undoubtedly suffering from one of the fusariums; otherwise they appear to be healthy. It is recommended that you make up a solution of sulphate of copper and lime and keep the mixture very blue. There appears to have been too much lime and too little sulphate of copper used on the samples you sent us. Your house also, quite evidently, is too moist and should be kept drier. If you can give the plants sunlight, so much the better. If the above advice as to spraying mixture fails to benefit then try dry sulphur on the foliage, after same has been moistened just enough to hold the sulphur. If allowed to spread the disease would undoubtedly spoil your crop.

(86) **Asparagus elongatus.**—In your issue of Feb. 26, page 372, you referred to *Asparagus elongatus*. Where can I get seeds or plants of this variety?—H. E. S., Florida.

—*Asparagus elongatus* is not common in the trade as yet. We would suggest correspondence with some of the prominent seedsmen whose advertisements appear in the Exchange.—W. H. T.

(87) **Palm Seeds.**—Would Palm seeds, such as Kentias and Cocos Weddelliana, do best when planted in solid beds in this locality under lath shed or in shallow boxes placed under the shed? How deep should they be planted where the soil is very sandy? What fertilizer is best suited to them and would liquid manure from cow or stable manure prove beneficial when applied to Palms in 3-in. pots?—H. E. S., Florida.

—Palm seeds would be under better control when planted in shallow boxes than if they were sown in a solid bed. The first roots of the species named are stiff and brittle, and when sown in a deep bed are likely to go down to such a depth that it is difficult to pot them afterward. A good rule for planting the seeds is to cover them to a depth about equal to the diameter of the seeds, in this case, about 3/4 of an inch. No fertilizer is required in the seed boxes, and it is preferable to use the manure in the potting compost rather than to feed these small plants with liquid manure.—W. H. T.

(88) **Fertilizer for Gladioli.**—Should like to know what is considered a good commercial fertilizer for Gladioli, outside of stable manure. I have ground bone on hand; would this be good of itself?—J. E. H., N. J.

—Bone meal of itself will be a good fertilizer for your Gladioli or you can use any high grade commercial fertilizer carrying a good percentage of nitrogen, potash and phosphoric acid.

(89) **Fertilizer for Evergreens.**—We have some Evergreens that do not thrive well. They are planted in a somewhat shaded position. Wouldn't dry blood be a quick acting fertilizer for Rhododendrons?—Evergreen, Pa.

Use well decomposed stable manure; cow manure is the best, or a high grade of ground bone on both your evergreens and Rhododendrons. Dry blood would also be good for the latter.

(90) **Specimen for Identification.**—Wm. Kruch, N. Y.—The catkins of flowers which you send are those of some species of Poplar, just which variety cannot be determined without a specimen of the leaves and twigs. Probably it is either a Carolina or Silver Poplar.

(91) **To Kill Lice on Carnations.**—How much bi-sulphate of carbon should I use in killing green lice on Carnations in a hothed? The Carnations are in bud.—W. K., N. Y.

—For your purpose there are other insecticides more advisable than bi-sulphide of carbon, which you should not use for this purpose. Fumigate with tobacco dust or stems, or fumigate or spray with some of the insecticides advertised in the columns of this paper.

(92) **Tomato Plants Gone Wrong.**—A. E. C., Conn.

—Give your house more ventilation, but avoid draughts and a low temperature at night on your Tomato plants. Do not water too heavily but, on the other hand, do not let your plants get dry to the wilting point. Transplant your plants when very small so as to give them more space. Be sure that your benches or flats have good drainage. Your trouble is a common one and is not in your soil, but in your manner of handling the plants; prevention is the best remedy. You apparently have already injured your young Tomato plants by too heavy fumigations.

(96) **Asparagus for Name.**—Herewith is a specimen of Asparagus that appeared last year among a lot of seedling Sprengeri. The plant is of a climbing habit, never sheds its foliage, and the first shoot that appeared is still in perfect condition. It has just put forth three new shoots, the longest about three feet in length and still growing.—Asparagus, N. Y.

Partial View of the Interior of Wholesale Store of Hoerber Bros., Chicago

—The sample sent by you is possibly *A. retrofractus*, but not having seen this variety for some time we cannot determine for sure. *Asparagus* has a slight tendency to produce new seedlings, which, when grown, seldom prove more valuable than existing varieties.

(93) **Plants for Identification.**—Will you kindly give me the names of the plants sent under separate cover. Nos. 1 and 2 were sent to me from Texas. No. 3—What is the name of this *Stevia*? No. 4—This is a plant that I have had for twenty years or more; never saw it bloom, though I had one ten years old. I never met any one who knew the name of it. I sell it as a Cactus, as it grows with them and stands without water longer than any plant I have.—Reader, Newport, Ky.

—The specimen marked No. 3 is not a *Stevia* at all but is *Eupatorium riparium*. No. 4 I take to be our old friend, *Crassula portulaca*, which with us is not a shy bloomer. We have plants of it 2 to 3 ft. high, which flower profusely early every year, about January or February. Specimens No. 1 and 2 (ferns) I submitted to our Fern Specialist here and he refused to pass an opinion on them on account of the meagreness of the material. If more material can be sent I will again submit them to him.—GEORGE V. NASH

(94) **Chrysanthemum Cuttings from the Root.**—Will Chrysanthemum cuttings taken from shoots that spring up from the roots of the old plant make good plants or will they come blind?—C. H.

Cuttings from root shoots of stock Chrysanthemum plants, if properly handled, will produce good flowers.

(95) **Drying Off Roses.**—I have a bunch of Bride and Bridesmaid that were planted quite late last Summer, and which did not seem to do well or grow up until now when they are making a new growth. As I wish to grow this bunch on for next year, would you advise drying this bunch off now, or would it be better to wait yet a few weeks?—C. H.

—It will be better to let your Rose bushes grow on till after Memorial Day, and then let them rest.

RICHMOND, VA.—The greenhouses and about 20 acres of land of W. A. Hammond have been sold, at a price approximating \$68,000 to a company to be known as the Hammond Co., with J. Scott Parish, president; H. A. Higason, vice-president; and F. F. Apt, treasurer. The business will be conducted as formerly under the new management.

COLORADO SPRINGS, COLO.—A. D. Jones has sold the Jones greenhouse in Broadmoor to Oscar Lillyback of Memphis, Tenn., for a consideration of \$20,000. Mr. Lillyback, who is a wholesale druggist, has in turn given a five-year lease on the property to R. L. Pemberton and D. A. Harris, who will carry on the business.

FAIRVIEW, ILL.—B. Eldridge has purchased the interests of W. H. Moore, J. W. Lyon and W. P. Williams in the Belvidere Plant and Floral Co.'s property here. The retail sale of flowers has been abandoned, Mr. Eldridge's plans being to conduct a wholesale business exclusively, in connection with the floral business, from his private greenhouses near his Pearl st. residence. August Lembke will have charge of both plants.

Some Fine Pansies

We recently received from E. B. Jennings of Southport, Conn., a box of Pansy flowers, of the giant flowering and ruffled edge types, Mr. Jennings' specialty. They showed good culture, and the colorings were grand, many of them running to shades and combinations of shades seldom seen. The flowers were quite large and the stems unusually long.

A Florist Hero

A fire, occurring in the early morning, and believed to have been caused by a defective flue in the kitchen, destroyed the home of P. Campbell Erdman, a florist on Dobler ave., Baltimore, the estimated loss being \$4000. By the quick action of a street car conductor, all the occupants of the house, with the exception of an aged relative, J. R. Stommer, who was sleeping all unconscious of the danger, were able to escape early, although they did not have time to dress. Mr. Erdman, who had gotten up some time before, was in his greenhouses in the rear of the building, and upon hearing the shouts rushed back to his house, only to find it in flames. He quickly lined up the members of the family, and found only the occupant of the back second-story room missing. Without a moment's hesitation he dashed into the house and almost fell in the smoke filled passageway and on the stairs. After a struggle with the flames he picked up the aged sleeper and practically had to carry him all the way out of the building to safety. Despite the good work of those who volunteered the fire rapidly gained headway, and was spreading to the greenhouses when the opportune arrival of the fire engines saved them from destruction.

Notes

ACKLEY, IA.—C. E. Frederick has purchased the seed business here of W. R. French.

ROCKFORD, ILL.—J. J. Soper, florist of North Church st., has purchased a 20-acre fruit farm in Roseburg, Ore.

STAMFORD, N. Y.—William Heermans has purchased the Violet house belonging to Wesley Pink and will take possession April 1.

OREGON, ILL.—Gilbert & Son are making arrangements to erect another new greenhouse, 26 by 80 ft. They will place it on a cement foundation.

PAXTON, ILL.—Mr. Brice, for eight years florist at the University of Illinois, at Champaign, has taken a position here with the Addeme, Morgan Co.

CINCINNATI, O.—The establishment of A. Sunderbruch, florist at 232 West Fourth st., was forced open recently and the cash drawer rifled of 200 2-cent postage stamps and three packages of lead pencils. The thieves also tried to force the safe, but succeeded only in loosening the hinges.

The Florists' Exchange is exclusively a Trade Paper. Prices at which stock is offered in these columns are intended for the Trade only.

WE PRINT CATALOGUES

Estimates Cheerfully Furnished

We feel that you cannot but agree with us when we make the statement that our firm as Expert Horticultural Printers, with many years of experience behind them, and with all the best and latest facilities for this class of printing, are in a position to produce for you a catalogue that will be far superior to any that could be turned out by a firm not making this work a specialty. In these days the best printed, best illustrated and generally best looking catalogue is the one that purchasers examine the most closely; therefore it stands to reason that to have as much chance of making sales as any of your competitors your catalogue or printed matter must be fully up to date.

In conclusion, we feel that our prices are as low as any when quality and results, and the free use of our illustrations are taken into consideration.

Firms Who are Building

ELDORA, IA.—The J. S. Pollard Floral Co. will erect a number of greenhouse buildings.

NEW HAVEN, CONN.—A frame greenhouse will be built by Leander Ioegeare at 93 Ramsdell st.

DOVER, ME.—Fred Norris is erecting a greenhouse at his home on Spring st. in connection with his gardening business.

ROSCOE, ILL.—New greenhouses are to be erected by Arthur Briscoe on the Fyler property; Carnations and Ferns will be his specialty.

FINDLAY, O.—J. J. Waaland is erecting a greenhouse on his premises at 124 East Front st. in which he will raise Violets.

EMPORIA, KANS.—A new 100 by 54 ft. greenhouse has just been completed at the corner of West st. and Twelfth ave. by the Emporia Floral Co.

GRADYVILLE, PA.—Howard Keller of Falls of Schuylkill, Philadelphia, has purchased the Jesse R. Baker farm here and will engage in the florist business. He expects to erect several greenhouses on his new property during the coming season.

HANFORD CITY, W. VA.—Work has been started on the new greenhouses which T. J. Huston, the florist of Sistersville, has contemplated here, and it is the intention to push the construction of the new plant as rapidly as possible in order that it may be gotten in shape for occupancy early in the Fall. The new greenhouses will be constructed of steel and concrete.

The Week's Work

BY
FRITZ BAHR

Easter Sunday

Reflections of the Easter Trade.

I always have made it a rule to consider the business we have done at the principal holiday seasons of the year, and compare the results with those of former years; not alone in regard to the volume of business done but as to what has sold the best, and what ran into a surplus or a surplus. To me this is not only very interesting, but of great value as a guide to determine what to plan, plant and prepare for the next year. At this writing it is Easter Sunday, in the afternoon, and without looking at any book, or asking "Bill," I know it was the best Easter ever, and I think I am not mistaken when I say that the severe and long winter we passed through had more to do with it than anything else. With us, outside of funeral work, there have not been as many flowers sold during the first two months of the year as usual, nor as many visitors to the greenhouses—and all on account of the weather. It almost seemed as though the customers felt like wanting to make good the shortage judging from the way they came to view the Easter display. What sold as well as anything we carried were pans filled with Marguerites out of 2½'s. Murillo and Couronne d'Or Tulips and Daffodils sold out clean; so did pans of miniature Hyacinths, especially was there a strong call for the pure white and light lavender ones. Now these pans didn't sell because we hadn't a good stock of Hydrangeas, Azaleas, Roses and other things, for we did have them and they also moved, but the unusual call for the bulbous stock seems to indicate that the buyers wanted something that was what they call "so Spring like." Lilies! Well, every good one went. I have almost come to the conclusion that the man who uses about 150 or 200 pots of Lilies, and must have them well grown, is as well off, if not better, if he buys them all ready grown from the man who grows them by the thousands. If you have heat there is nothing more easy to grow than a Lily, and at the same time nothing more uncertain as to just what you will get; and the man who grows 200 pots of them can't do it as well as the one who grows 2000 or 20,000. Primula obconica made good also, selling better than ever. Say what you will, there are but few plants we grow which bring better returns than they do, in the greenhouses of the retail grower—and most of us belong to that class. Azaleas and Rhododendrons could have sold better; several days last week on which the thermometer registered 70° didn't do some of the plants of Empress of India a bit of good, there was no more opportunity for holding back; what such temperatures did help to do was to get some much needed color to that grand Spiraea Queen Alexandra, plants of which were, up to a week ago, in a 90° house in order to get them to bloom. It is all over, but only for a few moments. We have hardly delivered the last order, but when I look over the empty benches of the Lily house, and then glance up to the crowded shelves and the 2½" Geraniums on the side benches, I almost feel like wishing that it was tomorrow morning so that we could go to work again.

The Perennials

A Good Time to Divide the Large Clumps

Throughout the middle West the winter has been an ideal one for the perennials. They overwintered finely. The leaves of the Coreopsis and the Gaillardias, on the young stock, are as green as they were last fall when the first snow covered them. Some Campanula medium left outdoors are in the very best of shape, also the hardy Chrysanthemums which, like the Campanulas, usually freeze out if not well protected. What I want to call attention to at this time is the dividing of some of the large plants which might be on hand. There couldn't be a better time to do this with a Chrysanthemum maximum, Gaillardia, Delphinium, Phlox, or any other of the many better known perennials the average florist usually carries, than now. When the climate is more mild this can, of course, just as well be done in the fall. With us, however, it is always risky to expect the divided, wounded plants to overwinter well. A far better and safer plan is to divide now, for at this time of the year the plants will get over the operation quick-

We have a SPECIALLY nice lot of

Double Your Carnation Profits—Last Chance to Buy

The trade has certainly bought liberally of Carnation Dorothy Gordon this Winter and Spring—prized for rooted cuttings, have found our producing capacity nearly to the limit, but we're proud of the stock we've sent out, and judging by their kind letters, our customers are pleased, too. And next Winter, when all these splendid plants come to bloom and these florists begin to make money as they have never before made it from Carnations, they'll be still better satisfied!

Have you delayed getting in your order for this magnificent new Carnation?

If so, this advertisement is addressed to you; we have just a few thousand more cuttings in the sand for April 15th delivery, and when these are taken, no more will be available till next Winter.

We urge you, if you want to double your Carnation profits, not to delay; the merit of this splendid new variety has been thoroughly proved and the only possible loss you can experience in the matter is to let this opportunity slip by and stick to the old sorts you've been growing in the past.

Carnation Dorothy Gordon

has a splendid pedigree, a long list of good qualities, and an enviable record of prizes and awards. It is a seedling of Lawson on Enchantress, possessing the principal merits of these varieties without their faults. It is vigorous in growth and is perfectly free from disease. Its flowers are a trifle darker than Pink Enchantress; they are borne in double the quantity, and are of exceptional size—averaging over 3 inches in diameter. They are very fragrant and keep exceptionally well. The market price paid for Carnation Dorothy Gordon is regularly 50 per cent. more than that paid for Enchantress.

From the very first, Dorothy Gordon has established a splendid record as

an exhibition variety. High awards were given it at the meeting of the American Carnation Society in 1908 and at the National Gardeners' Association meeting in New York in 1909. This season it has attracted much attention and has won further renown at the Pittsburgh and Toronto meetings.

In order to give the trade a fair opportunity to test it thoroughly, we have from the first sold rooted cuttings at a price which would get it established everywhere. This low figure still prevails, and the remaining stock will be sold at these prices: \$10.00 per 100, \$75.00 per 1000. No further offers this season.

Joseph Heacock Co., Disseminators :: Wyncote, Pa.

Please mention the Exchange when writing.

er, and on account of the root action there is less danger of rot decay. Get at such old clumps as there may be on hand and are worthy of propagation, and divide them at once, the smaller the pieces the better. The less woody stalks or roots left to the individual divisions the better; just a little care taken in the dividing means money in your pocket.

The Hotbeds

Their Great Importance to the Retail Grower

Hotbeds are certainly a great help to the retail grower at this time of the year. There are but few bedding plants which will not do equally as well in frames as in the greenhouse bench. The only reason we have for failure is negligence on the part of the grower. Whenever there is the least doubt as to being able to find time or have some one reliable to take the proper care of the stock in the hotbeds, it is useless to go to the trouble of preparing them. Here, as with the indoor stock, only too often the grower is liable to undertake too much, and finds this out usually too late. To provide the proper ventilation and faithfully attend to the watering are the two main requirements in the care of hotbeds; either one, if neglected, might ruin, in a few hours, stock which has cost months of work. On the other hand, when proper attention is given stock in a hotbed, where the pots are plunged in or standing on the moist soil, with a gentle bottom heat, you have ideal conditions for the growing of many of your bedding plants, far better than you could expect on a greenhouse bench. When one takes into consideration what an amount of stock can be added by the proper use of a few hotbed sash it would seem that the average grower would find it a paying proposition, even if he will only have use for the sash during the short period of four to five weeks of the year. For instance, he can put about 200 3 1/2" pots side by side in a 3 ft. by 6 ft. sash; averaging them at 5 cents for whatever plant they may contain, why doesn't it pay to use a sash for that purpose?

Plants for the Hotbeds

A Few the Average Grower Handles

Among the plants which are not so very particular about the manner of heating them is the *Canna*. We have the very best of results with them in the frames; an overhead watering with the hose, such as would be out of place with *Geraniums* in bloom, is just right for them; as long as they are kept moist enough they will make good, and there is no reason, whenever the grower is short on bench space, for having *Cannas* occupy valuable space there when a hotbed can be had, not that they aren't deserving of the bench, but they will do equally well in the hotbed. When it comes to *Geraniums*, while I have seen some of the finest plants grown in frames, it certainly takes a careful man to attend to them as they ought to be attended to; it is easier when on the bench. Tuberous rooted *Begonias* just delight in the atmosphere of a hotbed, it's the very place for them. If you are going to use the plants for bedding out later, remove the sashes for a few hours each day toward the end of May and get them hardened off, just what they want. Then there are *Coleus*, *Centaureas*, *Mme. Sallerol* *Geraniums*, *Fuchsias*, *Heliotropes*, *Ageratums*, and so many others used in every florist's place where bedding stock is handled, which will do well in frames. Twelve inches of well packed manure is all that is really required to get a hotbed into shape in April. Pot up your

Cannas into 3 1/2's and plunge the pots, shade for a few days, and they will soon grow into salable stock; and so with the *Begonias*—as soon as the leaves begin to appear in the flats the tubers are in, pot them up and give them the hotbed.

Leftover Hardy Stock

It pays to Take Care of It.

Any of the shrubs which were forced for Easter and are left over will make good plants again if care is taken of them. This is particularly the case with *Lilacs*, *Spiraeas* and *Deutzias*. We always have some of them left over, and quite often there is a call for cuttings of these useful flowers. With the temperature 74° in the shade, as is the case today, one would hardly think it possible to expect any more cold weather this Spring; and yet it will be better to place any left over plants, intended to be planted out in the field, in a cold frame for about two weeks. The plants are soft, and a hard frost will not benefit them any. Cut them back well just before they are planted out; two growing seasons in the field will develop them into good salable stock again. If you intend forcing certain stock in the shrub line for another Easter, better begin now by placing an order with your nearest nurseryman for a good supply of 2 to 3 ft. plants. Give them field culture over Summer and pot up next October; you will, by so doing, have them when ready. You can buy 2 to 3 ft. *Spiraea Van Houttei* for about 8 to 10 cents, and if taken care of they will make excellent material for forcing next Winter. If not sold, you will lose but the labor in having taken care of them during three months inside, for the plant itself is not lost, use it over again.

Azaleas and Rhododendrons

Unsold Stock—What to Do With It

I was asked the other day what I did with our left over *Azaleas*, and if we found it a paying proposition to keep them over and how it was done. I have never kept a record of our experience in keeping *Azaleas* over, but am sure that if we haven't lost any money doing it, the profit we made was so very small that we never noticed it; therefore, while we still recommend our customers, whenever they ask our advice, to plant their *Azaleas* out along the edge of some shrub border during the Summer months, we hide our own underneath the compost heap. If we should happen to get left with an expensive plant which is in good shape, it pays to carry it over. I am also of the opinion that it pays to keep the plants over where a great number of them are on hand and proper methods can be used in taking care of them, but for the smaller retail grower, who has, say, a couple of dozen plants left over each year, it doesn't pay to bother, for nine chances out of ten the plants will not get proper care during the Summer months. I have experienced it and have seen the same neglect at other

places. Expose a potted *Azalea* to four hours of good July sun, when the plant is in need of water, and you will undo six months of faithful care. And that holds good with the *Rhododendron*. However, plants which are to be kept over should now go to a cool light house or, what is better, a frame, and not be stuck under some benches—that isn't the place for them. Protect them against frost until the end of April.

Dahlias

Get Ready a Good Stock for Planting Out

But few of us can get along without growing *Dahlias*, even if we haven't as much success with them in certain localities as in others. They are most valuable as cut flowers, and with the newer varieties such as have been added during the last ten years, especially in the *Cactus* class, there is an increasing demand for them on the part of the public. You are bound to try some of the new ones, and nothing is gained by waiting before ordering them—the sooner this is done the better. Mrs. Chas. Turner in the yellows and Countess of Lonsdale as a pink, while not novelties, are two splendid varieties. I know of no other *Dahlia* which has as beautiful color under artificial light as Countess of Lonsdale. Look over your own stock. If you use the dormant roots to plant out into the field, the first planting can be made in early April. Divide the roots, place the tubers about 4 inches below the soil, 2 ft. in and 3 ft. between the rows. If you are short on certain sorts, plant the roots on a sunny bench and use the young growth for cuttings; they root very quickly and make the very best of stock for planting out. If you are disappointed with certain new ones the first season give them another trial, some of the best ones we grow didn't do a thing the first season.

ORCHIDS

We have imported, this year, all the commercial *Cattleyas*. We will have again *Cattleya Lawrenceana*, *Oskelliana*, *Dowdiana* and *Ercellaviana*. Write to-day.

Please mention the Exchange when writing.

NEW YORK, March 30.—Last Saturday night found the New York cut flower market at the glut point. Potted plants for Easter use had been given the preference by buyers, and the supply of cut flowers exceeded the demand. The continued warm weather this week has caused the growers to send in large shipments to an already glutted market. There could be but one result, namely, a slaughter of prices.

The basket and pavement florist is carrying away more flowers for his money than ever before, and more we hope than he ever will again, and yet he has his place, and has become a useful factor in helping to clean up a glutted market. The general axiom is "make any kind of an offer and you can take away the flowers."

Special American Beauty Roses in a few cases are selling as high as 25c. each. The top notch price for Richmond is 10c., Killarney 6c., and on Bride, Bridesmaid, and My Maryland there is practically no price, though a few of the very best sell at 5c.

Best grade Lilies sell for 6c. and Callas 8c. each.

Prices on bulbous stock reach their limit at \$1 per 100, and Lily of the Valley at \$2. Violets are nearly finished, but the best of arrivals reach the 50c. mark. Orchids are not plentiful, but are selling at 60c. each for the best Cattleyas, and 40c. for Dendrobium Formosum.

Very large consignments of Roses and other flowers from Rhode Island and Connecticut are arriving and will further depress the market. Up to the time of going to press conditions are growing worse, with Killarney Roses selling for \$10 per 1000 in some transactions, and other good Roses going at an equally low price.

PHILADELPHIA, March 28.—Weather conditions for the week preceding Easter Sunday were such that they increased the demand for both potted plants and cut flowers, and made possible quicker and better deliveries. The only drawback was that the warm weather was damaging to the Violet crop, and also caused some Roses and Carnations, especially the held back stock, to arrive in soft condition. A careful inquiry among the wholesalers and commission men brought out an expression of opinion from nearly all that the volume of business had been equal to or greater than that for the corresponding season of 1919, and on the whole was satisfactory. In many cases the prices on Saturday were not greatly in advance of those of the week. The highest prices mentioned here were the prices of Saturday, while the average prices for the week in some cases was somewhat lower.

The supply of American Beauty Roses was not plentiful and specials realized as high as 75c. each; while Richmond of the same grade sold for 20c. to 25c. each. The best Bride brought 12c. to 15c., with Bridesmaid 8c. to 10c. Killarney and My Maryland came in in excellent condition and reached the 50c. mark for the best, with Kaiserin at 10c. and Mrs. Jardine at 25c. Lower grades of Roses were in full supply and sold all the way down to 4c. for the lowest grade.

A few special Carnations sold as high as 6c. each, but Carnations at that price cannot hold their own as an Easter flower, and late on Saturday they had to be offered at 3c. to 5c. each in order to clean up the stock. Many Carnations, as well as Roses, came in soft because the grower had held them back, and they had to be sold at sacrifice prices.

Extra quality long stemmed Gardenias brought \$2 to \$3 per doz. Violets, single and double, though for the most part of only medium to poor quality, were in steady demand at 75c. to \$1.25 per 100 for single and \$1 to \$1.25 for double, for the best obtainable.

Neither Easter Lilies nor Callas seemed to get above the 15c. mark, and many of the poorer grades of Lilies sold for 10c. each. Cattleyas were not over abundant, and top grade flowers realized 75c. each, and from that down to 50c.

Bulbous stock of all kinds was moving off briskly and at good prices. Lily of the Valley showed a decided rise and sold at \$3 to \$4 per 100. Tulips, brought 2c. to 3c. while for some fancy varieties like Couronne, d'Or 4c. was asked. Southern Daffodils arrived in good condition, and realized \$1 per 100, while home grown varieties, such as Emperor were selling at \$3 for best grades. Lilac was moving well at \$1 per bunch of 12 sprays. There was a good demand for Sweet Peas, the top grade bringing \$1.25 per 100.

The supply of miscellaneous stock was varied, and moved satisfactory. Snapdragons sold at \$1.50 to \$2 per doz. Daisies, yellow and white, were good property, and sold easily at \$1.50 to \$2 per 100. Fancy Mignonette sold well at \$3 per 100. Pansies proved everywhere good sellers at 50c. to \$1 per 100.

Of Asparagus and Smilax there was, especially of the latter, no more than enough to go around, but the former remained at the normal price of 50c. per bunch, while Smilax soared to 25c. per string.

Today, Monday, there was the usual reaction after Easter, and consequent fall in prices all along the line, but up to evening nothing which could be called a slump had resulted. Some special Am. Beauty Roses sold at 50c. each, and Richmond specials found purchasers at 15c., while the very best Killarney did not get above the 10c. mark. The demand for Bride and Bridesmaid was limited and prices low.

Fancy Carnations sold for \$3 per 100. The top notch price on Daffodils, and other bulbous stock was \$1.50 per 100, and most sales were at a much lower figure. Lilies sold at from 8c. down, and Callas from 10c. down. All other flowers showed a decided drop from the prices of Easter week.

The unprecedented warm weather increases the cut of flowers with the growers, causing heavy shipments now when the demand is naturally light, and a further fall in prices during the remainder of the week is expected.

BOSTON, March 29.—Early in Easter week the market proved quite good and on the upward move; although stock was quite plentiful it cleaned up and good prices were obtained. Cut flowers were never more plentiful than they were this year and on Saturday prices went all the way back to the last moment, thinking there will be an advance in prices. The unexpected happened on Saturday, prices dropping considerably. Yet with all the slump Easter business could not be called bad, as the good prices in the early part balanced up things well.

Although Roses were much more plentiful than they have been, such kinds as American Beauty, the Killarneys and Richmond brought good prices. Bride and Bridesmaid were not in such good demand and the prices obtained were not as satisfactory; yet taking the whole list of Roses into consideration the trade was quite good, in spite of a little surplus.

Carnations sold well. There was a great demand for good white Carnations, and it is the first time that white kinds beat the colored.

Violets were cleaned up at good prices and there were none too many for the demand. Prices ran from 30c. to 75c. per 100, and very choice ones were higher.

Bulbous stock was more than abundant. Narcissus Empress, Princes, Golden Spur and Emperor brought \$10 per 1000. Tulips were very plentiful and prices were not satisfactory. In bulbous goods there was a large surplus.

Cattleya Shroedere was in good demand and \$6 per doz. was the price. Sweet Peas sold well and were abundant. Mignonette, Marguerite, Snapdragon, Frezias and other miscellaneous stock sold fairly well.

Asparagus Sprengeri and plumosus were not over abundant, and therefore

good prices were obtained. Adiantum cuneatum, Croweanum and Farleyense sold well. Southern Smilax, Boxwood, Mexican Ivy and all other green goods were in good demand and quite satisfactory prices obtained. Gardenias were more plentiful than a few weeks ago and the prices were good. Lily of the Valley was plentiful and sold well. Mayflowers are just beginning to come in and the price is \$2 to \$3 per doz. bunches.

R. C.

CHICAGO, March 29.—As is usual, the market is quiet after the busy Easter rush, although business is not as stagnant as one would suppose. The quantities of stock being received can hardly be comprehended, and all in excellent condition. Never has stock come in with such a rush at this time of the year. The outlook is that very shortly nearly every grower's Roses and Carnations will go off crop, which will mean the redemption of the market. Roses are abundant in all varieties, and American Beauty and Richmond, so strong last week, took a drop in prices with the rest, but not so decided as in the other lines. Killarney, Bridesmaid, Bride and other varieties have sold as low as 2c. and 4c. each, and then some were left over.

Carnations at Easter were an extra demand and moved nicely although reduced to 2c. and 3c. for the best sorts. Some were sold as low as \$1 per 100, but they were of inferior quality. Lilies were the one crop that was disappointing. The impression was that there were loads of held back flowers that would flood the market, but they failed to materialize. The quoted prices, \$15 per 100, prevailed. Callas were good and moved off at about the same price. Lily of the Valley was also in good demand.

Bulbous stock came in in awful quantities, almost gilding the market. With the exception of much of the Southern Daffodils it was nearly all sold, although some at a sacrifice. Stocks were in great abundance and many were unsold.

Violets proved a disappointment in every way. Arrivals were all in very bad condition, being overheated. Thousands of bunches went to the garbage barrel, very few were in condition for selling, mainly those from the local growers. Some fine Spanish Iris arrived just in time for the Easter trade, and the best flowers brought 4c. each. Dutch Hyacinths were plentiful, and some fine grade spikes brought from 4 to 6c.

Orchids had a good call and no surplus stock was noted; prices ranged from

50 to 75c. each. Gardenias also moved nicely at 25c.

All greens were much in demand for decorative purposes, but there was plenty to supply all demands. Considering the enormous amount of stock available it is surprising how little went begging.

ST. LOUIS, March 28.—Easter trade here was fully up to last year's and in some cases very much better, especially so in blooming plants. The weather was of the made-to-order kind, in fact the whole month was more like Midsummer than March and all the stores could make a fine show of plants outside. From all reports, the trade has done a tremendous plant business and for better value than last year. Lilies, that a few weeks ago were reported backward, all came in just right and every grower around here had plants for all demands. Azaleas were in great demand; Hydrangeas were to be had only in limited numbers. Spiraeas, Ramblers, Rhododendrons, Lilacs, Dutch Hyacinths and Tulips came in for their share of calls.

The show houses of the West Enders were packed all of last week; today they are empty and it will take a lot of replenishing to keep from looking like moving day. In cut flowers there was also a big business done at the retail stores all over the city; stock of all kinds was in plenty and prices were almost as high as at Christmas. Downtown florists, especially had a big run on cut flowers; Lilies, Sweet Peas and Carnations sold best. Violets had a big demand but were very scarce and are about done for this season.

Among the commission men the big demand by the local trade cut down shipping orders somewhat, still they had large consignments of everything in season. American Beauty Roses, in all grades were plenty and brought from \$2 to \$5 per doz.; shorts, \$6 to \$10 per 100. Roses, such as Killarney, Ivory, Richmond, Bride and Bridesmaid, from \$5 to \$10 per 100; shorts, from \$2 to \$4 per 100. Carnations, large fancy, \$5 per 100; others, from \$2 to \$4 per 100. Lilies, \$15 per 100; Lily of the Valley, \$3 to \$4; Dutch Hyacinths, \$4; Tulips, \$3 to \$4; Paperwhite Narcissus, \$3; Freesia, \$3; Jonquils and Von Sions, \$2 to \$3 per 100; Sweet Peas, 50c. to \$1 per 100; these were in plenty with a great demand. Violets sold clean, the few that came in, at 50c. to 75c. per 100.

So all points to the best Easter trade has had in years.

ST. PATRICK.

CUT FLOWERS AT WHOLESALE

New York

On account of the sale of the building where Traendly & Schenck are now doing business, they will be compelled to look for new quarters.

News came on Tuesday that a son of Mr. Hatcher of Amsterdam, N. Y., had died in Illinois.

It is said that one firm on 28th st. sold a million Violets last week.

Hitchings & Co. have been building an iron post and rafter greenhouse, 161x28 ft., at Bound Brook, N. J., for Thomas Young, Jr., the 5th ave. florist; also another of similar construction, 425x55 ft., for L. B. Coddington, Murray Hill, N. J.

J. H. Small & Sons have their store windows decorated with large bunches of Apple houghs in bud.

Charles Millang is confined to his home with illness.

Alexander Smith of the N. Y. Cut Flower Exchange is the happy father of a girl baby, born Tuesday, March 29. Congratulations are in order.

Mr. James McIlutichison of McIlutichison & Co., sailed last Wednesday, per S. S. Lusitania, for Europe on his annual business trip for the firm.

"Buds" Manhattan, is a new concern incorporated with a capital of \$5000 to deal in flowers, seeds, bulbs, plants, etc. Incorporators, Carl R. Gloeckner, 376 Webster ave., Persey City, N. J.; Wm. F. O'Connor, Wm. H. Siebrecht Jr., both of 277 Broadway, New York City.

Wm. Elliott & Sons had a most successful auction sale on Tuesday of this week, including everything, practically, in nursery stock, with Rhododendrons, Hardy Roses, Shrubs, Clematis and the California Privet specialties. The attendance was unusually large and prices obtained most satisfactory. The firm will continue their nursery stock and plant auctions twice a week throughout the season.

The Fruit Auction Co. had a most successful series of sales during Easter week, a new departure in the line of auction business, and from Tuesday until Saturday preceding Easter, inclusive, their auction rooms were filled with bidders who bought large lots and at good prices. The stock of Easter plants offered was splendid, Azaleas, Roses, bulb stock, Rhododendrons and, in fact, a complete line of seasonable plants in full bloom. Although a new departure, this continued sale for practically the entire week met with the greatest success. Manager John P. Cleary is certainly to be congratulated.

In Brooklyn

Abrams has been running a Fulton st. store during Easter week.

Frederick Looser & Co. had the windows of their department store decorated with pots of Rambler Roses, and other stores, especially those handling Easter goods, decorated their show windows with potted plants.

James Mallon's Sons had their store well filled with a varied stock of good potted plants, and reported sales very satisfactory.

Robert G. Wilson at his Green ave. store near Fulton st. reports so much funeral work that he with difficulty found time to decorate his store for Easter. Some Lilacs grown in standard form and Crimson Rambler Roses grown into the form of arches were especially noteworthy. At his greenhouses and salesrooms at 341 Greene ave. are some fine specimens of Metrosideros, or Bottle-brush plants, and a new variety of Rhododendron with flowers of apple blossom color. He also has several large and perfect specimens of the Fern Cibotium Schiede. The whole frontage of the salesroom at the latter place will shortly be torn out and remodeled at no distant date.

At Applegate's on Putnam ave. during Easter week potted plants in great variety and of superb quality were artistically arranged, in a manner hardly approached in New York or Philadelphia. Mr. Applegate had seven churches to decorate for Easter. Some irregular shaped baskets made of plaited grass and colored a delicate pink framed novel covers for potted plants. This is Mr. Applegate's 33d year in business.

At the greenhouses of Charles Zeller & Son on Leffert st. unusual activity prevailed during Easter week, business being far better than was the case last Easter. Tubs of Crimson Ramblers with Easter Lilies growing about the base were conspicuous at this establishment and formed a pleasing combination.

Philadelphia

Calls last week upon a majority of the retail florists brought out some facts which may be of interest to both grower and wholesaler. First, with hardly a dissenting voice the retailers expressed the opinion that the sales for this Easter were larger than for the last. While cut flowers sold well, potted plants reigned and, though the whole line of them was in good demand, the most popular were Hydrangea Otaksa, Rambler Roses, and Azaleas. Lilies sold rather slowly. The buyer of moderate means was pleased with a pan well filled with Hyacinths or Daffodils. Pansies, too, and Daisies in rustic boxes met with ready sale. Rhododendrons went slowly as compared with Azaleas. Tausendschon, Crimson Rambler and Dorothy Perkins Roses were very attractive and had a steady sale.

Where the buyer could afford the price, baskets and boxes of various shapes, materials and designs, filled with different kinds of plants, moved well and no difficulty was met in making sales.

At the J. J. Habermehl's Sons' store an immense Paris Daisy of perfect form and literally covered with a multitude of blooms attracted much attention and was purchased by Heinz, the pickle manufacturer, to be shipped to him. Also to be noted here were some baskets of magnificent Lillium auratum, and some unique moss-covered receptacles filled with Dendrobium nobile, not seen elsewhere. Mr. Habermehl called the writer's attention to a portable electric fountain which can be set up anywhere where an electric current can be obtained and set in motion with only a few gallons of water. This fountain when made the center of a collection of plants is very effective.

At Robert Kiff's were noted gilt baskets filled in a light and airy way with several kinds of plants, showing especial skill in putting them up.

Charles H. Fox had an attractive display of good plants, and some very fine Hydrangeas in baskets in combination with other plants.

At Frank Polites' were some extra fine double yellow Tulips in rustic boxes.

It was indeed a treat to any lover of plants and flowers to visit the store of Pennock Bros. An immense Acacia of some old variety and forgotten name, some four feet in diameter and perfectly symmetrical, was covered with cream-colored flowers and surpassed anything in that line seen elsewhere. It was sold as soon as it was brought into the store. Their Tausendschon and other potted Roses were unusually well finished. Some baskets of pleasing design filled with various kinds of plants were in different combination than those generally on sale and showed great taste in selection.

Among the wholesalers and commission men, John McIntyre says that business was never as good with him as during the past two months and especially this Easter. He is shipping Lilac to all the large cities, and is handling some gigantic Callas which at Easter reached the \$2.50 mark.

At S. S. Pennock-Meehan Co.'s store satisfaction was expressed with the volume of Easter sales. This company, as is well known, handles a very complete line of cut flowers, covering almost or quite all varieties, with especial attention to Roses and Carnations.

W. E. McKissick & Bros. had been fortunate in securing some very good single Violets, and long-stemmed Lilies of excellent quality for Easter trade.

Alfred M. Campbell reports heavy sales of his specialty, Asparagus plumosus. He also handled some exceptionally good Daffodils. He is, so far, making a vain search for young plants of Adiantum hybridum for growing on in his greenhouses.

Calling upon Robert Craig Co., it was found that his houses which had been so well filled with potted plants suitable for Easter, were nearly emptied by the large sales. In a large house which had been filled with Spirea only one plant was left. Mr. Craig expressed himself as well satisfied with Easter business this year. The sales of Tausendschon, Lady Gay, Dorothy Perkins and Crimson Rambler Roses were unprecedented. The company has five houses devoted to Picea pandurata, and even those are not enough to supply the demand for this plant, which is here grown to perfection.

At the Leo Nielsen Co.'s establishment, where is handled a full line of cut flowers, Leo Nielsen expressed himself as well pleased with the Easter business.

Wm. J. Baker has been handling large quantities of nice Pansies. The writer had the pleasure of meeting at Mr. Baker's Wm. Swayne of Kennett Square,

Pittsburgh Cut Flower Co.

Pa. Mr. Swayne not only grows Caranous. Pansies, etc., but is a large grower of Mushrooms, his crop to ship averaging about 100 lbs. per day to the different cities.

A Geyser-Heated Greenhouse

In the Yellowstone Park Geyser Basin a small greenhouse stands over a geyser stream. A current of nearly boiling water constantly passes through it. Steam arises in profusion, moistening the plants, and the sun aids in the work, so that an extraordinary rapidity of growth is the result. Lettuce matures in two or three weeks, and other plants grow with proportionate rapidity. The climate of the locality is very severe, which makes more striking this example of the utilization of Nature's energy.—Harper's Weekly.

Boston

William Sim of Cliftondale did an immense Easter business. He shipped over 100,000 Sweet Peas and the prices obtained ran from \$1 to \$1.50 per 100. He also shipped 140,000 Violets at about \$1.

Paine Bros. of Randolph, Mass., are shipping some excellent Sweet Peas with good, long, stout stems. Their Easter supply of bulbous material was very fine indeed, consisting principally of Roman Hyacinths, Paperwhite Narcissus, La Reine, Murillo, Van Goyen, Tournesol Scarlet, and Cramoisi Brilliant Tulips, Daffodils and miscellaneous bulbs.

The Snapdragons from P. E. Richwagan of Needham are well grown with fine straight stout stems and superb heads of flowers, so are also his Winsor and Lawson Carnations, which are handled by Edward Rokean, the energetic salesman at 1 Park st. market.

Mann Bros. are among the largest growers of bulbs for the Boston market and they import direct from 17 Dutch and 6 French firms. They handle about 900,000 bulbs of all kinds in the season. They force about 225,000 Tulips, 225,000 Daffodils, 150,000 Paperwhite Narcissus, 75,000 Roman Hyacinths and the remainder in miscellaneous bulbs. They report very satisfactory business during the whole season and had a large cut for Easter which cleaned up quite satisfactorily.

George Butterworth of Framingham is handling this week at 1 Park st. some fine Tulips with long stout stems in the following varieties Rose Lusante, Keizer-skroon, and Murillo. His Lily of the Valley is also of good quality. He reports poor sale for Dendrobium Wardianum for Easter.

Thomas Peglar of 1 Park st. market is handling this week Antirrhinums of good quality in distinct colors; they come from Sam Goddard of Framingham.

Peirce Bros. of Waltham grow an immense quantity of Lilies for Easter. Mr. Peirce reports that, with the favorable weather the week before Easter, every plant was in fine shipping condition, and they disposed of almost all of the immense stock they grew this year. Their shipping facilities are the best of any of the growers in this part of the country. They own three large auto wagons which will clear out almost any ordinary establishment in one day. Their largest machine will carry 500 Lilies in pots on one load and is able to deliver in Boston 2000 pots in one day. Their second size machine will carry 200 plants and the smallest machine 100 plants of Lilies. They shipped large quantities to Lowell, Lawrence, Haverhill, Lynn, and Brockton. The houses of Gladioli at Peirce Bros. are looking very well and we were surprised to see such large quantities grown here. The following named kinds are grown in large quantities: 20,000 America, 10,000 Augusta, 5,000 Branchley-ensis, 20,000 Shakespeare and 40,000 Blushing Bride for Decoration Day. Their houses of Stocks for Decoration Day are looking well at the present time. They have an immense large sash house filled with Asparagus Sprengeri which was very remunerative this winter.

Mr. Archer, of the landscape department of Backhouse & Co., York, England, is visiting the Hub this week and is going to make a study of the landscape work that has been done in our parks and large private estates. There are many good examples of this art around our city for Mr. Archer's investigation and we wish him a pleasant time. Leonard Cousins, Concord Junction, is installing two 50 horsepower boilers at his establishment.

W. C. Stickle of Lexington is about to build some very large greenhouses;

ROSES

Our supply of is hard to beat for quality. Our growers are in with a heavy crop and a good portion of the cut is of the fancy and special grades. Our leaders are

As the days lengthen and the cold gives place to the warm, balmy days of Spring, it is then that each and every one is thinking of the pleasure Nature has in store; flowers, green grass, trees budding—in fact, new life everywhere.

A longing to be closer to Nature seems to pervade the atmosphere, thus giving the florist who is willing to grasp his opportunities a chance to dispose of more flowers than at any other time of the year.

Prices, owing to larger supplies, are far more reasonable.

Below we quote some Specials:

GARDENIAS, per doz., special \$3.00, fancy \$2.50, first \$2.00.

VALLEY, per 100, special \$4.00, extra \$3.00, No. 1, \$2.00.

CARNATIONS, per 100, special \$4.00, fancy \$3.00, first \$2.00.

CARNATIONS, our selection, in lots of 500 or more, good quality, \$2.50 per 100.

SWEET PEAS, extra long, \$1.00 per 100.

the material is all on the ground ready to start at any time.

We saw at 1 Park st. market some very superior Roses from J. A. Rudlong & Son; those worthy of special mention were Killarney, pink and white, and Richmond.

At 2 Park st. market were some very good Ray State Carnations which came from Albert Roper, Tewksbury. Mr. Roper seems to have the knack of growing this variety. It has been a rather shy bloomer with most people.

F. L. Hardy of Natick is shipping to 2 Park st. market some creditable Snapdragons in various colors.

Gardenias of good quality are shipped to the market at 2 Park st. by John MacFarland of North Easton. He grows Lily of the Valley the year round and his stock of this commodity is of superior grade.

Plant growers report a large business for Easter and almost everything in the way of plants in pots has been thoroughly cleaned out at remunerative prices; in fact, in some cases, there was a shortage. Lilies averaged poor this year. Plants sold well and the heavy demand for these helped to cripple the cut market on Saturday. Flowers were too plentiful, if anything, and by Saturday the markets were overstocked.

The retailers report a very satisfac-

tory business for Easter, away ahead of last year.

The wholesale houses report very good Easter business; some of them claim it was as good as ever they had done at any previous Easter.

The growers report a satisfactory Easter trade. The plant growers are especially enthusiastic over the great business they have done. There never was more satisfactory weather for shipping their goods and, no doubt, this helped to increase their sales.

The cut flower men had abundance of material and of good quality. Early in the week all cut flowers were well cleaned up, but on Saturday there was quite a little surplus, more especially in bulbous stock and this is not to be wondered at when many of the flowers offered are in bloom out of doors in sheltered places. March has been so mild that such stock as Narcissus, Tulips and Hyacinths came so quickly and unexpectedly that they overstocked the markets. Then there are always some who hold on to the last minute, thinking prices will advance; however, it was the reverse this year, the slump came on the last day. Customers seem to be pleased also; they got more flowers for their money and better quality than usual at this season. One large wholesaler told me he had never

handles during the season 250,000 Tulips,
250,000 Paperwhite Narcissus, 75,000
Daffodils, 7000 Azaleas and a large as-
sortment of other plants such as Lor-
raine Begonias, Genistas and Cyclamens.
All his Easter stock was practically
cleaned out.We noticed at the market some nice
Hydrangeas grown and shipped there by
H. Hansen of Malden, Mass.Welch Bros. report an exceptional
large Easter business and they handled
immense quantities of good quality flow-
ers. They did a satisfactory plant busi-
ness, shipping largely to customers out-
side Boston and the State. All green
goods sold in large quantities and, taken
right through, this was their most satis-
factory Easter in many years.A. Leuthy & Co. report that they
have had an extra good business in their
pot plant trade. They handle high grade
plants and were sold out early in the
week.Although Thomas Roland handles an
immense quantity of the highest grades of
Easter plants his business was so good
that his houses are practically empty of
all Easter stock. He is quite a distance
from the city and in cold weather it
takes much care to get plants to cus-
tomers in the city. They were handled
more quickly and with less trouble this
year owing to the mild weather we are
enjoying.Wm. W. Edgar Co. of Waverly say
they got rid of all their big stock of
Easter plants. Their Lilies were of good
quality and brought them remunerative
prices; this has been one of their best
Easters for plant trade in a number of
years.

R. C.

Chicago**The Easter Business**An ideal Easter Sunday was ex-
perienced, and after a most strenuous
week in holiday preparations business has
settled down to a marked degree of quiet-
ude, which for a few days will be its
condition. It is stated that never before
has Easter week been so hard as this
season, and everyone is tired out. While
the volume of business was greater, and
many more shipping orders had to be
taken care of, stock arrived in such quan-
tity that to prevent a slump prices wentdown early on Saturday morning. Lilies
were the only commodity of strength.
Roses, with the exception of American
Beauty and Richmond, fell about 50%
lower than the quoted prices for Easter
stock. The fine weather, was a boon
to the growers and florists who had
plants to deliver, as no wrapping was
required in any form for protection. The
cut flower business was the greatest in
volume that was ever handled in this
market, and if prices had held up the re-
ceipts would have far exceeded those of
former years. With the sales greater
and prices lower the results about even-
ed up. The stock handled never was
better, and the growers should feel ex-
tremely thankful over the Easter returns.Nearly all the shipments of Violets
were unsalable; they arrived in such a
heated condition that it was impossible
to dispose of them at any price. Many
dealers have thousands of bunches on
hand that are positively worthless.Potted Lilies were not nearly equal to
the demand; scores of orders could not
be filled. Such as were obtainable
were not up to the standard of Easter
Lily plants. The cut Lilies were all
consumed, and Saturday kept many
rushing around to try and locate places
where more could be purchased. The
majority of the blooms were good, though
of short stem, but even the poorer grades
moved rapidly.News has been received that O. P.
Bassett, of the firm of Bassett & Wash-
burn has again launched out into matri-
mony, having been married at Santa
Barbara, Cal., on Feb. 21, to Mrs. Lu-
gene Dickerson, widow of the late
Charles Dickerson, a well-known hat
dealer of Detroit, Mich.The annual flower show for the ben-
efit of the Home for Destitute Crippled
Children was held Saturday, March 26,
at the Virginia Hotel. The flowers on
sale constituted the chief decorative ef-
fect, and were tastefully arranged to
tempt prospective purchasers. The total
profit realized was \$825.The Chicago Culture Club held a
"flower cotillion" on the evening of
March 30, at the West Side Masonic
Temple.Mrs. Alice Hastings, mother of Mrs.
E. A. Kanst, whose serious illness was
announced in our last issue, died, March**HOERBER BROTHERS****Wholesale Growers****ROSES and CARNATIONS a specialty**

24, at Minneapolis. Mrs. Hastings will
be sincerely missed by a large circle of
friends, both in Chicago and at her home.A mortgage was foreclosed on the firm
of Willard B. Smith & Co. of Kankakee,
Ill.; the greenhouses, boilers and
building were sold at auction to the
highest bidder on March 28.W. H. Picher, the Violet grower of
St. Louis, Mo., spent several days in
Chicago recently and visited all the Vi-
olet growers of Park Ridge and vicinity.The A. L. Randall Co. sold out com-
pletely in many lines of their supply de-
partment. Carl Thomas' smiling coun-
tenance will be missed from the force, as
this week he leaves for his farm in Penn-
sylvania, to spend the Summer. T. E.
Waters says that his own "perfection pot
cover" was a boomer.On Saturday evening, as early as
7 o'clock, Fleischman's were compelled
to close their store, as they were com-
pletely cleaned out of all stock.The Leonard Seed Co. says that owing
to the onrush of extremely early Spring
business, it is impossible to keep cleaned
up with orders.The W. W. Barnard Co. is also un-
usually busy this season, both at the
Kinzie st. and Fifth ave. stores. Mr.
Stewart of the latter store says that the
seed trade was so pressing that it was
impossible to take care of the usual stock
of Easter plants they handle.Miss H. Tonner of the Flower Grow-
ers' market has some excellent stock of
Spanish Iris, which came in good time
for Easter. She also had some magnif-
icent Snapdragons.Frank Ben says that the plant trade
this Easter was great, only he had not
nearly enough pot Lilies to meet the
demand; this fact, however, helped the
sale of all bulbous stock.The young son of Mr. and Mrs. Jos.
Brooks of Morton Grove, Ill., who was
taken to the hospital some three weeks
ago, suffering from a cut on his knee,
was in a very serious condition last week,
his life being despaired of. On Saturday,
however, a change for the better took
place, and at this writing his parents
feel very much encouraged.The demand for Sweet Peas was un-
usually strong for Easter. The J. B.
Deamud Co. state that they could easily
have disposed of 75,000 on Sunday morn-
ing if they were to be had.Hoerber Brothers are greatly pleased
with their first Easter in the florist busi-
ness. This firm has not as yet started
the construction of their new houses, al-
though the contractor is empowered to
commence at any time.The executive committee of the Chi-
cago Horticultural Society met on Thurs-
day evening last at the Union Restau-
rant. The main topic under discussion
was the date and place for the Fall ex-
hibition. The question is still open.Ernst Wienhoeber Co. had the decora-
tion for the reception of the Princeton
University at the home of Mrs. Silas Mc-
Cormick on Monday. This was a most
elaborate decoration and was carried out
as nearly as possible in the college col-
ors. About 6000 bulbous flowers, yellow
varieties, were utilized, with Smilax,
Ferns and Palms. Banks of yellow flow-
ers were placed in every conceivable
place. The staircase was covered with
wild Smilax, enlivened with Daffodils and
Snapdragons. A letter "P" of immense
size, of Daffodils, was suspended in the
hall.Ed. Enders says Samuelson's Easter
business was on a clean-up basis, every-
thing with the exception of 25 plants be-
ing cleaned up. The reasonable price of
stock appealed to the public.The staff of Vaughan's Seed Store is
exceedingly busy in filling their nursery
stock orders, as the season is advancing
so rapidly and the foliage so far advanced
for this time of year, that nursery peo-
ple may lose on their stock unless they
hurry in to stop further growth.C. L. Washburn of Bassett & Wash-
burn says that his receipts for Easter
trade were about equal to those of last
year, although the business was greater.It seems almost impossible when it is
stated that Violets are in bloom outdoors
at Hinsdale, but Mr. Washburn says such
is a fact, as the children spent hours
picking wood Violets on Easter Sunday.

F. E.—Best Advertising Medium

Poehlmann Bros. Co.'s stock was all disposed of and business was said to exceed that of last Easter. Never were better quality Sweet Peas seen than are being received by this house from the greenhouses. John Poehlmann says that business since Christmas has been better than last year.

Peter Reuberg cleaned up nicely, as their booked shipping orders left very little stock to be disposed of.

Winterson's Seed Store is kept busy handling the heavy orders for hardy stock and Roses. Three carloads received two weeks ago opened up in fine shape and the stock is moving off rapidly.

A letter from Mrs. Romaine, daughter of the late John Thorpe, who is en route for California, says that she stopped over at Albuquerque, New Mexico, and visited Mr. and Mrs. Byron H. Ives, the leading florists of that town. Everything was found in a most flourishing and promising condition. American Beauty Roses are growing with stems 8 and 10 ft. long. Iris, Lilies, Carnations and many other varieties of flowers were in bloom. Mr. Ives says that New Mexico is a great country for flowers; all one has to do is to cultivate the land and plant crops, they grow without further effort.

The regular meeting of the Chicago Florists' Club takes place next Thursday evening, April 7, at the Union Restaurant.

Owing to Easter week, the Bowling Club had to postpone its bowling. As the bowling season ends the middle of April, and as there are three postponed games to play the members will have to arrange two games in the next three weeks to get in the number of games scheduled.

Visitor: John E. Lapes, Cedar Rapids, Ia.

Cincinnati

Easter business compared favorably with that of last year. The Roses which arrived were wide open in a great many cases, owing to the very warm weather; it was simply impossible to hold them, consequently the prices dropped considerably on them. Carnations held up well. Bulbous stock was cleaned up in very good shape. The growers in the flower market sold out clean, consequently Easter business in Cincinnati was very satisfactory. The only scarce articles were Lilies and American Beauty Roses; more could have been sold of both if we could have procured them. Out-of-door Daffodils were received by the produce commission men by the barrel, and handed out for a nickel a bunch or any price they could get in order to sell them. This had a bad effect on the yellow Narcissus, but with all that everybody cleaned up fairly well; \$2 to \$3 per 100 were the best prices we could obtain for the yellow. The retailers all report a very satisfactory business. E. G. GILLET.

Kalamazoo, Mich.

According to the reports of the local press, the business during the Easter week among the florists has been stupendous and the amount of church decorations far in excess of anything in former years. Certainly, the weather from the shopper's point of view was remarkably fine, every day during the week being bright, warm, sunny Summer weather. From the florist's point of view, however, it was rather too warm, and the hot sun was too much for the best development of size and color in all lines, but more especially in Sweet Peas and Violets, which felt the heat considerably. Nevertheless, it is safe to say business was very good all along and a big increase over previous years.

Shipping trade held up good right through the week and the trade in pot plants was brisk. Lilies, of course, were in the lead and were of excellent quality, as were Azaleas and bulb stock. I did not remark any particular departure from previous years, most retailers being content to display the old-time favorites, which indeed made as effective an exhibit as one would wish to see.

Deliveries were made easy on account of the mild weather and, as usual, a large amount of work had to be done in the last two days before Easter.

The Central Nursery Co. had an extra store for Easter and showed a nice line at popular prices.

The suburban growers also had about as much as they could handle in attending to their customers' wants. It appeared that cut flowers and plants both had their admirers and they continued about evenly balanced in selling qualities. Altogether a good and satisfactory business was enjoyed by all. S. E.

The Mastin Automatic White-Wash and Spraying Machine is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass. The pump is of brass throughout, simple and powerful. The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for fifteen minutes.

All parts are made to gauge, and may be had for repairs.

Ask your dealer about our Extension Hose, Extension Rods, and the Mastin White-wash Nozzle for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

Worcester, Mass.

The Boston Herald of March 24 stated that "Easter Lilies will be very scarce on account of the early season, etc." One prominent florist is credited with saying: "The scarcity was due to the inferior quality of bulbs he was getting from Bermuda. Japan bulbs were also in the same condition, and those from Holland were not plentiful." To verify this statement and compare prices with those of Worcester florists, I visited the leading stores in Boston on the above

date, and found things somewhat different from what was stated. Our Worcester prices were about the same, save in a few cases where there was a cut in price.

Worcester has never seen such an Easter trade. Weather conditions were perfect, flowers very plentiful and on the whole, of good quality. Prices were as usual. Lilies were 25c. per bud or bloom, until the latter part of the week when some dropped to 20c.; culls of course sold lower. Carnations varied a little in price, but averaged about 75c. per

doz. Roses ran from \$1 to \$3 per doz. Azaleas brought a fair price, \$2.50 buying one exceptionally fine.

Some of the smaller growers sold their stock through grocery stores, but this seemed to make no difference with the larger dealers.

C. D. Mackie has a constantly increasing trade, and his store, although smaller than some of the others, had an immense trade. Customers were pleased to have Miss Leonard back again among them.

H. F. A. Lange had the usual rush and increase of help.

H. F. Littlefield was evidently the largest dealer of the week. In addition to his two regular stores he was forced to open up a third store near the center to display his Lilies. In one of his stores, under the management of Harry Randall, there was the handsomest Easter window display ever seen in Worcester. In his delivery Mr. Littlefield used two touring cars and three covered autos. As he is agent for these it served a two-fold purpose.

All the stores report "sold out."

CAROLUS.

New Bedford, Mass.

Easter, 1910, was a hummer; everyone was about cleaned out of stock. Lilies were rather scarce and sold about as well as any other plant. Plant trade was fine with good prices. There was a good demand for Daffodils and Tulips in pots. Azaleas also sold well. The cut flower trade was good, with Roses, Carnations, Violets, Sweet Peas, Tulips, Daffodils, Paperwhite Narcissus and Snapdragon to select from. Prices realized were very good: Roses, from \$2 up per doz. Carnations, 75c. to \$1 per doz. Violets were scarce, \$1.50 per 100 being the general price. Bulb stock sold well at 50c. and 60c. per doz., retail. The uptown retailers are of the opinion that this Easter was ahead of last year. The weather for delivery was ideal, warm with just a little too much wind blowing.

E. H. Chamberlain was all cleaned out of stock. R. H. Woodhouse had some elegant bulb stock, which went quickly. Wm. P. Peirce had a grand display of plants and flowers and a great many of those large Violets, but not near enough to go around. Wm. H. Davenport had a big display. Right next to Mr. Davenport, one of our big department stores was selling Lilies at 17c. each flower and Azaleas from 50c. up, but this did not seem to hurt William any.

J. H. Cleary on Pleasant st. was just as busy, his handsome delivery wagon being kept on the go. Noftz on William st. lived up to his reputation and made a grand display.

All seem to be satisfied with this year's Easter business.

Funeral work came in with a rush at Easter, too. Most of the business was over by Sunday noon, though a few stragglers came in once in a while.

The next thing is to get ready for Memorial Day; stocks are looking fairly well; the weather is warm and Spring-like; garden work is in full swing. Most of the florists have planted their outdoor Sweet Pea seeds; Geranium stock is looking good.

HORTICO.

Newport, R. I.

The fine weather of the past two weeks has started up things in general and the seedsmen have now all that they can do to keep up with their orders. And the nurserymen are now on the jump, also, but are badly handicapped by the shortage of competent help; good men were never so scarce here as they are today.

The condition of Henry M. Wilson, whose illness we reported three weeks ago, is still precarious. His nursery is not large but one of the best managed in the State; his ambition has always been to produce the finest specimens possible to meet the demands of a critical retail trade, and in this he has succeeded. His love for his specimens is such that often after making a sale he grieved to part with them. We wish for him a speedy recovery.

For Easter the florists, as usual, had a lot of decoration to do in the churches which called principally for Palms as the greenery with Lilies in flower, and the latter, according to a beautiful custom established a few years ago, are as a rule afterward donated to the sick and "shut-ins" of the parish. To the children of the Sunday schools are given Geraniums or other small pot plants in bloom. The weather was glorious and greatly facilitated the delivery of greenhouse products.

In his preparation for Easter C. Oscar Schultz had on hand almost double the amount of stock grown one year ago. Besides a large number of Lilies of his own growing, which came in just right, he disposed of a large number bought in. Mr. Schultz had the misfortune to lose a valuable horse by distemper on Easter eve.

Gibson Bros. grew their own stock and had it so well timed that, with the exception of a few items, their customers were supplied with stock from their own greenhouses.

ALEX. MACLELLAN.

Syracuse, N. Y.

In previous notes I mentioned the fact that the florists here were making extra efforts to meet what they anticipated would be a record-breaking Easter trade. Weather conditions being favorable, never before in my thirty years residence here have I seen such a wealth of flowers displayed at Easter.

P. R. Quinlan's store and conservatory on Salina st. has been treated to a fresh coat of paint, and the whole place was filled with a wealth of bloom that made a glorious sight. The Azaleas were a very fine lot, some magnificent plants being among them. Roses, hybrids, Baby Ramblers, were remarkably good and well flowered. The bulb stock was very good. Lilies especially so. A large block of Hydrangeas were a well finished lot. I noted some very neatly arranged baskets that sold well. The Warren st. store was also very tastefully arranged.

Burt's store and annex were well decorated. At the latter the window display was one of the finest ever seen here. The bulb stock was particularly good. There was a large stock of Azaleas, Roses, Daisies, Lilies, Hydrangeas, Pansies, etc.

H. Morris' and M. S. Hinckle's stores were filled to overflowing with seasonal stock.

At the greenhouses, W. Menclly & Son had a very large stock of Azaleas, hybrid and Baby Rambler Roses, well finished stock. Their strain of Primula obconica is very fine, far ahead of the ordinary variety one sees. They had an immense stock of well-grown bulbous flowers.

G. Bartholme's stock was fine, clean and healthy. The Carnations were particularly fine. Much sympathy is felt for Mr. Bartholme owing to the serious illness of his eldest daughter, who has had charge of the making up, and in which she has most excellent taste.

Sillman Bros.' place on Roberts ave. is kept in nice order, and everything looks good. They had a splendid crop of Carnations for Easter, the flowers remarkably fine. Sweet Peas, too, are well grown here. They are very much encouraged by their growing trade.

Bannister Bros., whose specialty is Boston and small Ferns, have an immense stock of splendid plants, in the pink of condition. They had a very complete stock of Easter goods and sold out.

John Menclly has a compact little place at 123 Chester st. He is a very good "chip off the old block" as his stock testified. The bulbous stock was all exceptionally well grown. He had a large stock of Genistas and Baby Rambler Roses which sold well. He contemplates enlarging and improving the place this Summer.

H. Y.

The Man Who Puts up a Range that Shows Quality in Every Detail Almost Invariably Equips it with the *Kroeschell Boiler* NOT CAST-IRON

Special Notice.

Our Heating Engineer, Mr. Lantenschlager is now making a tour of the following states.

Indiana, Ohio, Kentucky, the Virginias, Maryland, District of Columbia, Pennsylvania, New Jersey, New York, Connecticut, Rhode Island, Maine, Massachusetts.

Hundreds of Kroeschell Boilers used in these States. Write us at once if you wish him to call at your place and look over your requirements.

KROESCHELL BROS. CO., High Grade Boilers, Generators, Piping Systems, 452 W. Erie St., CHICAGO

THE KROESCHELL PIPING SYSTEM

Circulation is perfect. Cheaper and better than 1, 1 1/4, 1 1/2 or 2-inch threaded pipe.

Overcomes all the disadvantages of 4-inch cast-iron pipe. No deep boiler pits required.

The No. 6 boiler we purchased from you last year (rated at 18,000 square feet glass) is taking care of 18,000 square feet more.

Have no trouble to keep up temperatures in coldest weather. In zero weather we fired at 9:30 p. m. and left until 6:00 a. m. and everything was O. K.

The boiler has given entire satisfaction. Your boiler is far superior to any we have used, and we are sorry we didn't take out the three smaller boilers sooner and put in the Kroeschell No. 6.

ADAM LAUB & SON.

Hoghsenville, New York.

Your No. 2 boiler is taking care of about 3000 square feet glass; it will certainly take care of 7500 square feet.

We had positively no trouble to keep up temperatures of 60 degrees and 60 degrees in coldest weather. On very cold nights I can leave the fire from 10:00 p. m. to 8:00 a. m.

The boiler has given entire satisfaction. I have personally attended to four other makes of boilers, but none can I recommend as I can yours.

THE KROESCHELL GENERATOR

Cures sluggish circulation. Water travels three to five times faster.

Saves fuel. Prevents boiling over. Water can be heated to 240 degrees without boiling, making it possible to have steam temperatures in your piping if wanted.

Greatly improves systems having long mains and coils. Can be connected to any hot water system, no matter what kind of boiler or piping is used.

Easy to install—simply attach to your present expansion pipe.

I have found your boiler to be first class in every respect and beyond expectations, so you can consider me one of your satisfied customers. After following your heating plans which I installed myself, with the aid of said plans I filled the whole system, started a wood fire and from the time I built the fire until hot water was circulated all around was 20 minutes; it certainly worked fine and so continues.

EDWARD STEELE.

Philadelphia, Pa.

The No. 7 Kroeschell Boiler is heating 10,000 square feet of glass; it would take care of 20,000. We had no trouble whatever in keeping a temperature of 50 to 55 degrees in our Carnation houses and 60 degrees in our Rose houses in the coldest weather.

The Boiler has given excellent satisfaction—it is simply wonderful. We had a steam boiler previous to this, but your improved system has it beat to death in every way.

Your system of piping together with your improved generator system has steam skinned to death in so many ways. We were on the market to

The Kroeschell Boiler

Was installed to Heat Over 9,000,000 Square Feet of Glass During the Past Four Years.

The Kroeschell Boiler

Replaced Over 1,500 Cast Iron Boilers in the Short period of Six Years.

Expressions of the Men who Know:

Kroeschell Boilers Are Not Over-Rated

Our heating system works to perfection. To our surprise the new No. 8 boiler mastered the whole plant, consisting of five houses 20x150. We only deemed it necessary to start our second boiler when the temperature went down to 8 degrees below zero. We had expected to use both boilers in cold weather, but the one boiler did such excellent work that we did not run the two boilers until December 5th when the very cold weather set in.

It was a very easy matter to keep the temperature up in the very coldest weather and stormiest nights.

The five houses have 20,500 square feet of glass, the No. 8 boiler is rated at 16,500 square feet of glass.

MUELLER & SCHROEDER CO., 926 9th St., Milwaukee, Wis.

The Kroeschell Generator

buy high pressure steam but after receiving such reports of your improved hot water system, we concluded that your experience was worth something, and have been delighted at the results, and so glad we took your advice and put in hot water, instead of steam.

W. J. MILLER & SON.

Pontiac, Illinois.

The No. 4 boiler we purchased of you in 1909 has given the very best satisfaction—would wish no better.

Have taken out return tubular boiler this Fall, which used one-half more coal than your present boiler. Your boiler is so easy to regulate that in a few minutes I can run up the temperature by opening drafts.

The flow and return connections with Generator, all work the very best, according to your plans.

We cannot give your boiler enough praise; so far as I have given it a test, my old boiler would not be in it comparing to how much more attention the old one took.

FRANK A. WAGNER.

Tiffin, Ohio.

New Orleans

Gorgeous indeed are the 1910 Easter displays in the florists' establishments, and the owner of the well-filled purse can satisfy his taste to his heart's content.

Chas. Eble's window was an artistic arrangement of Easter Lilies, Hyacinths, Spireas and doves.

At Virgin's there were well flowered Rhododendrons, Hydrangeas, Spireas, Azaleas, and Lily of the Valley, the forcing of which Virgin's grower, R. Eichling, is an expert.

James A. Newsbarn had a fine showing of Azaleas, miniature Hyacinths, Lilies and Spireas. Of course, this establishment would not be considered complete without some Orchids in bloom.

At the Metairie Ridge Nursery Co.'s place were to be seen fine Azaleas, Bougainvilleas, Hydrangeas, and well flowered Wistaria in pots, both white and blue. The writer saw in the Metairie greenhouses the pink—Queen Alexandra

—Marguerite; this is the daintiest thing imaginable in the Daisy line, a pretty blush pink, which opens up visions of wonderful possibilities in the hands of the European hybridist.

C. W. Eichling's special offer for Easter was half standard Baby Rambler Roses, both red and white, and the two colors on one plant together, with a good assortment of seasonal stock.

Frank Faessel on Magazine st. has a very nice display.

Peter Chopin, on Magazine and Eighth sts., has a very tempting assortment.

Frank Rieth has, as usual, his seasonable display.

Home-grown Lilies were rather backward, and those being shipped in were many of them the shortest stemmed Lilies seen in many a year. CRESCENT CITY.

Washington, D.C.

Very bright weather, with temperature ranging near the 70's preceded Easter and had some effect on the home grown stock, otherwise the season was not unlike others of its kind. The warm weather told on all stock on exhibition and rendered the market almost destitute of Violets; those seen were far below the average. Prices on cut flowers and plants were similar to former years. The chief demand was for good small plants ranging at from 50c. to 75c. and for mixed cut flowers.

Outside Jonquils were rushed in from all nearby points, and during the early morning about the market a glut seemed inevitable, but soon signs went up offering two dozen for 25c., and by 5 p.m. they were pretty well cleaned up, irrespective of condition and short stems. Trade grown Jonquils were also abundant, and probably led as the best selling cut flower; these brought 25c. per dozen throughout.

Easter Lilies were not over abundant and, while the supply offered was somewhat above the average of a year ago in length of stem, and many were sold, the tendency is gradually increasing toward other pot plants as mentioned; from 20c. to 25c. per flower was asked by the retailer for pot Lilies while cut ones moved at about \$1.50 per doz.

The preponderance of sales on this class of stock was for church decorations. From four to six-inch pot plants of Asparagus, the various Ferns and the smaller Palms sold better than usual. The better class of trade bought more liberally than customary of pink Azaleas, Lilacs and Rhododendrons. There was a noticeable scarcity of Bougainvilleas this season, and the number of Spireas was above the average. Many large pans of America Beauty Roses, with small Ferns beneath, were offered, but the number of Ramblers was comparatively small. Sweet Peas were just at a point where those from the inside had been shortened in crop and quality by the unseasonable heat, and the outside ones are not yet in. Hyacinths were somewhat scarce, and Tulips, while not in the usual profusion, moved very well. Fruit trees, which usually contribute largely to the Easter decorations, were not yet open enough to serve this purpose.

Gude Bros. & Co. took three first prizes at the recent exhibition in New York on their home grown American Beauty, Wellesley and collection of Teas and Hybrid Teas; also three second prizes on other home grown Roses. It is understood that this firm intends to try and ship some of their Roses to Holland for exhibition in competition with others. They had a fine assortment of specimen plants for Easter, and in their window exhibited a large cross of crumpled satin, decorated with spray Orchids and lavender Rhododendrons, trimmed with ribbon of this shade.

J. H. Small had a unique window decoration of a large Immortelle Easter egg with crushed side, formed of yellow Immortelles and overhung with white Lilac, Snapdragon and Forsythia; beneath these were small rabbits with bows of ribbon. JAS. L. CARRERY.

CONCORD JUNCTION, MASS.—Pansies will soon take up the attention of the force at the establishment of Leonard Cousins, Jr. They wintered better than ever this season. Advance orders now in indicate a larger demand for his "Superb" strain than in any previous year. Geraniums are grown in quantity and shipped to florists everywhere. A general line of other bedding plants, such as Vincas, Heliotropes, Salvias, etc., is grown. They will be in fine shape when needed.

Oswego, N. Y.

The Easter trade this year broke all
records and was 30 per cent. larger than
last year. The florists feel very happy,
as in spite of the severe long Winter the
business done was larger than previous
years. Frequent and large funeral orders
helped out greatly, so there is a good
balance on the right side of the ledger.

Carl Beckstedt has his place in good
shape, and had some good plants of Azal-
cas, Daisies, Cinerarias and a large as-
sortment of bulb stock. His Violets and
Sweet Pens were in good crop and fine.
Much sympathy is felt for him owing to
the serious illness of his wife, but it
is hoped she will soon be restored to good
health.

W. D. Stewart had a magnificent crop
of very fine Carnations, Violets and
Mignonette. His Lillium giganteums and
Cinerarias were good; some pans of
Pansies were very nice.

Walter Workman's place, as usual, was
in the pink of condition, everything in
first-class shape. His bulb stock was
very large and taken altogether was the
best I have seen this year. His Lillium
Harrisii were remarkably good; the Hy-
brid and Baby Rambler Roses were a
fine, well-finished lot; some remarkably
fine Azaleas found a ready sale.

There was no advance in the price of
potted plants. It is hard to say which
variety had the call in pot plants, as
Workman alone had 15,000, and sold out
everything. In cut flowers Violets were
in most demand and the supply was not
equal to it. Beckstedt turned down a
number of orders. Prices for cut flow-
ers were. Roses, Am. Beauty, \$5 to \$12
per doz., others \$2 to \$3; Carnations \$1 to
\$1.50 per doz.; Daffodils, Tulips and

Narcissus, 75c. per doz.; Hyacinths \$3
doz.; Callas and Lilies \$3 doz.
H. Y.

Seattle, Wash.

Although near Easter, cut flowers are
sold at very low prices. A leading firm
is advertising Carnations in the daily
papers for 35 cents per dozen. Crocus,
Tulips, Daffodils and some Spireas are
in full bloom outside and the demand for
greenhouse-grown Easter flowers will
no doubt be very light.

We have had fine clear Spring weather
for about three weeks and some trees
and shrubs are out in full leaf. The
lawns have been mowed everywhere and
a general planting rush is on. The Ex-
position has set a good example in show-
ing the value of hardy perennials and
there is a great demand for plants of
that kind.

Last Sunday the Seattle Times de-
voted two full pages to gardening and
lawnmaking, and thus set a good exam-
ple for other newspapers to follow. The
subjects discussed were the following:
"The Kitchen Garden," "Gardening for
Health and Recreation," "Cactus Dah-
lias," "Rose Culture," and "Beautiful
Gardens on Tide Flats." The whole was
nicely illustrated with reproductions of
photographs procured from Lilly's Seed
Store and Ernest G. Benson.

Benson's Dahlias are selling fast and
this new firm is receiving orders from
visitors to the A. Y. P. Exposition from
all parts of the country.

Arrangements have been made between
the University of Washington and the
City Park Board for an appropriation
of \$10,000, to be expended this year on
the fairgrounds, in order to preserve this
beautiful park. G.

Successors to JENNINGS BROS.

PIPE FRAME HOUSE OF JOHN STEPHENSON & SONS, PHILADELPHIA, PA.

Boiling its description right down to a few words, it reads like this: wide, long, with Guaranteed Wrought Iron Posts imbedded in concrete footings and partly so in the sides—Plate is the L & B Patented, Ice-Clearing one bolted to the post by a strong iron fitting—Bars fastened to plate by Sash Bar Clamps, making a strong, dry joint.

Roof supported by the Giant Arch formed by clamping together the pipe columns, purlins and cross ties.

Purlins firmly bolted to gable rafter by a special iron fitting and secured to the roof bars by metal binding straps.

Bars are held at ridge by Wrought Iron Ridge Brackets.

In other words, it is practically an all Iron Frame House. Next to our Sectional Iron Frame Construction it is the best one to build.

When thinking of building, think of us as doing the building.

Rolker & Son, 18 cases living plants; Rooney & Spence, 1 basket living plants.

European Notes

Although we have a frost nearly every night the conditions continue to be extremely favorable for all outdoor work and Spring sowings proceed apace. As a consequence the seedsmen are up to their eyes in work, and the retail stores are crowded all the time. One very remarkable feature is the continuous demand for Onion seed.

This is the more surprising because the prices realized in the markets by the

"Horseshoe Brand" Products

"NOT HOW CHEAP—
BUT HOW GOOD"

Isn't it worth something just to know that you have bought the best brand of Lily Bulbs that can be procured? Doesn't it rather ease your mind to know that you have potted up bulbs that come from the very best fields in Japan? Don't you think it is better to pay a little more and buy Horseshoe Brand Giganteum for Easter, 1911, than to buy some other brand of doubtful origin?

Horseshoe Brand Giganteum are positively produced from the very choicest seed-bulbs in the world, and are properly planted and cultivated. If they cannot satisfy you nothing can. Write or call.

Union growers are quite unprofitable. So great is the glut of onion bulbs in northern France that the towns and villages in southern England and the suburbs of London are literally infested with the itinerant vendors of this article from Brittany, who are not only a pestiferous nuisance to the British householder but help to still further reduce the demand for home-grown stock. Where these stinking hawkers spend the night with their odorous merchandise it is not well to enquire too closely, especially as we are told that Onions appropriate to themselves any impurities that may be near.

When tariff reform is in the ascendant this is one of the abuses of the right of free entry that must be put away.

It might be supposed from the opening remarks in these notes that all is now well with the seed grower, but while there is a relief from anxiety on account of the weather the difficulties of arranging with the farmers increase every day. One by one the miserable remnants of last season's crops of Mangel and Radish are now being threshed and as a great part of the wretched stuff is absolutely worthless it is small wonder that the farmer seeks some excuse to repudiate contracts already booked for these articles, and it is now too late to place them elsewhere. Even worse is the case with Peas. The heavy losses in picking were an additional discouragement to the growers who during the terrible harvest time had their crops turned over day by day to prevent their being spoiled. Many of these men have grown Peas regularly for thirty or forty years and were relied upon to continue the culture—of course at an advanced price—but at the last moment they are with one accord backing out and the stock Peas that have cost us a pile of money and are not fit to be carried over to next year remain on our hands. As a result surplus offers are very much in evidence and prices are tumbling down all round.

In market seeds the trade in Tares continues very brisk, partly owing to some very heavy orders from your side. The Clover market is quiet; good samples are almost neglected, mainly because there is a large surplus of mid-dling seed that is being offered on very favorable terms. EUROPEAN SEEDS.

American Notes

Trade Still Increasing

The warmer Spring days have added to the already splendid volume of

trade that the seedsmen in every part of the country are doing. Good as every line of horticultural and agricultural business was in March, this month's orders will be even larger; in fact, every indication is that the seed-selling season as a whole will certainly turn out to be the best this country has ever experienced. All conditions favor an enormous seed business. Easter being so early, with every indication of an early Spring, combined with the fact that seed users realize that there is a real shortage of the best stocks in many lines, can only have one result. The past week has seen retail counter sales assume very large proportions, not only for seeds but nursery stock, and plants have been in great demand.

Seed Potatoes are now being shipped extensively, many of the larger dealers reporting that sales in quantity are ahead of last year to date, but as prices average some 75c. to \$1 per barrel less than in 1909, it is too early as yet to estimate the comparative value of the total sales. Onion sets, as always, are in brisk demand; these also, like seed Potatoes, are selling somewhat under last season's rates. At the present time white sets are worth \$2.75, and red and yellow sets, \$2.35 per bushel in round lots. It was noted last week that the amount of nursery stock being sold by the seedsmen never was larger than this season; in fact, many of the seed houses, who before have done little in this line, have organized special departments for the sale of nursery stock and plants.

Detroit Dark Red Turnip Beet

Beet is a very important seed; and while no seed stock can be considered complete without a generous supply of it, still most dealers do not wish to keep on hand a full line of the innumerable sorts carried by the seedsmen. Where only a few varieties of Beet seed are kept in stock, the Detroit Dark Red Turnip Beet will be found an invaluable sort. Extended experience has shown this variety to be one of the best deep red Turnip Beets, not only for market gardeners but for the home garden as well. Its small upright growing tops, early maturing, and the splendid shape, as well as the dark color of the roots, make it liked by all and suitable for all purposes. It is equally good for early or late sowings. Get an ample supply of this variety, if it is only intended to keep one kind of Beet seed in stock, and customers will be few, in a retail way especially, that cannot be satisfied.

Bulb Mixtures

The next six weeks to two months will be the very height of the season for the sale of Spring bulbs. From inquiries received in the last few days many dealers who do considerable in seeds seem to be loath to take up bulbs, for the reason, as one writes, "the named varieties run into money so fast." It seems opportune to remind those dealers who have not as yet kept bulbs but would like to do so, that it is not necessary at first to carry in stock any named varieties whatever, as good mixtures are what the majority of retail purchasers require. For example, in Gladioli bulbs a mixture that can be sold for 40c. or 50c. a dozen will be found a good leader, and so right through the list. A dealer should put into stock good but inexpensive mixtures as far as possible, and he will be much pleased with the lucrative retail business Spring bulbs will bring in connection with seed sales. The principal sellers at retail in Spring bulbs are Gladioli, Cannas, Dahlias and Tuberoses. There are, of course, many other sorts but these are ones mostly called for.

April 9, 1910

New York Seed Trade

The warmer days have brought an unprecedented rush of orders, even for April. Our seedsmen are all agreed that never has the month been busier. It is needless to select any special line for particular comment as everything that seedsmen sell is in demand. We are certainly as busy as we were two weeks later last year.

The location of Vaughan's Seed Store, at 25 Barclay st., is certainly proving most desirable for retail business. There is plenty of sidewalk room that can be used for display purposes as well as prominent show windows. The combination is a most happy one and attracts crowds of purchasers. The firm is making a fine display this week of Pansy plants, a full line of nursery stock and vegetable plants, all of which can be instantly delivered.

The Stump & Walter Co. has started this week its sales of early Cabbage, Lettuce, Cauliflower and other vegetable plants. They are also making a particularly fine display of Spring bulbs. Every line of the seed trade here is most active.

S. D. Woodruff & Sons report sales of seed Potatoes and Onion sets much ahead of a year ago. The leading sorts of seed Potatoes such as Irish Cobblers, Early Rose, Early Beauty of Hebron, were this week \$2.50 to \$2.75 per barrel; with Green Mountains \$2.25 per barrel. Regarding Onion sets, the best whites are \$2.75; red and yellow sets are \$2.35 per bushel.

At Boddington's great activity is manifest; his special offers of Roses have brought many orders. This week the new Kenia Palm seed has arrived from Australia. Sales of Spring bulbs with this house exceed those of any previous season, particularly in Cannas.

Alexander Dallas of Waterbury, Conn., was among our visitors this week. Mr. Dallas reports that every line of the florists' business is most active in his city. All over town, little stands where seeds, bulbs, nursery stock and plants are being sold, have sprung up like mushrooms, particularly in the downtown district.

Burnett Bros. still continue to handle a large amount of nursery stock. This seems to be quite a feature with this firm.

Rickards Bros. report their retail counter business as far ahead of any previous year at this time.

All our seedsmen have greatly increased their sales lately of the new insecticide Aphine, made by the Aphine Manufacturing Company of Madison, New Jersey. This insecticide, while only on the market a short time, has already made its way as one of the best sellers in this line with the seedsmen.

Peter Henderson & Co. have a very complete assortment of vegetable plants. So well known are they for this particular specialty that their sales along this line seem to be ever on the increase.

Weeber & Don are particularly pleased with the much increased volume of Sweet Pea sales this season.

Every seedsmen in New York could certainly use more efficient help, if the same could be obtained; the demand for trained seedsmen is certainly far ahead of the supply at the present time.

J. M. Thorburn & Co. are particularly busy in the flower seed line, among the varieties in which their new Eschscholtzia Thorburni has made very satisfactory sales, both at wholesale and retail.

C. McTaggart is disposing of both nursery stock and vegetable plants in goodly quantities. Mr. McTaggart, in common with the rest of the seedsmen, has been experiencing much difficulty in obtaining skilled help to handle the rush.

Philadelphia Seed Trade

A continuance of the same weather conditions which existed during March, with even a higher temperature, and a light warm rain of short duration, has brought about an unprecedented sale of all seeds used for Spring planting. The counter trade at the seed stores is very large, as is also the mail order business. At many stores work is going on five nights a week and, notwithstanding, it is impossible to keep up with the steadily increasing orders. Vegetable and flower roots and bulbs of every kind are displayed, and the quality, too, is all right.

Johnson Seed Co. is doing a large business in Cyrene stems and Tuberoses, and the sale of Aster seed still continues very large. The sale of spray pumps in all sizes is rapidly increasing.

The Stokes Seed Co. is already displaying lawn mowers. They are offer-

THE AMERICAN CARNATION

Price \$2.50

A. T. DE LA MARE PTG & PUB CO. LTD

ing Cabbage plants and a full line of field and garden seeds and all seasonable roots and bulbs.

The Moore Seed Co. is carrying a very large line of both American and imported garden tools. This house is now offering a new crop of greenhouse grown *Asparagus plumosus nanus* seeds.

At Henry A. Dreer's the display of Lawn Grass seeds is still a feature, and a very full line of lawn mowers is now shown.

Henry A. Michell Co.'s store still continues crowded with buyers. The house is offering some remarkably good Lily bulbs of the following varieties: Auratum, rubrum, album, tigrinum, ismene, and large clumps of hardy Lily of the Valley.

As far as can be learned, never in the history of the American seed business were the sales so heavy at this season of the year, nor the outlook for the remainder of the season more promising.

As remarked in our last letter, some shortages are already rumored, among them one in extra early red Valentine Beans.

OCONOMOWOC, WIS.—Louis Johnson & Son have purchased the seed business of C. H. Jackson.

WINDSOR, ONT.—The large building here occupied by D. M. Ferry & Co. as a seed warehouse, was recently gutted by fire, entailing a loss of \$200,000. The firm is making an addition to its Detroit seed house, to cost \$70,000.

AUGUSTA, GA.—The N. L. Willet Seed Co. has made a substantial increase in its capital stock. Neeley Ransom, who was connected with the store, has bought the stock and is now closely identified with the management of the business.

Amended Seed Bill

We present the text of the Callan Seed Bill, as amended, and now on the order of its second reading in the Assembly of New York State.

Sec. 340. Inspection and sale of seeds.—Within the meaning of this article "agricultural seeds" are defined as the seeds of Alfalfa, Barley, Canadian blue grass, Kentucky blue grass, Brome (awnless) grass, Buckwheat, Alsike Clover, crimson Clover, red Clover, white Clover, field Corn, Kaffir Corn, meadow Fescue, Flax, Millet, Oats, Orchard grass, Rape, red top Rye, Sorghum, Timothy and Wheat which are to be used for sowing or seeding purposes. No person shall sell, offer, expose or have in his possession for sale for the purposes of seeding, any seeds or cereals, grasses, Clovers of the class known as agricultural seeds in quantities exceeding ten pounds, unless every receptacle, package, sack or bag containing such seeds, or a label securely attached thereto or enclosed therein, is marked in a plain indelible manner as follows; and said marks shall be on the receptacle, package, sack or bag itself if there is more than ten per centum of injurious foreign seed:

a. With the full name and address of the seller.

b. With the name of the kind or kinds of seeds, except in the case of mixtures prepared for special purposes, when so labeled, and the name of any foreign injurious seeds present to the extent of five per centum or over by count and

the name and per centum of the following adulterants, if present, which adulterants shall not be taken into consideration when estimating the five per centum hereinbefore referred to: Yellow Trefoil in red Clover; yellow Trefoil, burr Clover, sweet Clover or Dodder, in Alfalfa; Canadian blue grass in Kentucky blue grass; Meadow Fescue or Rye grass in Orchard grass; yellow Trefoil in alsike Clover.

c. With the claimed per centum of purity of the sample by count which shall be not more than five above the per centum determined by official examination.

Sec. 341.—Samples, publication of results of examinations.—Samples of seed shall be taken in duplicate, both samples to be sealed promptly and one to be tendered and, if accepted, to be delivered at the time of taking to the person apparently in charge and a receipt taken therefor, unless refused. The commissioner of agriculture is hereby authorized to publish from time to time the results of seed examination, together with the names and addresses of dealers from whom the samples examined were taken.

Sec. 342. Provisions concerning actions.—No action shall be maintained for a violation of any of the provisions of this article if the seed was not sold or exposed for sale; nor shall any such action or any action for the breach of a legal duty or obligation in the sale of agricultural seeds be maintained by the buyer against the seller unless such action is commenced within a reasonable time after the sale and before the sowing or other use of the seeds, nor unless the claim or claims of such buyer are based upon properly drawn samples of such seed from the bulk thereof.

This act shall take effect July first, nineteen hundred and ten.

Canadian Reciprocity

The reduction of duty on articles going into Canada from the United States, under the recent tariff arrangements, affects natural cut flowers, Palms, Pepper plants and Tomato plants.

DREER SPECIALS IN HARDY PERENNIALS

Japanese Anemone.

ANEMONE JAPONICA. Many thousands of well-established pot plants. Japonica Alba. Large snowy white. Doz. 85c., 100 \$6.00. Japonica Rubra. Beautiful rosy red. Doz. 85c., 100 \$6.00. Elegantesima. Semi-double satiny-rose. Doz. \$1.25, 100 \$8.00. Prince Henry. Large double, deep pink. Doz. \$1.25, 100 \$8.00. Queen Charlotte. Very large silvery pink. Doz. 85c., 100 \$6.00. Rosea Superba. Delicate silvery rose. Doz. 85c., 100 \$6.00. Whirlwind. Large semi-double, pure white. Doz. 85c., 100 \$6.00.

ACHILLEA, BOULE DE NEIGE. A decided improvement over "The Pearl," with flowers one-half larger; a valuable cut flower. Doz. 2.00, 100 \$16.00.

ANCHUSA ITALICA, DROPMORE VARIETY (Improved Italian Alkaner). One of the showiest and most useful plants for the mixed border or for planting between shrubbery that we know of; the plant grows from 6 to 8 feet high, producing throughout the season large but graceful spikes of beautiful blue flowers. Doz. \$1.60, 100 \$10.00.

AQUILEGIAS. A splendid stock of the popular Columbine. All the leading varieties in strong plants. Doz. 85c., 100 \$6.00.

ARTEMISIA LACTIFLORA. A new plant, an introduction from China, grows 3 to 4 ft. high, with elegant dark green cut foliage and large spikes of graceful, creamy white, Spiraea-like, light and graceful flowers. Strong plants 30c. each, doz. \$3.

HARDY ASTER GRANDIFLORUS. The latest of all to bloom, frequently being in good condition as late as Thanksgiving Day; flowers large, of a dark bluish violet; always attracts attention in our grounds, being the last plant in flower. Strong plants 2.00 per doz., 100 \$16.00.

ASTILBE ARENDII, CERES AND SILVER WHITE. These are the result of crossings between Astilbe Davidii, Japonica compacta, Astilboides and Thunbergii. They are of strong, robust habit, growing from 2½ to 3 ft. high, in much branched panicles; the former with light rose colored flowers, the latter with silvery white flowers. Excellent subject for a semi-shaded moist position. Each 60c., doz. \$6.00.

ASTILBE GRANDIS. An introduction from China, growing from 5 to 6 ft. high; the panicles of white flowers range from 2 to 2½ ft. in length. Each 35c., doz. \$3.50.

DELPHINIUM BELLADONNA. The freest flowering of all the Delphiniums and the most valuable of any variety for cutting. Its beautiful turquoise-blue flowers appeal to all who see it. Plant these early and you will have a continuous display of bloom from June until freezing weather. We offer an exceptionally fine lot of extra heavy one-year-old plants. Doz. 2.00, 100 \$16.00, 1000 \$125.00.

DELPHINIUM, DREER'S GOLD MEDAL HYBRIDS. Unquestionably the finest strain of mixed hybrids ever offered, being seedlings of one of the best named collections and containing some wonderful varieties. Strong one-year-old plants. Doz. \$1.25, 100 \$9.00, 1000 \$76.00.

DELPHINIUM FORMOSUM. A splendid strain of this favorite and popular dark blue variety. Doz. 85c., 100 \$6.00, 1000 \$50.00.

GYSOPHILA PANICULATA FLORE PLENA. We consider this one of the most valuable Summer cut flowers we have a plant which is destined to become one of the most important subjects for cutting. Strong plants, doz. \$2.00, 100 \$16.00.

HELENIUM, RIVERTON GEM AND RIVERTON BEAUTY. Two splendid perennials of our own origin, the former having flowers of old gold color suffused with terra cotta, changing as they mature to a wall flower red; the latter a pure lemon color with a large disc of purplish black. Doz. \$1.60, 100 \$10.00.

HEMEROCALIS AURANTIACA, AURANTIACA MAJOR AND FLORIAM. These are the three handsomest forms of the Day Lily, with very large trumpet-shaped yellow flowers. Doz. \$1.60, 100 \$10.00.

HEUCHERA, FIVE NEW VARIETIES. Fanciful. Sulphur yellow, tinted green; tips of petals bronzy red. Grenade. Bright red, tinted carmine; very vigorous. Pluie de Feu. Bright raspberry-red; very free.

Profusion. Ivory white. Virginal. Large creamy white. Each 35c., doz. \$3.50.

BEAUTIFUL PALLIDA IRIS.

Pallida Dalmatica. One of the finest of the Germanica type. The plant is of strong habit, growing 4 feet high, with exceptionally large flowers, the standards of a fine lavender, the falls lavender shaded blue; fine for massing. 15c. each, \$1.50 per doz., \$10.00 per 100.

Pallida Dalmatica Folia Variegata. A variety of above, with the foliage strikingly and conspicuously variegated, with broad bands of creamy-yellow. 35c. each; \$3.50 per dozen.

Pallida Dalmatica Folia Argentea Variegata. Identical with the foregoing, except that the variegation instead of being yellow is of a silver white; very pretty. 50c. each, \$5.00 per doz.

IRIS SIBIRICA ORIENTALIS, Blue and White. These are among the freest flowering Iris grown; they come into bloom just ahead of the Iris Kaempferi, succeeding on dry or wet ground, are very effective as subjects for the garden and useful for cutting. Strong plants, \$1.00 per doz., \$7.00 per 100, \$60.00 per 1000.

IRIS INTERREGNA.

(Introductions of Goos & Koenemann) An interesting new type of Iris, the result of crossing Iris Germanica with I. Pumila Hybrida, and for which there promises to be a great future. They flower earlier in the season than the German Iris, and while the flowers are of the most approved and perfect form, they also combine large size with the most beautiful and decided clear colors. The foliage is dwarf and healthy, holding its freshness throughout the season; the flower stems which are about 18 inches high, hold the flowers well above the foliage.

The entire flower is of a pure creamy yellow, of absolutely perfect form. Helge. Light citron yellow with pearl colored center, a beautiful soft color. Ingeborg. Both standards and falls are pure white; the flowers are 9 in. deep and have petals 2 in. wide; a grand perfect flower.

Wallballa. Standards rosy lavender, falls claret red; a most distinct and beautifully formed flower. Price: Each 60c., doz. \$5.00; the set of 4 varieties for \$1.75.

Gypsophila paniculata fl. pl.

IRIS PUMILA HYBRIDA, THE BRIDE. This is without question the prettiest dwarf white Iris yet introduced. The flowers which are of ideal form, on first opening are of a creamy white color, changing to pure white as they mature. They are produced on stems from 10 to 12 ins. high, which appear in great profusion early in May. Each 25c., doz. \$2.50, 100 \$18.00.

TWO HANDSOME NEW LUPINUS

Polyphyllas Moerhelmi. The most beautiful variety yet introduced; a combination of light and dark shades of pink difficult to describe and without a trace of magenta. Each 35c., doz. \$3.50, 100 \$26.00. **Polyphyllus Roseus.** A decided improvement on the old variety, immense spikes of showy rosy pink flowers; a desirable acquisition. Each 20c., doz. \$2.00, 100 \$15.00.

PHLOX DIVARICATA LAPHAMI (Perry's Variety). A wonderfully improved form of the popular Phlox Divaricata, of more robust habit, larger flowers and of a more intense color. Doz. \$1.60, 100 \$10.00.

Lupinus Moerhelmi.

THREE FINE NEW HARDY PHLOX

Selected from a collection of over fifty new varieties of the past two seasons; distinct from all other sorts.

Elizabeth Campbell. Bright salmon-pink with lighter shading and dark crimson eye; an entirely new and much wanted shade in Phlox.

Frau Anton Bachner. The finest white yet introduced, largest truss as well as individual flower; of dwarf habit.

Rosenberg. Bright reddish violet with blood-red eye; individual flower as large as a silver dollar.

Each 35c., doz. \$4.00; one each of the 3 varieties for \$1.00.

PRIMULA CORTUSOIDES

SIEBOLDI. This Japanese Primrose is not so well known as it deserves, it is not only valuable for the hardy border but will also find ready sale as a pot plant for the window. We offer six distinct varieties, varying from the purest white to deepest rose. Doz. \$1.60, 100 \$10.00.

RUBECKIA, RAYS OF GOLD. An improved form of the popular Golden Glow with which it is identical, excepting that it has narrower petals and a fuller center, it is really a refined form of the old variety. Doz. \$1.00, 100 \$7.00.

Anchusa Italica, Dropmore Variety.

PYRETHRUM HYBRIDUM FLORE PLENA.

A fine lot of strong plants in 5-in. pots. Double white, pink and crimson. Doz. \$2.50, 100 \$18.00.

Choice mixed seedlings, 3-in. pots, doz. \$1.00, 100 \$7.00.

SEDUM SPECTABILIS, BRILLIANT. Originated with us as a sport from the variety atropurpurea, and is by far the richest colored variety yet introduced, being a bright shade of amaranth-red or dark crimson. Strong plants, doz. \$1.60, 100 \$10.00.

STOKESIA CYANEA, BLUE AND WHITE. Strong pot grown plants, 4-in. pots. Doz. 85c., 100 \$6.00.

SWEET WILLIAM, SUTTON'S GIANT WHITE. Immense trusses of large pure white flowers; splendid for cutting; strong 4-in. pots. Doz. 85c., 100 \$6.00.

TRITOMA FITZGERI. A splendid lot of strong plants. Doz. \$1.25, 100 \$8.00, 1000 \$75.00.

SIX CHOICE NEW TROLLIUS. Goldquelle. Large globular golden yellow. Götterfunke. Large, open orange yellow flowers.

Helios. Very free flowering, pure yellow, on strong-branched stems.

Leuchtkugel. One of the finest deep orange red.

Leichtball. Large, globular orange-yellow flowers on stiff stems.

Salomander. Soft orange colored flowers of globular form. Ea. 25c., doz. \$2.50; the set of six for \$1.25.
